NET OPERATING INCOME IN 1918 AND STANDARD RETURN.

The "standard return" is approximately the average net operating income for the three years ending June 30, 1917, used as the basis for the rentals to be paid by the government for the use of the railway property. According to a table compiled by the bureau of railway economics, comparing the net operating income for 1918 with the standard return, 119 railroads out of a list of 184 Class 1 roads under federal control earned less than the amount of their standard return, while sixty-five roads earned net operating income greater than their standard return and so contributed some $80,000,000 toward making up the deficiency in meeting the standard return of the other roads, although the net result was a deficiency for all Class 1 roads of $202,135,602 as compared with the standard return for those roads of $890,335,685.

First Six Months of 1919.

In the first six months of 1919 the Class 1 railroads under federal control earned 39.8 per cent of their standard return as compared with 38.4 per cent during the first half of 1918. The net federal income for the six months was $156,827,416, as compared with $151,319,830 in the first half of 1918 and as compared with the standard return for this period of $393,975,779. The central western region came nearer earning its standard return than the others, but its percentage was only 63.1.

CHRISTIAN SCIENCE CHURCH.

The Christian Science church was founded in 1879 by Mary Baker Eddy, the discoverer of Christian Science and author of its textbook, "Science and Health with Key to the Scriptures." The church was organized to "commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Church Manual). Its proper name is The First Church of Christ, Scientist, in Boston, Mass. It is also known as The Mother Church. The present officers of The Mother Church are:

President—John W. Doorley.
Clerk—Charles E. Jarvis.
Treasurer—Edward L. Ripley.
Directors—Adam H. Dickey, James A. Neal, Edward A. Merritt, William R. Rathvon, Annie M. Knott.

All Christian Science churches and societies in the United States and in foreign countries are branches of The Mother Church. Lesson-sermons compiled from the bible and "Science and Health with Key to the Scriptures," by Mrs. Eddy, are read at the services in Christian Science churches.

The Christian Science Journal, Sentinel, Quarterly, Der Herold der Christian Science, Le Heraut de Christian Science and The Christian Science Monitor (an international daily newspaper) are published by The Christian Science Publishing society in Boston.

There is maintained by the Christian Science church an official board of lectureship designed to furnish the public correct information concerning the fundamental teachings of Christian Science. Lectures given by members of this board are free to the public.

CHURCHES AND CHURCH PROPERTY.

According to the census of 1916 the total number of church edifices in the United States was 203,432 as against 192,705 in 1906. Only a building owned and used by a denomination for church purposes is included in the term church edifice. The Methodist Episcopal church had 28,406 such buildings in 1916 and ranked first in this respect. The Methodist denomination as a whole had 61,467 churches.

Following is a table showing the number of churches owned by the leading denominations in 1916, with the value of the church property of each:

Denomination.	Churches.	Property.
All denominations	203,432	$1,676,600,582

AMERICAN LIBRARY ASSOCIATION.

Organized 1876.

Object: To promote the welfare of libraries in America and secure public library service for all Americans everywhere.

President—Chalmers Hadley, Denver Public library, Denver, Col.

First Vice-President—George H. Locke, Public library, Toronto, Canada.

Second Vice-President—Cornelia Marvin, Oregon State library, Salem, Ore.

Secretary—George B. Utley, 78 East Washington street, Chicago, Ill.

Association Headquarters—78 East Washington street, Chicago, Ill.

Membership 4,000.

The association provided library service for the army, navy and marine corps during the war. Dr. Herbert Putnam, librarian of congress, was general director of this service. This library work was taken over in November, 1919, by the war and navy departments. The association is continuing to provide library service for the coast guard and lighthouse service, United States public health service hospitals and United States shipping board and other merchant marine vessels. These activities are included in an enlarged program which is aiming also to provide library service for all districts and communities lacking in library facilities. Carl H. Milam is general director of the enlarged program. The association assists in the organizing of libraries in states lacking library extension agencies; publishes books and pamphlets on library work, selection of books, etc. and serves as a clearing house for general library information.

ROCKEFELLER FUND FOR MEDICAL EDUCATION.

John D. Rockefeller gave to the general education board on Sept. 26, 1919, the sum of $20,000,000 to be used for the improvement of medical education in the United States. The board announced the gift in New York city on the date named as follows:

"The general education board announces the gift from John D. Rockefeller of $20,000,000, the income to be currently used, and the entire principal to be distributed within fifty years for the improvement of medical education in the United States."

Abraham Flexner, secretary of the board, said the entire sum, principal and interest, would be devoted to the upbuilding of medical schools, since such was the desire of the donor. In other words, none of the money will go to educational propaganda, but all of it will be expended directly and practically. Asked what preliminary work would be undertaken before the distribution of the $20,000,000 was started, Mr. Flexner said there would be a general survey of the schools of the country which would determine not only which ones could be improved to the general good of the country but also what were the specific needs in each instance.

CONSTITUTION OF THE UNITED STATES.

September 17, 1787.

PREAMBLE. We, the people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this constitution for the United States of America:

ARTICLE I.

Section I. All legislative powers herein granted shall be vested in a congress of the United States, which shall consist of a senate and house of representatives.

Sec. II. 1. The house of representatives shall be composed of members chosen every second year by the people of the several states, and the electors in each state shall have the qualifications requisite for electors of the most numerous branch of the state legislature.

2. No person shall be a representative who shall not have attained to the age of 25 years and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that state in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several states which may be included within this union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of representatives shall not exceed one for every 30,000, but each state shall have at least one representative, and until such enumeration shall be made the state of New Hampshire shall be entitled to choose three; Massachusetts, eight; Rhode Island and Providence Plantations, one; Connecticut, five; New York, six; New Jersey, four; Pennsylvania, eight; Delaware, one; Maryland, six; Virginia, ten; North Carolina, five; South Carolina, five, and Georgia, three.

4. When vacancies happen in the representation from any state the executive authority thereof shall issue writs of election to fill such vacancies.

5. The house of representatives shall choose their speaker and other officers and shall have the sole power of impeachment.

Sec. III. 1. The senate of the United States shall be composed of two senators from each state, chosen by the legislature thereof, for six years, and each senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election they shall be divided, as equally as may be, into three classes. The seats of the senators of the first class shall be vacated at the expiration of the second year; of the second class, at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year, and if vacancies happen by resignation or otherwise, during the recess of the legislature of any state, the executive thereof may make temporary appointments until the next meeting of the legislature, which shall then fill such vacancies.

3. No person shall be a senator who shall not have attained the age of 30 years and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that state for which he shall be chosen.

4. The vice-president of the United States shall be president of the senate, but shall have no vote unless they be equally divided.

5. The senate shall choose their other officers and also a president pro tempore in the absence of the vice-president or when he shall exercise the office of president of the United States.

6. The senate shall have the sole power to try all impeachments. When sitting for that purpose they shall be on oath or affirmation. When the president of the United States is tried the chief justice shall preside, and no person shall be convicted without the concurrence of two-thirds of the members present.

7. Judgment, in cases of impeachment, shall not extend further than to removal from office and disqualification to hold and enjoy any office of honor, trust or profit under the United States, but the party convicted shall, nevertheless, be liable and subject to indictment, trial, judgment and punishment according to law.

Sec. IV. 1. The times, places and manner of holding elections for senators and representatives shall be prescribed in each state by the legislature thereof, but the congress may at any time, by law, make or alter such regulations, except as to the places of choosing senators.

2. The congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall, by law, appoint a different day.

Sec. V. 1. Each house shall be the judge of the elections, returns and qualifications of its own members, and a majority of each shall constitute a quorum to do business, but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner and under such penalties as each house may provide.

2. Each house may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

3. Each house shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may, in their judgment, require secrecy; and the yeas and nays of the members of either house, on any question, shall, at the desire of one-fifth of those present, be entered on the journal.

4. Neither house, during the session of congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two houses shall be sitting.

Sec. VI. 1. The senators and representatives shall receive a compensation for their services, to be ascertained by law and paid out of the treasury of the United States. They shall, in all cases, except treason, felony and breach of the peace, be privileged from arrest during their attendance at the session of their respective houses and in going to or returning from the same, and for any speech or debate in either house they shall not be questioned in any other place.

2. No senator or representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased, during such time, and no person holding any office under the United States shall be a member of either house during his continuance in office.

Sec. VII. 1. All bills for raising a revenue shall originate in the house of representatives, but the senate may propose or concur with amendments, as on other bills.

2. Every bill which shall have passed the house of representatives and the senate shall, before it becomes a law, be presented to the president of the United States; if he approve, he shall sign it, but if not, he shall return it,

with his objections, to that house in which it shall have originated, who shall enter the objections at large on their journal and proceed to reconsider it. If, after such reconsideration, two-thirds of that house shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved by two-thirds of that house it shall become a law. But in all such cases the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the president within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the congress, by their adjournment, prevent its return, in which case it shall not be a law.

3. Every order, resolution or vote to which the concurrence of the senate and house of representatives may be necessary (except on a question of adjournment) shall be presented to the president of the United States, and before the same shall take effect shall be approved by him, or, being disapproved by him, shall be repassed by two-thirds of the senate and house of representatives, according to the rules and limitations prescribed in case of a bill.

Sec. VIII. The congress shall have power—

1. To lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defense and general welfare of the United States, but all duties, imposts and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations and among the several states and with the Indian tribes.

4. To establish a uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish postoffices and postroads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme court. To define and punish piracies and felonies committed on the high seas and offenses against the law of nations.

10. To declare war, grant letters of marque and reprisal and make rules concerning captures on land and water.

11. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

12. To provide and maintain a navy.

13. To make rules for the government and regulation of the land and naval forces.

14. To provide for calling forth the militia to execute the laws of the union, suppress insurrections and repel invasions.

15. To provide for organizing, arming and disciplining the militia and for governing such part of them as may be employed in the service of the United States, reserving to the states respectively the appointment of the officers and the authority of training the militia according to the discipline prescribed by congress.

16. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular states and the acceptance of congress, become the seat of government of the United States, and to exercise like authority over all places purchased, by the consent of the legislature of the state in which the same shall be, for the erection of forts, magazines, arsenals, dockyards and all other needful buildings; and,

17. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this constitution in the government of the United States or in any department or officer thereof.

Sec. IX. 1. The migration or importation of such persons as any of the states now existing shall think proper to admit shall not be prohibited by the congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding $10 for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it.

3. No bill of attainder or ex post facto law shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any state. No preference shall be given, by any regulation of commerce or revenue, to the ports of one state over those of another; nor shall vessels bound to or from one state be obliged to enter, clear or pay duties in another.

6. No money shall be drawn from the treasury but in consequence of appropriations made by law, and a regular statement and account of receipts and expenditures of all public money shall be published from time to time.

7. No title of nobility shall be granted by the United States, and no person holding any office of profit or trust under them shall, without the consent of congress, accept of any present, emolument, office or title of any kind whatever from any king, prince or foreign state.

Sec. X. 1. No state shall enter into any treaty, alliance or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make anything but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No state shall, without the consent of the congress, lay any imposts or duties on imports or exports except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts laid by any state on imports or exports shall be for the use of the treasury of the United States, and all such laws shall be subject to the revision and control of the congress. No state shall, without the consent of congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another state or with a foreign power or engage in war, unless actually invaded or in such imminent danger as will not admit of delay.

ARTICLE II.

Section I. 1. The executive power shall be vested in a president of the United States of America. He shall hold his office during the term of four years, and together with the vice-president, chosen for the same term, be elected as follows:

2. Each state shall appoint, in such manner as the legislature thereof may direct, a number of electors, equal to the whole number of senators and representatives to which the state may be entitled in the congress, but no senator or representative or person holding an office of trust or profit under the United States shall be appointed an elector.

3. The electors shall meet in their respective

states and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same state with themselves. And they shall make a list of all the persons voted for and of the number of votes for each, which list they shall sign and certify and transmit sealed to the seat of government of the United States, directed to the president of the senate. The president of the senate shall, in the presence of the senate and house of representatives, open all the certificates and the votes shall then be counted. The person having the greatest number of votes shall be the president, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority and have an equal number of votes, then the house of representatives shall immediately choose, by ballot, one of them for president; and if no person have a majority, then from the five highest on the list the said house shall, in like manner, choose the president. But in choosing the president the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. In every case after the choice of the president the person having the greatest number of votes of the electors shall be the vice-president. But if there should remain two or more who have equal votes the senate shall choose from them, by ballot, the vice-president. [The foregoing provisions were changed by the 12th amendment.]

4. The congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

5. No person except a natural-born citizen or a citizen of the United States at the time of the adoption of this constitution shall be eligible to the office of president; neither shall any person be eligible to that office who shall not have attained to the age of 35 years and been fourteen years a resident within the United States.

6. In case of the removal of the president from office or of his death, resignation or inability to discharge the powers and duties of the said office, the same shall devolve on the vice-president; and the congress may, by law, provide for the case of removal, death, resignation or inability both of the president and vice-president, declaring what officer shall then act as president, and such officer shall act accordingly, until the disability be removed or a president shall be elected.

7. The president shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States or any of them.

8. Before he enters on the execution of his office he shall take the following oath or affirmation:

I do solemnly swear (or affirm) that I will faithfully execute the office of president of the United States, and will, to the best of my ability, preserve, protect and defend the constitution of the United States.

Sec. II. 1. The president shall be commander in chief of the army and navy of the United States and of the militia of the several states when called into the actual service of the United States. He may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have the power to grant reprieves and pardons for offenses against the United States except in cases of impeachment.

2. He shall have power, by and with the advice and consent of the senate, to make treaties, provided two-thirds of the senators present concur, and he shall nominate, and, by and with the advice and consent of the senate, shall appoint ambassadors, other public ministers and consuls, judges of the Supreme court and all other officers of the United States whose appointments are not herein otherwise provided for and which shall be established by law. But the congress may, by law, vest the appointment of such inferior officers as they shall think proper in the president alone, in the courts of law or in the heads of departments.

3. The president shall have power to fill up all vacancies that may happen during the recess of the senate by granting commissions, which shall expire at the end of their next session.

Sec. III. He shall, from time to time, give to the congress information of the state of the union and recommend to their consideration such measures as he shall judge necessary and expedient. He may, on extraordinary occasions, convene both houses or either of them, and in case of disagreement between them, with respect to the time of adjournment, he may adjourn them to such time as he shall think proper. He shall receive ambassadors and other public ministers. He shall take care that the laws be faithfully executed, and shall commission all officers of the United States.

Sec. IV. The president, vice-president and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery or other high crimes and misdemeanors.

ARTICLE III.

Section I. The judicial power of the United States shall be vested in one Supreme court and in such inferior courts as the congress may, from time to time, ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall, at stated times, receive for their services a compensation which shall not be diminished during their continuance in office.

Sec. II. 1. The judicial power shall extend to all cases, in law and equity, arising under this constitution, the laws of the United States and treaties made or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more states; between a state and citizens of another state; between citizens of different states; between citizens of the same state claiming lands under grants of different states, and between a state or the citizens thereof and foreign states, citizens or subjects.

2. In all cases affecting ambassadors, other public ministers and consuls and those in which a state shall be a party the Supreme court shall have original jurisdiction. In all the other cases before mentioned the Supreme court shall have appellate jurisdiction, both as to law and fact, with such exceptions and under such regulations as the congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trials shall be held in the state where the said crimes shall have been committed, but when not committed within any state the trial shall be at such place or places as the congress may by law have directed.

Sec. III. 1. Treason against the United States shall consist only in levying war against them or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act or on confession in open court.

2. The congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attainted.

ARTICLE IV.

Section I. Full faith and credit shall be given in each state to the public acts, records and judicial proceedings of every other state. And the congress may, by general laws, prescribe the manner in which such acts, records and proceedings shall be proved and the effect thereof.

Sec. II. 1. The citizens of each state shall be entitled to all privileges and immunities of citizens in the several states.

2. A person charged in any state with treason, felony or other crime, who shall flee from justice and be found in another state, shall, on demand of the executive authority of the state from which he fled, be delivered up, to be removed to the state having jurisdiction of the crime.

3. No person held to service or labor in one state under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

Sec. III. 1. New states may be admitted by the congress of this union, but no new state shall be formed or erected within the jurisdiction of any other state, nor any state be formed by the junction of two or more states or parts of states, without the consent of the legislatures of the states concerned as well as of the congress.

2. The congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States, and nothing in this constitution shall be so construed as to prejudice any claims of the United States or of any particular state.

Sec. IV. The United States shall guarantee to every state in this union a republican form of government, and shall protect each of them against invasion, and on application of the legislature or of the executive (when the legislature cannot be convened) against domestic violence.

ARTICLE V.

The congress, whenever two-thirds of both houses shall deem it necessary, shall propose amendments to this constitution, or, on the application of the legislatures of two-thirds of the several states, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes as part of this constitution when ratified by the legislatures of three-fourths of the several states or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the congress; provided, that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the ninth section of the first article, and that no state, without its consent, shall be deprived of its equal suffrage in the senate.

ARTICLE VI.

Section I. 1. All debts contracted and engagements entered into before the adoption of this constitution shall be as valid against the United States under this constitution as under the confederation.

2. This constitution and the laws of the United States which shall be made in pursuance thereof, and all treaties made or which shall be made under authority of the United States, shall be the supreme law of the land, and the judges in every state shall be bound thereby, anything in the constitution or laws of any state to the contrary notwithstanding.

3. The senators and representatives before mentioned and the members of the several state legislatures and all executive and judicial officers, both of the United States and of the several states, shall be bound, by oath or affirmation, to support this constitution, but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

The ratification of the conventions of nine states shall be sufficient for the establishment of this constituion between the states so ratifying the same.

Done in convention, by the unanimous consent of the states present, the seventeenth day of September, in the year of our Lord one thousand seven hundred and eighty-seven, and of the independence of the United States of America the twelfth.

AMENDMENTS TO THE CONSTITUTION.

Proposed by congress and ratified by the legislatures of the several states, pursuant to article V. of the original constitution. The dates given are those showing when each amendment went into effect or was proclaimed.

I. Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof, or abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the government for a redress of grievances. (Dec. 15, 1791.)

II. A well regulated militia being necessary to the security of a free state, the right of the people to keep and bear arms shall not be infringed. (Dec. 15, 1791.)

III. No soldier shall, in time of peace, be quartered in any house without the consent of the owner; nor in wartime but in a manner to be prescribed by law. (Dec. 15, 1791.)

IV. The right of the people to be secure in their persons, houses, papers and effects against unreasonable searches and seizures shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized. (Dec. 15, 1791.)

V. No person shall be held to answer for a capital or otherwise infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall he be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty or property without due process of law; nor shall private property be taken for public use without just compensation. (Dec. 15, 1791.)

VI. In all criminal prosecutions the accused shall enjoy the right to a speedy and public trial by an impartial jury of the state and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense. (Dec. 15, 1791.)

VII. In suits at common law, where the value in controversy shall exceed $20, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise reexamined in any court of the United States than according to the rules of the common law. (Dec. 15, 1791.)

VIII. Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted. (Dec. 15, 1791.)

IX. The enumeration in the constitution of certain rights shall not be construed to deny or disparage others retained by the people. (Dec. 15, 1791.)

X. The powers not delegated to the United States by the constitution nor prohibited by it to the states are preserved to the states respectively or to the people. (Dec. 15, 1791.)

XI. The judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by citizens of another state or by citizens or subjects of any foreign state. (Jan. 8, 1798.)

XII. Section 1. The electors shall meet in their respective states and vote by ballot for president and vice-president, one of whom at least shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as president, and in distinct ballots the person voted for as vice-president, and they shall make distinct lists of all persons voted for as president and of all persons voted for as vice-president, and of the number of votes for each, which list they shall sign and certify and transmit sealed to the seat of the government of the United States, directed to the president of the senate; the president of the senate shall, in the presence of the senate and house of representatives, open all the certificates and the votes shall then be counted; the person having the greatest number of votes for president shall be the president, if such number be a majority of the whole number of electors appointed, and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as president, the house of representatives shall choose immediately, by ballot, for president. But in choosing the president the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. And if the house of representatives shall not choose a president whenever the right of choice shall devolve upon them before the fourth day of March next following, then the vice-president shall act as president, as in the case of the death or other constitutional disability of the president.

Sec. 2. The person having the greatest number of votes as vice-president shall be the vice-president, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the senate shall choose a vice-president. A quorum for the purpose shall consist of two-thirds of the whole number of senators and a majority of the whole number shall be necessary to a choice.

Sec. 3. But no person constitutionally ineligible to the office of president shall be eligible to that of vice-president of the United States. (Sept. 28, 1804.)

XIII. Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime, whereof the party shall have been duly convicted, shall exist within the United States or any place subject to their jurisdiction.

Sec. 2. Congress shall have the power to enforce this article by appropriate legislation. (Dec. 18, 1865.)

XIV. Section 1. All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any state deprive any person of life, liberty or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Sec. 2. Representatives shall be apportioned among the several states according to their respective numbers, counting the whole number of persons in each state, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for president and vice-president of the United States, representatives in congress, the executive and judicial officers of a state or the members of the legislature thereof is denied to any of the male inhabitants of such state, being 21 years of age and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens 21 years of age in such state.

Sec. 3. No person shall be a senator or representative in congress or elector of president and vice-president, or hold any office, civil or military, under the United States, or under any state, who, having previously taken the oath as a member of congress or as an officer of the United States, or as a member of any state legislature, or as an executive or judicial officer of any state, to support the constitution of the United States, shall have engaged in insurrection or rebellion against the same or given aid or comfort to the enemies thereof. But congress may, by a vote of two-thirds of each house, remove such disability.

Sec. 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any state shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States or any claim for the loss or emancipation of any slave, but all such debts, obligations and claims shall be held illegal and void.

Sec. 5. The congress shall have the power to enforce by appropriate legislation the provisions of this article. (July 28, 1868.)

XV. Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or any state on account of race, color or previous condition of servitude.

Sec. 2. The congress shall have power to enforce this article by appropriate legislation. (March 30, 1870.)

XVI. The congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several states, and without regard to any census or enumeration.

XVII. Section 1. The senate of the United States shall be composed of two senators from each state, elected by the people thereof, for six years; and each senator shall have one vote. The electors in each state shall have the qualifications requisite for electors of the most numerous branch of the state legislature.

Sec. 2. When vacancies happen in the representation of any state in the senate, the executive authority of such state shall issue writs of election to fill such vacancies; provided, that the legislature of any state may empower the executive thereof to make temporary appointment until the people fill the vacancies by election as the legislature may direct.

Sec. 3. This amendment shall not be so construed as to affect the election or term of any senator chosen before it becomes valid as part of the constitution. (May 31, 1913.)

XVIII. Section 1. After one year from the ratification of this article, the manufacture, sale or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and

all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

Sec. 2. The congress and the several states shall have concurrent power to enforce this article by appropriate legislation.

Sec. 3. This article shall be inoperative unless it shall have been ratified as an amendment to the constitution by the legislatures of the several states, as provided in the constitution, within seven years from the date of the submission hereof to the states by congress.

[The foregoing article was ratified Jan. 16, 1919.]

THE AMERICAN DECLARATION OF INDEPENDENCE.

The unanimous declaration of the thirteen United States of America, in congress, July 4, 1776.

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident: That all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly all experience hath shown that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government and to provide new guards for their future security. Such has been the patient suffering of these colonies, and such is now the necessity which constrains them to alter their former systems of government. The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these states. To prove this, let facts be submitted to a candid world.

He has refused his assent to laws the most wholesome and necessary for the public good.

He has forbidden his governors to pass laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained, and, when so suspended, he has utterly neglected to attend to them.

He has refused to pass other laws for the accommodation of large districts of people, unless those people would relinquish the right of representation in the legislature—a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies, at places unusual, uncomfortable and distant from the repository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time after such dissolutions to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the state remaining, in the meantime, exposed to all the dangers of invasion from without and convulsions within.

He has endeavored to prevent the population of these states; for that purpose obstructing the laws for naturalization of foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice by refusing his assent to laws for establishing his judiciary powers.

He has made judges dependent on his will alone for the tenure of their offices and the amount and payment of their salaries.

He has erected a multitude of new offices and sent hither swarms of officers to harass our people and eat out their substance.

He has kept among us, in times of peace, standing armies without the consent of our legislatures.

He has affected to render the military independent of and superior to the civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitutions and unacknowledged by our laws, giving his assent to their acts of pretended legislation:

For quartering large bodies of armed troops among us:

For protecting them by a mock trial from punishment for any murders which they should commit on the inhabitants of these states:

For cutting off our trade with all parts of the world:

For imposing taxes on us without our consent:

For depriving us in many cases of the benefits of trial by jury:

For transporting us beyond seas to be tried for pretended offenses:

For abolishing the free system of English laws in a neighboring province, establishing therein an arbitrary government, and enlarging its boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these colonies:

For taking away our charters, abolishing our most valuable laws and altering fundamentally the forms of our governments:

For suspending our own legislatures and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here by declaring us out of his protection and waging war against us.

He has plundered our seas, ravaged our coasts, burnt our towns and destroyed the lives of our people.

He is at this time transporting large armies of foreign mercenaries to complete the work of death, desolation and tyranny already begun, with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages and totally unworthy the head of a civilized nation.

He has constrained our fellow citizens taken captive upon the high seas to bear arms against their country, to become the executioners of their friends and brethren or to fall themselves by their hands.

He has excited domestic insurrection amongst us, and has endeavored to bring on the inhabitants of our frontiers the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these oppressions we have petitioned for redress, in the most humble terms; our repeated petitions have been answered—only by repeated injury. A prince whose character is thus marked by every act which may define a tyrant is unfit to be the ruler of a free people.

Nor have we been wanting in attention to our British brethren. We have warned them, from time to time, of attempts by their legislature to extend an unwarrantable jurisdiction

over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred, to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They, too, have been deaf to the voice of justice and consanguinity. We must, therefore, acquiesce in the necessity which denounces our separation, and hold them, as we hold the rest of mankind, enemies in war; in peace, friends.

We, therefore, the representatives of the United States of America, in general congress assembled, appealing to the Supreme Judge of the World for the rectitude of our intentions, do, in the name and by the authority of the good people of these colonies, solemnly publish and declare that these united colonies are, and of right ought to be, free and independent states; that they are absolved from all allegiance to the British crown, and that all political connection between them and the state of Great Britain is, and ought to be, totally dissolved; and that as free and independent states, they have full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which independent states may of right do. And for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes and our sacred honor.

ALASKAN SEAL HERD CENSUS.

From the 1918 census of the fur seal on the Pribilof islands, Alaska, it appears that the herd is increasing. In 1917 the total number of animals in the herd was 468,692, while in 1918 the approximate number was 496,600. In 1888 it was estimated that the number of seals on the Pribilof islands alone amounted to about 2,500,000. The killing of seals was carried on at such rate both at sea and on land that the herd decreased so rapidly as to threaten its extinction. In 1911 a treaty was negotiated between the United States, Great Britain and Russia suspending pelagic sealing for a period of fifteen years and land sealing entirely for five years and to a limited extent for nine years longer.

WASHINGTON'S FAREWELL ADDRESS.

Following are the closing paragraphs of Washington's farewell address to the people of the United States Sept. 17, 1796, on his approaching retirement from the presidency. They relate more particularly to international relations:

"Observe good faith and justice toward all nations. Cultivate peace and harmony with all. Religion and morality enjoin this conduct. And can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and at no distant period a great nation to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt that in the course of time and things the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it? Can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

"In the execution of such a plan nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachments for others should be excluded, and that in place of them just and amicable feelings toward all should be cultivated. The nation which indulges toward another an habitual hatred or an habitual fondness is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. Antipathy in one nation against another disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable when accidental or trifling occasions of dispute occur.

"Hence frequent collisions, obstinate, envenomed and bloody contests. The nation prompted by ill will and resentment sometimes impels to war the government contrary to the best calculations of policy. The government sometimes participates in the national propensity, and adopts through passion what reason would reject. At other times it makes the animosity of the nation subservient to projects of hostility, instigated by pride, ambition and other sinister and pernicious motives. The peace often, sometimes perhaps the liberty, of nations has been the victim.

"So, likewise, a passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter without adequate inducement or justification. It leads also to concessions to the favorite nation of privileges denied to others, which is apt doubly to injure the nation making the concessions by unnecessarily parting with what ought to have been retained, and by exciting jealousy, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted or deluded citizens (who devote themselves to the favorite nation) facility to betray or sacrifice the interests of their own country without odium, sometimes even with popularity, gilding with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption or infatuation.

"As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent patriot. How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion, to influence or awe the public councils! Such an attachment of a small or weak toward a great and powerful nation dooms the former to be the satellite of the latter. Against the insidious wiles of foreign influence (I conjure you to believe me, fellow citizens) the jealousy of a free people ought to be constantly awake, since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy, to be useful, must be impartial, else it becomes the instrument of the very influence to be avoided, instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike of another cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots who may resist the intrigues of the favorite are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people to surrender their interests.

"The great rule of conduct for us in regard to foreign nations is in extending our commercial relations to have with them as little political connection as possible. So far as we have already formed engagements let them be fulfilled with perfect good faith. Here let us stop.

"Europe has a set of primary interests which to us have none or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves by artificial ties in the ordinary vicissitudes of her politics or the ordinary combinations and collisions of her friendships or enmities.

"Our detached and distant situation invites and enables us to pursue a different course. If we remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation; when we may choose peace or war, as our interest, guided by justice, shall counsel.

"Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalship, interest, humor or caprice?

"It is our true policy to steer clear of permanent alliances with any portion of the foreign world, so far, I mean, as we are now at liberty to do it; for let me not be understood as capable of patronizing infidelity to existing engagements. I hold the maxim no less applicable to public than to private affairs that honesty is always the best policy. I repeat, therefore, let those engagements be observed in their genuine sense. But in my opinion it is unnecessary and would be unwise to extend them.

"Taking care always to keep ourselves by suitable establishments on a respectable defensive posture, we may safely trust to temporary alliances for extraordinary emergencies.

"Harmony, liberal intercourse with all nations are recommended by policy, humanity and interest. But even our commercial policy should hold an equal and impartial hand, neither seeking nor granting exclusive favors or preferences; consulting the natural course of

things; diffusing and diversifying by gentle means the streams of commerce, but forcing nothing; establishing with powers so disposed, in order to give trade a stable course, to define the rights of our merchants, and to enable the government to support them, conventional rules of intercourse, the best that present circumstances and mutual opinion will permit, but temporary and liable to be from time to time abandoned or varied as experience and circumstances shall dictate; constantly keeping in view that it is folly in one nation to look for disinterested favors from another; that it must pay with a portion of its independence for whatever it may accept under that character; that by such acceptance it may place itself in the condition of having given equivalents for nominal favors, and yet of being reproached with ingratitude for not giving more. There can be no greater error than to expect or calculate upon real favors from nation to nation. It is an illusion which experience must cure, which a just pride ought to discard.

"In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope they will make the strong and lasting impression I could wish—that they will control the usual current of the passions or prevent our nation from running the course which has hitherto marked the destiny of nations. But if I may even flatter myself that they may be productive of some partial benefit, some occasional good—that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigue, to guard against the impostures of pretended patriotism—this hope will be a full recompense for the solicitude for your welfare by which they have been dictated.

"How far in the discharge of my official duties I have been guided by the principles which have been delineated the public records and other evidences of my conduct must witness to you and to the world. To myself, the assurance of my own conscience is that I have at least believed myself to be guided by them.

"In relation to the still subsisting war in Europe my proclamation of the 22d of April, 1793, is the index to my plan. Sanctioned by your approving voice and by that of your representatives in both houses of congress, the spirit of that measure has continually governed me, uninfluenced by any attempts to deter or divert me from it.

"After deliberate examination, with the aid of the best lights I could obtain, I was well satisfied that our country, under all the circumstances of the case, had a right to take and was bound in duty and interest to take a neutral position. Having taken it, I determined as far as should depend upon me to maintain it with moderation, perseverance and firmness.

"The considerations which respect the right to hold this conduct it is not necessary on this occasion to detail. I will only observe that, according to my understanding of the matter, that right, so far from being denied by any of the belligerent powers, has been virtually admitted by all.

"The duty of holding a neutral conduct may be inferred, without anything more, from the obligation which justice and humanity impose on every nation, in cases in which it is free to act, to maintain inviolate the relations of peace and amity toward other nations.

"The inducements of interest for observing that conduct will best be referred to your own reflections and experience. With me a predominant motive has been to endeavor to gain time to our country to settle and mature its yet recent institutions, and to progress without interruption to that degree of strength and consistency which is necessary to give it, humanly speaking, the command of its own fortunes."

LINCOLN'S GETTYSBURG SPEECH.

(Address at the dedication of Gettysburg cemetery, Nov. 19, 1863.)

Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battle field of that war. We have come to dedicate a portion of that field as a final resting place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But, in a larger sense, we cannot dedicate—we cannot consecrate—we cannot hallow—this ground. The brave men, living and dead, who struggled here have consecrated it, far above our poor power to add or detract. The world will little note, nor long remember what we say here, but it can never forget what they did here. It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain—that this nation, under God, shall have a new birth of freedom—and that government of the people, by the people, for the people shall not perish from the earth.

THE INFLUENZA EPIDEMIC OF 1918.

In an article published Aug. 8, 1919, on certain general statistical aspects of the 1918 epidemic of influenza, Raymond Pearl, professor of biometry and vital statistics at the Johns Hopkins university, says: "The pandemic of influenza which swept over the world in 1918 was the most severe outbreak of this disease which has ever been known and it takes an unpleasantly high rank in the roster of epidemics generally. It is certainly impossible now and perhaps always will be to make any precise statement of the number of people who lost their lives because of this epidemic. But it is certain that the total is an appalling one. Undoubtedly a great many more people died from this cause than from all causes directly connected with the military operations of the great war. In the United States alone conservative estimates place the deaths from the influenza epidemic at not less than 550,000, which is approximately five times the number (111,179) of Americans officially stated (April 30, 1919) to have lost their lives from all causes in the war. And the end of the epidemic is by no means yet reached. In England and Wales the curve of mortality from influenza was even in 1907, seventeen years after the epidemic of 1890, higher than it was in any of the forty years preceding 1890. The decline in the mortality rate after the 1848 epidemic in Great Britain was similarly slow. There is no evident reason to suppose that the conditions following the first explosion of the present epidemic will be essentially different from those which obtained in the earlier cases."

PRESIDENT'S MESSAGE TO CONGRESS.

May 20, 1919.

Owing to his absence in Paris, France, as a delegate to the peace conference President Wilson cabled his message to the 66th congress, called into special session by him. It was read in both houses on May 20, 1919, and was as follows:

"Gentlemen of the Congress:

"I deeply regret my inability to be present at the opening of the extraordinary session of congress. It still seems to be my duty to take part in the councils of the peace conference and contribute what I can to the solution of the innumerable questions to whose settlement it has had to address itself. For they are questions which affect the peace of the whole world and from them, therefore, the United States cannot stand apart.

"I deemed it my duty to call the congress together at this time because it was not wise to postpone longer the provisions which must be made for the support of the government. Many of the appropriations which are absolutely necessary for the maintenance of the government and the fulfillment of its varied obligations for the fiscal year 1919-1920 have not yet been made; the end of the present fiscal year is at hand, and action upon these appropriations can no longer be prudently delayed. It is necessary, therefore, that I should immediately call your attention to this critical need. It is hardly necessary for me to urge that it may receive your prompt attention.

TO DISCUSS TREATY LATER.

"I shall take the liberty of addressing you on my return on the subjects which have most engrossed our attention and the attention of the world during these last anxious months, since the armistice of last November was signed, the international settlements which must form the subject matter of the present treaties of peace and of our national action in the immediate future. It would be premature to discuss them or to express a judgment about them before they are brought to their complete formulation by the agreements which are now being sought at the table of the conference. I shall hope to lay them before you in their many aspects so soon as arrangements have been reached.

"I hesitate to venture any opinion or press any recommendation with regard to domestic legislation while absent from the United States and out of daily touch with intimate sources of information and counsel. I am conscious that I need, after so long an absence from Washington, to seek the advice of those who have remained in constant contact with domestic problems and who have known them close at hand from day to day; and I trust that it will very soon be possible for me to do so. But there are several questions pressing for consideration to which I feel that I may, and indeed must, even now direct your attention, if in only general terms. In speaking of them I shall, I dare say, be doing little more than speak your own thoughts. I hope that I shall speak your own judgment also.

LABOR QUESTION FIRST.

"The question which stands at the front of all others in every country amidst the present great awakening is the question of labor; and perhaps I can speak of it with as great advantage while engrossed in the consideration of interests which affect all countries alike as I could at home and amidst the interests which naturally most affect my thought, because they are the interests of our own people.

"By the question of labor I do not mean the question of efficient industrial production, the question of how labor is to be obtained and made effective in the great process of sustaining populations and winning success amidst commercial and industrial rivalries. I mean that much greater and more vital question. How are men and women who do the daily labor of the world to obtain progressive improvement in the conditions of their labor, to be made happier and to be served better by the communities and the industries which their labor sustains and advances? How are they to be given their right advantages as citizens and human beings?

"We cannot go any farther in our present direction. We have already gone too far. We cannot live our right life as a nation or achieve our proper success as an industrial community if capital and labor are to continue to be antagonistic instead of being partners; if they are to continue to distrust one another and contrive how they can get the better of one another; or, what perhaps amounts to the same thing, calculate by what form and degree of coercion they can manage to extort on the one hand work enough to make enterprise profitable; on the other, justice and fair treatment enough to make life tolerable. That bad road has turned out a blind alley. It is no thoroughfare to real prosperity. We must find another, leading in another direction and to a very different destination. It must lead not merely to accommodation but also to a genuine co-operation and partnership based upon a real community of interest and participation in control.

"There is now, in fact, a real community of interest between capital and labor, but it has never been made evident in action. It can be made operative and manifest only in a new organization of industry. The genius of our business men and the sound, practical sense of our workers can certainly work such a partnership out when once they realize exactly what it is that they seek and sincerely adopt a common purpose with regard to it.

"Labor legislation lies, of course, chiefly with the states; but the new spirit and method of organization which must be effected are not to be brought about by legislation so much as by the common counsel and voluntary co-operation of capitalist, manager and workman. Legislation can go only a very little way in commanding what shall be done. The organization of industry is a matter of corporate and individual initiative and of practical business arrangement. Those who really desire a new relationship between capital and labor can readily find a way to bring it about and perhaps federal legislation can help more than state legislation could.

"The object of all reform in this essential matter must be the genuine democratization of industry, based upon a full recognition of the right of those who work, in whatever rank, to participate in some organic way in every decision which directly affects their welfare or the part they are to play in industry. Some positive legislation is practicable.

"The congress has already shown the way to one reform which should be worldwide, by establishing the eight hour day as the standard day in every field of labor over which it can exercise control. It has sought to find the way to prevent child labor and will, I hope and believe, presently find it. It has served the whole country by leading the way in developing the means of preserving and safeguarding life and health in dangerous industries. It can now help in the difficult task of giving a new form and spirit to industrial organization by co-ordinating the several agencies of conciliation and adjustment which have been brought into existence by the difficulties and mistaken policies of the present management of industry and by setting up and developing new federal agencies of advice and information which may serve as a clearing

house for the best experiments and the best thought on this great matter, upon which every thinking man must be aware that the future development of society directly depends.

"Agencies of international counsel and suggestion are presently to be created in connection with the league of nations in this very field; but it is national action and the enlightened policy of individuals, corporations and societies within each nation that must bring about the actual reforms. The members of the committees on labor in the two houses will hardly need suggestion from me as to what means they shall seek to make the federal government the agent of the whole nation in pointing out and, if need be, guiding the process of reorganization and reform.

SOLDIERS MUST BE ASSISTED.

"I am sure that it is not necessary for me to remind you that there is one immediate and very practical question of labor that we should meet in the most liberal spirit. We must see to it that our returning soldiers are assisted in every practicable way to find the places for which they are fitted in the daily work of the country. This can be done by developing and maintaining upon an adequate scale the admirable organization created by the department of labor for placing men seeking work; and it can also be done, in at least one very great field, by creating new opportunities for individual enterprise.

"The secretary of the interior has pointed out the way by which returning soldiers may be helped to find and take up land in the hitherto undeveloped regions of the country which the federal government has prepared or can readily prepare for cultivation and for many of the cutover or neglected areas which lie within the limits of the older states; and I once more take the liberty of recommending very urgently that his plans shall receive the immediate and substantial support of the congress.

MUST REBUILD TRADE.

"Peculiar and very stimulating conditions await our commerce and industrial enterprise in the immediate future. Unusual opportunities will presently present themselves to our merchants and producers in foreign markets and large fields for profitable investment will be opened to our free capital. But it is not only of that that I am thinking; it is not chiefly of that that I am thinking. Many great industries prostrated by the war wait to be rehabilitated in many parts of the world, where what will be lacking is not brains or willing hands or organizing capacity or experienced skill, but machinery and raw materials and capital.

"I believe that our business men, our merchants, our manufacturers and our capitalists will have the vision to see that prosperity in one part of the world ministers to prosperity everywhere; that there is in a very true sense a solidarity of interest throughout the world of enterprise and that our dealings with the countries that have need of our products and our money will teach them to deem us more than ever friends whose necessities we seek in the right way to serve.

"Our new merchant ships, which have in some quarters been feared as destructive rivals, may prove helpful rivals, rather, and common servants, very much needed and very welcome. Our great shipyards, new and old, will be so opened to the use of the world that they will prove immensely serviceable to every maritime people in restoring much more rapidly than would otherwise have been possible the tonnage wantonly destroyed in the war. I have only to suggest that there are many points at which we can facilitate American enterprise in foreign trade by opportune legislation and make it easy for American merchants to go where they will be welcomed as friends rather than as dreaded antagonists. America has a great and honorable service to perform in bringing the commercial and industrial undertakings of the world back to their old scope and swing again, and putting a solid structure of credit under them. All our legislation should be friendly to such plans and purposes.

URGES TAX RECONSIDERATION.

"And credit and enterprise alike will be quickened by timely and helpful legislation with regard to taxation. I hope that the congress will find it possible to undertake an early reconsideration of federal taxes in order to make our system of taxation more simple and easy of administration and the taxes themselves as little burdensome as they can be made and yet suffice to support the government and meet all its obligations. The figures to which those obligations have arisen are very great, indeed, but they are not so great as to make it difficult for the nation to meet them, and meet them, perhaps, in a single generation, by taxes which will neither crush nor discourage.

"These are not so great as they seem, not so great as the immense sums we have had to borrow, added to the immense sums we have had to raise by taxation, would seem to indicate; for a very large proportion of those sums was raised in order that they might be loaned to the governments with which we were associated in the war, and those loans will, of course, constitute assets, not liabilities, and will not have to be taken care of by our taxpayers.

"The main thing we shall have to care for is that our taxation shall rest as lightly as possible on the productive resources of the country, that its rates shall be stable, and that it shall be constant in its revenue yielding power. We have found the main sources from which it must be drawn. I take it for granted that its mainstays will henceforth be the income tax, the excess profits tax and the estate tax. All these can so be adjusted as to yield constant and adequate returns and yet not constitute a too grievous burden on the taxpayer.

"A revision of the income tax has already been provided for by the act of 1918, but I think you will find that further changes can be made to advantage both in the rates of tax and the method of its collection. The excess profits tax need not long be maintained at the rates which were necessary while the enormous expenses of the war had to be borne; but it should be made the basis for a permanent system which will reach undue profts without discouraging the enterprise and activity of our business men. The tax on inheritances ought, no doubt, to be reconsidered in its relation to the fiscal systems of the several states, but it certainly ought to remain a permanent part of the fiscal system of the federal government also.

"Many of the minor taxes provided for in the revenue legislation of 1917 and 1918, though no doubt made necessary by the pressing necessities of the war time, could hardly find sufficient justification under the easier circumstances of peace and can now happily be got rid of.

"Among these, I hope you will agree, are the excises upon various manufacturers and the taxes upon retail sales. They are unequal in the incidence on different industries and on different individuals. Their collection is difficult and expensive. Those which are levied upon articles sold at retail are largely evaded by the readjustment of retail prices. On the other hand, I should assume that it is expedient to maintain a considerable range of indirect taxes; and the fact that alcoholic liquors will presently no longer afford a source

of revenue by taxation makes it the more necessary that the field should be carefully restudied in order that equivalent sources of revenue may be found, which it will be legitimate and not burdensome to draw upon.

"But you have at hand in the treasury department many experts who can advise you upon the matters much better than I can. I can only suggest the lines of a permanent and workable system, and the placing of the taxes where they will least hamper the life of the people.

"There is, fortunately, no occasion for undertaking in the immediate future any general revision of our system of import duties. No serious danger of foreign competition now threatens American industries. Our country has emerged from the war less disturbed and less weakened than any of the European countries which are our competitors in manufacture. Their industrial establishments have been subjected to greater strain than ours, their labor force to a more serious disorganization and this is clearly not the time to seek an organized advantage. The work of mere reconstruction will, I am afraid, tax the capacity and the resources of their people for years to come.

"So far from there being any danger or need of accentuated foreign competition, it is likely that the conditions of the next few years will greatly facilitate the marketing of American manufactures abroad. Least of all should we depart from the policy adopted in the tariff act of 1913 of permitting the free entry into the United States of the raw materials needed to supplement and enrich our own abundant supplies.

TARIFF CHANGES NEEDED.

"Nevertheless, there are parts of our tariff system which need prompt attention. The experiences of the war have made it plain that in some cases too great reliance on foreign supply is dangerous, and that in determining certain parts of our tariff policy domestic considerations must be borne in mind which are political as well as economic.

"Among the industries to which special consideration could be given is that of the manufacture of dyestuffs and related chemicals. Our complete dependence upon German supplies before the war made the interruption of trade a cause of exceptional economic disturbance. The close relation between the manufacturer of dyestuffs on the one hand, and of explosives and poisonous gases on the other, moreover, has given the industry an exceptional significance and value.

"Although the United States will gladly and unhesitatingly join in the program of international disarmament, it will, nevertheless, be a policy of obvious prudence to make certain of the successful maintenance of many strong and well equipped chemical plants. The German chemical industry, with which we will be brought into competition, was and may well be again, a thoroughly knit monopoly capable of exercising a competition of a peculiarly insidious and dangerous kind.

"The United States should, moreover, have the means of properly protecting itself whenever our trade is discriminated against by foreign nations, in order that we may be assured of that equality of treatment which we hope to accord and to promote the world over. Our tariff laws as they now stand provide no weapon of retaliation in case other governments should enact legislation unequal in its bearing on our products as compared with the products of other countries. Though we are as far as possible from desiring to enter upon any course of retaliation, we must frankly face the fact that hostile legislation by other nations is not beyond the range of possibility, and that it may have to be met by counterlegislation.

"This subject has, fortunately, been exhaustively investigated by the United States tariff commission. A recent report of that commission has shown very clearly that we lack and that we ought to have the instruments necessary for the assurance of equal and equable treatment. The attention of the congress has been called to this matter on past occasions and the past measures which are now recommended by the tariff commission are substantially the same that have been suggested by previous administrations. I recommend that this phase of the tariff question receive the early attention of the congress.

SPEAKS FOR SUFFRAGE.

"Will you not permit me, turning from these matters, to speak once more and very earnestly of the proposed amendment to the constitution which would extend the suffrage to women and which passed the house of representatives at the last session of the congress?

"It seems to me that every consideration of justice and of public advantage calls for the immediate adoption of that amendment and its submission forthwith to the legislatures of the several states. Throughout all the world this long delayed extension of the suffrage is looked for; in the United States longer, I believe, than anywhere else, the necessity for it, and the immense advantages of it to the national life, have been urged and debated by women and men who saw the need for it and urged the policy of it when it required steadfast courage to be so much beforehand with the common conviction; and I, for one, covet for our country the distinction of being among the first to act in a great reform.

WIRES TO BE RETURNED TO OWNERS.

"The telegraph and telephone lines will, of course, be returned to their owners so soon as the retransfer can be effected without administrative confusion; so soon, that is, as the change can be made with least possible inconvenience to the public and to the owners themselves. The railroads will be handed over to their owners at the end of the calendar year; if I were in immediate contact with the administrative questions which must govern the retransfer of the telegraph and telephone lines I could name the exact date for their return also.

"Until I am in direct contact with the practical questions involved I can only suggest that in the case of the telegraphs and telephones, as in the case of the railways, it is clearly desirable in the public interest that some legislation should be considered which may tend to make of these indispensable instrumentalities of our modern life a uniform and co-ordinated system which will afford those who use them as complete and certain means of communication with all parts of the country as has so long been afforded by the postal system of the government and at rates as uniform and intelligible. Expert advice is, of course, available in this very practical matter and the public interest is manifest.

"Neither the telegraph nor the telephone service of the country can be said to be in any sense a national system. There are many confusions and inconsistencies of rates. The scientific means by which communication by such instrumentalities can be rendered more thorough and satisfactory has not been made full use of. An exhaustive study of the whole question of electrical communication and of the means by which the central authority of the nation can be used to unify and improve it, if undertaken by the appropriate committees of the congress, would certainly result, indirectly even if not directly, in a great public benefit.

WOULD LIFT BEER BAN.

"The demobilization of the military forces of the country has progressed to such a point

that it seems to me entirely safe now to remove the ban upon the manufacture and sale of wines and beers, but I am advised that without further legislation I have not the legal authority to remove the present restrictions. I therefore recommend that the act approved Nov. 21, 1918, entitled, 'An act to enable the secretary of agriculture to carry out, during the fiscal year ending June 30, 1919, the purposes of the act entitled, "An act to provide further for the national security and defense by stimulating agriculture and facilitating the distribution of agricultural products," and for other purposes,' be amended or repealed in so far as it applies to wines and beers.

"I sincerely trust that I shall very soon be at my post in Washington again to report upon the matters which made my presence at the peace table apparently imperative, and to put myself at the service of the congress in every matter of administration or counsel that may seem to demand executive action or advice. WOODROW WILSON."

UNITED STATES CIVIL SERVICE.

Civil service act approved Jan. 16, 1883.

Officers—Three commissioners are appointed by the president to assist him in classifying the government offices and positions, formulating rules and enforcing the law. Their office is in Washington, D. C. The chief examiner is appointed by the commissioners to secure accuracy, uniformity and justice in the proceedings of the examining boards. The secretary to the commission is appointed by the president.

General Rules—The fundamental rules governing appointments to government positions are found in the civil service act itself. Based upon these are many other regulations formulated by the commission and promulgated by the president from time to time as new contingencies arise. The present rules were approved March 20, 1903, and went into effect April 15, 1903. In a general way they require that there must be free, open examinations of applicants for positions in the public service; that appointments shall be made from those graded highest in the examinations; that appointments to the service in Washington shall be apportioned among the states and territories according to population; that there shall be a period (six months) of probation before any absolute appointment is made; that no person in the public service is for that reason obliged to contribute to any political fund or is subject to dismissal for refusing to so contribute; that no person in the public service has any right to use his official authority or influence to coerce the political action of any person. Applicants for positions shall not be questioned as to their political or religious beliefs and no discrimination shall be exercised against or in favor of any applicant or employe on account of his religion or politics. The classified civil service shall include all officers and employes in the executive civil service of the United States except laborers and persons whose appointments are subject to confirmation by the senate.

Examinations—These are conducted by boards of examiners chosen from among persons in government employ and are held twice a year in all the states and territories at convenient places. In Illinois, for example, they are usually held at Cairo, Chicago and Peoria. The dates are announced through the newspapers or by other means. They can always be learned by applying to the commission or to the nearest postoffice or custom house. Those who desire to take examinations are advised to write to the commission in Washington for the "Manual of Examinations," which is sent free to all applicants. It is revised semiannually to Jan. 1 and July 1. The January edition contains a schedule of the spring examinations and the July edition contains a schedule of the fall examinations. Full information is given as to the methods and rules governing examinations, manner of making application, qualifications required, regulations for rating examination papers, certification for and chances of appointment, and as far as possible it outlines the scope of the different subjects of general and technical examinations. These are practical in character and are designed to test the relative capacity and fitness to discharge the duties to be performed. It is necessary to obtain an average percentage of 70 to be eligible for appointment, except that applicants entitled to preference because of honorable discharge from the military or naval service for disability resulting from wounds or sickness incurred in the line of duty need obtain but 65 per cent. The period of eligibility is one year.

Qualifications of Applicants—No person will be examined who is not a citizen of the United States; who is not within the age limitations prescribed; who is physically disqualified for the service which he seeks; who has been guilty of criminal, infamous, dishonest or disgraceful conduct; who has been dismissed from the public service for delinquency and misconduct or has failed to receive absolute appointment after probation; who is addicted to the habitual use of intoxicating liquors to excess, or who has made a false statement in his application. The age limitations in the more important branches of the public service are: Postoffice, 18 to 45 years; rural letter carriers, 17 to 55; internal revenue, 21 years and over; railway mail, 18 to 35; lighthouse, 18 to 50; life saving, 18 to 45; general departmental, 20 and over. These age limitations are subject to change by the commission. They do not apply to applicants of the preferred class. Applicants for the position of railway mail clerk must be at least 5 feet 6 inches in height, exclusive of boots or shoes, and weigh not less than 135 pounds in ordinary clothing and have no physical defects. Applicants for certain other positions have to come up to similar physical requirements.

Method of Appointment—Whenever a vacancy exists the appointing officer makes requisition upon the civil service commission for a certification of names to fill the vacancy, specifying the kind of position vacant, the sex desired and the salary. The commission thereupon takes from the proper register of eligibles the names of three persons standing highest of the sex called for and certifies them to the appointing officer, who is required to make the selection. He may choose any one of the three names, returning the other two to the register to await further certification. The time of examination is not considered, as the highest in average percentage on the register must be certified first. If after a probationary period of six months the name of the appointee is continued on the roll of the department in which he serves the appointment is considered absolute.

Removals—No person can be removed from a competitive position except for such cause as will promote the efficiency of the public service and for reasons given in writing. No examination of witnesses nor any trial shall be required except in the discretion of the officer making the removal.

Salaries—Entrance to the department service is usually in the lowest grades, the higher grades being generally filled by promotion. The usual entrance grade is about $900, but the applicant may be appointed at $840, $760 or even $600.

APPORTIONMENT OF REPRESENTATIVES.

[From census bureau report.]

The apportionment of representatives in congress, under the first six censuses—1790 to 1840, inclusive—was made by congress, each by a separate act. The law for taking the census of 1850, which was intended to be permanent, presented a rule of apportionment, fixed the number of members of the house at 233, and directed the secretary of the interior thereafter to make the apportionment. The apportionment of 1860 was also made under this law, but congress, on March 4, 1862, fixed the total number of representatives at 241, and the secretary of the interior apportioned the new quotas to the states. The apportionments from and after the census of 1870 were made by congress, each by a separate act; hence it may be assumed that the power conferred on the secretary of the interior by the act of May 23, 1850, was repealed by implication. The following shows the dates of the apportionment acts and the ratio of population to each representative:

Census. Date.	Ratio.
1910—Aug. 8, 1911	211,877
1900—Jan. 16, 1901	194,182
1890—Feb. 7, 1891	173,901
1880—Feb. 25, 1882	151,911
1870—Feb. 2, 1872	131,425
1860—May 23, 1850	127,381
1850—May 23, 1850	93,423
1840—June 25, 1842	70,680
1830—May 22, 1832	47,700
1820—May 7, 1822	40,000
1810—Dec. 21, 1811	35,000
1800—Jan. 14, 1802	33,000
1790—April 14, 1792	33,000

The residence requirement is continuous residence immediately prior to election day.

CITIZENSHIP IN THE UNITED STATES.

All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the state wherein they reside. (Fourteenth amendment to the constitution.)

All persons born in the United States and not subject to any foreign power, excluding Indians not taxed, are declared to be citizens of the United States. (Sec. 1992, U. S. Revised Statutes.)

All children heretofore born or hereafter born out of the limits and jurisdiction of the United States, whose fathers were or may be at the time of their birth citizens thereof, are declared to be citizens of the United States; but the rights of citizenship shall not descend to children whose fathers never resided in the United States. (Sec. 1993, U. S. Revised Statutes.)

Any woman who is now or may hereafter be married to a citizen of the United States and who might herself be lawfully naturalized shall be deemed a citizen. (Sec. 1995, U. S. Revised Statutes.)

Children born in the United States of alien parents are citizens of the United States.

When any alien who has declared his intention to become a citizen of the United States dies before he is actually naturalized the widow and minor children of such alien may, by complying with the other provisions of this act (June 29, 1906), be naturalized without making any declaration of intention. If a widow files an application for citizenship based on her husband's declaration of intention, the children who are under the age of 21 at the time she is naturalized will be citizens through her naturalization, but if the children are past the age of 21 and were born in a foreign country, it will be necessary for them to file petitions for naturalization in their own right, using their deceased father's declaration of intention, provided they were under the age of 21 at the time of his death.

Children of Chinese parents who are themselves aliens and incapable of becoming naturalized are citizens of the United States.

Children born in the United States of persons engaged in the diplomatic service of foreign governments are not citizens of the United States.

Children born of alien parents on a vessel of a foreign country while within the waters of the United States are not citizens of the United States, but of the country to which the vessel belongs.

Children born of alien parents in the United States have the right to make an election of nationality when they reach their majority.

Minors and children are citizens within the meaning of the term as used in the constitution.

Deserters from the military or naval service of the United States are liable to loss of citizenship.

Any alien being a free white person, an alien of African nativity or of African descent may become an American citizen by complying with the naturalization laws.

"Hereafter no state court or court of the United States shall admit Chinese to citizenship; and all laws in conflict with this act are repealed." (Sec. 14, act of May 6, 1882.)

The courts have held that neither Chinese, Japanese, Hawaiians, Burmese nor Indians can be naturalized.

The naturalization laws apply to women as well as men. An alien woman who marries

a citizen, native or naturalized, becomes a naturalized citizen of the United States.

Aliens may become citizens of the United States by treaties with foreign powers, by conquest or by special acts of congress.

In an act approved March 2, 1907, it is provided that any American citizen shall have expatriated himself when he has been naturalized in any foreign state in conformity with its laws, or when he has taken an oath of allegiance to any foreign state.

When any naturalized citizen shall have resided for two years in the foreign state from which he came, or five years in any other foreign state, it shall be presumed that he has ceased to be an American citizen, and the place of his general abode shall be deemed his place of residence during said years: Provided, however, that such presumption may be overcome on the presentation of satisfactory evidence to a diplomatic or consular officer of the United States, under such rules and regulations as the department of state may prescribe; and provided, also, that no American citizen shall be allowed to expatriate himself when this country is at war.

Any American woman who marries a foreigner shall take the nationality of her husband. At the termination of the marital relation she may resume her American citizenship, if abroad, by registering as an American citizen within one year with a consul of the United States, or by returning to reside in the United States, or, if residing in the United States at the termination of the marital relation, by continuing to reside therein.

Any foreign woman who acquires American citizenship by marriage to an American citizen shall be assumed to retain the same after the termination of the marital relation if she continue to reside in the United States, unless she makes formal renunciation thereof before a court having jurisdiction to naturalize aliens, or, if she resides abroad, she may retain her citizenship by registering as such before a United States consul within one year after the termination of such marital relation.

A child born without the United States of alien parents shall be deemed a citizen of the United States by virtue of the naturalization of or resumption of American citizenship of the parent: Provided, that such naturalization or resumption takes place during the minority of such child; and provided, further, that the citizenship of such minor child shall begin at the time such minor child begins to reside permanently in the United States.

All children born outside the limits of the United States, who are citizens thereof in accordance with the provisions of section 1993 of the Revised Statutes of the United States (see above), and who continue to reside outside of the United States, shall, in order to receive the protection of the government, be required, upon reaching the age of 18 years, to record at an American consulate their intention to become residents and remain citizens of the United States and shall further be required to take the oath of allegiance to the United States upon attaining their majority.

Any alien of the age of 21 years and upward who may, under existing law, become a citizen of the United States, who has served or may hereafter serve for one enlistment of not less than four years in the United States navy, naval auxiliary, marine corps or revenue cutter (coast guard) service and received an honorable discharge with recommendation for re-enlistment, shall be admitted to become a citizen of the United States upon his petition without previous declaration of intention to become such, and without proof of residence on shore. (Act of June 30, 1914.)

NATURALIZATION LAWS.

Approved June 29, 1906.

Exclusive jurisdiction to naturalize aliens resident in their districts is conferred upon the United States Circuit and District courts and all courts of record having a seal, a clerk and jurisdiction in actions in law or equity or both in which the amount in controversy is unlimited.

An alien may be admitted to citizenship in the following manner and not otherwise:

1. He shall declare on oath before the clerk of the proper court at least two years before his admission, and after he has reached the age of 18 years, that it is bona fide his intention to become a citizen of the United States and to renounce allegiance to any foreign state or sovereignty. Such declaration shall set forth the same facts as are registered at the time of his arrival.

2. Not less than two years nor more than seven after he has made such declaration he shall file a petition, signed by himself and verified, in which he shall state his name, place of residence, occupation, date and place of birth, place from which he emigrated, name of the vessel on which he arrived, the time when and the place and name of the court where he declared his intention of becoming a citizen; if he is married, he shall state the name of his wife, the country of her nativity and her place of residence at the time the petition is filed, and if he has children, the name, date and place of birth and place of residence of each child living. The petition shall also set forth that he is not a disbeliever in or opposed to organized government or a member of any body of persons opposed to organized government, and that he is not a polygamist or a believer in polygamy; that he intends to become a citizen of and to live permanently in the United States, and every other fact material to his naturalization and required to be proved upon the final hearing of his application. The petition shall be verified by the affidavits of at least two credible witnesses who are citizens. At the time of the filing of the petition there shall be also filed a certificate from the department of commerce and labor stating the date, place and manner of his arrival in the United States and the declaration of intention of such petitioner, which certificate and declaration shall be attached to and be a part of his petition.

3. He shall, before he is admitted to citizenship, declare on oath in open court that he will support the constitution of the United States, and that he absolutely renounces all allegiance to any foreign prince, potentate, state or sovereignty.

4. It shall be made apparent to the satisfaction of the court admitting any alien to citizenship that immediately preceding the date of his application he has resided continuously within the United States five years at least, and within the state or territory where such court is at the time held one year at least, and that during that time he has behaved as a man of good moral character, attached to the principles of the constitution. In addition to the oath of the applicant, the testimony of at least two witnesses, citizens of the United States, as to the facts of residence, moral character and attachment to the principles of the constitution shall be required.

5. He must renounce any hereditary title or order of nobility which he may possess.

6. When any alien who has declared his intention dies before he is actually naturalized the widow and minor children may, by complying with the other provisions of the act, be naturalized without making any declaration of intention.

Immediately after the filing of the petition the clerk of the court shall give notice there-

of by posting in a public place the name, nativity and residence of the alien, the date and place of his arrival in the United States and the date for the final hearing of his petition and the names of the witnesses whom the applicant expects to summon in his behalf. Petitions for naturalization may be filed at any time, but final action thereon shall be had only on stated days and in no case until at least ninety days have elapsed after the filing of the petition. No person shall be naturalized within thirty days preceding a general election within the territorial jurisdiction of the court.

No person who disbelieves in or who is opposed to organized government, or who is a member of or affiliated with any organization entertaining and teaching such disbelief in or opposition to organized government, or who advocates or teaches the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers of the government of the United States, or of any other organized government, because of his or their official character, or who is a polygamist, shall be naturalized.

No alien shall hereafter be naturalized or admitted as a citizen of the United States who cannot speak the English language. This requirement does not apply to those physically unable to comply with it, or to those making homestead entries upon the public lands of the United States.

IMMIGRATION LAW.

Effective since May 1, 1917.

The word "alien" as used in the act includes any person not a native born or naturalized citizen of the United States, but it does not include Indians of the United States not taxed or citizens of the islands under the jurisdiction of the United States. The term "United States" means the United States and any waters, territory or other place subject to the jurisdiction thereof except the Isthmian Canal Zone; but if any alien shall leave the Canal Zone or any insular possession and attempt to enter any other place under the jurisdiction of the United States he is not to be permitted to enter under any other conditions than those applicable to all aliens.

There shall be collected a tax of $8 for every alien, including alien seamen regularly admitted, entering the United States. Children under 16 accompanying father or mother are not subject to the tax. The tax shall not be levied on aliens who enter after an uninterrupted residence of at least one year preceding such entrance in Canada, Newfoundland, Cuba or Mexico for a temporary stay, nor upon aliens in transit, nor upon aliens who, having been lawfully admitted, shall go from one part of the United States to another, although through contiguous foreign territory.

Excluded Aliens.

The following classes of aliens are excluded from the United States: Idiots, imbeciles, feeble minded, epileptics, insane persons; persons who have had one or more attacks of insanity previously; persons of constitutional psychopathic inferiority; persons with chronic alcoholism; paupers; professional beggars; vagrants; persons afflicted with tuberculosis in any form or with a loathsome or dangerous contagious disease; persons not comprehended within any of the foregoing excluded classes who are found to be and are certified by the examining surgeon as being mentally or physically defective, such physical defect being of a nature which may affect the ability of such alien to earn a living; persons who have been convicted of or admit having committed a felony or other crime or misdemeanor involving moral turpitude; polygamists, or persons who practice polygamy or believe in or advocate the practice of polygamy; anarchists, or persons who believe in or advocate the overthrow by force or violence of the government of the United States or of all forms of law, or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials, or who advocate or teach the unlawful destruction of property; persons who are members of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocate or teach the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the government of the United States or of any other organized government, because of his or their official character, or who advocate or teach the unlawful destruction of property; prostitutes, or persons coming into the United States for the purpose of prostitution or any other immoral purpose; persons who directly or indirectly procure or attempt to procure or import prostitutes or persons for the purpose of prostitution or any other immoral purpose; persons who are supported by or receive in whole or in part the proceeds of prostitution; contract laborers, who have been induced or assisted to migrate to this country by offers or promises of employment, whether such offers or promises are true or false, or in consequence of agreements, oral, written or printed, express or implied, to perform labor in this country of any kind, skilled or unskilled; persons who have come in consequence of advertisements for laborers printed, published or distributed in a foreign country; persons likely to become a public charge; persons who have been deported under any of the provisions of this act, and who may again seek admission within one year from the date of such deportation, unless prior to their re-embarkation at a foreign port or their attempt to be admitted from foreign contiguous territory the secretary of labor shall have consented to their reapplying for admission; persons whose ticket or passage is paid for with the money of another, or who are assisted by others to come, unless it is satisfactorily shown that such persons do not belong to one of the foregoing excluded classes; persons whose ticket or passage is paid for by any corporation, association, society, municipality, or foreign government, either directly or indirectly; stowaways, except that any such stowaway, if otherwise admissible, may be admitted at the discretion of the secretary of labor; all children under 16 years of age unaccompanied by or not coming to one or both of their parents, except that any such children may, in the discretion of the secretary of labor, be admitted if, in his opinion, they are not likely to become a public charge and are otherwise eligible; unless otherwise provided for by existing treaties, persons who are natives of islands not possessed by the United States adjacent to the continent of Asia, situate south of the 20th parallel latitude north, west of the 160th meridian of longitude east of Greenwich, and north of the 10th parallel latitude south, or who are natives of any country, province, or dependency situate on the continent of Asia west of the 110th meridian of longitude east from Greenwich and the 24th and 38th parallels of latitude north, and no alien now in any way excluded from, or prevented from entering, the United States shall be admitted to the United States.

The provision next foregoing, however, shall not apply to persons of the following status or occupation: Government officers, ministers or religious teachers, missionaries, lawyers, physicians, chemists, civil engineers, teachers, students, authors, artists, merchants, and travelers for curiosity or pleasure, nor to their legal wives or their children under 16 years of age who shall accompany them or who may subsequently apply for admission to the United States, but such persons or their legal wives or foreign born children who fail to maintain in the United States a status or occupation placing them within the excepted classes shall be

deemed to be in the United States contrary to law and shall be subject to deportation.

Literacy Test.

After three months from the passage of this act, in addition to the aliens who are by law now excluded from admission into the United States, the following persons shall also be excluded from admission thereto, to wit:

All aliens over 16 years of age, physically capable of reading, who cannot read the English language, or some other language or dialect, including Hebrew or Yiddish: Provided, that any admissible alien, or any alien heretofore or hereafter legally admitted, or any citizen of the United States, may bring in or send for his father or grandfather over 55 years of age, his wife, his mother, his grandmother or his unmarried or widowed daughter, if otherwise admissible, whether such relative can read or not; and such relative shall be permitted to enter. That for the purpose of ascertaining whether aliens can read the immigrant inspectors shall be furnished with slips of uniform size, prepared under the direction of the secretary of labor, each containing not less than thirty nor more than forty words in ordinary use, printed in plainly legible type in some one of the various languages or dialects of immigrants. Each alien may designate the particular language or dialect in which he desires the examination to be made, and shall be required to read the words printed on the slip in such language or dialect. That the following classes of persons shall be exempt from the operation of the literacy test, to wit: All aliens who shall prove to the satisfaction of the proper immigration officer or to the secretary of labor that they are seeking admission to the United States to avoid religious persecution in the country of their last permanent residence, whether such persecution be evidenced by overt acts or by laws or governmental regulations that discriminate against the alien or the race to which he belongs because of his religious faith; all aliens who have been lawfully admitted to the United States and who have resided therein continuously for five years and who return to the United States within six months from the date of their departure therefrom; all aliens in transit through the United States; all aliens who have been lawfully admitted to the United States and who later shall go in transit from one part of the United States to another through foreign contiguous territory: Provided, that nothing in this act shall exclude, if otherwise admissible, persons convicted, or who admit the commission, or who teach or advocate the commission, of an offense purely political: Provided further, that the provisions of this act relating to the payments for tickets or passage by any corporation, association, society, municipality or foreign government shall not apply to the tickets or passage of aliens in immediate and continuous transit through the United States to foreign contiguous territory: Provided further, that skilled labor, if otherwise admissible, may be imported if labor of like kind unemployed cannot be found in this country, and the question of the necessity of importing such skilled labor in any particular instance may be determined by the secretary of labor upon the application of any person interested, such application to be made before such importation, and such determination by the secretary of labor to be reached after a full hearing and an investigation into the facts of the case: Provided further, that the provisions of this law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, nurses, ministers of any religious denomination, professors for colleges or seminaries, persons belonging to any recognized learned profession, or persons employed as domestic servants: Provided further, that whenever the president shall be satisfied that passports issued by any foreign government to its citizens or subjects to go to any country other than the United States, or to any of its insular possessions or the Canal Zone, are being used for the purpose of enabling the holder to come to the continental territory of the United States to the detriment of labor conditions therein, the president shall refuse to permit such persons to enter the United States or its possessions: Provided further, that aliens returning after a temporary absence to an unrelinquished United States domicile of seven consecutive years may be admitted at the discretion of the secretary of labor and under such conditions as he may prescribe: Provided further, that nothing in the contract-labor or reading-test provisions of this act shall be construed to prevent any alien exhibitor or holder of any concession for any fair or exposition authorized by congress from bringing into the United States, under contract, such otherwise inadmissible alien mechanics, artisans, agents or other employes, natives of his country, as may be necessary for installing or conducting his exhibit or business, under such rules as the commissioner-general of immigration with the approval of the secretary of labor may prescribe, both as to the admission and return of such persons: Provided further, that the commissioner-general of immigration with the approval of the secretary of labor shall issue rules and prescribe conditions, including exaction of such bonds as may be necessary, to control and regulate the admission and return of otherwise inadmissible aliens applying for temporary admission: Provided further, that nothing in this act shall be construed to apply to accredited officials of foreign governments, nor to their suites, families or guests.

The importation of any alien into the United States for any immoral purpose is punishable by imprisonment for not more than ten years and by a fine of not more than $5,000. Violations of the contract-labor section of the act are punishable by fines of $1,000 or by imprisonment for not less than six months nor more than two years. The act provides for the fining or imprisonment of persons engaged in the transportation of aliens into the United States who encourage or help persons excluded under the provisions of the law to enter the country.

In five states in 1892 the electoral vote was divided: California gave 8 electoral votes for Cleveland and 1 for Harrison and Ohio gave 1 for Cleveland and 22 for Harrison; in Michigan, by act of the legislature, each congressional district voted separately for an elector; in Oregon 1 of the 4 candidates for electors on the people's party ticket was also on the democratic ticket; in North Dakota 1 of the 2 people's party electors cast his vote for Cleveland, this causing the electoral vote of the state to be equally divided among Cleveland, Harrison and Weaver. In 1896 California gave 8 electoral votes to McKinley and 1 to Bryan; Kentucky gave 12 to McKinley and 1 to Bryan. In Maryland in 1904 7 of the presidential electors chosen were democrats and 1 republican. In 1908 Maryland elected 6 democratic and 2 republican electors. In 1912 California elected 11 progressive and 2 democratic electors. In 1916 West Virginia elected 1 democratic and 7 republican electors.

HOMESTEAD LAWS OF THE UNITED STATES.

For full information as to the method of acquiring homesteads on unappropriated public lands of the United States apply at the nearest federal land office or write to the general land office in the department of the interior, Washington, D. C. In general, it may be said that any person who is the head of a family or is 21 years old and a citizen of the United States, or has declared his intention to be such, and who is not the proprietor of more than 160 acres of land, is entitled to enter 160 acres of public land as a homestead. He is obliged to pay certain fees and commissions, ranging from $7 to $18, according to the amount of land entered and its location, to live upon the land for a certain length of time and to cultivate a certain amount of it. Recent laws provide for enlarged homesteads of 320 acres in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, South Dakota, Oregon, Utah, Washington and Wyoming, on nonmineral, non-irrigable and nontimbered land; also for stock raising homesteads of 640 acres on land fit only for grazing or forage growing purposes.

UNITED STATES ARSENALS.

The largest of the United States arsenals are located at Rock Island, Ill., and Springfield, Mass. Others are at Pittsburgh, Pa.; Augusta, Ga.; Benicia, Cal.; Columbia, Tenn.; Fort Monroe, Va.; Philadelphia, Pa.; Indianapolis, Ind.; Governor's island, N. Y.; Jefferson barracks, Mo.; Sandy Hook, N. Y.; San Antonio, Tex.; Dover, N. J.; Watertown, Mass., and Watervliet, N. Y. Some of the above are merely powder depots, the principal manufacturing plants being at Rock Island, Springfield and Watervliet. The navy yards are also arsenals.

POSTAL INFORMATION.

DOMESTIC RATES.

First-Class Matter.

Rates of postage—Letters and other first-class matter, 2 cents for each ounce or fraction thereof. Postcards and postal cards, 1 cent each.

"Drop letters," addressed for delivery at the office where mailed, 2 cents for each ounce or fraction thereof when deposited at postoffices where letter carrier service is not established. There is no drop rate on mail other than letters.

The limit of weight of first-class matter is four pounds.

First-class matter includes written matter, namely, letters, postal cards, postcards (private mailing cards) and all matter wholly or partly in writing, whether sealed or unsealed (except manuscript copy accompanying proof sheets or corrected proof sheets of the same and the writing authorized by law on matter of other classes). Also matter sealed or otherwise closed against inspection.

Second-Class Matter.

Rate of postage—Newspapers and periodical publications of the second class, when sent unsealed by others than the publisher or a news agent, 1 cent for each four ounces or fraction thereof on each separately addressed copy or package of unaddressed copies. To be entitled to this rate the copies must be complete. Incomplete copies are third-class matter.

Second-class matter includes newspapers and periodicals bearing notice of entry as second-class matter. No limit of weight is prescribed.

On and after July 1, 1918, the rates of postage on publications entered as second-class matter, when sent by the publisher or a news agent to subscribers or to other agents for the purpose of sale, on the portion of a publication devoted to other matter than advertisements, shall be 1¼ cents per pound or fraction thereof until July 1, 1919; after that 1½ cents per pound or fraction thereof; on the portion of a publication devoted to advertisements the rates per pound or fraction thereof for delivery within the several zones devoted to fourth-class matter shall be: From July 1, 1918, to July 1, 1919, for the 1st and 2d zones, 1¼ cents; 3d zone, 1½ cents; 4th zone, 2 cents; 5th zone, 2¼ cents; 6th zone, 2½ cents; 7th zone, 3 cents; 8th zone, 3¼ cents; between July 1, 1919, and July 1, 1920, for 1st and 2d zones, 1½ cents; 3d zone, 2 cents, 4th zone, 3 cents; 5th zone, 3½ cents; 6th zone, 4 cents; 7th zone, 5 cents; 8th zone, 5½ cents; from July 1, 1920, to July 1, 1921, for 1st and 2d zones, 1¾ cents; 3d zone, 2½ cents; 4th zone, 4 cents; 5th zone, 4¾ cents; 6th zone, 5½ cents; 7th zone, 7 cents; 8th zone, 7¾ cents; after July 1, 1921, for the 1st and 2d zones, 2 cents; 3d zone, 3 cents; 4th zone, 5 cents; 5th zone, 6 cents; 7th zone, 9 cents; 8th zone, 10 cents.

In the case of newspapers entitled to be entered as second-class matter and published in the interest of religious, educational, scientific, philanthropic, agricultural, labor or fraternal organizations, not organized for profit, the rates, irrespective of the zone in which delivered (except where the same are deposited in a letter carrier office for delivery by its carrier, in which case the old rate prevails), shall be 1⅛ cents a pound or fraction thereof between July 1, 1918, and July 1, 1919, and after that 1¼ cents.

Third-Class Matter.

Rate of postage—On unsealed third-class matter the rate is 1 cent for each two ounces or fraction thereof on each individually addressed piece or package.

Third-class matter embraces circulars, newspapers and periodicals not admitted to the second class, nor embraced in the term "book," miscellaneous printed matter on paper not having the nature of an actual personal correspondence, proof sheets, corrected proof sheets and manuscript copy accompanying the same, and matter in point print or raised characters used by the blind. (Books are included in fourth-class or parcel post mail.)

The limit of weight of third-class matter is four pounds.

Fourth-Class Matter (Domestic Parcel Post).

Fourth-class matter embraces that known as domestic parcel post mail and includes farm and factory products (and books), not now embraced by law in either the first or second class or (with the exception of books) in the third class, not exceeding seventy pounds in weight (when mailed for delivery within the first or second zones, nor exceeding fifty pounds in weight when mailed for delivery within any of the other zones), nor greater in size than 84 inches in length and girth combined, nor in form or

kind likely to injure the person of any postal employe or damage the mail equipment or other mail matter and not of a character perishable within a period reasonably required for transportation and delivery.

Rates of postage—To be fully prepaid—unsealed—are as follows:

(a) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance.

(b) Parcels weighing 8 ounces or less containing books, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance.

(c) Parcels weighing more than 8 ounces, containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces are chargeable, according to distance or zone, at the pound rates shown in the zone table, a fraction of a pound being considered a full pound.

Zones—Parcel Post Guide and Maps.

For parcel post purposes the United States is divided into units of area thirty minutes square. Such units form the basis of the eight postal zones. To ascertain in which zone a postoffice is located from the office of mailing, a parcel post guide, costing 55 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone key is furnished with the guide for use in the units of area in which some of the largest postoffices are located, and makes the map for those units unnecessary. The guide and maps may be purchased by sending a money order to the third assistant postmaster-general, Washington, D. C. Stamps are not accepted.

Insurance of Fourth-Class Mail.

Fees and conditions—Fourth-class or domestic parcel post mail (but no other) may not be registered, but may be insured against loss in an amount equivalent to its actual value, but not to exceed $5 in any one case, on payment of a fee of 3 cents; not to exceed $25 on payment of a fee of 5 cents; not to exceed $50 on payment of a fee of 10 cents, or not to exceed $100 on payment of a fee of 25 cents, in addition to the postage, both to be prepaid by stamps affixed.

Collect-on-Delivery Service.

Conditions and fee—Parcels of fourth-class or parcel post matter (but no other) may be sent C. O. D. from one domestic money order postoffice to another, including those in the Canal Zone, on payment of a fee of 10 cents in addition to the postage, both to be prepaid with stamps affixed. The amount to be collected and remitted to the sender must not exceed $100. The remittance is made by postoffice money order, the fee therefor being included in the amount collected from the addressee. A C. O. D. tag furnished by the postmaster must be filled in by the sender and attached to the parcel. The C. O. D. fee also covers insurance against loss up to $50.

Postal Cards.

Postal cards are furnished at the postage value represented by the stamp impressed thereon; single postal cards for domestic and foreign correspondence at 1 cent and 2 cents each, respectively, and reply (double) postal cards at 2 cents and 4 cents each, respectively.

Special Delivery Service.

Special delivery service is the prompt delivery of mail by messenger during prescribed hours to persons who reside within the carrier limits of city delivery offices, to patrons of rural service who reside more than one mile from postoffices but within one-half mile of rural routes, and to residents within one mile of any postoffice.

This service is obtained by placing on any letter or article of mail a special delivery stamp or 10 cents' worth of ordinary stamps in addition to the lawful postage. When ordinary stamps are used the words "Special Delivery" must be placed on the envelope or wrapper, directly under, but never on the stamps; otherwise the letter or article will not be accorded special delivery service.

Registry System.

Any matter, properly addressed and bearing the name and address of the sender, admissible to the domestic mails (except fourth-class mail, which may be insured), or to the postal union mails (except foreign "parcel post" packages for Barbados, Curacao, Dutch Guiana, France, Great Britain, Guadeloupe, Martinique, the Netherlands and Uruguay), may be registered. Foreign "parcel post" mail must be taken to the postoffice to be registered, but other mail may be registered at any postoffice or postoffice station by rural carriers, and, when sealed and not cumbersome, by city carriers in residential districts.

The registry fee for each separate article, foreign or domestic, is 10 cents in addition to the postage, both to be fully prepaid.

Indemnity for lost registered mail will be paid as follows:

Domestic mail, first class (sealed), up to $50, actual value; third class (unsealed), up to $25, actual value.

Foreign mail, amount claimed within limit of 50 francs ($9.65), for total loss (not partial loss or rifling) of a registered article exchanged between the United States and a postal union country, except foreign parcel post matter, and losses beyond control ("force majeure").

Application for a money order must be made on a form furnished for that purpose and be presented at the money order window of the postoffice or one of its stations. Money orders are issued for any desired amount from 1 cent to $100, and when a larger sum than $100 is to be sent any number of additional orders may be obtained. Applications may be made through rural carriers, who will furnish the necessary forms and give receipts for the amounts.

International money orders, payable in almost any part of the world, may be obtained at all of the larger postoffices and at many of the smaller ones.

Fees for money orders payable in the United States (which includes Hawaii, Porto Rico and the Virgin islands) and its possessions, comprising the Canal Zone, Guam, the Philippines and Tutuila, Samoa; also for orders payable in Bermuda, British Guiana, British Honduras, Canada, Cuba, Mexico, Newfoundland, at the United States postal agency at Shanghai (China), in the Bahama islands and in certain other islands in the West Indies:

For orders from $0.01 to $2.50	3 cents
For orders from 2.51 to 5.00	5 cents
For orders from 5.01 to 10.00	8 cents
For orders from 10.01 to 20.00	10 cents
For orders from 20.01 to 30.00	12 cents
For orders from 30.01 to 40.00	15 cents
For orders from 40.01 to 50.00	18 cents
For orders from 50.01 to 60.00	20 cents
For orders from 60.01 to 75.00	25 cents
For orders from 75.01 to 100.00	30 cents

The fees for foreign money orders payable in any country on which a money order may be drawn, other than those named above, may be ascertained upon inquiry at the postoffice.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

Established by act of Congress March 21, 1866.

Names and Location of Branches—Central, Dayton, O.; Northwestern, Milwaukee, Wis.; Southern, Hampton, Va.; Eastern, Togus, Me.; Western, Leavenworth, Kas.; Marion, Marion, Ind.; Pacific, Santa Monica, Cal.; Danville, Danville, Ill.; Mountain, Johnson City, Tenn.; Battle Mountain Sanitarium, Hot Springs, S. D.

Board of Managers—The president of the United States, the chief justice of the Supreme court, the secretary of war ex officiis, Washington, D. C.; president, Capt. John C. Nelson, Logansport, Ind.; first vice-president, Maj. James W. Wadsworth, Geneseo, N. Y.; secretary, James S. Catherwood, Hoopeston, Ill.; Col. H. H. Markham, Pasadena, Cal.; Menander Dennett, Lewiston, Me.; Col. George Black, Olathe, Kas.; Gen. George H. Wood, Dayton, O.

General treasurer—Col. C. W. Wadsworth.

Inspector-general and chief surgeon—Col. James E. Miller.

Requirements for Admission.

1. Honorable discharge from the United States service.

2. Disability which prevents the applicant from earning a living by labor.

3. Applicants for admission will be required to abide by all the rules and regulations made by the board of managers, perform all the duties required of them and obey all the lawful orders of the officers of the home.

4. A soldier or sailor to be admitted must forward with his application his discharge paper, his pension certificate if he is a pensioner and his discharge from a state home if he has been an inmate of such home. These papers are retained at the branch to which he is admitted to prevent their loss or fraud, but are returned to him when he is discharged. Soldiers or sailors whose pensions exceed $16 a month are not admitted to the home except for special reasons.

The National Home for Disabled Volunteer Soldiers is supported by the United States government. The annual appropriation for that purpose is about $4,000,000.

STATE SOLDIERS' HOMES.

There are a number of state homes for disabled volunteer soldiers who, for various reasons, are unable to obtain admission to the national homes. The federal government contributes toward the support of the state homes the sum of $100 for each soldier, based upon the average attendance for the year; the remainder of the expenses is paid by the states themselves. Some of these homes are on the cottage plan. Following is a list of the state homes:

California—Yountville.	New Jersey—Kearny and Vineland.
Colorado—Monte Vista.	New Hampshire—Tilton.
Connecticut — Noroton Heights.	New York—Bath and Oxford.
Illinois—Quincy.	North Dakota—Lisbon.
Idaho—Boise.	Ohio—Sandusky.
Indiana—Lafayette.	Oregon—Roseburg.
Iowa—Marshalltown.	Pennsylvania—Erie.
Kansas—Fort Dodge.	Rhode Island—Bristol.
Massachusetts—Chelsea.	S. Dakota—Hot Springs.
Michigan—Grand Rapids.	Vermont—Bennington.
Minnesota—Minnehaha.	Washington—Orting and Port Orchard.
Missouri—St. James.	Wisconsin—Waupaca.
Montana — Columbus Falls.	Wyoming—Cheyenne.
Nebraska—Grand Island and Milford.	

HOME FOR REGULAR ARMY SOLDIERS.

The United States maintains a home for disabled and discharged soldiers of the regular army at Washington, D. C. All soldiers who have served twenty years in the army and all soldiers who have incurred such disability, by wounds, disease or injuries in the line of duty while in the regular army, as unfits them for further service are entitled to admission to the home. The home is in charge of a board of commissioners, consisting of the governor of the home, the adjutant-general of the army, the judge-advocate, the commissary-general, the quartermaster-general, the chief of engineers and the surgeon-general. The present governor is Lieut.-Gen. S. B. M. Young (retired).

CONFEDERATE SOLDIERS' HOMES.

Confederate veterans of the civil war have a home at Beauvoir, near Biloxi, Miss. The residence there of Jefferson Davis in his last years was secured in 1902 as a refuge for helpless old southern soldiers by the United Sons of Confederate Veterans. It is supported by that society and the United Daughters of the Confederacy. Another home for confederate veterans was opened in Washington, D. C., May 24, 1913, by the women of the Southern Relief association.

DEATH OF ADELINA PATTI.

Adelina Patti, one of the world's most famous singers, died at her home, Craig-y-Nos castle, Penycae, Wales, Sept. 27, 1919, in her 77th year. She was born in Madrid, Spain, Feb. 19, 1843, daughter of Salvatore Patti of Catania, Sicily, and of Caterina Chiesi, an opera singer. She made her debut in the Academy of Music in New York city in November, 1859, and in London in May, 1861. Speedily winning fame she appeared at all the chief musical centers of the old and new world and it was generally agreed that in her prime she was without an equal as an opera singer. She was married three times, her first husband being the Marquis de Caux; the second, Sig. Nicolini, and the third, Baron Rolf Cederstrom.

NATIONAL PROHIBITION AMENDMENT RATIFIED.

The house of representatives in Washington, D. C., by a vote of 282 to 128 adopted, Dec. 17, 1917, the senate joint resolution submitting to the states an amendment providing for the suppression of the liquor traffic one year after the ratification of the amendment by the required thirty-six state legislatures and also providing that the amendment shall be inoperative unless ratified within seven years from the date of submission. The resolution had passed the senate Aug. 1, 1917, by a vote of 65 to 20. It was amended in the house and the senate accepted the resolution as amended Dec. 18 by a rising vote of 47 yeas to 8 nays.

Following is the joint resolution as adopted by the house and senate:

"Article —. Section 1. After one year from the ratification of this article the manufacture, sale or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

"Sec. 2. The congress and the several states shall have concurrent power to enforce this article by appropriate legislation.

"Sec. 3. This article shall be inoperative unless it shall have been ratified as an amendment to the constitution by the legislatures of the several states, as provided in the constitution, within seven years from the date of the submission hereof to the states by the congress."

The proposed amendment was submitted to state legislatures for ratification and by Jan. 16, 1919, more than thirty-six, the number required for making an amendment to the constitution valid, had taken affirmative action. The dates on which the various states ratified the amendment were as follows:

1918.	
Mississippi, Jan. 9.	Maine, Jan. 8.
Virginia, Jan. 10.	W. Virginia, Jan. 9.
Kentucky, Jan. 14.	California, Jan. 13.
South Carolina, Jan. 23	Washington, Jan. 13.
North Dakota, Jan. 25	Illinois, Jan. 14.
Maryland, Feb. 13.	Indiana, Jan. 14.
Montana, Feb. 19.	Arkansas, Jan. 14.
Texas, March 4.	Kansas, Jan. 14.
Delaware, March 18.	No. Carolina, Jan. 14.
So. Dakota, March 20	Alabama, Jan. 14.
Massachusetts, April 2	Colorado, Jan. 15.
Arizona, May 24.	Iowa, Jan. 15.
Georgia, June 26.	New Hampshire, Jan. 15
Louisiana, Aug. 8.	Oregon, Jan. 15.
Florida, Nov. 27.	Utah, Jan. 15.
	Nebraska, Jan. 16.
1919.	Missouri, Jan. 16.
Michigan, Jan. 2.	Wyoming, Jan. 16.
Ohio, Jan. 7.	Wisconsin, Jan. 17.
Oklahoma, Jan. 7.	Nevada, Jan. 21.
Idaho, Jan. 8.	Vermont, Jan. 29.
Tennessee, Jan. 8.	New York, Jan. 29.
	Pennsylvania, Feb. 25.

Connecticut, New Jersey and Rhode Island refused to ratify the federal prohibition amendment.

The states dry prior to December, 1917, were:

Alabama.	Maine.	Oregon.
Arizona.	Michigan.	South Carolina.
Arkansas.	Mississippi.	South Dakota.
Colorado.	Montana.	Tennessee.
Georgia.	Nebraska.	Utah.
Idaho.	North Carolina.	Virginia.
Iowa.	North Dakota.	Washington.
Kansas.	Oklahoma.	West Virginia.

Prohibition bills were passed by Ohio, Texas, Missouri and Delaware in 1919. A proposed amendment to the Michigan constitution permitting the sale and manufacture of beer and wine was defeated at the state election April 7, 1919.

RATIFICATION PROCLAIMED.

Ratification of the prohibition amendment to the federal constitution was formally proclaimed Jan. 29, 1919, by Frank L. Polk, acting secretary of state in the absence of Secretary Robert Lansing, who was attending the peace conference in Paris. Though the document was dated the 29th, legal authorities in the department held that the ratification was accomplished when the thirty-sixth state acted affirmatively on Jan. 16 and that under the terms of the amendment itself prohibition would become effective one year from that date, or Jan. 16, 1920.

The proclamation was signed by Mr. Polk at 11:20 a. m. in the presence of Senator Sheppard of Texas, author of the amendment resolution; Former Secretary Bryan, Representative Randall of California, prohibitionist member of the house, and officials of the Anti-Saloon League of America, the Woman's Christian Temperance union and other anti-saloon organizations.

Mr. Polk used several pens in affixing his signature and presented them to Senator Sheppard, Mr. Bryan, Representative Randall and others.

The proclamation follows:

"To all to whom these presents shall come, greeting:

"Know ye, that the congress of the United States at the second session 65th congress begun at Washington on the 3d day of December in the year 1917, passed a resolution in the words and figures following—to wit:

"'Joint resolution, proposing an amendment to the constitution of the United States:

"'Resolved by the senate and house of representatives of the United States of America in congress assembled (two-thirds of each house concurring therein): That the following amendment to the constitution be, and hereby is, proposed to the states to become valid as a part of the constitution when ratified by the legislatures of the several states as provided by the constitution:

"'Article —. Section 1. After one year from the ratification of this article the manufacture, sale or transportation of intoxicating liquors within, the importation thereof into or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

"'Section 2. The congress and the several states shall have power to enforce this article by appropriate legislation.

"'Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the constitution by the legislatures of the several states, as provided in the constitution, within seven years from the date of the submission hereof to the states by the congress.'

"And, further, that it appears from official documents on file in this department that the amendment to the constitution of the United States proposed as aforesaid has been ratified by the legislatures of the states of Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Hampshire, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, South Carolina, South Dakota, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin and Wyoming.

"And, further, that the states whose legislatures have so ratified the said proposed amendment constitute three-fourths of the whole number of states in the United States.

"Now, therefore, be it known that I, Frank L. Polk, acting secretary of state of the

United States, by virtue and in pursuance of section 205 of the revised statutes of the United States, do hereby certify that the amendment aforesaid has become valid to all intents and purposes as a part of the constitution of the United States.

"In testimony whereof I have hereunto set my hand and caused the seal of the department of state to be affixed.

"Done at the city of Washington this 29th day of January, in the year of our Lord one thousand nine hundred and nineteen.

"FRANK L. POLK,
"Acting Secretary of State."

PROHIBITION DURING WAR AND DEMOBILIZATION.

In an act passed by congress and approved Nov. 21, 1918, the following provisions were made:

After June 30, 1919, until the conclusion of the present war and thereafter until the termination of demobilization, the date of which shall be determined and proclaimed by the president of the United States, for the purpose of conserving the man power of the nation, and to increase efficiency in the production of arms, munitions, ships, food and clothing for the army and navy, it shall be unlawful to sell for beverage purposes any distilled spirits, and during said time no distilled spirits held in bond shall be removed therefrom for beverage purposes except for export. After May 1, 1919, until the conclusion of the present war and thereafter until the termination of demobilization, the date of which shall be determined and proclaimed by the president of the United States, no grains, cereals, fruit or other food product shall be used in the manufacture or production of beer, wine or other intoxicating malt or vinous liquor for beverage purposes. After June 30, 1919, until the conclusion of the present war and thereafter until the termination of demobilization, the date of which shall be determined and proclaimed by the president of the United States, no beer, wine or other intoxicating malt or vinous liquor shall be sold for beverage purposes except for export. The commissioner of internal revenue is hereby authorized and directed to prescribe rules and regulations, subject to the approval of the secretary of the treasury, in regard to the manufacture and sale of distilled spirits and removal of distilled spirits held in bond after June 30, 1919, until this act shall cease to operate, for other than beverage purposes; also in regard to the manufacture, sale and distribution of wine for sacramental, medicinal or other than beverage uses. After the approval of this act no distilled, malt, vinous, or other intoxicating liquors shall be imported into the United States during the continuance of the present war and period of demobilization: Provided, That this provision against importation shall not apply to shipments en route to the United States at the time of the passage of this act.

Any person who violates any of the foregoing provisions shall be punished by imprisonment not exceeding one year, or by fine not exceeding $1,000, or by both such imprisonment and fine: Provided, That the president of the United States be, and hereby is, authorized and empowered, at any time after the passage of this act, to establish zones of such size as he may deem advisable about coal mines, munition factories, shipbuilding plants and such other plants for war material as may seem to him to require such action whenever in his opinion the creation of such zones is necessary to, or advisable in, the proper prosecution of the war, and that he is hereby authorized and empowered to prohibit the sale, manufacture or distribution of intoxicating liquors in such zones, and that any violation of the president's regulations in this regard shall be punished by imprisonment for not more than one year, or by fine or not more than $1,000 or by both such fine and imprisonment; Provided further, That nothing in this act shall be construed to interfere with the power conferred upon the president by section fifteen of the food-control act, approved Aug. 10, 1917. (Public No. 40, 65th congress).

PROHIBITION ACT ENFORCED.

The act quoted above was rigidly enforced in most states beginning July 1, 1919, and thereafter there was no open sale of wines and liquors, though beer containing not more than 2¾ per cent of alcohol continued to be sold in some states. There was, however, much illicit selling of the prohibited spirits and many arrests were made by the federal authorities, especially in the large cities.

LEGAL PROCEEDINGS.

Steps were taken early in the year by distillers and brewers to test the constitutionality both of the war time prohibition act and the constitutional amendment providing for national prohibition. Many of them met in Chicago Jan. 7 and decided to fight the dry forces in every state in the union and before the United States Supreme court. Levy Mayer of Chicago was retained as chief counsel. One of their contentions was that the amendment was unconstitutional under article X, which provides that powers not delegated to the United States by the constitution nor prohibited by it to the states shall be reserved to the states respectively.

On the same day that the distillers met in Chicago the United States Supreme court sustained the constitutionality of the Webb-Kenyon act forbidding the shipment of liquor into dry territory. The decision made it evident that the same conclusions would apply to the prohibition amendment to the constitution when brought up for review.

Preliminary action toward testing the war time prohibition act was taken in New York city by the filing of a suit to restrain the Everard Brewery company from suspending its manufacturing activities May 1 and its sales July 1. The complaint, which was drawn up by Elihu Root, alleged that the emergency prohibition clause of the agricultural bill adopted on Nov. 21, 1918, is unconstitutional as a measure intended to safeguard the national security and defense, the armistice having been signed, hostilities ceased, and orders given preliminary to reduction of the military forces before that date.

On March 19 William D. Guthrie, Elihu Root and William L. Marbury, representing the United Brewers' association, applied to the federal District court in New York city for an injunction restraining the collector of internal revenue and the United States district attorney from beginning any proceedings to interfere with the Jacob Hoffman Brewing company's contemplated production of beer of 2¾ per cent alcoholic content.

The complaint not only challenged the revenue department's definition of intoxicants as without legal authority, but also attacked the constitutionality of the war time prohibition act forbidding the manufacture after May 1 and the sale after July 1 of intoxicants. It alleged "purpose, intent and threat" on the part of the commissioner of internal revenue and the department of justice to enforce against the complainant and its officers and employes the various penalties established for violations of the revenue rulings.

Federal Judge Mayer on May 23 granted the injunction asked for by the United Brewers' association until the court had passed upon the legality of the emergency prohibition act.

Gov. Beeckman of Rhode Island signed a resolution passed by the general assembly di-

recting the attorney-general to secure from the United States Supreme court a determination of the constitutionality of the prohibition amendment.

Attorney-General A. Mitchell Palmer on June 30 announced that the department of justice would enforce the war time prohibition act, but that until the courts determined whether beer containing less than 2¾ per cent alcohol was or was not intoxicating no arrests except in test cases would be made for its sale.

In Boston, Mass., Federal Judge George W. Anderson held on July 15 that the sale of nonintoxicating beer was not illegal. On the same day in Pittsburgh, Pa., Federal Judge W. H. S. Thomson overruled the demurrers of the Pittsburgh and Independent brewing companies to charges of violating the war time prohibition act. In New Orleans, La., on the same day Federal Judge Rufus E. Foster sustained a demurrer filed by the American Brewing company to an indictment charging that the manufacture of beer of more than one-half of one per cent of alcoholic content was in violation of the war time prohibition act.

Beer of 2¾ per cent alcoholic content was held to be intoxicating in a decision handed down by Federal Judge Thomas Ives Chatfield of Brooklyn, N. Y., July 24, in a test case brought by the government against Martin Schmauder of New Haven, Conn.

Manufacture or sale of malt beverages containing one-half of 1 per cent or more of alcohol was held illegal by Federal Judge George T. Page in Chicago, July 25, when he upheld District Attorney Clyne in the test beer suit as against the Stenson Brewing company, overruling the demurrer of the defendant to the bill of information filed by the government.

"In stating that no beer or other intoxicating liquors could be manufactured, congress obviously meant that beer or other beverages containing one-half of 1 per cent or more alcohol were intoxicating," said Judge Page. "In the revenue section of the act a tax is provided on all liquors of less than one-half of 1 per cent as unfermented."

July 24 Levy Mayer, as counsel for the Association Opposed to National Prohibition, issued a statement taking the ground that forty-five state legislatures having ratified the prohibition amendment, it will be void if the people in ten of the states where the referendum has been instituted should reverse the action of their legislatures.

In those states whose constitutions reserve to the people the right to referendum there is a provision, in substance, that "all acts, bills, and resolutions adopted by the legislature shall not take effect until a specified time after the legislature has adjourned," Mr. Mayer said.

"During that time all such acts, bills, and resolutions are suspended and do not have the force of law. If during that time the people petition for a referendum, the act, bill or resolution is entirely suspended until the people have voted either in favor or against the proposition. The right of referendum exists in fifteen states.

"To date, legislatures of forty-five states have ratified the eighteenth amendment. The federal constitution requires thirty-six states. Rhode Island, Connecticut and New Jersey have not ratified. If the people in ten of the referendum states that are included among the forty-five do not approve of the ratification resolutions of their respective legislatures, then only thirty-five states will have ratified the amendment and the amendment will not have received the ratification of the requisite three-fourths, and, therefore, the amendment will not have been adopted. The states in which the referendum proceedings have been invoked are:

"Michigan, Ohio, Missouri, Arkansas, New Mexico, Colorado, Nebraska, Washington, California, Nevada, Maine, Oklahoma, Oregon, Utah and Idaho. Of these fifteen, the petitions were thrown out in Oregon, Utah and Idaho. An appeal from the decisions of the highest courts of Oregon, Utah and Idaho may be taken to the United States Supreme court."

In Ohio, Sept. 30, the state Supreme court affirmed a decision of the lower courts dismissing a petition seeking to compel the secretary of state to refuse to accept petitions filed by the Ohio Home Rule association calling for a referendum at the November election on the ratification of the prohibition amendment.

PROHIBITION ENFORCEMENT.

For congressional legislation to enforce the prohibition amendment to the constitution see "Work of the Sixty-Sixth Congress," in this volume.

LIQUOR PROHIBITION IN NORWAY.

In Norway a plebiscite to determine the question of national prohibition of alcohol was taken Oct. 6, 1919, and resulted in a vote of 528,455 for such prohibition and 284,137 against. The measure applies only to whisky, brandy and other strong liquors and does not affect wines and beers.

CENTENARIANS IN THE UNITED STATES.

According to the census of 1910 there were then in the United States 3,555 persons 100 years of age or over. Of these, 1,380 were men and 2,175 were women. Classified according to the color they were: White men, 326; white women, 438; total, 764; negro men, 1,004; negro women, 1,671; total, 2,675; Indian men, 50; Indian women, 66; total, 116. Classified as to place of birth, 439 were native white and 293 foreign born white. The number of centenarians reported by the census of 1900 was 3,504. "It may be noted," says a census report in commenting on these figures, "that the proportion of centenarians according to the census returns was less in 1910 than in 1900. In fact, the proportion has steadily decreased from census to census for over half a century. The number of centenarians reported in 1910 was equal to 4 for each 100,000 of the total population, while the corresponding ratio in 1850 was 11. It is improbable that any such decrease in longevity has actually occurred. By no means have all those who report themselves as 100 years old or more, in fact, reached that age, and the apparent reduction in the proportion of centenarians is probably due to greater accuracy in the returns."

Deaths of centenarians reported from Nov. 1, 1918, to Nov. 1, 1919:

CONSECUTIVE HIT RECORD.

Joe Wilhoit, outfielder of the Wichita, (Kas.) Western League team in 1919 hit safely in sixty-nine consecutive games. Jack Ness, first baseman of the Oakland (Cal.) team in 1915 hit safely in forty-nine consecutive games. The former record was held by Ty Cobb, who hit safely in forty consecutive games.

RECORD FOR CONSECUTIVE VICTORIES.

The mark of twenty consecutive victories set by the Providence club of the National league in 1884 was beaten by the New York National league team in 1916, when it scored twenty-six straight victories.

HOME RUN RECORD.

George (Babe) Ruth, pitcher in the Boston American league baseball team, set a new record in home run hits in the course of the season of 1919. He registered thirty, or three more than were made by Ed Williamson of the Chicago National league team in 1884 and five more than were made by John (Buck) Freeman in 1899 while a member of the old Washington (D. C.) National league team. The record now stands:

1919—Babe Ruth, Boston Americans.....30
1884—Ed Williamson, Chicago Nationals....27
1899—Buck Freeman, Washington Nationals.25

Consecutive Home Runs.

Babe Ruth in six successive times at bat, four in an exhibition game with the Baltimore Internationals on April 18 and two with the same club on the following day at Baltimore, Md., scored home runs, breaking the world's record.

PLAYS IN 533 CONSECUTIVE GAMES.

Fred Luderus, first baseman of the Philadelphia National league team had up to the end of the 1919 season played in 533 consecutive games of baseball. The former record of 478 games, held by Eddie Collins of the Chicago White Sox in 1914 to 1918 inclusive, was passed by Luderus on Aug. 3 when Luderus played his 479th straight game and received the congratulations of John Heydler, president of the National league, on his record.

YACHTING.

THE AMERICA'S CUP.

Record of Races.

1851—Aug. 22. In this, the year of the great exhibition in London, the Royal Yacht Club of England offered a cup to the winner of a yacht race around the Isle of Wight. The course was 60 miles in length. The race was won by the schooner yacht America, designed by George Steers for John C. Stevens of the New York Yacht club. The America was 94 feet over all, 88 feet on the water line, 22½ feet beam and 11½ feet draft. There was no time allowance and the competing yachts ranged in size from a three-masted 392-ton schooner, the Brilliant, to the 47-ton cutter the Aurora, which came in second in the race. The time of the America was 10 hours and 34 minutes; that of the Aurora was 24 minutes slower. The cup after that became known as the America's cup and has ever since been successfully defended.

Owing mainly to a disagreement as to the proper size of the competing yachts no races were arranged after 1903 until 1913, when an agreement was reached between the New York Yacht club and the Royal Ulster club to hold a race in 1914. Sir Thomas Lipton sent over the Shamrock IV. as challenger for the cup, but the great war in Europe put a stop to all further proceedings until Oct. 5, 1919, when Sir Thomas renewed the challenge for a race in 1920, which it was then thought would be accepted by the New York Yacht club.

*Time not taken. Yale stroke oar collapsed at end of 2½ miles. †Wartime substitute race on 2-mile course on the Housatonic river near New Haven, Conn.

Of the above races the first two were rowed on the Springfield (Mass.) course and the remainder (except the 1918 race) on the New London course, which is four miles straightaway. There were no dual races in 1896, 1897 and 1898. The Harvard-Yale freshman and junior varsity races are rowed at the same time and place as the eight oared races.

TWENTY-FOUR HOUR RECORD.

Joe Dawson in a Chalmers car made a new world's record for twenty-four hours by running 1,900¼ miles on the Sheepshead Bay speedway Aug. 2, 1917. The best previous record was 1,819 miles by Ralph Mulford on the same track May 1-2, 1916.

ONE-HOUR RECORD.

Driving a Packard on the Sheepshead Bay speedway at New York Nov. 12, 1917, Ralph De Palma made 112.4 miles in one hour. The best previous record was 107 miles by Jean Chassagne on the Brooklands track, England, in 1910.

TRANSCONTINENTAL RECORDS.

The coast to coast records were established in 1916. In the order of their occurrence the performances were as follows:

Robert Hammond in an Empire car drove from San Francisco to New York, a distance by the route taken of 3,384 miles, in 6 days 10 hours 59 minutes May 16-23. This lowered the record set the previous week by a Cadillac eight cylinder car, which made the trip from Los Angeles to New York in 7 days 11 hours 52 minutes.

Driving a Marmon 34, S. B. Stevens arrived in San Francisco at 5 p. m., July 29, just 5 days 18 hours 30 minutes out from New York city.

W. F. Sturm, driving a Hudson Super-Six, made the distance from San Francisco to New York in exactly 5 days 3 hours 31 minutes Sept. 13-18 and then made the return trip in 5 days 17 hours 32 minutes, making the time for the round trip 10 days 21 hours 3 minutes. The distance traveled was 6,592 miles.

CHICAGO-NEW YORK RECORD.

B. F. Durham and Al Walden drove from Chicago to New York in 31 hours flat June 6-7, 1916, the total mileage by the route taken being 1,047.

Lieut. Casale, France, June 14, 1919, 33,136 feet 5 inches.
Roland Rohlfs, Mineola, N. Y., July 25, 1919, 31,100 feet.
Roland Rohlfs, Mineola, N. Y., Sept. 13, 1919, 34,000 feet.
Roland Rohlfs, Mineola, N. Y., Sept. 18, 1919, 34,610 feet.

LONG NONSTOP FLIGHTS.

Capt. John Alcock and Lieut. Arthur W. Brown, British aviators, hold the record for the longest nonstop flight in a heavier-than-air machine. They crossed the Atlantic ocean June 14-15, 1919, from Newfoundland to Ireland, covering a distance estimated at 1,960 miles. Lieut. Roget of France made a flight of 1,375 miles on May 25, 1919. The NC-4 of the American navy made a flight of 1,219 miles in crossing the Atlantic from Newfoundland to the Azores May 16-17, 1919. The British dirigible R-34, which crossed the Atlantic from east to west and west to east in July, 1919, holds the record for the longest nonstop flight by a craft of that type—more than 3,200 miles.

RECORD FOR SPEED.

Records for speed by airplanes are to be accepted in most cases with reserve, as they are not always official. Sable Lacointe, a French aviator, was reported on Oct. 3, 1919, as flying three miles in one minute in a new type Monocoque at an altitude of 2,000 feet. In a flight from Dayton to Cleveland, O., Jan. 7, 1919, Pilot Eric Springer and Mechanician Ernest Longchamp flew at the rate of 172 miles an hour.

LINCOLN PARK TOURNAMENT.

In a roque tournament held in Lincoln park, Chicago, July 29-Aug. 7, 1919, J. C. Lathrop was the winner in the first division, L. L. McDermott in the second division and D. Sandberg in the third division.

NATIONAL CHAMPIONSHIP.

Edward Clark of Springfield, Mass., won the national championship at roque in the tournament of the National association held at Norwich, Conn., and ending Aug. 23, 1919, his score being eleven games won and one lost. His opponent in the final game was C. G. Williams of Washington, D. C., holder of the title.

WRESTLING.

LEWIS VS. STECHER.

In a contest for the heavyweight wrestling honors at the Coliseum, Chicago, March 3, 1919, Edward Lewis defeated Joe Stecher after a struggle lasting 2:12:37. A single fall determined the contest as it had been agreed that if the wrestling proceeded more than an hour and a half without a fall one flattening hold should decide the issue.

ZBYSZKO VS. LEWIS.

Wladek Zbyszko defeated Edward Lewis at Madison Square garden, New York, N. Y., March 21, 1919, after 1:34:37 of hard wrestling. Though nearly used up, the Polish wrestler in a last desperate effort grabbed Lewis about the body, lifted him high in the air and throwing him down landed him squarely on his back.

In the Coliseum, Chicago, April 28, 1919, Zbyszko defeated Lewis after 2:14:09 of high grade wrestling. Lewis had apparently had the best of the contest until his grip on his opponent slipped off and he fell on his side. The Pole leaped on him and held him down with a body scissors hold until the referee gave him the victory.

Zbyszko and Lewis met again in the Coliseum May 19, 1919, and this time Lewis was the winner, taking two falls out of three. The first was won by Zbyszko in 1:36:52 with a reverse body lock. Lewis won the second and third falls in 48:35 and 12:56 with head locks.

STECHER VS. ZBYSZKO.

Joe Stecher defeated Wladek Zbyszko in Louisville, Ky., May 9, 1919, in a one-fall match in 1:45:15. Stecher used the body scissors and bar arm holds.

BASKET BALL.

CONFERENCE CHAMPIONSHIP.

The University of Minnesota basket ball team won the "Big 10" or conference championship of 1919 with a percentage of 1.000. The University of Chicago was second with a percentage of .833, having lost two games out of twelve, one to the Northwestern team and one to Wisconsin. Team standing at close of season:

POLO.

AMERICAN CHAMPIONSHIPS.

The contests for the junior and senior polo championships of the United States took place on the grounds of the Philadelphia Country club beginning Sept. 13, 1919. The Meadowbrook second team of Westbury, L. I., won the junior title by defeating the Philadelphia Country club team in the final match 4½ goals to 3¼. The senior title went to the Rockaway Hunt club team by default, the deciding contest between that quartet and the Philadelphia Country club first team, which was to have taken place on Sept. 23, being called off on account of the unavoidable absence of Thomas Stokes, the forward of the Philadelphias.

DOG RACING.

HUDSON BAY DERBY.

The Hudson Bay Derby race of 100 miles for dog teams was won March 19, 1919, by Bates Campbell in 15:35. His team covered the course, which began and ended at The Pas, Manitoba, without stopping. Bates Campbell drove the same team that his brother, Albert Campbell, piloted to victory in the Winnipeg-St. Paul race in 1917. The trail was banked high with snow in places and was badly cut up in others.

EDITH CAVELL BURIED IN ENGLAND.

Edith Cavell, the English nurse whose execution by the Germans was one of the saddest tragedies of the world war, received extraordinary honors when her remains were brought to England for burial May 15, 1919. Her body was exhumed on March 17 from the unmarked grave in which the Germans had buried her after they had shot her to death early on the morning of Oct. 12, 1915, within a building at Schaerbeek, a suburb of Brussels, used in connection with the national shooting ground at that place. An examination revealed that she had been struck by four bullets, two of which entered her right side and two the left, one piercing the heart and causing instantaneous death. The body was well preserved and the features were perfectly recognizable.

Encased in a double coffin of oak and zinc the remains were permitted to rest in the Tir National cemetery until May 13, when they were placed on a gun carriage drawn by six black horses and taken to the Gare du Nord in Brussels. Both at the cemetery and the station military honors were paid to the martyred nurse by detachments of British and Belgian troops. A funeral service was conducted in the railroad station by the Rev. H. S. T. Gahan, the British chaplain who was with Miss Cavell on the evening before her execution. The coffin was then taken by train to Ostend, where it was placed on board the destroyer Radiant and conveyed to Dover, England. It arrived there on May 14 and was received by a special committee having charge of the funeral arrangements in England.

On the arrival of the body in London on May 15 a public funeral was held. The streets through which the cortege moved were congested with crowds and the vicinity of Westminster abbey, in which an impressive memorial service was held, was packed with a great multitude gathered to do reverent homage to the brave nurse who, as the bishop of London said, "deserved much from the British empire." In the abbey the services were conducted by the dean of Westminster in the presence of a large congregation of high British officials, representatives of foreign countries and persons prominent in many walks of life. The choir sang the 23d psalm, Sullivan's anthem, "Yea, though I walk through the valley of the shadow of death" and "I Heard a Voice from Heaven." The litany, the Lord's prayer and two collects were repeated, followed by the hymn, "Abide With Me." The benediction was then pronounced and the last post and reveille sounded. The services lasted half an hour, after which the procession left the abbey to the strains of Chopin's funeral march.

The body was then taken by train to Norwich, the home of Miss Cavell. The coffin was placed upon a gun carriage and carried to Norwich cathedral, where another service officially designated as the "funeral of Edith Cavell, a nurse who gave her life for her countrymen," was held. At the grave the latter portion of the burial service was conducted by the bishop and the hymn "Abide With Me," which Miss Cavell repeated shortly before her execution, was sung.

On the coffin in which she was buried was the simple inscription: "Edith Cavell. Born December 4, 1865. Died October 12, 1915."

CAPT. CHARLES FRYATT ALSO BURIED IN ENGLAND.

The remains of Capt. Charles Fryatt, who was executed by the Germans in Bruges, Belgium, July 27, 1916, on the charge of having attempted to ram a German submarine, were brought to England in July, 1919, and were buried with honors similar to those paid to Edith Cavell. The body was brought to Dover on a destroyer with a naval escort on July 7 and on the following day was taken by train to London, where national memorial services were held in St. Paul's cathedral. The interment took place at Dovercourt July 8.

LLOYD'S.

Lloyd's is an association of underwriters in London, England. Its name is derived from a coffee house kept by Edward Lloyd in Tower street in the 17th century, where underwriters met to transact business. They remained there until 1774, when they removed to the Royal Exchange, where they have since remained. Lloyd's was incorporated in 1871 by an act of parliament, the act being amended in 1911. It does not undertake insurance business as a corporation. This is conducted by its members on their own account but in accordance with the rules of the society. Lloyd's is also an organization for the collection and distribution of maritime intelligence which is published in Lloyd's List. This paper, originally established in 1696 as Lloyd's News, is the oldest newspaper in Europe with the exception of the London Gazette. Various works are published by the corporation for the benefit of the mercantile community.

ENLISTED STRENGTH OF ARMY.

The number of enlisted men to serve in the permanent regular army had not been determined up to the time this record was prepared (Nov. 1, 1919). The number provided for by the appropriation bills was only 225,000 men, but congress had under consideration measures contemplating a force of about 500,000 men.

ARMY ORGANIZATION.

When the United States entered the European war the army was entirely reorganized to conform to modern conditions of warfare. The number of men in each infantry regiment was increased, for example, to 3,500 men or more and that of an infantry division to more than 27,000 men. The new organization has been retained both in respect to the regular army and the national guard. Details of this organization follow:

Strength of Infantry Regiment.

At maximum strength an infantry regiment comprises 103 officers and 3,652 men. It is made up as follows, the figures including officers and men:

1 headquarters and headquarters company	303
3 battalions of 4 rifle companies each	3,078
1 supply company	140
1 machine gun company	178
1 medical detachment	56
	3,755

Each rifle company has a strength of 250 men and 6 officers. It is composed of a company headquarters (2 officers and 18 men) and four platoons. Each platoon includes:

1 headquarters	2
1 section bombers and rifle grenadiers	22
2 sections riflemen, 12 each	24
1 section auto riflemen (4 guns)	11
	59

The machine gun company has 6 officers and 172 men. It consists of the headquarters (3 officers and 21 men), 3 platoons (each with 1 officer and 46 men), and a train (13 men). Its armament is 12 machine guns of heavy type and 4 spare guns.

Transportation and Equipment.

The transportation equipment of the regiment is: 22 combat wagons, 16 rolling kitchens, 22 baggage and ration wagons, 16 ration carts, 15 water carts, 3 medical carts, 24 machine gun carts, 59 riding horses, 8 riding mules, 332 draft mules, 2 motorcycles with side cars, 1 motor car, 42 bicycles.

Fighting equipment for each regiment, in addition to the usual rifles, bayonets, pistols, etc., includes 480 trench knives (40 to each company), 192 automatic rifles (16 to each company), and 3 one-pounder cannon manned by the one-pounder cannon platoon of the regimental headquarters company.

Headquarters Company.

Each regimental headquarters company is made up of 7 officers and 294 men, as follows:

One headquarters platoon (93 officers and men) including 1 staff section (36 officers and men), 1 orderlies section (29 men), 1 band section (28 men).

One signal platoon (77 officers and men) including 1 telephone section (51 men), 1 section with headquarters (10 men), 1 section with 3 battalions (16 officers and men).

One sappers' and bombers' platoon (43 officers and men) including 1 section sappers (9 men) for digging and special work, 1 section bombers (34 officers and men).

One pioneer platoon (55 officers and men) for engineer work.

One one-pounder cannon platoon (33 officers and men).

Infantry Divisions.

The following summary of the organization of an infantry division completes the general outline of organization of the United States army for service in Europe. The figures are

the total of officers and men for each entry. Each infantry division comprises:

1 division headquarters	164
1 machine gun battalion of 4 companies	768
2 infantry brigades, each composed of 2 infantry regiments and 1 machine gun battalion of 3 companies	16,420
1 field artillery brigade composed of 3 field artillery regiments and 1 trench mortar battery	5,068
1 field signal battalion	262
1 regiment of engineers	1,666
1 train headquarters and military police	337
1 ammunition train	962
1 supply train	472
1 engineer train	84
1 sanitary train composed of 4 field hospital companies and 4 ambulance companies	940
	27,152

Artillery and Machine Gun Strength.

The new organization increases the ratio of artillery and machine gun strength of infantry. In place of the old division of three brigades with three infantry regiments in each are two brigades with two infantry regiments in each. But in the new as in the old organization there are three regiments of field artillery in each division, making the ratio of artillery to infantry regiments three to four, in place of three to nine. A trench mortar battery, added to the artillery brigade, and a one-pounder platoon, attached to each infantry regiment headquarters company, adds to the gun strength of the division.

A division now includes a total of fourteen machine gun companies. Each of the four infantry regiments has one; each of the two brigades has a machine gun battalion of three companies and the division has a machine gun battalion of four companies. This gives each division a mobile machine gun strength of ten companies, which can be used as special needs require, while each regiment still has its own machine gun equipment in one of its component companies. And, in addition, there are forty-eight sections of auto-rifiemen, each section carrying four light machine guns (automatic rifles), one section in each of the four platoons making up each rifle company.

REORGANIZATION OF THE NATIONAL GUARD.

The national guard of the United States was reorganized in 1919 on a sixteen division basis in accordance with plans approved by Secretary of War Baker on July 16. In a circular letter giving the details of the reorganization Maj.-Gen. J. McI. Carter, chief of the militia bureau, said that the national guard which existed prior to the war with the central European powers was drafted into the federal service and "after performing its duty with great honor and fidelity" had been discharged from its obligation and the time had arrived for its reorganization under the provisions of law. The infantry divisional districts, which are substantially the same as those in which the national guard was formed for service in the United States army, are:

51—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut.
52—New York.
53—Pennsylvania.
54—New Jersey, Delaware, Maryland, District of Columbia and Virginia.
55—North Carolina, South Carolina and Tennessee.
56—Alabama, Georgia and Florida.
57—Arkansas, Louisiana and Mississippi.
58—Ohio.
59—Indiana, Kentucky and West Virginia.
60—Illinois.
61—Michigan and Wisconsin.
62—Minnesota, Nebraska and Iowa.
63—Kansas and Missouri.
64—Texas and Oklahoma.
65—California, Utah, Nevada, Colorado, Arizona and New Mexico.
66—North Dakota, South Dakota, Montana, Idaho, Wyoming, Washington and Oregon.

There is one cavalry division of the national guard. It is assigned to the entire United States at large.

The plan as further outlined in Maj-Gen. Carter's circular provides:

"In accordance with the act of June 3, 1916, as amended by the act of July 11, 1919, the total strength of the national guard is to be obtained in annual increments, commencing with 200 men for each senator and representative in congress and increasing each year by not less than fifty per centum until a total peace strength of 800 enlisted men for the above representation has been reached.

"The appropriation for the support of the national guard for the fiscal year 1920 is based on 200 enlisted men for each senator and representative in congress, and provides for the maintenance of a total of 106,200 enlisted men, who have been prorated on this basis to the states and territories of the United States. The militia bureau in designating the number and kind of national guard units to be organized by the several states has been guided by the necessity of forming larger units, useful in the event of a federal emergency, while at the same time considering the interests of the states by providing for them a force capable of maintaining law and order.

"The plan comprising sixteen infantry divisions and one cavalry division cannot be completely realized during the fiscal year 1920 owing to the limitation of existing appropriations, but the organization of the national guard will be such as to form the necessary units for eight partially complete infantry divisions and one skeleton cavalry division which could be mobilized in an emergency by a combination of national guard districts.

"The secretary of war has decided that the fine services of the national guard divisions in the world war should receive the greatest recognition that it is possible to accord them. Their services and fine records are a national asset and the recognition accorded them should be of the same character. As a part of the army of the United States they won many of the laurels of that army. It has, therefore, been decided to perpetuate as many as possible of the national guard and national army units which took part in the war with Germany by continuing their designations in the permanent military establishment and in such a manner as to give representation to every state. Those divisions which cannot be incorporated in the permanent military establishment will be perpetuated by announcing them as reserve divisions, to be organized whenever a national emergency should require.

"You are therefore informed that designations other than those used in the war with Germany will be selected for all new national guard divisions, and the units which compose them."

RANK AND INSIGNIA OF ARMY AND NAVY OFFICERS.

The following table shows the rank of commissioned officers in the United States army and marine corps and the corresponding grades in the navy:

ARMY AND MARINE CORPS.	NAVY.
General.	Admiral.
Lieutenant-general.	Vice-admiral.
Major-general.	Rear-admiral.
Brigadier-general.	Commodore.
Colonel.	Captain.
Lieutenant-colonel.	Commander.
Major.	Lieutenant-commander.
Captain.	Lieutenant.
First lieutenant.	Lieutenant, jr. grade.
Second lieutenant.	Ensign.

Commissioned army officers wear the following insignia on the shoulder loop.

RANK AND INSIGNIA.

General—Four silver stars.
Lieutenant-general—Three silver stars.
Major-general—Two silver stars.
Brigadier-general—One silver star.
Colonel—Silver eagle.
Lieutenat-colonel—Silver oak leaf.
Major—Gold oak leaf.
Captain—Two silver bars.
First lieutenant—One silver bar.
Second lieutenant—No insignia.
Chaplain—Cross.

Commissioned officers of the navy wear the following devices on the collar:
Admiral—Anchor and four stars.
Vice-admiral—Anchor and three stars.
Rear-Admiral—Anchor and two stars.
Captain—Anchor and silver eagle.
Commander—Anchor and silver leaf.
Lieutenant-commander—Anchor and gold leaf.
Lieutenant—Anchor and two bars.
Lieutenant, junior grade—Anchor and one bar.
Ensign—One bar.

Following are the army service insignia:
Infantry—Crossed guns.
Cavalry—Crossed sabers.
Field artillery—Crossed cannon and numbers.
Coast artillery—Crossed cannon.
Engineer corps—Castle.
Aviation corps—Globe with wings.
Medical corps—Winged staff and serpents.
Signal corps—Crossed flags.
Quartermaster corps—Eagle on wheel.
Motor transport corps—Winged hat on bronze wheel.

Hat Cords.

Generals wear hat cords the color of gold, while those of other officers are gold and black. The branch of the service to which each enlisted man belongs is indicated by the color of the hat cord he wears:
Infantry—Light blue.
Cavalry—Yellow.
Artillery—Scarlet.
Engineers corps—Scarlet intertwined with white.
Signal corps—Orange intertwined with white.
Medical department—Maroon.
Quartermaster corps—Buff.
Ordnance department—Black intertwined with white.
Motor transport corps—Purple.

Chevrons.

First class privates wear on their coat sleeves or shirts the design of the department or service to which they belong. The designs or chevrons sewn on the sleeves of noncommissioned officers are as follows:
Lance corporal—One inverted V-shaped bar.
Corporal—Two bars.
Sergeant—Three bars.
First sergeant—Diamond mark under bars.
Stable sergeant—Horse's head under bars.
Color sergeant—Star under bars.
Battalion quartermaster sergeant—Three horizontal bars.
Chief trumpeter—One bar and bugle.

War Service Chevron.

A gold chevron of standard material and design, to be worn on the lower half of the left sleeve of all uniform coats, except fatigue coats, by each officer and enlisted man who has served six months in the zone of the advance in the war, and an additional chevron for each six months of similar service thereafter. Silver chevrons of similar design are worn by officers and men who were in the army during the war but did not see service overseas.

Wound Chevrons.

A gold chevron of pattern identical with that of the war service chevron, to be worn on the lower half of the right sleeve of all uniform coats, except fatigue coats, by each officer and enlisted man who has received a wound in action with the enemy which necessitates treatment by a medical officer, and an additional chevron for each additional wound, but not more than one chevron will be worn for two or more wounds received at the same time. Disablement by gas necessitating treatment by a medical officer shall be considered to be a wound within the meaning of this order.

Honorable Discharge Chevrons.

As a recognition of duties performed in the service of the country each soldier on being discharged is furnished with two scarlet chevrons to be worn on the left sleeves, point up, midway between the elbow and the shoulder, one on the coat and one on the overcoat. These chevrons will serve to indicate to the country while the uniform is being worn that the wearer responded to the demands of the country, performing creditable service in the army, and finally received honorable discharge therefrom.

DECORATIONS AND MEDALS FOR VALOR.

Capt. George W. Brush, commander of the Army and Navy Legion of Valor, U. S. A., in an article contributed to the Army and Navy Journal, March 29, 1919, described the chief decorations and medals of valor and their origin as follows:

In these days when our boys are coming home from the greatest war in history wearing the decorations and medals awarded for acts of valor and heroism, it may be well to know a little of their meaning. The medals bestowed on our soldiers for acts of heroism should not be confounded with the medals of our various patriotic organizations such as the Grand Army of the Republic, the Loyal Legion, the Spanish War Veterans and the Sons and Daughters of the Revolution. These are adopted by these organizations and have no significance except to identify them as belonging to a particular organization.

It has long been the custom to reward soldiers who have performed special deeds of valor or heroism. The various countries have adopted medals to express different degrees of such service. The United States has its congressional medal of honor, and recently two additional decorations, the distinguished service cross and the distinguished service medal. England has her Victoria cross, the Distinguished Service Order and its military medal; France, the Legion of Honor, its croix de guerre and medaille militaire; Italy its Order of the Crown and Order of St. Maurice; Belgium its Order of Leopold and croix de guerre; Japan, the Order of the Rising Sun of various degrees; and Germany the iron cross of two classes and the grand cross.

Gen. Washington near the close of the revolutionary war established a badge of "military merit" and he himself received a gold medal, with the thanks of congress. It was not until the civil war that definite action was taken. Congress, in 1862, passed a law providing for a medal of honor for its soldiers in the ranks,

and in 1863 amended it so as to include officers. It also provided a medal of honor for the navy, but singularly did not include the officers. Recently this defect was remedied. The navy medal is different in design from that of the army.

The congressional medal of honor is the most difficult to win of any military decoration in the world. The requirements are so stringent that comparatively few are seen. So far as can be ascertained only twenty-four medals of honor have thus far been issued in the war just closed, while over 1,200 distinguished service crosses have been awarded. The requirements for our medals are given in concise form in Gen. Pershing's bulletin No. 25 to our army abroad. He says:

"The following instructions are published as a guide to all concerned in the manner of American awards for gallantry in action and exceptionally meritorious service and to set a standard for such awards. 1, The medal of honor, and 2, the distinguished service cross are awarded for gallantry in action.

"Medal of Honor—The award of the medal of honor is confined to officers and soldiers of the American army whose action complies with the following tests: (a) who have performed in action deeds of most distinguished bravery and self-sacrifice; (b) above and beyond the call of duty; (c) so conspicuous as to clearly distinguish them for gallantry and intrepidity above their comrades; (d) which involve risk of life or the performance of more than ordinarily hazardous service; (e) the omission of which would not justly subject the person to censure or for shortcoming or failure in the performance of his duty.

"Distinguished Service Cross—The award of the distinguished service cross is confined to any one who may distinguish himself or herself by extraordinary heroism in connection with military operations against an armed enemy of the United States under circumstances which do not justify the award of the medal of honor, and may be awarded to any person who while serving in any capacity with the army shall hereafter distinguish himself or herself or who since April 6, 1917, has distinguished himself or herself.

"Distinguished Service Medal—The award of the distinguished service medal will be confined to any one distinguishing himself or herself by exceptionally meritorious service to the government in a duty of great responsibility in time of war or in connection with or against an armed enemy of the United States."

There are other medals issued by the government representing service of various kinds, but the three described are the most important. The distinguished service medal may be awarded to civilians not engaged in military operations, but not the other two named.

The Victoria cross, the highest military decoration of Great Britain, was established Jan. 29, 1856, by Queen Victoria, "for conspicuous bravery or devotion in presence of the enemy." Second in importance is the Distinguished Service Order and third the military medal. England has also the royal red cross for women.

The origin of the most important French decoration, the Legion of Honor, is described in a translation from the French of Jules Martin, made by Miss M. Murphy for the Army and Navy Legion of Valor. In the period of the consulate, the year eight, it was designated as a national recompense to warriors who rendered distinguished service in battle for the republic; also to citizens who by their learning, talents or virtues contributed in establishing or defending the principles of the republic. In time of war heroic deeds were recognized; in time of peace it required twenty-five years of military service to be entitled to the decoration. In the period of the empire the Legion of Honor comprised four classes, grand officer, commandant, officer, legionary. By a decree of Jan. 30, 1805, Napoleon instituted a fifth degree, the "great decoration" or "great eagle," which since has taken the name of "grand croix." The imperial decree of March 1, 1808, which related to titles of nobility, gave future members of the legion the title of knight, to be transmissible to their descendants, and granted a net revenue of at least 3,000 francs.

Various changes have been made from time to time. The government of the national defense decreed Oct. 28, 1870, that the Legion of Honor be exclusively reserved as a recompense for military service and for acts of bravery and devotedness. The law of July 25, 1873, abrogates this.

The iron cross of Germany was instituted by royal decree of March 10, 1813, as a special decoration for patriotic services, to be "earned during the impending war in battle with the enemies or in the field or at home." It consists of two classes and a "grand cross." Originally instituted for one war only, it was reinstituted July 19, 1870, for the Franco-Prussian war and has existed since that time. The grand cross may be awarded only "to the commanding officer for winning a decisive battle through which the enemy was forced to give up his position." The iron cross, it was decreed in 1870, is to be bestowed "regardless of rank and position as a reward for meritorious services rendered either in actual battle with the enemy or at home in connection with this struggle." In the great world war just closed the iron crosses have been distributed to the German army in lavish profusion.

THE VICTORY MEDAL.

The secretary of war through Gen. Peyton C. March, chief of staff, issued the following order June 30, 1919:

1. A war service medal, to be known as the victory medal, will be awarded to all officers and enlisted men who served on active duty in the army of the United States at any time between April 6, 1917, and Nov. 11, 1918, and whose service was honorable.

2. Battle clasps will be awarded for each of the major operations and for the occupation of a defensive sector. Only one defensive sector clasp will be awarded to any one individual. To be eligible for a battle clasp the officer or enlisted man must have been actually present, under competent orders, in the sector of the army, corps, division or similar independent organization during the period in which the organization was engaged. The officer or enlisted man may have belonged to the organization in question, been attached to it or have served it in some independent capacity. The authorized presence of the person in the locality at the time of operation will be the determining factor in the award of clasp. Each officer or enlisted man serving in the 1st army area between Aug. 30 and Nov. 11, 1918, or in the 2d army area between Oct. 12 and Nov. 11, 1918, will be entitled to the defensive sector clasp, irrespective of awards for major operations. Each officer or enlisted man serving in the area of corps, divisions, or smaller independent organizations under French, British, Belgian or Italian commands, between April 6, 1917, and Nov. 11, 1918, will be entitled to the defensive sector clasp, irrespective of awards for major operations. Each officer or enlisted man present in an engagement in European Russia since Aug. 1, 1918, or in Siberia since Aug. 15, 1918, will be entitled to a defensive sector clasp. The following operations are announced as major operations:

a. Cambrai—Between May 12-Dec. 4, 1917.

b. Somme, defensive—Between March 21-April 6, 1918.
c. Lys—Between April 9-27, 1918.
d. Aisne—On the Chemin des Dames and northeast of Reims between May 27-June 5, 1918.
e. Montdidier-Noyon — Between June 9-13, 1918.
f. Champagne-Marne—Between July 15-18, 1918.
g. Aisne-Marne—Between July 18-Aug. 6, 1918.
h. Somme, offensive—Between Aug. 8-Nov. 11, 1918.
i. Oise-Aisne—Between Aug. 18-Nov. 11, 1918.
j. Ypres-Lys—Between Aug. 19-Nov. 11, 1918.
k. St. Mihiel—Between Sept. 12-16, 1918.
l. Meuse-Argonne—Between Sept. 26-Nov. 11, 1918.
m. Vittorio-Veneto—Between Oct. 24-Nov. 4, 1918.

3. Clasps will be awarded to each officer and enlisted man who served overseas and is not entitled to a battle clasp under paragraph 2 as follows:

a. France—For service in France between April 6, 1917-Nov. 11, 1918.
b. Italy—For service in Italy between April 6, 1917-Nov. 11, 1918.
c. Siberia—For any service in Siberia.
d. Russia—For any service in European Russia.
e. England—For service in England between April 6, 1917-Nov. 11, 1918. The clasp for this service will only be awarded to officers and enlisted men who served in England and are not entitled to one of the other clasps enumerated in this paragraph.

4. Officers and enlisted men forming part of the personnel of the crews of army and commercial transports operating between the United States and Europe will be included among those authorized to wear one of the clasps enumerated in paragraph 3, depending on the European country for which the transport sailed. Not more than one such clasp, however, will be awarded to any one individual under this authority.

5. A bronze star, three-sixteenths inch in diameter, will be placed on the service ribbon for each battle clasp awarded under the provisions of paragraph 2. When an officer or enlisted man has been cited in orders issued from the headquarters of a force commanded by a general officer for gallantry in action not justifying the award of a medal of honor, distinguished service cross or distinguished service medal, he will wear a silver star on the ribbon of the medal and on the service ribbon for each such citation.

VICTORY LAPEL BUTTON.

The victory lapel button is for wear on civilian clothing by honorably discharged soldiers. It is made of bronze for all soldiers who saw service abroad or at home, and of silver for those who were wounded. It is in the shape of a five pointed star superimposed on a conventional laurel wreath with the letters U. S. in the center of the star. The button, which was designed under the general direction of the commission of fine arts, was issued in July, 1919, and subsequently to all applicants presenting their discharge papers.

DETAILS OF CERTAIN DECORATIONS.

The war department in an order issued May 5, 1919, gave the following technical descriptions of the distinguished service medal, the distinguished service cross and the victory medal:

Distinguished Service Medal.

The coat of arms of the United States in bronze surrounded by a ring in dark blue enamel bearing the inscription "For Distinguished Service. MCMXVIII." Suspended by a bar from a silk ribbon, 1⅜ inches long and 1⅜ inches wide, consisting of a white center (⅝ inch wide) with a scarlet band on each edge and a narrow dark-blue stripe between the scarlet and white, according to standard sample.

Distinguished Service Cross.

A cross of bronze with an eagle on the center and a scroll below the eagle, bearing the inscription "For Valor." Suspended by a ring from a silk ribbon, 1⅜ inches long and 1⅜ inches wide, composed of a band of red (⅛ inch), white (1/16 inch), blue (1 inch), white (1/16 inch), and red (⅛ inch).

Victory Medal.

(a) A bronze medal 36 mm. in diameter. On the obverse a Victory winged, standing, full length and full face. On the reverse the inscription "The Great War for Civilization" and a representation of the various allied and associated nations. Suspended by a ring from a watered silk ribbon, 1⅜ inches long and 36 mm. wide, representing two rainbows placed in juxtaposition and having the red in the middle, with a white thread along each edge, according to standard sample.

(b) Bronze clasps—Bronze bars, ⅛ inch wide, to be placed on the ribbon of the medal and bearing the following inscriptions:

(1) Somme, defensive.
(2) Lys.
(3) Aisne.
(4) Montdidier-Noyon.
(5) Champagne-Marne.
(6) Aisne-Marne.
(7) Somme, offensive.

Sharpshooter's badge, army and marine corps.
Marksman's badge, army and marine corps.

COLORED RIBBON BARS.

The various medals are suspended from ribbons of distinctive colors. Bars of ribbon of the same color are worn by officers and men upon whom the medals have been conferred with their uniforms. There are as many different kinds as there are medals.

MEXICAN SERVICE BADGE.

The following order was issued by the war department in February, 1918:

By authority of the president, a service badge with ribbon, to be known as the Mexican service badge, will be issued to all officers and enlisted men who are now or may hereafter be in the military service of the United States, and whose service has been under the following conditions:

(a) In Mexico, afloat or ashore, as members of the Vera Cruz expedition, between April 24, 1914, and Nov. 26, 1914.

(b) In Mexico as members of the punitive or other authorized expeditions between March 14, 1916, and Feb. 7, 1917.

(c) Those who were actually present and participated in an engagement against Mexicans between April 12, 1911, and Feb. 7, 1917, in which there were casualties on the side of the United States troops.

(d) Those who were present as members of the Mexican border patrol between April 12, 1911, and Feb. 7, 1917, in proximity to an engagement between Mexicans which resulted in casualties among their own company, troop, battery or detachment.

The distribution of this badge will be governed by the provisions of article VIII., compilation of general orders, circulars and bulletins, war department, 1881-1915. No individual will be entitled to more than one Mexican service badge.

Persons not now in the army of the United States, who if they had remained in the service would be entitled to this badge and whose separation from the service has been honorable, may apply to the adjutant-general of the army for authority to purchase and wear the Mexican service badge.

WOUND AND SERVICE CHEVRONS IN NAVY.

Wound and service chevrons for men in the naval service, afloat or ashore in Europe, were authorized by the secretary of the navy Sept. 25, 1918. The chevrons are similar to those worn in the army and take the form of a V-shaped bar of gold braid for blue uniforms and yellow silk lace or braid for white. Service chevrons are worn on the lower half of the left sleeve and wound chevrons on the right sleeve.

War service chevrons will be given as follows:

Served three months or more since April 6, 1917, afloat or ashore, on duty east of the thirty-seventh meridian west of Greenwich.

Served afloat three months or more since May 25, 1918, on vesse's that have cruised on the high seas of the Atlantic ocean north of the equator.

Served on vessels that have been torpedoed or fired upon.

Served on aviation duty in the United States, making actual flights in search of enemy vessels since May 25, 1918.

Service on transports and convoying ships shall be included.

Lieut.-Col. Sir M. Hankey	G. C. B.	125,000

Resolutions voted by parliament:

That the thanks of this house be given to the officers, petty officers, and men of the navy and of the royal marines for their sleepless watch over the seas and for the courage, resource and devotion with which, during four years of constant peril, they have maintained the blockade of the enemy's coast, convoyed armies drawn from the most distant lands, and defended the commerce of the civilized world against the craft and subtlety of a lawless foe.

That the thanks of this house be given to the officers, noncommissioned officers, and men of the armies in the field for the matchless valor and endurance with which, amid circumstances of unexampled hardship, they have sustained the shock of war in many climes, for the good humor, clemency and patience of their bearing and for the undaunted spirit which has carried them through four years of strenuous toil to a complete and splendid victory.

GRAVES OF AMERICAN SOLDIERS IN EUROPE.

Up to June 30, 1919, 57,919 graves of American soldiers had been registered by the graves registration service in Europe. They are distributed as follows:

Country.	Cemeteries.	Graves.
France—American	230	47,236
French, local	558	6,779
Great Britain	93	2,073
Germany	31	1,053
Belgium	2	403
Russia	..	189
Luxemburg	8	110
Italy	12	76

The work of recording graves and placing crosses in Great Britain had been completed before June 30. The seventy-six bodies in Italy were concentrated in a cemetery at Genoa, this work being completed July 15. The bodies in Russia, it was decided, should be removed to a cemetery in France while those in Luxemburg and Germany were also to find a resting place in France. In October it was decided by the war department that bodies of American soldiers buried in Italy, Belgium, Germany, Great Britain, Luxemburg and north Russia were to be brought home as soon as possible without waiting on the action of the French government with respect to the army dead in France.

UNITED STATES ARMY PAY.

Statement of the system of pay of the army authorized by the quartermaster-general:

Commissioned Officers.

Rank.	Per year.
General	$10,000
Lieutenant-general	9,000
Major-general	8,000
Brigadier-general	6,000
Colonel	4,000
Lieutenant-colonel	3,500
Major	3,000
Captain	2,400
First lieutenant	2,000
Second lieutenant	1,700

In the cases of colonels and other commissioned officers of lower rank an increase of 10 per cent, known as longevity pay, is allowed for each period of five years of service, provided that such increase shall not exceed 40 per cent. Officers of higher rank than colonel receive no increase for continuous service.

All officers are entitled to be furnished public quarters, with fuel and light, but if these cannot be provided the officers receive a commuted money value of the same. The allowance for quarters for a second lieutenant is 2 rooms, or $24 per month; for a first lieutenant, 3 rooms or commutation of $36 per month; a captain, 4 rooms or commutation of $48; major, 5 rooms or commutation of $60; lieutenant-colonel, 6 rooms or commutation of $72; colonel, 7 rooms or commutation of $84; brigadier-general, 8 rooms or commutation of $96; major-general, 9 rooms or commutation of $108; lieutenant-general, 10 rooms or commutation of $120, and a general, 11 rooms or commutation of $132. All receive a suitable allowance for heat and light, dependent upon the locality of their stations and the season. While on foreign service officers receive an increase of 10 per cent of their base pay and longevity pay.

Aerial Flight Increases.

Aviation officers of the signal corps, or officers attached to the signal corps, while on duty which requires them to participate regularly and frequently in aerial flights, are entitled to an increase in the pay of their grade, under their commissions, as follows: Aviation officers, 25 per cent; junior military aviators, 50 per cent; military aviators, 75 per cent. Each junior military aviator and each military aviator duly qualified and serving has the rank, pay and allowances of one grade higher than that held by them under their commissions, provided that the ranks under their commissions are not higher than that of captain.

Pay of Enlisted Men.

The pay of enlisted men depends on their grades, ratings and length of service. From June 1, 1917, and continuing during and after the war in Europe the pay of enlisted men is as follows

Men receiving $30: All privates, the army entering grade.

Men receiving $33: First-class privates, men promoted to act in minor noncommissioned officer capacity.

Men receiving $36: Corporals, saddlers, mechanics, farriers and wagoners, and musicians of the third class.

Men receiving $38: All sergeant grades in the line, which include infantry, field artillery, coast artillery and cavalry; cooks, horseshoers, band corporals and musicians of the second class.

Men receiving $44: Sergeants of the various corps of the engineers, ordnance, signal corps, quartermaster corps and medical department; band sergeants and musicians of the first class.

Men receiving $48: Battalion sergeant majors, squadron sergeant majors, sergeant majors (junior grade), sergeant buglers, master gunners and assistant band leaders of the line.

Men receiving $51: Regimental sergeant majors, regimental supply sergeants, sergeant majors (senior grade), quartermaster sergeants of the quartermaster corps, ordnance sergeants, first sergeants, electrician sergeants of the first class, assistant engineers and battalion sergeant majors and battalion supply sergeants of the engineers.

Men receiving $56: Sergeants, first class, of the medical department.

Men receiving $71: Hospital sergeants, master engineers of the junior grade and engineers.

Men receiving $81: Quartermaster sergeants of the senior grade of the quartermaster corps, band leaders, master signal electricians, master electricians, master engineers of the senior grade and master hospital sergeants.

Assignment to Special Duties.

These are the established grades of the enlisted men, but they may variously be assigned to such special duties as chauffeurs, switchboard operators, cobblers, clerks, camoufleurs, sanitary inspectors, draftsmen, stevedores, accountants, plumbers and such other occupations and trades as are necessary to meet the requirements of army service.

In addition to the rates of pay for enlisted men heretofore mentioned, supplemental pay or allowances are made as follows:

(1) Increased pay is allowed for continuous service, computed under what is known as "enlistment period." An enlistment period ordinarily represents a period of three or four years, dependent upon the law in effect at date of enlistment. There are seven such periods, covering a period of service of from 1 year to more than 18 years, provided for, and the increases range from $3 to $24 per month, according to the grade and length of service. Men in the grade of private calling for $30 per month are increased $3 per month during the second enlistment period, an additional $3 during the third enlistment period, and $1 per month for each additional enlistment period to include the seventh enlistment period. Men above the $30 grade and up to and including the $38 grade are entitled to $3 per month additional pay for each enlistment period from the second to the seventh. Men above the $38 grade are entitled to $4 per month additional pay for each enlistment period from the second to the seventh.

Some Additional Ratings.

(2) Enlisted men of the coast artillery, below the grade of mess sergeant, are entitled to the following additional ratings, according to established individual qualifications: Casement electricians, observers of the first class, plotters and coxswains, $9 per month; chief planters, observers of second class, chief loaders, gun commanders and gun pointers, $7 per month; enlisted men of the field artillery—expert first-class gunners, $5 per month; first-class gunners, $3 per month, and second-class gunners, $2 per month; enlisted men of the cavalry, engineers and infantry—expert riflemen, $5 per month; sharpshooters, $3 per month, and marksmen, $2 per month; enlisted men of the medical department—surgical assistants, $5 per month; nurse (enlisted man), $3 per month, and dispensary assistant, $2 per month.

(3) Enlisted men of the signal corps, while on duties which require them to participate regularly in aeroflights, assuming that they have rating of aviation mechanician, receive 50 per cent increase in their monthly pay.

Housing and Subsistence.

(4) All enlisted men, while on detached duty not in the field where there are no army quar-

ters available, receive in addition to their pay $15 per month to cover the expense of housing and also a suitable allowance for subsistence and for heat and light.

(5) Enlisted men, if serving in a foreign country or beyond the continental limits of the United States (Porto Rico, Hawaii and Panama Canal Zone excepted) receive 20 per cent increase in pay computed on the base pay and service pay prevailing prior to June 1, 1917, when an act of congress increased, for the "term of the emergency," the pay of all enlisted men in amounts ranging from 50 per cent to 8 per cent.

(6) Enlisted men attached to the United States military academy are entitled to the same pay and allowances as other enlisted men of the regular army of the same grade and additional compensation provided for performing certain duties upon detail therefor in orders.

For deeds of valor, recognized by acts of congress, officers and enlisted men receive certificates of merit which entitle them to an additional compensation of $2 per month.

Allowances at Retirement.

Enlisted men can apply for retirement after 30 years of service. They are retired on 75 per cent of the monthly pay drawn at the time of retirement, and $15.75 a month additional in lieu of allowances.

Officers are retired for disability or after 64 years of age, and receive 75 per cent of the pay of the grade held at date of retirement.

An enlisted man in active service has no necessary personal expenses except for barber and laundry. Uniforms, underclothing, shoes, hats, quarters, medical attendance and subsistence are supplied them at government expense. Such materials as tobacco, postage, confectionery and incidentals of individual taste may be purchased at the post exchange at cost.

Officers, while in hospital, are charged $1 per day for subsistence. They are not entitled to clothing or equipment and are required to subsist themselves, purchasing their supplies either from the quartermaster or through the ordinary channels of trade.

NAVY PAY TABLE.

All commissioned officers of the active list of the navy receive the same pay and allowances according to rank and length of service. Officers of the medical, pay and construction corps, chaplains, civil engineers and professors of mathematics have the relative ranks of the various grades of the line, the annual base pay of each grade being as follows:

Admiral (in command of fleet)	$10,000
Vice-admiral (second in command of fleet)	9,000
Rear-admiral, upper half	8,000
Rear-admiral, lower half	6,000
Commodore	6,000
Captain	4,000
Commander	3,500
Lieutenant-commander	3,000
Lieutenant	2,400
Lieutenant (junior grade)	2,000
Ensign	1,700

To each commissioned officer below the rank of rear-admiral is allowed 10 per cent of his yearly base pay for each five years of service in the army, navy and marine corps, but not exceeding in all 40 per cent. Additional provision is made by law that the pay of a captain shall not exceed $5,000, a commander $4,500, and a lieutenant-commander $4,000 per annum.

Sea and Foreign Shore Duty.

An officer on sea or on shore duty beyond the continental limits of the United States receives, while so serving 10 per cent additional of his pay.

An officer on shore duty where no government quarters are furnished is paid $12 per month for each of the number of rooms to which his rank entitles him, that is:

	Rooms.
Rear-admiral, upper half	9
Rear-admiral, lower half	8
Captain	7
Commander	6
Lieutenant-commander	5
Lieutenant	4
Lieutenant (junior grade)	3
Ensign, warrant officer and nurse	2

Varying allowances for heat and light, depending upon the month and place of duty, are made for the number of rooms actually occupied, but not exceeding the number to which an officer's rank entitles him.

Aids to rear-admirals of the upper half are each paid $200 per annum and aids to rear-admirals of the lower half $150 each per annum.

Student Naval Aviators.

Officers of the navy appointed student naval aviators and while detailed for duty involving actual flying in aircraft receive the pay and allowances of the rank plus 35 per cent increase thereof, and those officers who have qualified as naval aviators shall, while so detailed, receive the pay and allowances of their rank plus 50 per cent thereof.

Boatswains, gunners, pay clerks, machinists, carpenters, sailmakers and pharmacists are known as warrant officers and are paid as follows:

	At sea.	On shore.	Waiting orders.
First 3 years' service	$1,500	$1,125	$875
Second 3 years' service	1,625	1,250	1,000
Third 3 years' service	1,750	1,625	1,125
Fourth 3 years' service	2,000	1,750	1,250
After 12 years' service	2,250	2,000	1,500

Warrant officers on shore duty receive the same allowances for quarters and heat and light as an ensign.

After six years from date of warrant these officers are, if duly qualified, commissioned chief warrant officers and receive the pay and allowances of ensign. After six years from date of commission each commissioned warrant officer with a creditable record receives the pay and allowances of a lieutenant (junior grade), and after twelve years from date of commission the pay and allowances of a lieutenant.

Warrant officers while attached to a seagoing ship are paid a ration allowance of 40 cents per day.

All officers in the regular navy are required to provide their own uniforms and to pay for subsistence both ashore and afloat.

The Enlisted Personnel.

The enlisted personnel of the navy is of various classifications, depending upon their duties. Entry into the service is usually made in the lower ratings and the men are advanced upon the establishment of qualifications for the higher ratings. The following tables show the classifications and the base monthly pay of each rating during the present war as provided by the act of May 22, 1917:

In addition to the pay as provided in the above tables the following amounts are also paid monthly to each enlisted man who is qualified to receive them:

$1.50 for each successive re-enlistment for four years within four months of date of honorable discharge from previous enlistment.

$5.50 for first re-enlistment and $3.30 for each subsequent re-enlistment, if citizen of the United States and completed previous enlistment.

$2.20 if a seaman gunner.

$2.20 if a graduate of a petty officers' school.

$5.50 to a steward or cook who holds a certificate of qualification and is a citizen of the United States.

83 cents for each good conduct medal a man holds.

Extra Monthly Compensation.

The following extra monthly compensations are paid to men who perform the transient duties specified:

$5 to a seaman in charge of hold.

$5 to a coxswain of a steam or motor launch.

$5 to a captain of a gun's crew.

$5 to a jack-of-the-dust.

$5 to a lamplighter.

$5 to a messman.

From $10 to $30 to a mail clerk, the amount depending upon the complement of the ship.

From $2 to $10 to a man who qualifies at target practice as a gun pointer, the amount depending upon the caliber of the gun.

From $1 to $3 to a signalman.

From $10 to $20 to a tailor or tailor's helper, the amount depending upon the complement of ship.

Pay for Special Duties.

For special duties or details the following compensations are paid:

$1.20 per hour to divers for the actual time spent under water.

33 cents per day to seamen detailed for duty as firemen.

$5 per month for submarine service.

$1 per day (but not exceeding $15 per month) spent submerged in submarine, if qualified for torpedo work.

A man detained beyond the expiration of his enlistment receives one-fourth additional of all pay while so detained.

A man receives a gratuity of four months' pay if he re-enlists within four months and presents an honorable discharge from his last enlistment.

Each enlisted man receives on first enlistment an outfit of clothing and small stores free of charge. Any articles subsequently drawn are issued at cost price.

Enlisted men are subsisted by the government. Men on detached duty are furnished cash in lieu of subsistence.

Men discharged are either furnished transportation to their homes and all expenses while

en route or are paid 4 cents per mile for the total number of miles from place of discharge to their homes.

On board each ship of the navy and at each station on shore is maintained a commissary store at which may be purchased at cost price such articles as are usually sold in civilian stores and shops.

Officers on the retired list receive three-fourths of their active duty pay.

Enlisted men are retired after 30 years' service and are paid three-fourths of total pay and allowances they received at date of retirement and cash in lieu of quarters and subsistence.

Officers and men of the naval reserve force and the national naval volunteers while on active duty receive the same pay and allowances as those of same rank and length of service in the regular navy.

When first called into active service in time of war or national emergency a uniform gratuity of $150 is allowed each officer of the naval reserve and $60 each enlisted man.

UNITED STATES NAVAL ACADEMY.

Annapolis, Md.

The United States naval academy is a school for the practical and theoretical training of young men for the naval service of the United States. The students are styled midshipmen.

The course of study is four years. Midshipmen who graduate are appointed to fill vacancies in the lower grade of the line of the navy, and occasionally to fill vacancies in the marine corps and in certain of the staff corps of the navy.

Appointments — Five midshipmen are allowed for each senator, representative and delegate in congress, five for the District of Columbia, fifteen each year from the United States at large and 100 from enlisted men of the navy. The appointments from the District of Columbia and from the United States at large are made by the president. Enlisted men of the navy are appointed by the secretary of the navy after competitive examination. One midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the president on the recommendation of the governor of Porto Rico. Candidates must be actual residents of the districts from which they are nominated.

Examinations—Two examinations for the admission of midshipmen are held each year. The first is held on the third Wednesday in February and the other on the third Wednesday in April under the supervision of the civil service commission at certain specified points in each state and territory. All those qualifying mentally, who are entitled to appointment in order of nomination, will be notified by the bureau of navigation, navy department, Washington, D. C., when to report at the academy for physical examination, and if physically qualified will be appointed. Alternates are given the privilege of reporting for mental examination at the same time as the principals. Examination papers are all prepared at the academy and the examinations of candidates are finally passed upon by the academic board. Certificates from colleges and high schools will not be accepted in lieu of the entrance examinations at the naval academy.

Mental Requirements—Candidates will be examined in punctuation, spelling, arithmetic, geography, English grammar, United States history, world's history, algebra through quadratic equations and plane geometry (five books of Chauvenet's geometry or an equivalent).

Physical Requirements—All candidates are required to be citizens of the United States and must be not less than 16 years of age nor more than 20 years of age on April 1 of the calendar year in which they enter the naval academy. A candidate is eligible for appointment the day he becomes 16 and is ineligible on the day he becomes 20 years of age. Candidates are required to be of good moral character, physically sound, well formed and of robust constitution. The height of candidates for admission must not be less than five feet two inches between the ages of 16 and 18 years, and not less than five feet four inches between the ages of 18 and 20 years. The minimum weight at 16 years is 105 pounds, with an increase of five pounds for each additional year or fraction of a year over one-half. Candidates must be unmarried.

Pay—The pay of a midshipman is $750 a year, beginning at the date of his admission. Midshipmen must supply themselves with clothing, books, etc., the total expense of which amounts to $350. Traveling expenses to the academy are paid by the government.

Enlistment—Each midshipman on admission is required to sign articles by which he binds himself to serve in the United States navy during the pleasure of the president of the United States.

UNITED STATES MILITARY ACADEMY.

West Point, N. Y.

The United States military academy is a school for the practical and theoretical training of cadets for the military service of the United States. When any cadet has completed

the course of three years satisfactorily he is eligible for promotion and commission as a second lieutenant in any arm or corps in the army in which there may be a vacancy, the duties of which he may have been judged competent to perform.

Appointments—Each congressional district and territory, including Porto Rico, Alaska and Hawaii, is entitled to have two cadets at the academy. The District of Columbia has two. Each state is also entitled to have four cadets from the state at large and eighty-two are allowed from the United States at large, two of whom are appointed upon the recommendation of the vice-president and twenty from among honor graduates of "honor schools." The president is also authorized to appoint not to exceed 180 men from the regular army and national guard who have served for one year. The total number in the academy in September, 1919, was 909. The appointments from a congressional district are made upon the recommendation of the representative in congress from that district and those from the state at large upon the recommendations of the senators of the state. The appointments for the United States at large are made by the president upon

his own selection. The appointments from the District of Columbia are made on the recommendation of the district commissioners and those from Porto Rico on the recommendation of the resident commissioner. As far as practicable appointments are made one year in advance of admission. For each candidate appointed two alternates should be nominated. Four cadets from the Philippines are admitted.

Examinations—On the third Tuesday in February of each year the candidate selected for appointment must appear for mental and physical examination before boards of army officers at such places as the war department may designate. Candidates who pass will be admitted to the academy on June 14 following.

Mental Requirements—Each candidate must show that he is well versed in algebra, to include quadratic equations and progressions, plane geometry, English grammar, composition and literature, and general and United States history. Under certain conditions fully explained in the war department circular of information relative to the appointment and admission of cadets, a copy of which may be obtained upon application to the adjutant of the academy, candidates may, upon presentation of satisfactory high school or college certificates, be excused from the mental examination.

Physical Requirements—No candidate will be admitted who is under 17 or over 22 years of age, or less than five feet four inches in height at the age of 17, or five feet five inches at the age of 18 and upward, or who is deformed or afflicted with any disease or infirmity which would render him unfit for military service. Candidates must be unmarried.

Pay—The pay of a cadet is $780 a year and one ration a day or commutation therefor at 68 cents a day. The total is $1,028.20, to begin with his admission to the academy. No cadet is allowed to receive money or other supplies from his parents or from any other person without the sanction of the superintendent.

Enlistment—Before receiving his warrant of appointment a candidate for admission is required to sign an agreement to serve in the army of the United States eight years from the time of his admission to the academy.

PRISON TERMS FOR SOCIALIST LEADERS.

On March 9, 1918, it was made public that five of the most prominent socialists in the country had been indicted by a federal grand jury in Chicago on Feb. 2. They were:

Victor L. Berger, Milwaukee, former congressman and then candidate for the United States senate from Wisconsin.

Adolph Germer, Chicago national secretary of the socialist party.

J. Louis Engdahl, Chicago editor of the American Socialist.

William F. Kruse, Chicago, of American Liberty Defense league.

Irwin St. John Tucker, Chicago, of "peace party" fame and author of "The Price We Pay" and other antiwar literature.

The indictments dated back to activities in opposition to the draft and other alleged efforts to defeat the policies of the government in connection with the war. The defendants were accused of disloyalty and obstructing recruiting work and by public utterances and writings to have interfered with the military plans of the United States. The men were not indicted as socialists or because of their connection with the socialist party. Each was indicted for individual acts alleged to have been committed.

The indictment set forth that the speeches, articles, pamphlets, pictures, etc., were such as persistently dwelt upon the evils and horrors of the war without mentioning any consideration in favor thereof and "upon the desirability and necessity of avoiding and stopping the war and opposing the further prosecution thereof at all costs and regardless of the patriotic duty of the persons constituting the military and naval forces of the United States."

The indictment set forth twenty-six overt acts alleged to have been done in furtherance of the unlawful conspiracy. Among these were the printing and distributing of "Proclamation of War Program" and other pamphlets, the printing of different items in the American Socialist and the Milwaukee Leader.

The defendants were brought to trial in the United States Circuit court, Chicago, before Judge Kenesaw M. Landis Dec. 6, 1918. The testimony was concluded Jan. 4, 1919, and after arguments by counsel the case was given to the jury on Jan. 9. On the same day the jurymen returned a verdict finding all the defendants guilty as charged in the indictment. They were released under $10,000 bonds each pending the hearing of a motion for a new trial on Jan. 23. Sentence was withheld by Judge Landis until that time.

Some delay occurred, but the defendants had a hearing before Judge Landis the first week in February. On Feb. 20 he denied a writ for a supersedeas and sentenced each of the defendants to twenty years' imprisonment in the federal penitentiary at Leavenworth, Kas. After remaining seven hours in the custody of the United States marshal the defendants were released on $25,000 bonds each by Judge Samuel Alschuler in the United States Circuit Court of Appeals, to which tribunal they had appealed on a writ of error. Before accepting the bonds Judge Alschuler made each of the defendants give a pledge that neither by word nor deed would he do any of the things for which he had been convicted.

MOTOR CARS AND TRUCKS IN THE UNITED STATES.

On July 1, 1919, there were in the United States 6,353,233 registered motor cars and trucks. Estimating their average value at $1,200 each, the total value of all the cars then in use was more than $7,623,879,000. The cars were distributed among the states as follows:

ARMAMENT OF BIG FIGHTING SHIPS.

The United States battle cruisers when built will, unless the plans are changed, carry eight 16-inch and fourteen 6-inch guns each. The latest battle ships are armed with from twelve 14-inch to twelve 16-inch guns. The battle ships built between 1902 and 1910 have four 12-inch and eight 8-inch guns, while those in commission built since then have from eight 12-inch to twelve 14-inch guns. The armored cruisers are armed chiefly with 8-inch, 10-inch and 6-inch guns.

PERSONNEL OF U. S. NAVY.

In October, 1918, the strength of the various branches of the naval service was as follows:

Service.	Men.	Officers.	Total.
Regular navy	218,322	9,411	227,733
Naval reserve force	270,424	19,619	290,043
Marine corps	66,105	2,271	68,376
Coast guard	6,106	665	6,771
Total officers and men	560,957	31,966	592,923

By Oct. 1, 1919, the number of enlisted men had been cut down to 191,000. In the naval appropriation act approved July 11, 1919, it was provided:

"The total authorized enlisted strength of the active list of the navy is hereby temporarily increased from 131,485 during the period from July 1, 1919, to Sept. 30, 1919, to 241,000 men, and from Oct. 1, 1919, to Dec. 31, 1919, to 191,000 men, and from Jan. 1, 1920, to June 30, 1920, to 170,000 men, and the president is hereby authorized, whenever in his judgment a sufficient national emergency exists, to increase the authorized enlisted strength of the navy to 191,000 men, and the secretary of the navy is hereby authorized to call to or continue on active service on strictly naval duties, with their consent, such numbers of the male members and nurses of the naval reserve force in enlisted ratings as may be necessary to supply deficiencies to maintain the total authorized strength for the periods herein authorized. The foregoing total authorized strength shall include the hospital corps, apprentice seamen, those sentenced by court-martial to discharge, enlisted men of the flying corps, those under instruction in trade schools, and members of the naval reserve force so serving. That during the fiscal year ending June 30, 1920, no member of the naval reserve force shall be recalled to active duty for training or any other purpose except as hereinbefore provided: Provided, That the average number of commissioned officers of the line, permanent, temporary and reserves on active duty, shall not exceed during the periods aforesaid, 4 per centum of the total temporary authorized enlisted strength of the regular and temporary navy, and members of the naval reserve force in enlisted ratings on active duty, and the number of staff officers shall be in the same proportion as provided under existing law: Provided further, That nothing herein shall be construed as affecting the permanent, commissioned or enlisted strength of the regular navy as authorized by existing law."

Notes—Battle ships, battle cruisers, cruisers, light cruisers and coast defense vessels over twenty years of age not included. Torpedo boat destroyers, torpedo boats and submarines over fifteen years of age not included.

German vessels surrendered to the allies not included in the above compilation. Russian vessels in the hands of the Germans not included in German or Russian figures.

The entire navy of Austria-Hungary, according to the best information on file in the bureau, is in the hands of the Jugo Slavs. The ships are being paid off and rendered harmless.

The warship construction of the Russian navy has ceased and little work has been done since June, 1917.

While Germany ranks third according to tonnage, her real position, according to fighting ships and gun power, is fifth.

The Turkish navy is in the hands of the allies.

LIBRARY OF CONGRESS.

The library of congress was established in 1800 in the city of Washington, D. C. It was burned in 1814, and in 1851 lost 35,000 volumes by fire. The present library building, which cost $6,347,000, was opened to the public in November, 1897. It is located a short distance east of the capitol and is the largest and finest building of its kind in the world.

June 30, 1916, the library contained 2,451,974 books and pamphlets, 154,200 maps, 770,248 pieces of music and 392,905 photographs, prints, engravings and lithographs. The copyright office is a distinct division of the library with its own force of employes. The total number of employes in the library is 551 and the annual cost of maintenance is now about $850,000, including $200,000 for printing and binding.

The librarian of congress is Herbert Putnam, salary, $6,500; chief assistant librarian, Appleton P. C. Griffin, $4,000.

THE UNITED STATES IN THE WORLD WAR.

BY COL. LEONARD P. AYRES.

[In response to a request by Newton D. Baker, secretary of war, for "a stock taking of the efforts made and the results achieved by the United States in the war," Col. Leonard P. Ayres, chief of the statistics branch of the general staff, collected, classified and published, on May 31, 1919, the most important official data relating to American participation in the European war. It should be noted that the facts relate chiefly to the activities of the war department and that some of the figures, especially relating to casualties, have been modified by later developments. Most of the facts and figures, however are to be accepted as the most reliable and up date available, as they have been subjected to repeated checking and revision.]

SOURCES OF THE ARMY.

When war was declared there were only 200,000 men in the army. Two-thirds of these were regulars and one-third national guardsmen who had been called into the federal service for duty on the Mexican border. When the war ended this force had been increased to twenty times its size and 4,000,000 men had served. More than half a million came in through the regular army. Almost 400,000 more or nearly 10 per cent entered through the national guard. More than three-quarters of all came in through the selective service or national army enlistments.

The selective service law was passed on May 19, 1917, and as subsequently amended it mobilized all the man power of the nation from the ages of 18 to 45 inclusive. Under this act 24,234,021 men were registered and slightly more than 2,800,000 were inducted into the military service. The first registration, June 5, 1917, covered the ages from 21 to 31; the second registration, June 5, 1918, and Aug. 24, 1918, included those who had become 21 years old since the first registration, and the third registration, Sept. 12, 1918, extended the age limits down to 18 and upward to 45.

Physical Examinations.

Registrants were given two physical examinations—one by the local board and the other by the camp physicians. From the examination data comparisons have been made which show the standing of the various states with respect to the fitness of the men registered for military duty. The results are presented in the accompanying map, which shows four classifications of the states. The states shown in outline only are those which sent men of so high an order of physical condition that from 70 to 80 per cent of them were accepted for service. It is noteworthy that these states constitute about one-quarter of all and are mostly located in the middle west. Next come the states from which 65 to 69 per cent passed, and these are indicated by light cross lines. This group is almost equal to the first and the states are contiguous to the first group either on the east or the west. In the third group, indicated by heavy diagonal lines, from 60 to 64 per cent of the young men passed. Most of them are in the south and far west. In the last group are the states, shown in solid black, in which only 50 to 59 per cent of the candidates were accepted. They are in the northeast and far west, where many persons of physically subnormal condition have gone in search of health. In general it is noteworthy that the agricultural states made the best records and the states with large manufacturing centers and many recently arrived immigrants the worst.

Further analysis of the examination data shows that the country boys made better records than those from the cities; the white registrants better records than the colored, and the native born better records than those of alien birth. It shows that 100,000 country boys would furnish 4,790 more soldiers than an equal number of city boys; that 100,000 whites would furnish 1,240 more soldiers than would an equal number of colored men, and that 100,000 native born would yield 3,500 more solders than would an equal number of foreign born. It may be noted that 3,500 men are equivalent to an infantry regiment at full war strength.

Summary.

1. The number of men serving in the armed forces of the nation during the war was 4,800,000, of whom 4,000,000 served in the army.

2. In the war with Germany the United States raised twice as many men as did the northern states in the civil war, but only half as many in proportion to the population.

3. The British sent more men to France in their first year of war than we did, but it took England three years to reach a strength of 2,000,000 in France. The United States accomplished it in one-half of that time.

4. Of every 100 men who served, ten were national guardsmen, thirteen were regulars and seventy-seven were in the national army (or would have been if the services had not been consolidated).

5. Of the 54,000,000 males in the population 26,000,000 were registered in the draft or were already in the service.

6. In the physical examinations the states of the middle west made the best showing, country boys did better than city boys, whites better than colored and the native born better than the foreign born.

7. In this war twice as many men were recruited as in the civil war and at one-twentieth the recruiting cost.

8. There were 200,000 army officers. Of every six officers one had previous military training with troops, three were graduates of officers' camps and two came directly from civil life.

TRAINING OF THE TROOPS.

The average American soldier who went to France received six months of training in the United States before he sailed. After he landed overseas he had two months of training before entering the battle line in a quiet sector, where he remained one month before going into an active sector and taking part in hard fighting. The infantry soldier was trained in the division, which was our typical combat unit. In the American army it was composed of about 1,000 officers and 27,000 men. Training and sorting organizations of about 10,000 men, known as depot brigades, were also utilized. Before the signing of the armistice there were trained and sent overseas forty-two American divisions. The training of twelve more was well advanced and there were four others that were being organized. The plan on which the army was acting called for eighty divisions overseas before July, 1919, and 100 divisions by the end of that year.

The following table shows the place of organization of divisions and sources by states:

The regular army divisions were originally made up from regular army units plus voluntary enlistments and selective service men. The national guard divisions came largely from the militia of the several states. The national army divisions were made up almost wholly of men called in by the selective service law. The 42d division, called because of its composite character the "Rainbow divi-

sion" was made up of selected groups from the entire country and sent to France early. The 41st, called the "Sunset division," was a composite of troops from many western states. Four divisions were made up from one state each: The 27th, 28th, 33d and 37th.

Camps and Cantonments.

To carry forward the training program shelter was constructed in a few months for 1,800,000 men. For the national guard and national army divisions sixteen camps and sixteen cantonments were built. The national guard units organized during the summer of 1917 were put under canvas in tents in the south. The building of the cantonments was authorized in May, 1917. The last site was secured July 6 and on Sept. 4 accommodations were ready for 430,000 men. The capacity was soon increased to 770,000, an average capacity per cantonment of 48,000. Troops had to be accommodated at many other points also. There were schools for training men for special services, such as the artillery, aviation, engineer corps, chemical warfare, tank corps and quartermaster corps. There were proving grounds and testing fields. For these training schools, but only of schools training officers for line duty.

When the new camps had been established France and England sent experienced officers to the United States to assist in training the men in modern methods of war. France sent 286 such officers and England 261.

Summary.

1. The average American soldier who fought in France had six months of training here, two months overseas before entering the line and one month in a quiet sector before going into battle.

2. Most soldiers received their training in infantry divisions which are the typical training units and consist of about 1,000 officers and 27,000 men.

3. Forty-two divisions were sent to France.

4. More than two-thirds of our line officers were graduates of the officers' training camps.

5. France and England sent to the United States nearly 800 specially skilled officers and noncommissioned officers who rendered most important aid as instructors in the training camps.

purposes housing was constructed for more than 300,000 men, including accommodations at the large embarkation camps at New York and Newport News.

Officers and Instructors.

Some 200,000 officers were required for the army of 4,000,000 men, there being in the American army one officer for each twenty men. When war was declared there were 6,000 officers in the regular army and the national guard divisions were able to furnish most of their own officers. After this source of supply had been exhausted it was still necessary to secure 180,000 officers elsewhere. The officers' training camp was the instrumentality that solved the problem. The successful precedents of the Plattsburg camps were followed. Three months of intensive training put the prospective officers through all the tasks required of enlisted men and the duties of the platoon and company commander. By ranks the officers commissioned from the training camps were: Colonels, 2; lieutenant-colonels, 1; majors, 294; captains, 5,429; first lieutenants, 12,397; second lieutenants, 62,445; total, 80,568. This total is not the grand total of graduates of officers'

TRANSPORTATION OF ARMY.

During the nineteen months of the American participation in the war, more than 2,000,000 soldiers were carried from the United States to France. Half a million went over in the first thirteen months and 1,500,000 in the last six months. At first the movement was not rapid. We had only a few American and British troopships chartered directly from their owners. Later, as more ships came into the service, the embarkations increased to a rate of nearly 50,000 a month and by the end of 1917 had reached a total of 194,000. The figures from January to November, 1918, were:

January	47,893	July	308,350
February ...	49,110	August	285,974
March	84,869	September ...	257,457
April	118,642	October	180,326
May	245,945	November ...	30,201
June	278,664		

During many weeks in the summer number carried was more than 10,000 men a day, and in July the total landed averaged more than 10,000 for every day of the month. No such troop movement had ever been contemplated, and no movement of any such number of persons by water for such a distance and such a time had every pre-

viously occurred. The record has been excelled only by the achievement in bringing the same men back to the shores of the United States.

The necessity for creating a great transport fleet came just at the time when the world was experiencing its most acute shortage of tonnage. The start was made by chartering a few American merchant steamers and by July 1, 1917, there were in service seven troopships and six cargo ships with a total deadweight capacity of 94,000 tons.

There was developed from these small beginnings a great transport fleet which aggregated by the end of 1918 3,250,000 deadweight tons of shipping.

During these same months another great American transport fleet was created with almost equal rapidity. This was the cross-channel fleet which carried cargo and men from England to France. Beginning with 7,000 tons in October, 1917, this fleet by the end of 1918 consisted of 324,600 tons. About one-fourth of the vessels were Norwegian or Swedish, while the rest were American. This

service utilized large numbers of small wood and steel vessels built by the emergency fleet corporation at the yards of the great lakes and along the coast.

In building up the transatlantic and cross-channel fleets every possible source of tonnage had to be called on for every ship that could be secured. The first great increment was the seized German vessels, which came into service during the fall of 1917. The taking over of Dutch steamers in the spring of 1918 and the chartering of Scandinavian and Japanese tonnage accounted for great increases in the cargo fleet.

Most of the troops who sailed for France left from New York. Half of them landed in England and the other half landed in France. Most of those who landed in England went directly to Liverpool and most of those who landed in France went to Brest.

Of every 100 men who went over, forty-nine went in British ships, forty-five in American ships, three in Italian ships, two in French ships and one in shipping under English control.

Cargo Movement.

The first shipment of cargo to support the forces abroad was made in June, 1917, and amounted to 16,000 tons. After the first two months the shipments grew rapidly until they were in excess of 800,000 tons in the last month of the war. They were made almost entirely by American ships. The following table shows the number of short tons of cargo shipped for each army supply service to April 30, 1919:

Service.	Tons.	Per cent.
Quartermaster	3,606,000	48.39
Engineer	1,506,000	20.21
Ordnance	1,189,000	15.96
Food relief	285,000	3.82
Motor transport	214,000	2.87
Trench material	208,000	2.79
Signal corps	121,000	1.62
Medical	111,000	1.49
Aviation	61,000	.82
Red Cross	60,000	.81
Y. M. C. A.	45,000	.60
Miscellaneous	35,000	.47
Chemical warfare	11,000	.15
Totals	7,452,000	100.00

Included in the cargo shipment were 1,791 consolidation locomotives of the 100 ton type. Of these 650 were shipped set up on their own wheels. The army also shipped 26,994 standard gauge freight cars and 47,018 motor trucks. There were also shipped 68,694 horses and mules.

During the whole period of active hostilities the army lost at sea only 200,000 deadweight tons of transports. Of this total 142,000 tons were sunk by torpedoes. No American troop transport was lost on its eastward voyage. For this credit is due to the navy, which armed, manned and convoyed the transports.

When the armistice was signed preparations were at once made to return the troops to the United States in the shortest possible time. The British ships were not available, as these had to be used for the return of troops to Canada, Australia and South Africa. The situation was met by the army transport service, which immediately began the conversion of large cargo ships into troop carrying vessels. By means of these cargo ships, by the assignment of German liners and also by the aid of the navy, which put cruisers and battle ships at the command of the army, the army was brought back to America even more rapidly than it was taken to France.

Summary.

1. During our nineteen months of war more than 2,000,000 American soldiers were carried to France. Half a million of these went over in the first thirteen months and a million and a half in the last six months.

2. The highest troop carrying records were those of July, 1918, when 306,000 soldiers

were carried to Europe, and May, 1919, when 330,000 were brought home to America.

3. Most of the troops who sailed for Europe left from New York. Half of them landed in England and half in France.

4. Among every 100 Americans who went over, forty-nine went in British ships, forty-five in American ships, three in Italian, two in French and one in Russian shipping under English control.

5. Our cargo ships averaged one complete trip every seventy days and our troopships one complete trip every thirty-five days.

6. The cargo fleet was almost exclusively American. It reached the size of 2,600,000 deadweight tons and carried to Europe about 7,500,000 tons of cargo.

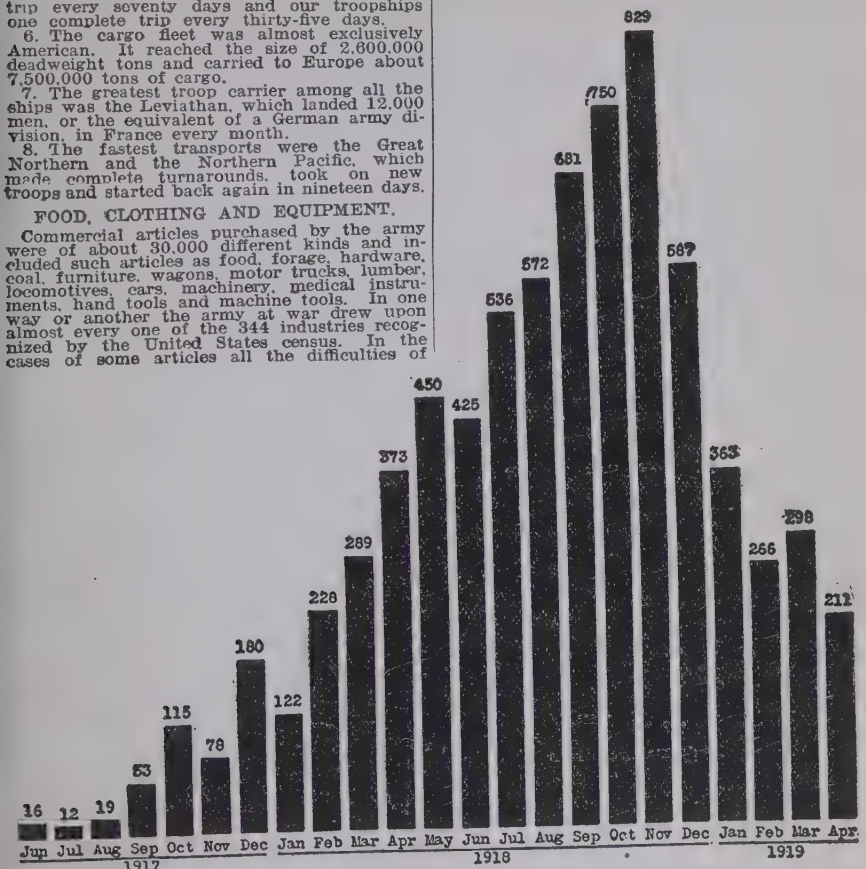
7. The greatest troop carrier among all the ships was the Leviathan, which landed 12,000 men, or the equivalent of a German army division, in France every month.

8. The fastest transports were the Great Northern and the Northern Pacific, which made complete turnarounds, took on new troops and started back again in nineteen days.

FOOD, CLOTHING AND EQUIPMENT.

Commercial articles purchased by the army were of about 30,000 different kinds and included such articles as food, forage, hardware, coal, furniture, wagons, motor trucks, lumber, locomotives, cars, machinery, medical instruments, hand tools and machine tools. In one way or another the army at war drew upon almost every one of the 344 industries recognized by the United States census. In the cases of some articles all the difficulties of quantity production were combined with the problems of making something not before manufactured. Typical instances are the 5,400,000 gas masks and the 2,728,000 steel helmets produced before the end of November, 1918.

In France a complete new organization was necessary for the distribution of munitions and supplies. It was called the service of supply (S. O. S.) and had its headquarters at Tours. It was an army behind the army. On the day the armistice was signed there were reporting to the commanding general of the service of supply 386,000 soldiers, besides 31,000 German prisoners and thousands of civilian employes furnished by the allies. At the same time there were in the zone of the armies 160,000 noncombatant troops, the majority of whom were keeping in operation the lines of distribution of supplies to the front. The proportion of noncombatants in the American army never fell below 28 per cent. When there was the greatest pressure for men at the front the work back of the lines took roughly one man out of every three. A list of the total deliveries from April 6, 1917, to May 31, 1919, of some common articles of clothing given herewith gives an idea of the task of supplying the army:



TONS OF ARMY CARGO SHIPPED TO FRANCE EACH MONTH. FIGURES IN THOUSANDS OF SHORT TONS.

Articles.	Delivered.
Wool stockings, pairs	131,800,000
Undershirts	85,000,000
Underdrawers	83,600,000
Shoes, pairs	30,700,000
Flannel shirts	26,500,000
Blankets	21,700,000

Articles.	Delivered.
Wool breeches	21,700,000
Wool coats	13,900,000
Overcoats	8,300,000

The value of the above articles was more than $1,000,000,000.

Distributing supplies to the American forces in France was in the first place a problem of ports, second a problem of railroad, third a problem of motor and horse-drawn transportation, and fourth, a problem of storage. It was not necessary to build new ports, but Americans added eighty-three new berths, together with warehouses and dock equipment. It was not necessary to build new railroads, but it was desirable to increase the carrying capacity by nearly 1,000 miles of new trackage, by switching facilities at crucial points, by new repair shops and new rolling stock. These things were done by the engineers. The problems were not wholly solved. There were never enough docks to prevent some loss of time by vessels waiting to dock, but the capacity for handling American cargo was tripled, from 10,000 tons per day in the spring of 1918 to 30,000 tons by Nov. 11, and the waiting time of ships was shorter than in commercial practice. There were never wholly adequate railway facilities, but with the help of locomotives and freight cars shipped from this side freight was carried inland about as fast as it was landed. The main railway lines connected the principal ports at which the army fleet docked with the headquarters of the service of supply at Tours and with the Toul-Verdun sector, where the American armies operated.

Railroads carried American supplies from the ports in France to intermediate or advance depots. Railroad lines roughly paralleled the front. Spurs led up to the front, but beyond a certain distance the standard-gauge railroad did not go. Where the danger of shelling began or where the needs changed rapidly as the battle activity shifted from this front to that, the place of the heavy railway was taken by other means of distributing supplies. First came the narrow-gauge railroad, with rails about two feet apart, much narrower than the usual narrow-gauge road in this country. American engineers built 538 miles of these roads, for which 406 narrow-gauge locomotives and 2,385 narrow-gauge cars were shipped from this country in addition to the standard-gauge equipment.

Beyond the range of the narrow-gauge railway came the motor truck. The truck could go over roads that were under shell fire. Trucks were used on a larger scale in this war than was ever before thought possible. The American infantry division on the march with the trucks, wagons and ambulances of its supply, ammunition and sanitary trains stretches for a distance of thirty miles along the road. The 650 trucks which the tables of this organization of the division provide are a large factor in this train. The number of trucks sent overseas prior to the armistice was 40,000 and of these 33,000 had been received in France. They ranged in size from three-quarters of a ton to five tons.

Telephone and Telegraph Lines.

In order to operate the transportation of supplies in France the American signal corps strung its wires over nearly every part of France. At the time the armistice was signed the signal corps was operating 282 telephone exchanges and 133 complete telegraph stations. The telephone lines numbered 14,956, reaching 8,959 stations. More than 100,000 miles of wire had been strung. The peak load of operation reached 47,555 telegrams a day, averaging sixty words each.

Other Construction.

To build factories and storage warehouses for supplies, as well as housing for troops, 200,000 workmen in the United States were kept continuously occupied during the war. Housing constructed had a capacity of 1,800,000 men. The total expenditures in this enterprise to Nov. 11, 1918, were in round numbers $800,000,000, or about twice the cost of the Panama canal.

In France all the construction work was performed by the corps of engineers under the service of supply. Up to the signing of the armistice the construction projects undertaken in France numbered 831.

No Food or Clothing Shortage.

At no time was there a food shortage. Soldiers sometimes went hungry, but the condition was local and temporary. It occurred because of transportation difficulties during periods of active fighting or rapid movement, when the units advanced faster than their rolling kitchens. The stocks of food on hand in the depots in France were always adequate.

In the matter of clothing also the supply services rose to the emergency of combat.

There were periods in the history of many individual units when needed supplies could not be immediately obtained, but, as in the case of food, the difficulty was one of local transportation.

The records of the quartermaster show that during the six months of hard fighting, from June to November, 1918, the enlisted man in the A. E. F. received on the average:

Slicker and overcoat every 5 months.
Blanket, flannel shirt and breeches every 2 months.
Coat every 79 days.
Shoes and puttees every 51 days.
Drawers and undershirt every 34 days.
Woolen socks every 23 days.

Summary.

1. The problems of feeding and clothing the army were difficult because of the immense quantities involved rather than because of the difficulty of manufacturing the articles needed.

2. Requirements for some kinds of clothing for the army were more than twice as great as the prewar total American production of the same articles.

3. To secure the articles needed for the army the government had to commandeer all the wool and some other staple articles in the United States and control production through all its stages.

4. The distribution of supplies in the expeditionary forces required the creation of an organization called the service of supply, to which one-fourth of all the troops who went overseas were assigned.

5. American engineers built in France 83 new ship berths, 1,000 miles of standard gauge track and 538 miles of narrow gauge track.

6. The signal corps strung in France 100,000 miles of telephone and telegraph wire.

7. Prior to the armistice 40,000 trucks were shipped to the forces in France.

8. Construction projects in the United States cost twice as much as the Panama canal and construction overseas was on nearly as large a scale.

9. The army in France always had enough food and clothing.

RIFLES AND MACHINE GUNS.

Rifles.

When the United States entered the war there were on hand nearly 600,000 Springfield rifles of the model of 1903, or sufficient for the initial equipment of an army of about 1,000,000 men. The available Springfields were used to equip the regular army and the national guard divisions that were first organized. There were also in stock some 200,000 Krag-Jorgensen rifles in sufficiently good condition to be used for training purposes. It was found that the output of Springfield rifles could not be increased to much beyond 1,000 a day, which was not enough. There were in the country several plants just completing large orders for the Enfield rifle of the British government. A new

rifle, model of 1917, was designed, which was enough like the British weapon to make it possible to convert the plants equipped for making Enfields to the manufacture of the new rifle chambered to use the same ammunition as is used in the Springfield and in American machine guns.

Beginning with slightly less than 600,000 Springfields at the outbreak of the war, the total at the end of the war had increased to nearly 900,000. The Enfields first came into production in August, 1917. After their manufacture had actually begun the output increased rapidly until it totaled at the end of the war, in November, 1918, nearly 2,300,000.

It is a fact that about half the rifle ammunition used against the enemy by American troops was shot from Springfield rifles. Both the Springfield and the American Enfield rifles proved superior in the test of battle to the small arms used by the enemy or the other allies in accuracy and rapidity of fire.

Machine Guns.

In accordance with the recommendations of the secretary of war 4,000 Vickers machine guns were ordered in December, 1916, and by the end of 1917, 2,031 of them had been delivered. It could not, however, be put on a quantity production basis because of technical difficulties in manufacture. Fortunately, a new gun well adapted to quantity production was presented for trial. This gun, the heavy Browning, performed satisfactorily in all respects and was adopted as the ultimate standard heavy machine gun. The light Browning, designed by the same expert, was easily in the lead as an automatic rifle, weighing only fifteen pounds. The Lewis gun, too heavy for satisfactory use as an automatic rifle, and not capable of the long-sustained fire necessary in a heavy gun, was very well suited, with slight modification, for use as a so-called flexible gun on aircraft. A small number (2,500) of these guns was ordered for training purposes for ground use, but the bulk of the possible production of this gun was assigned to aircraft purposes. In addition to the flexible type, airplanes require also a synchronized gun; that is, a gun whose time of firing is so adjusted that the shots pass between the propeller blades. The Vickers gun had been used successfully for this purpose in Europe and the call was insistent for their diversion to this use, both for our own planes and for those of the French. After many trials and adjustments, however, the Marlin gun, a development of the old Colt, was adapted to this purpose, releasing part of the early production of Vickers guns for ground use. A subsequent development was the design of a modified form of the heavy Browning for aircraft use as a synchronized gun.

The earliest needs of our troops in France were met by French Hotchkiss machine guns and Chauchat automatic rifles. A little later divisions going over were provided with Vickers heavy guns and Chauchat automatic rifles. After July 1 divisions embarking were equipped with light and heavy Brownings. Both Browning guns met with immediate success and with the approval of foreign officers as well as with that of our own.

The total number of machine guns of American manufacture produced to the end of 1918 is shown in the following table:

Heavy Browning field	56,612
Vickers field	12,125
Other field	6,366
Lewis aircraft	39,200
Browning aircraft	580
Marlin aircraft	38,000
Vickers aircraft	3,714
Light Browning	69,960
Total	226,557

In addition there were secured from the French and British 5,300 heavy machine guns, of which nearly all were French Hotchkiss guns, and 34,000 French Chauchat automatic rifles.

When troops embarked for France they carried with them their rifles and sometimes their machine guns and automatic rifles. If appropriate allowance is made for such troop property in addition to what was shipped in bulk for replacement and reserves, it is found that about 1,775,000 rifles, 29,000 light Brownings and 27,000 heavy Brownings and 1,500,000,000 rounds of rifle and machine gun ammunition were shipped to France from this country before Nov. 1. These supplies were supplemented by smaller amounts received from the French and British, as already mentioned. The actual use of American made machine guns and automatic rifles in France is summarized thus:

	Used at the front.	Total, including training.
Light Browning	4,608	17,664
Heavy Browning	1,168	3,528
Vickers ground gun	2,340	2,860
Lewis aircraft	1,393	3,930
Marlin aircraft	1,220	3,084
Vickers aircraft	1,320	1,625

Pistols and Revolvers.

From the beginning of the war the call for pistols was insistent. In this case the American army was fortunate in having in the Browning-Colt a weapon already in production and more effective than the corresponding weapon used by any other army. But while there never was any question as to the quality of the pistol, there was much trouble in securing them in numbers adequate to meet the demands. To help meet the situation a revolver was designed using the same ammunition and placed in production in October, 1917. As a result the troops in France who were likely to require them for close combat were supplied with one or the other of these weapons so far as possible, but full equipment was never secured.

Small-Arms Ammunition.

A sufficient supply of small-arms ammunition was always available to provide for troops in service. The complication due to the use of machine guns and automatic rifles of French caliber was successfully met. To meet the special needs of the air service and of anti-aircraft defense new types of ammunition were designed and produced, the purposes of which are indicated by their names—armor piercing, tracer and incendiary. Before the end of the war American production of rifle ammunition amounted to approximately 3,500,000,000 rounds, of which 1,500,000,000 were shipped overseas. In addition 100,000,000 rounds were secured from the French and British.

Summary.

1. When war was declared the army had on hand nearly 600,000 Springfield rifles. Their manufacture was continued, and the American Enfield rifle designed and put into production.

2. The total production of Springfield and Enfield rifles up to the signing of the armistice was over 2,500,000.

3. The use of machine guns on a large scale is a development of the European war. In the American army the allowance in 1912 was four machine guns per regiment. In 1919 the new army plans provide for an equipment of 336 guns per regiment, or eighty-four times as many.

4. The entire number of American machine guns produced to the end of 1918 was 227,000.

5. During the war the Browning automatic rifle and the Browning machine gun were developed, put into quantity production and used in large numbers in the final battles in France.

6. The Browning machine guns are believed to be more effective than the corresponding weapons used in any other army.

7. American production of rifle ammunition amounted to approximately 3,500,000,000 rounds, of which 1,500,000,000 were shipped overseas.

ARTILLERY.

When the United States declared war on Germany in 1917 there were 900 pieces of field artillery available. The gun on hand in the largest quantities was the 3-inch field piece, of which we had 544, of which fifty are required for one division. This was a sufficient number to equip eleven divisions. The initial plan called for the formation of forty-two divisions, which would require 2,100 3-inch field pieces almost at once. To meet the situation the decision was made in June, 1917, to allot our own guns to training purposes and to equip our forces in France with artillery conforming to the French and British standard calibers. The arrangement was to buy from the British and French the artillery needed for our first divisions and ship to them in return equivalent amounts of steel, and smokeless powder were all required by the hundreds of million pounds. As no firms were prepared to manufacture complete rounds it was necessary for the ordnance department to make contracts for each component and assume the burden of directing the distribution of these components between the manufacturers. For the shrapnel it was possible to use the design substantially as had previously been used in this country, but the high explosive and gas shell proved more troublesome. A large supply of American shells was produced, however, before the signing of the armistice and shipment to Europe in quantity had begun. The ammunition actually used against the enemy at the front was nearly all of French manufacture, but the approaching supply from America made possible a more free use of the French and British reserves. Our monthly production of artillery ammunition rose to over 2,000,000 complete rounds in August and over 3,000,000 rounds in October if we include United States cali-

copper and other raw materials to manufacture new guns. With no serious exceptions, the guns from British and French sources were secured as needed, but our own plants were slower in producing complete units ready for use than had been hoped and planned.

In our factories the 3-inch guns of improved model which had been ordered in September, 1916, were changed in caliber to use standard French ammunition and became known as 77 mm. guns, model 1916. The British 18-pounder then being produced in this country was similarly redesigned and became known as the 75 mm. gun, model 1917. Work was immediately begun also on the plans for the French 75 mm. gun, so as to make it possible to produce it in American factories. For this gun, however, it was necessary to develop new manufacturing capacity. In the case of other calibers of artillery the same means in general were taken to secure a supply.

Artillery Ammunition.

In the magnitude of the quantities involved the artillery ammunition program was the biggest of all. Copper, steel, high explosives bers. By the end of 1918 the number of rounds of complete artillery ammunition produced in American plants was in excess of 20,000,000, as compared with 9,000,000 rounds secured from the French and British.

Smokeless Powder and High Explosives.

From April 1, 1917, to Nov. 11, 1918, the production of smokeless powder in the United States was 632,000,000 pounds, which was almost exactly equal to the combined production of France and Great Britain. This was not all for American use. About half the British supply in 1917 was drawn from this country and in 1918 more than one-third of the French supply was made in America. In the matter of high explosives, such as TNT, ammonium nitrate, picric acid and others, the United States was poorly prepared and it became necessary to erect new plants. As the result of the efforts made the rate of production at the close of the war was more than 40 per cent larger than Great Britain's and nearly double that of France. The averages for the three countries in August, September and October, 1919, were:

Country—	Pounds.
Great Britain	30,957,000
France	22,802,000
United States	43,888,000

Poison Gases.

In the Ypres salient early in 1915 the Germans introduced poison gas as a weapon in warfare. When America entered the war there were no facilities for producing toxic gases in large quantities. The government found it necessary to build its own chemical plants and to finance certain private firms. The majority of these plants were at what became known as Edgewood Arsenal, Md. The increase in production was rapid and steady during 1918 and before the armistice was signed more than 10,000 tons had been manufactured.

That gas is a powerful weapon in war is shown by the fact that in 1918 from 20 to 30 per cent of all the American casualties were caused by gas. At the close of the war the United States was equipped to produce gas at a more rapid rate than France, England or Germany.

American Artillery in France.

When the armistice came in November the American forces not only had a sufficient number of 75s for the twenty-nine combat divisions, but in addition enough more for twelve other divisions. A careful study of the battle records of all the divisions shows that if all the days in the line of all the combat divisions are added together, the total is 2,232. The records further show the number of days that each division was in line with its own artillery, with British artillery, with French, or without any.

The result of the compilation is to show that in every 100 days that our combat divisions were in line they were supported by their own artillery for seventy-five days, by British artillery for five days, by French for one and one-half days and were without artillery for eighteen and one-half days out of 100. Of these eighteen and one-half days, however, eighteen days were in quiet sectors and only one-half of one day in active sectors. There are only three records of American divisions being in an active sector without artillery support. The total of these three cases amounts to one-half of 1 per cent, or about fourteen hours out of the typical 100 days just analyzed.

The most significant facts about our artillery in France are presented in summary in the following table, which takes into account only light and heavy field artillery and does not include either the small 37-millimeter guns or the trench mortars:

Total pieces of artillery received to Nov. 11	3,499
Number of American manufacture	477
American made pieces used in battle	130
Artillery on firing line	2,251
Rounds of artillery ammunition expended	8,116,000
Rounds of ammunition of American manufacture expended	208,327
Rounds of American made ammunition expended in battle	8,400

Tractors and Tanks.

An innovation in this war, development of what in the future promises to be even more important, was the increased use of motor transportation. As applied to the artillery, this meant the use of caterpillar tractors to haul the big guns, especially over rough ground. When we entered the war no suitable designs existed for caterpillar tractors of size appropriate for the medium heavy artillery. But new 5-ton and 10-ton types were perfected in this country, put into production, and 1,100 shipped overseas before Nov. 1. About 300 larger tractors were also shipped and 350 more secured from the French and British.

The tank was an even more important application of the caterpillar tractor to war uses. In the case of the small 6-ton tanks, the efforts of this country were largely concentrated on improvement of design and on development of large scale production for the 1919 campaign. Up to the time of the armistice sixty-four had been produced in this country, and the rate at which production was getting under way is shown by the fact that in spite of the armistice the total completed to March 31, 1919, was 778. The burden of active service in France was borne by 227 of these tanks received from the French.

The efforts of this country in the case of heavy thirty-ton tanks were concentrated on a co-operative plan by which this country was to furnish liberty motors and the rest of the driving mechanism and the British the armor plate for 1,500 tanks for the 1919 campaign. It has been estimated that about one-half the work on the American components for this project had been completed before Nov. 11 and the work of assembly of the initial units was well under way. For immediate use in France this country received sixty-four heavy tanks from the British.

Summary.

1. When war was declared the United States had sufficient light artillery to equip an army of 500,000 men, and shortly found itself confronted with the problem of preparing to equip 5,000,000 men.

2. To meet the situation it was decided in June, 1917, to allot our guns to training purposes and to equip our forces in France with artillery conforming to the French and British standard calibers.

3. It was arranged that we should purchase from the French and British the artillery needed for our first divisions and ship them in return equivalent amounts of steel, copper and other raw materials so that they could either manufacture guns for us in their own factories or give us guns out of their stocks and replace them by new ones made from our materials.

4. Up to the end of April, 1919, the number of complete artillery units produced in American plants was more than 3,000, or equal to all those purchased from the French and British during the war.

5. The number of rounds of complete artillery ammunition produced in American plants was in excess of 20,000,000, as compared with 9,000,000 rounds secured from the French and British.

6. In the first twenty months after the declaration of war by each country the British did better than we did in the production of light artillery, and we excelled them in producing heavy artillery and both light and heavy ammunition.

7. So far as the allies were concerned the European war was in large measure fought with American powder and high explosives.

8. At the end of the war American production of smokeless powder was 45 per cent greater than the French and British production combined.

9. At the end of the war the American production of high explosives was 40 per cent greater than Great Britain's and nearly double that of France.

10. During the war America produced 10,000 tons of gas, much of which was sold to the French and British.

11. Out of every hundred days that our combat divisions were in line in France they were supported by their own artillery for seventy-five days, by British artillery for five days and by French for one and one-half days. Of the remaining eighteen and one-half days that they were in line without artillery, eighteen days were in quiet sectors, and only one-half of one day in each hundred was in active sectors.

12. In round numbers, we had in France 3,500 pieces of artillery, of which nearly 500 were made in America, and we used on the firing line 2,250 pieces, of which over 100 were made in America.

Airplanes, Motors and Balloons.

When the war was declared in April, 1917,

the United States had two aviation fields and fifty-five serviceable airplanes. The national advisory committee on aeronautics, which had been conducting a scientific study of the problems of flight, advised that fifty-one of these airplanes were obsolete and the other four obsolescent.

There were three primary requisites for bringing into existence an elementary aviation service. These were training planes, aviators and service planes. All of them had to be created.

The initial shortage of instructors and the opening of new fields made it necessary to retain a considerable proportion of the early graduating classes as instructors. At the date of the armistice there were thirty-four fields in operation, with 1,063 instructors; 8,602 men had been graduated from elementary training, and 4,028 from advanced training. There were then actually in training 6,528 men, of whom 59 per cent were in elementary and 41 per cent in advanced training schools.

There had been sent to the expeditionary forces more than 5,000 pilots and observers, of whom, at the date of armistice, 2,226 were still in training and 1,238 were on flying duty at the front.

The total personnel of our air service, including flying and nonflying officers, students and enlisted men, increased from about 1,200 at the outbreak of the war to nearly 200,000 at the close.

Training Planes and Engines.

With 4,500 aviators demanded and only fifty-five training planes on hand, the production of training planes was the problem of greatest immediate concern. A few planes provided for in the 1917 fiscal appropriation were on order. Other orders were rapidly placed. Deliveries of primary training planes were begun in June, 1917. To the date of the armistice over 5,300 had been produced, including 1,600 of a type which was abandoned on account of unsatisfactory engines.

Advanced training planes reached quantity production early in 1918; up to the armistice about 2,500 were delivered. Approximately the same number were purchased overseas for training the units with the expeditionary force.

European experience had demonstrated that the maintenance of a squadron, whether in training or in service, requires more engines than planes for replacements. Pending the results of American experience, British figures, requiring an average production of two engines per plane, were adopted as standard for American computations. Extensive orders were placed for two types of elementary and three types of advanced training engines.

Quantity production of training engines was reached in 1917 and by the end of November, 1918, a total of nearly 18,000 training engines and more than 9,500 training planes had been delivered. Of the engines, all but 1,346 were built in the United States; and of the 9,500 elementary training planes more than 8,000 were of American manufacture.

Service Planes.

On our entry into the war it became possible for American officers and engineers to learn the secrets of the great improvements that had been developed during the war in airplanes used in battle service. A commission was sent abroad to select types of foreign service planes for production in the United States. The commission selected four types, with a view to their adaptability to a new type of motor. These were the De Haviland-4 (British) observation and day bombing machine, the Handley Page (British) night bomber, the Caproni (Italian) night bomber and the Bristol (British) two seater fighter. At the time of the armistice the De Haviland plane was being produced at the rate of about 1,100 a month. A total of 3,227 had been completed, 1,885 had been shipped to France and 667 to the zone of the advance. The Handley Page was redesigned to take two high powered American motors, passed its tests and on the date of the armistice parts for 100 had been shipped abroad for assembly.

Delay in the receipt of plans for the Caproni greatly retarded the redesign of this machine. Successful tests of the new model were, however, completed previous to the armistice. The Bristol fighter was a failure. The total production of service planes at the end of November, 1918, was nearly 7,900, of which nearly 4,100 were of American manufacture, and remaining 3,800 were of foreign manufacture. In other words, of every 100 battle planes which we received up to the end of November, 1918, fifty-two were of American manufacture and forty-eight were made in foreign factories.

Two new models—the Le Pere two-seater fighter and the Martin bomber—were designed around the standard American motor, and in tests prior to the armistice each showed a performance superior to that of any known machine of its class. Neither, however, was completed in time for use in actual service.

Service Engines.

The rapid development of the heavier types of airplane, together with the pressing need for large scale production, made necessary the development of a high powered motor adaptable to American methods of standardized quantity production. This need was met in the Liberty twelve cylinder motor, which was America's chief contribution to aviation. After this standardized motor had passed the experimental stage production increased with rapidity, the October output being over 4,200. The total production of Liberty engines to the date of the armistice was 13,574. Of this production 4,435 were shipped overseas to the expeditionary forces and 1,025 were delivered to the British, French and Italian air services.

Other types of service engines, including the Hispano-Suiza 300 horse power, the Bugatti and the Liberty eight cylinder, were under development when hostilities ceased. The Hispano-Suiza 180 horse power had reached quantity production; 469 of this type were produced, of which about one-half were shipped overseas for use in foreign built pursuit planes.

Up to the end of November, 1918, the total number of service engines secured was in excess of 22,000. Of this number more than 16,000 or 73 per cent were from American sources and less than 6,000 from foreign sources.

Accessories.

In the line of aviation accessories some notable results were achieved by intensive research. Among them may be mentioned the oxygen mask, with telephone connections, enabling the flyer to endure the rarefied air at high altitudes and at the same time permitting him to have speaking contact with his companions; the military parachute, which was made safe, not a single American casualty occurring through parachute failure; electric heated clothing for aviators on high altitude work; long focus cameras, enabling observers to take photographs from altitudes of three miles or more; and the wireless telephone, enabling aviators to talk easily with other pilots in the air and with the ground stations. Much of the credit for the invention or improvement of these accessories is due the Americans.

Balloons

In no field did American manufacturing capacity achieve a greater relative success than in the production of observation balloons. Before the armistice we had produced 642 observation balloons and had received twenty from the French. Forty-three of our balloons had been destroyed and forty-five given to the French and British. This left us with 574 balloons at the end of the war or nearly twice as many as the enemy and the allies

combined had on the western front. The Belgian army had six, the British forty-three, the French seventy-two and the Germans 170.

Squadrons at the Front.

The American pilots of the Lafayette escadrille were transferred from the French to the American service Dec. 26, 1917, flying as civilians until formally commissioned in late January, 1918. They were then attached to and served with the French 4th army, operating over Reims.

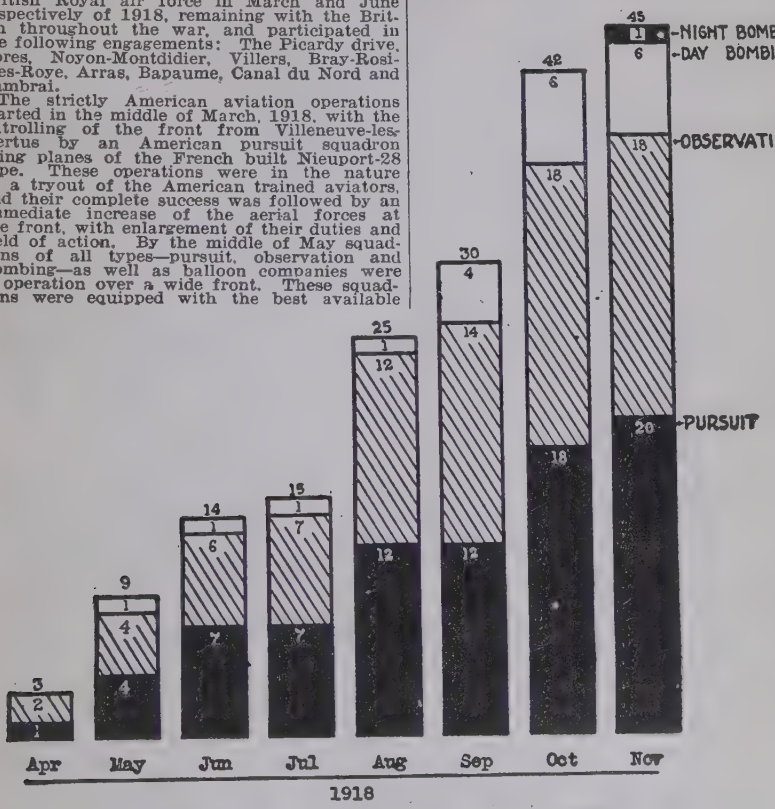
In addition to the purely American operations, two full squadrons were attached to the British Royal air force in March and June respectively of 1918, remaining with the British throughout the war, and participated in the following engagements: The Picardy drive, Ypres, Noyon-Montdidier, Villers, Bray-Rosieres-Roye, Arras, Bapaume, Canal du Nord and Cambrai.

The strictly American aviation operations started in the middle of March, 1918, with the patrolling of the front from Villeneuve-les-Vertus by an American pursuit squadron using planes of the French built Nieuport-28 type. These operations were in the nature of a tryout of the American trained aviators, and their complete success was followed by an immediate increase of the aerial forces at the front, with enlargement of their duties and field of action. By the middle of May squadrons of all types—pursuit, observation and bombing—as well as balloon companies were in operation over a wide front. These squadrons were equipped with the best available types of British and French built service planes.

The squadrons were of four types: Observation squadrons, whose business it is to make observations, take photographs and direct artillery fire; pursuit squadrons, using light fighting planes to protect the observation planes at their work, to drive the enemy from the air, or to "strafe" marching columns by machine-gun fire; the day bombers, whose work was the dropping of bombs on railways or roads; and the night bombers, carrying heavier bomb loads for the destruction of strategic enemy works.

In April the American forces just going into active sectors had three squadrons, two for observation and one for pursuit. Their strength totaled thirty-five planes. In May the squadrons were increased to nine. The most rapid growth occurred after July, when American De Haviland planes were becoming available in quantity for observation and day bombing service, and by November the number of squadrons increased to forty-five, with a total of 740 planes in action.

Of the total of 2,698 planes sent to the zone of action, 667 were of American make and the proportion was rapidly increasing when the armistice came. Of the 2,031 planes from foreign sources, nine-tenths were French. At the signing of the armistice only 1,162 planes of the 2,698 sent to the zone of advance remained, so rapid was the rate of destruction.



AMERICAN AIR SQUADRONS IN ACTION EACH MONTH.

Important Operations.

Three major operations furnish a comparison indicating the growth of the American air forces in action. They are: The second battle of the Marne, St. Mihiel and the Meuse-Argonne.

Chateau Thierry—July.

On the Chateau-Thierry-Soissons front the Germans at the start had a pronounced supe-

riority in the air. The American service, however, succeeded in establishing the lines of contact with the enemy airmen from three to ten miles within the enemy's line, photographed the entire front and the terrain deep behind the lines and played an important part in putting the German air forces on the defensive. The German concentration for the attack of July 15 was reported in detail and the location of the German reserves established, while the secrecy of the allied mobilization for the counterattack was maintained and the Germans were surprised. The American force employed consisted of four pursuit squadrons, three observation squadrons and two balloon companies.

St. Mihiel—September.

In capturing the St. Mihiel salient the American 1st army was aided and protected by the largest concentration of air force ever made, of which approximately one-third were American and the other two-thirds were French, British and Italian squadrons operating under American command. Throughout this operation the German back areas were kept under bombardment day and night; their reserves and ammunition dumps were located for the American long-range artillery; propaganda designed to disaffect enemy personnel was dropped; record was made by photograph of every movement of the enemy's lines and reserves, such information being frequently delivered to headquarters in finished photographs within half an hour of its occurrence; the fast pursuit planes armed with machine guns flew low over the German lines, firing directly into his infantry.

Day bombers and corps and artillery observers were forced to fly low on account of the fog which hampered all the day operations, greatly reduced the visibility and made infantry liaison especially difficult. This accounts for the fact that some trouble was experienced by the infantry with German "strafing" planes.

The American air force employed consisted of twelve pursuit squadrons, twelve observation squadrons, three bombing squadrons and fifteen balloon companies. This large force performed an amount of flying approximately three times as great as was done during the Chateau Thierry operations. During the last two weeks of July the flying time was more than 1,000 hours per week. The week of the St. Mihiel offensive it rose to nearly 4,000 hours.

Meuse-Argonne—September to November.

Because the Meuse-Argonne engagement covered a wider front and a more extended period of time, against an enemy who had improved his distribution of air force along the entire southern section of the front, no such heavy instantaneous concentration of planes as was made at St. Mihiel was possible. In this operation, moreover, less assistance was rendered by French and British flyers. The American force used during the engagement was considerably larger than at St. Mihiel.

On the signing of the armistice there were twenty pursuit squadrons, eighteen observation squadrons and seven squadrons of bombers, with 1,238 flying officers and 740 service planes. There were also twenty-three balloon companies.

Test of Battle.

In the course of their few months of active service American aviators brought down 755 enemy planes. Their own losses were 357 planes. Forty-three American and seventy-one German balloons were destroyed.

Summary.

1. On the declaration of war the United States had fifty-five training airplanes, of which fifty-one were classified as obsolete and the other four as obsolescent.

2. When we entered the war the allies made the designs of their planes available to us and before the end of hostilities furnished us from their own manufacture 3,800 service planes.

3. Aviation training schools in the United States graduated 8,602 men from the elementary course and 4,028 from the advanced course. More than 5,000 pilots and observers were sent overseas.

4. The total personnel of the air service, officers, students and enlisted men, increased from 1,200 at the beginning of the war to nearly 200,000 at its close.

5. There were produced in the United States to the end of Nov. 30, 1918, more than 8,000 training planes and more than 16,000 training engines.

6. The De Haviland-4 observation and day bombing plane was the only plane the United States put into quantity production. Before the signing of the armistice 3,227 had been completed and 1,885 shipped overseas. The plane was successfully used at the front for three months.

7. The production of the twelve cylinder Liberty engine was America's chief contribution to aviation. Before the armistice 13,574 had been completed, 4,435 shipped to the expeditionary forces and 1,025 delivered to the allies.

8. The first flyers in action wearing the American uniform were members of the Lafayette squadron, who were transferred to the American service in December, 1917.

9. The American air force at the front grew from three squadrons in April to forty-five in November, 1918. On Nov. 11 the forty-five squadrons had an equipment of 740 planes.

10. Of the 2,698 planes sent to the zone of advance for American aviators 667, or nearly one-fourth, were of American manufacture.

11. American air squadrons played important roles in the battles of Chateau Thierry, St. Mihiel and the Meuse-Argonne. They brought down in combat 755 enemy planes, while their own losses were only 357.

AMERICANS IN BATTLE.

Two out of every three American soldiers who reached France took part in battle. The number who reached France was 2,084,000 and of these 1,390,000 saw active service in the front line. American combat forces were organized into divisions, each consisting of some 28,000 officers and men. The British division numbered about 15,000 and those of the French and Germans about 12,000 each. Of the forty-two divisions that reached France twenty-nine took part in active combat service, while the others were used for replacements or were just arriving when the war ended. The battle record of the United States army in this war is largely the history of these twenty-nine combat divisions. Seven of them were regular army divisions, eleven were organized from the national guard and eleven from the national army troops.

American combat divisions were in battle for 200 days from April 25, 1918, when the 1st regular division, after long training in quiet sectors, entered an active sector on the Picardy front, until the signing of the armistice. During these 200 days they were engaged in thirteen major operations, of which eleven were joint enterprises with the French, British and Italians and two were distinctly American.

At the time of their greatest activity, in the second week in October, all twenty-nine American divisions were in action. They then held 101 miles of front, or 23 per cent of the entire allied battle line. From the middle of August until the end of the war they held, during the greater part of the time, a front longer than that held by the British. Their strength tipped the balance of man power in favor of the allies, so that from the middle of June, 1918, to the end of the war the allied forces were superior in number to those of the enemy.

The total battle advances of all the American divisions amount to 782 kilometers, or 485 miles, an average advance for each division of seventeen miles, nearly all of it against desperate enemy resistance. They captured 63,000 prisoners, 1,378 pieces of artillery, 708 trench mortars and 9,650 machine guns. In June and July they helped to shatter the enemy advance toward Paris and to turn retreat into a triumphant offensive. At St. Mihiel they pinched off in a day an enemy salient, which had been a constant menace to the French line for four years. In the Argonne and on the Meuse they carried lines which the enemy had determined to hold at any cost, and cut the enemy lines of communication and supply for half of the western battle front.

Another measure of American participation is the effect caused by the rapid arrivals of American troops on the rifle strength of the allied armies. On April 1 the Germans had an actual superiority of 324,000 riflemen on the western front. Their strength increased during the next two months, but began to drop during June. At the same time the allied strength, with the constantly growing American forces, was showing a steady increase, so that the two lines crossed during June. From that time on allied strength was always in the ascendancy and since the French and British forces were weaker in October and November than they were in April and May, this growing ascendancy of the allies was due entirely to the Americans. By Nov. 1 the allied rifle strength had a superiority over the German of more than 600,000 rifles.

THIRTEEN BATTLES.

American troops saw service on practically every stretch of the western front from British lines in Belgium to inactive sectors in the Vosges. On Oct. 21, 1917, Americans entered the line in the quiet Toul sector. From that date to the armistice American units were somewhere in line almost continuously.

It is difficult to cut up the year and twenty-two days which intervened into well defined battles, for in a sense the entire war on the western front was a single battle. It is possible, however, to distinguish certain major operations or phases of the greater struggle. Thirteen such operations have been recognized in which American units were engaged, of which twelve took place on the western front and one in Italy. These battles are named and the number of Americans engaged is shown herewith:

Vittorio-Veneto, Oct. 24 to Nov. 4	1,200

The first major operation in which American troops were engaged was the Cambrai battle at the end of the campaign of 1917. Scattering medical and engineering detachments serving with the British were present in the action, but sustained no serious casualties.

German Offensives.

The campaign of 1918 opened with the Germans in possession of the offensive. In a series of five drives of unprecedented violence the imperial great staff sought to break the allied line and end the war. These five drives took place in five successive months so as to take advantage of the light of the moon for that month. The first drive opened on March 21 on a fifty mile front across the old battle field of the Somme. In seventeen days of fighting the Germans advanced their lines beyond Noyon and Montdidier and were within twelve miles of the important railroad center of Amiens with its great stores of British supplies. In this battle, also known as the Picardy offensive, approximately 2,200 American troops, serving with the British and French, were engaged.

The attack upon Amiens had been but partially checked when the enemy struck again to the north in the Armentieres sector and advanced for seventeen miles up the valley of the Lys. A small number of Americans, serving with the British, participated in the Lys defensive.

For their next attack (May 27) the Germans selected the French front along the Chemin des Dames north of the Aisne. The line from Reims to a little east of Noyon was forced back. Soissons fell and on May 31 the Germans reached the Marne valley, down which they were advancing in the direction of Paris. At this critical moment our 2d division, together with elements of the 3d and 28th divisions, was thrown into the line. By blocking the advance at Chateau Thierry they rendered great assistance in stopping perhaps the most dangerous of the German drives. The 2d division not only halted the enemy on its front, but also recaptured from him the strong tactical positions of Bouresches, Belleau wood and Vaux.

The enemy had by his offensives established two salients threatening Paris. He now sought to convert them into one by a fourth

terrific blow delivered on a front of twenty-two miles between Montdidier and Noyon. The re-enforced French army resisted firmly and the attack was halted after an initial advance of about six miles. Throughout this operation (June 9-15) the extreme left line of the salient was defended by our 1st division. Even before the drive began the division had demonstrated the fighting qualities of our troops by capturing and holding the town of Cantigny (May 28).

There followed a month of comparative quiet during which the enemy reassembled his forces for the fifth onslaught. On July 15 he attacked simultaneously on both sides of Reims, the eastern corner of the salient he had created by the Aisne drive. To the east of the city he gained little. On the west he crossed the Marne, but made slight progress. His path was everywhere blocked. In this battle 85,000 American troops were engaged—the 42d division to the extreme east in the Champagne and the 3d and 28th to the west near Chateau Thierry.

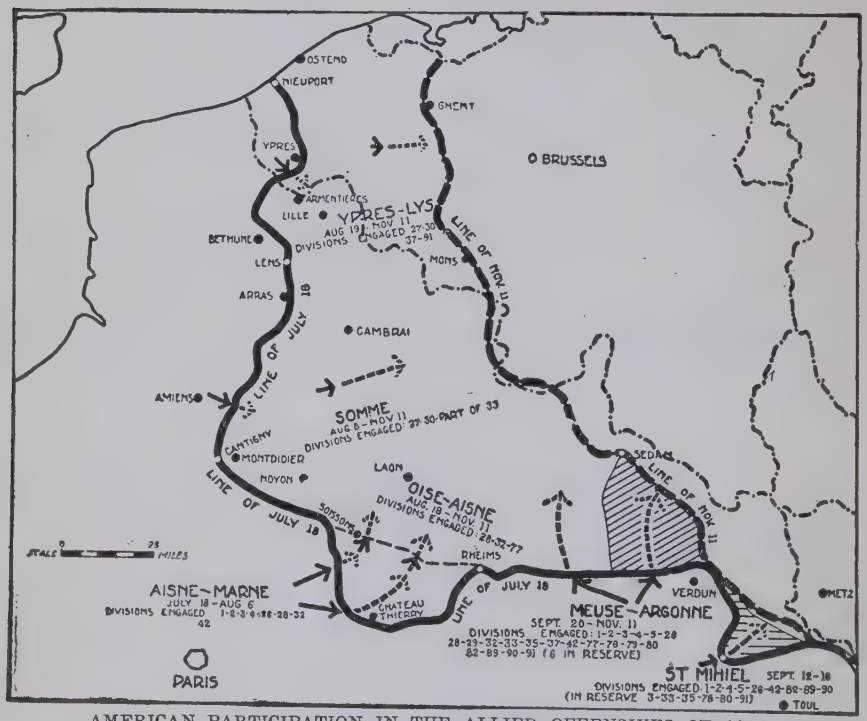
Allied Offensives.

The turning point of the war had come. The great German offensives had been stopped. The initiative now passed from Ludendorff to Marshal Foch and a series of allied offensives began, destined to roll back the German armies beyond the French frontier. In this continuous allied offensive there may be distinguished six phases or major operations in which the American expeditionary forces took part.

The moment chosen by Marshal Foch for launching the first counteroffensive was July 18, when it was clear that the German Champagne-Marne drive had spent its force. The place chosen was the uncovered west flank of the German salient from the Aisne to the Marne. The 1st, 2d, 3d, 4th, 26th, 28th, 32d and 42d American divisions, together with selected French troops, were employed. When the operation was completed (Aug. 6) the salient had been flattened out and the allied line ran from Soissons to Reims along the Vesle.

Two days later the British struck at the Somme salient, initiating an offensive which, with occasional breathing spells, lasted to the date of the armistice. American participation in this operation was intermittent. From Aug. 8 to 20 elements of the 33d division, which had been brigaded for training with the Australians, were in the line and took part in the capture of Chipilly ridge. Later the 27th and 30th divisions, who served throughout with the British, were brought over from the Ypres sector and used in company with Australian troops to break the Hindenburg line at the tunnel of the St. Quentin canal (Sept. 20-Oct. 20).

In the meantime simultaneous assaults were in progress at other points on the front. On Aug. 18 Gen. Mangin began the Oise-Aisne phase of the great allied offensive. Starting from the Soissons-Reims line, along which they had come to rest Aug. 6, the French armies advanced by successive stages to the Aisne, to Laon, and on Nov. 11 were close



AMERICAN PARTICIPATION IN THE ALLIED OFFENSIVES OF 1918.

to the frontier. In the first stages of this advance they were assisted by the 28th, 32d and 77th American divisions, but by Sept. 15 all of these were withdrawn for the coming Meuse-Argonne offensive of the American army.

The day after the opening of the Oise-Aisne offensive the British launched the first of a series of attacks in the Ypres sector, which continued with some interruptions to the time of the armistice and may be termed the "Ypres-Lys offensive." Four American divisions at different times participated in this operation. The 27th and 30th were engaged in the recapture of Mount Kemmel Aug. 31 to Sept. 2. The 37th and 91st were withdrawn from the Meuse-Argonne battle and dispatched to Belgium, where they took part in the last stages of the Ypres-Lys offensive (Oct. 31 to Nov. 11).

DAYS SPENT BY EACH DIVISION IN QUIET AND ACTIVE SECTORS.

With the organization of the American 1st army on Aug. 10, under the personal command of Gen. Pershing, the history of the American expeditionary forces entered upon a new stage. The St. Mihiel (Sept. 12-16) and Meuse-Argonne (Sept. 26-Nov. 11) offensives were major operations planned and executed by American generals and American troops.

In addition to the twelve operations above mentioned, American troops participated in the battle of Vittorio-Veneto (Oct. 24 to Nov. 4), which ended in the rout of the Austrian army.

Battle of St. Mihiel.

The first distinctly American offensive was the reduction of the St. Mihiel salient carried through from Sept. 12 to Sept. 15, largely by American troops and wholly under the orders of the American commander in chief. The American divisions were aided by French colonial troops and also by French and British air squadrons.

The attack began at 5 a. m., after four hours of artillery preparation of great severity, and met with immediate success. Before noon about half the distance between the bases of the salient had been covered and the next morning the troops of the 1st and 26th divisions met at Vigneulles, cutting off the salient within twenty-four hours from the beginning of the movement. Two comparisons between this operation and the battle of Gettysburg emphasize the magnitude of the action. About 550,000 Americans were engaged at St. Mihiel; the union forces at Gettysburg numbered approximately 100,000. St. Mihiel set a record for concentration of artillery fire by a four hour artillery preparation, consuming more than 1,000,000 rounds of ammunition. In three days at Gettysburg union artillery fired 33,000 rounds.

The St. Mihiel offensive cost only about 7,000 casualties, or less than one-third the union losses at Gettysburg. There were captured 16,000 prisoners and 443 guns. A dangerous enemy salient was reduced, and American commanders and troops demonstrated their ability to plan and execute a big American operation.

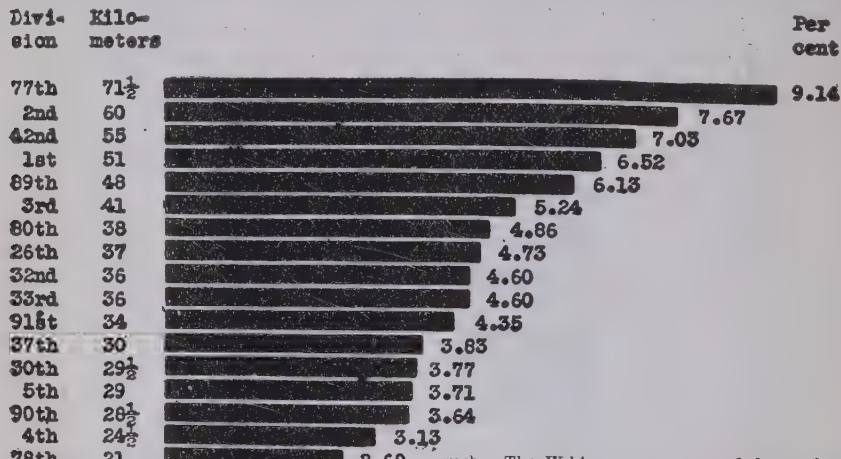
Battle of the Meuse-Argonne.

The object of the Meuse-Argonne offensive, said Gen. Pershing in his report of Nov. 20, 1918, was "to draw the best German divisions to our front and to consume them." This sentence expresses better than any long description not only the object but also the outcome of the battle. Every available American division was thrown against the enemy. Every available German division was thrown in to meet them. At the end of forty-seven days of continuous battle our divisions had consumed the German divisions.

The goal of the American attack was the Sedan-Mezieres railroad, the main line of supply for the German forces on the major part of the western front. If this line were cut a retirement on the whole front would be forced. This retirement would include, moreover, evacuation of the Briey iron fields.

which the Germans had been using to great advantage to supplement their iron supply. The defense of the positions threatened was therefore of such importance as to warrant the most desperate measures for resistance. When the engagement was evidently impending the commander of the German 5th army sent word to his forces, calling on them for unyielding resistance and pointing out that defeat in this engagement might mean disaster for the fatherland.

On the first day, the 26th of September, and the next day or two after that, the lines were



KILOMETERS ADVANCED BY EACH DIVISION AGAINST THE ENEMY. ONE KILOMETER EQUALS 62 MILES.

considerably advanced. Then the resistance became more stubborn. Each side threw in more and more of its man power until there were no more reserves. Many German divisions went into action twice, and not a few three times, until through losses, they were far under strength. All through the month of October the attrition went on. Foot by foot American troops pushed back the best of the German divisions. On Nov. 1 the last stage of the offensive began. The enemy power began to break. American troops forced their way to the east bank of the Meuse. Toward the north they made even more rapid progress, and in seven days reached the outskirts of Sedan and cut the Sedan-Mezieres railroad, making the German line untenable.

In the meantime (Oct. 2 to 28) our 2d and 36th divisions had been sent west to assist the French who were advancing in Champagne beside our drive in the Argonne. The liaison detachment between the two armies was for a time furnished by the 92d division.

In some ways the Meuse-Argonne offers an interesting resemblance to the Battle of the Wilderness, fought from May 5 to 12, 1864, in the civil war. Both were fought over a terrain covered with tangled woods and undergrush. The Wilderness was regarded as a long battle, marked by slow progress against obstinate resistance, with very heavy casualties. Here the similarity ends. The Meuse-Argonne lasted six times as long as the Battle of the Wilderness. Twelve times as many American troops were engaged as were on the Union side. They used in the action ten times as many guns and about 100 times as many rounds of artillery ammunition. The actual weight of the ammunition fired was greater than that used by the union forces during the entire civil war. Casualties were perhaps four times as heavy as among the northern troops in the Battle of the Wilderness.

The battle of the Meuse-Argonne was, beyond compare, the greatest ever fought by American troops, and there have been few, if any, greater battles in the history of the world. Some of the more important statistics of the combat are presented in the following table:

Days of battle	47
American troops engaged	1,200,000
Guns employed in attack	2,417
Rounds artillery ammunition used	4,214,000
Airplanes used	840
Tons explosives dropped on enemy	100
Tanks used	324
Miles advanced, maximum	34
Square kilometers of land taken	1,550
Villages and towns liberated	150
Prisoners captured	16,059
Artillery pieces captured	468
Machine guns captured	2,864
Trench mortars captured	177
American casualties	120,000

Summary.

1. Two out of every three American soldiers who reached France took part in battle. The number who reached France was 2,084,000, and of these 1,390,000 saw active service at the front.

2. Of the forty-two divisions that reached France twenty-nine took part in active combat service. Seven of them were regular army divisions, eleven were organized from the national guard and eleven were made up of national army troops.

3. American divisions were in battle 200 days and engaged in thirteen major operations.

4. From the middle of August until the end of the war the American divisions held during the greater part of the time a front longer than that held by the British.

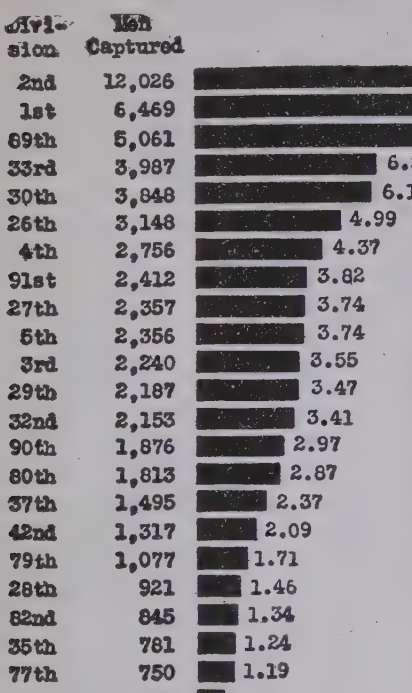
5. In October the American divisions held 101 miles of line, or 23 per cent of the entire western front.

6. On April 1 the Germans had a superiority of 324,000 in rifle strength. Due to American arrivals the allied strength exceeded that of the Germans in June and was more than 600,000 above it in November.

7. In the battle of St. Mihiel 550,000 Americans were engaged and the artillery fired more than 1,000,000 shells in four hours, which is the most intense concentration of artillery fire recorded in history.

8. The Meuse-Argonne battle lasted for forty-seven days, during which 1,200,000 American troops were engaged.

9. The American losses of the war were 49,000 killed and 230,000 wounded.



GERMAN PRISONERS CAPTURED BY EACH DIVISION.

Casualties and Health.

Of every 100 American soldiers and sailors who took part in the war with Germany two were killed or died of disease during the period of hostilities. In the northern army during the civil war the number was about ten. Among the other great nations in this war, between twenty and twenty-five in each 100 called to the colors were killed or died. To carry the comparison still further, American losses in this war were relatively one-fifth as large as during the civil war and less than one-tenth as large as in the ranks of the enemy or among the nations associated with us.

The war was undoubtedly the bloodiest which has ever been fought. One possible competitor might be the Crimean war, in which the casualty rate per 100 men was equally heavy. The British forces in the Crimean war lost twenty-two of every 100 men, the French thirty-one, the Turkish twenty-seven and the Russian forty-three. More than four-fifths of the losses were, however, deaths from disease, while in the recent war with Germany disease deaths were inconsiderable as compared with battle deaths. The forces engaged in the Crimean war were, moreover, much smaller.

Bulgaria	100,000
United States	48,900
Greece	7,000
Portugal	2,000
Total	7,450,200

The total battle deaths in the recent war were greater than all the deaths in all the wars for more than 100 years previous. From 1793 to 1914 the total deaths in war may be safely estimated at something under 6,000,000. Battle deaths alone from 1914 to 1918 totaled about 7,450,000.

Russia had the heaviest losses, in spite of the fact that she withdrew from the war after the fall of 1917. American losses were third from the bottom of the list. German losses were thirty-two times as great as the losses of the United States, the French twenty-eight and the British eighteen times as large.

That American battle losses were not more severe was due to the fact that our armies were in the heavy fighting for only 200 days.

The heaviest losses were in the Meuse-Argonne drive from the last week of September until Nov. 11. The weekly deaths during a part of that period were around the 6,000 mark.

Battle Deaths by Services.

The chances of death are much heavier in the infantry than in any other branch of the service. The following table shows the number of battle deaths in each 1,000 men in the various services who reached France:

Service.	Officers.	Men.
Infantry	55	46
Air	31	1
Tank corps	16	7
Engineer corps	10	6
Artillery	8	6
Cavalry	5	8
Signal corps	5	8
Medical department	4	5
Ordnance	2	3
Quartermaster	1	1

Wounded, Prisoners and Missing.

For every man who was killed in battle, seven others were wounded, taken prisoner or reported missing. The total battle casualties in the expeditionary forces are shown in the table appended. The number who died of wounds was only 6 per cent as large as the number who were wounded. The hospital records show that about 85 per cent of the men sent to hospitals on account of injuries returned to duty. About half the wounded were reported as slightly wounded and many of them would not have been recorded as casualties in previous wars. Except for 297 who died all the prisoners shown in the table returned.

[The above figures showing American casualties in the war were compiled about June 1, 1919. Later figures making some slight changes and also giving additional details will be found on another page.]

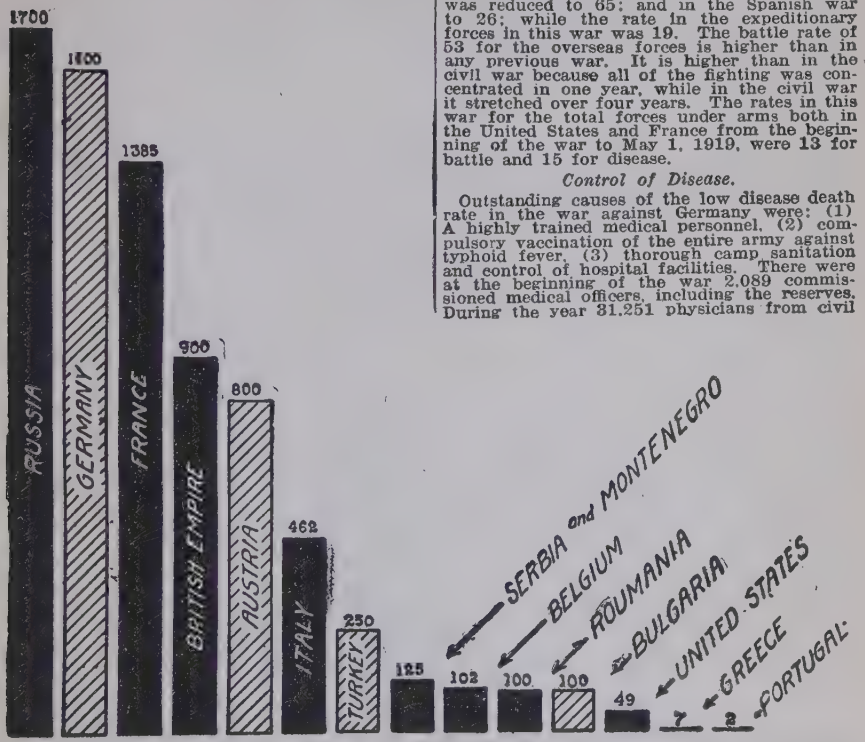
CASUALTIES SUFFERED BY EACH AMERICAN DIVISION.

Killed in action	34.180
Died of wounds	14.729
Total dead	48.909
Wounded severely	80.130
Wounded slightly	110.544
Wounded, degree undetermined	39.400
Total wounded	230.074
Missing in action	2.913
Taken prisoner	4.434
Grand total	286.330

The number of men reported as missing has been steadily reduced from a total of 22,724, exclusive of prisoners, to the figure 2,913 shown in the table. This reduction has gone

on without clearing any case as dead, except on evidence establishing beyond doubt the fact of death. Only 22 per cent of those who were originally reported as missing in action have now been returned as dead. The largest number have been found in hospitals, while a considerable number have returned to duty after being lost from their units.

The work of the central records office of the American expeditionary forces in clearing up the cases of men listed as missing has been more successful than that done in any of the other armies or in any previous great war. When the records are finally completed there will be very few American soldiers unaccounted for. The missing lists of the other nations still run into the hundreds of thousands.



TOTAL BATTLE DEATHS OF ARMIES IN THE EUROPEAN WAR (7,582,000). FIGURES FOR DEATHS BY COUNTRIES IN THOUSANDS.

Battle and Disease Losses.

The total number of lives lost in both the army and navy from the declaration of war to May 1, 1919, was 122,500. Deaths in the army, including marines attached to it, were 112,422. About two-thirds of these deaths occurred overseas. Of the 112,422 deaths 43 per cent, or 48,909, were battle deaths; 51 per cent, or 56,991, were deaths from disease, and 6 per cent, or 6,522, were from accident, etc. There were 768 lost at sea, of which 381 are included in the battle deaths, since their loss was the direct result of submarine activity. Almost exactly half the losses were from disease. If the comparison between disease and battle losses is limited to the expeditionary forces, battle losses appear more than twice as large as deaths from disease.

This is the first war in which the United States has been engaged that showed a lower death rate from disease than from battle. In previous wars insanitary conditions at camps and the ravages of epidemic diseases have resulted in disease deaths far in excess of the number killed on the battle field. Since the time of the Mexican war a steady improvement has been made in the health of troops in war operations. The death rate from disease in the Mexican war was 110 per year in each 1,000 men; in the civil war this was reduced to 65; and in the Spanish war to 26; while the rate in the expeditionary forces in this war was 19. The battle rate of 53 for the overseas forces is higher than in any previous war. It is higher than in the civil war because all of the fighting was concentrated in one year, while in the civil war it stretched over four years. The rates in this war for the total forces under arms both in the United States and France from the beginning of the war to May 1, 1919, were 13 for battle and 15 for disease.

Control of Disease.

Outstanding causes of the low disease death rate in the war against Germany were: (1) A highly trained medical personnel. (2) compulsory vaccination of the entire army against typhoid fever. (3) thorough camp sanitation and control of hospital facilities. There were at the beginning of the war 2,089 commissioned medical officers, including the reserves. During the year 31,251 physicians from civil life were commissioned in the medical corps.

Intestinal diseases such as dysentery, the typhoids, bubonic plague, cholera and typhus have ravaged and even obliterated armies in the past. In the war with Spain typhoid fever alone caused 85 per cent of the total deaths. In the war with Germany these diseases were practically eliminated as causes of deaths. During the entire war up to May 1, 1919, a total of only 2,328 cases of typhoid fever were reported and only 227 deaths from this cause.

Pneumonia was the greatest cause of death from disease. More than 40,000 died of the disease. Of these probably 25,000 resulted from the influenza-pneumonia pandemic which swept through every camp and cantonment in this country and caused thousands of

deaths in the expeditionary forces. Up to Sept. 14, 1918, only 9,840 deaths from disease had occurred in the army and the death rate for the period of the war up to that time was only 5 per year for each 1,000 men. During the eight weeks from Sept. 14 to the 8th of November 316,089 cases of influenza and 53,449 cases of pneumonia were reported among troops in this country. The disease reached its high point the second week in October, when four out of each 1,000 troops under arms in this country died. The rate subsided at the end of October, but during the succeeding months remained somewhat higher than it had been previous to the epidemic. Measles was prevalent during the first year of the war and was particularly dangerous as the predecessor of pneumonia. After vigorous efforts to control it, the number of cases was greatly reduced. Meningitis caused nearly 2,000 deaths, ranking next to pneumonia. Both of these contagious diseases were largely the result of bringing numbers of men together in the confinement of camps and cantonments where the control of contagion is difficult.

Hospitalization.

At the beginning of the war what was then considered an extravagant program of hospital construction was entered upon, with the intent that in no case should the army lack facilities for the care of the sick. The following table summarizes the hospital construction in the United States:

	No.	Beds.
New hospitals	62	88,468
Leased buildings	39	29,383
Post hospitals	48	6,056
Totals	149	123,899

The figures are exclusive of very numerous small hospitals already in army use. In addition more than 200 hospitals were put in operation overseas. On Dec. 1, 1918, there were available in army hospitals 399,510 beds, or 1 bed for every 9 men in the army. Of these 287,290 were overseas and 112,220 in this country. The hospital capacity was exceeded in this country only during the influenza epidemic, when it became necessary to take over barracks for hospital purposes. The overseas record was even better. Except during two weeks in October, at the height of the attack on the Hindenburg line, the number of patients did not exceed the normal bed capacity of the hospitals, and at that time there were approximately 60,000 unused emergency beds.

Over 130,000 patients have been evacuated from the expeditionary forces to hospitals in this country. They have been distributed to hospitals in this country in accordance with a twofold plan permitting the specialization of hospitals for the most efficient treatment of the various kinds of cases and placing the convalescents near their homes.

Summary.

1. Of every 100 American soldiers and sailors who served in the war with Germany two were killed or died of disease during the period of hostilities.

2. The total battle deaths of all nations in this war were greater than all the deaths in all the wars in the previous 100 years.

3. Russian battle deaths were 34 times as heavy as those of the United States, those of Germany 32 times as great, the French 28 times and the British 18 times as large.

4. The number of American lives lost was 122,500, of which about 10,000 were in the navy and the rest in the army and the marines attached to it.

5. In the American army the casualty rate in the infantry was higher than in any other service and that for officers was higher than for men.

6. For every man killed in battle seven were wounded.

7. Five out of every six men sent to hospitals on account of wounds were cured and returned to duty.

8. In the expeditionary forces battle losses were twice as large as deaths from disease.

9. In this war the death rate from disease was lower and the death rate from battle was higher than in any other previous American war.

10. Inoculation, clean camps and safe drinking water practically eliminated typhoid fever among our troops in this war.

11. Pneumonia killed more soldiers than were killed in battle. Meningitis was the next most serious disease.

12. Of each 100 cases of venereal disease recorded in the United States, 96 were contracted before entering the army and only 4 afterward.

13. During the entire war available hospital facilities in the American expeditionary forces were in excess of the needs.

WAR EXPENDITURES.

For a period of twenty-five months, from April, 1917, through April, 1919, the war cost the United States considerably more than $1,000,000 an hour. Treasury disbursements during the period reached a total of $23,500,000,000, of which $1,650,000,000 may be charged to the normal expenses which would have occurred in time of peace. The balance may be counted as the direct money cost of the war to the end of April, 1919, a sum of $21,850,000,000. The figure is twenty times the prewar national debt. It is nearly large enough to pay the entire cost of our government from 1791 up to the outbreak of the European war. Our expenditure in this war was sufficient to have carried on the revolutionary war continuously for more than 1,000 years at the rate of expenditure which that war actually involved.

In addition to this huge expenditure loans were advanced to the allies at the rate of nearly half a million dollars an hour. Congress authorized for this purpose $10,000,000,000, and there was actually paid to various governments the sum of $8,850,000,000.

Of the United States government war costs, the army was responsible for the expenditure of 64 per cent. or just short of two-thirds of the entire amount. Through April 30, 1919, there had been withdrawn from the treasury on the army account $14,244,061,000. If there is deducted from this figure what would be the normal expenditure for a peace time army for a similar period there remains a total of $13,930,000,000 directly chargeable to the war.

The rate of expenditure for the army and for the entire government increased rapidly as the war progressed. During the first three months war expenditures were at the rate of $2,000,000 a day. During the next year they averaged more than $22,000,000 a day. For the final ten months of the period the daily total reached the enormous sum of over $44,000,000. The very high daily average in the last period, most of which is in the months after the termination of hostilities, is surprising until we consider that the building of ships for the emergency fleet corporation, the construction and operation of naval vessels, the food, clothing, pay and land and ocean transportation of the army have had to go forward at about the same rate as during the war. The great flow of munitions and supplies for the army and navy could not, out of regard for the industrial balance of the country, be stopped with too great abruptness. A considerable number of war time activities and purchases had still to be paid for as well.

Army Expenditures.

The following table shows the amounts expended by each important army bureau to April 30, 1919:

Bureau.	Amount.	Pct.
Quartermaster corps, pay	$1,831,273,000	12.9
Other	6,242,745,000	43.8
Ordnance department	4,087,347,000	28.7

Bureau.	Amount.	Pct.
Air service	$859,291,000	6.0
Engineer corps	638,974,000	4.5
Medical department	314,544,000	2.2
Signal corps	128,920,000	.9
Chemical warfare	83,299,000	.6
Provost marshal	24,301,000	.2
Secretary's office	33,367,000	.2
Totals	14,244,061,000	100.0

The total of our army expenditures equals the value of all the gold produced in the whole world from the discovery of America up to the beginning of the European war. The single item of pay for the army is larger than the combined salaries of all the public school principals and teachers in the United States for the five years from 1912 to 1916.

Permanent Assets.

As a result of the war efforts large quantities of munitions, supplies and equipment have been secured which will be of value for many years to come. The army now owns some of the finest docks in the world. The sixteen national army cantonments and three of the national guard camps will be retained permanently as training camps. A number of first class aviation fields and depots and balloon schools will be a permanent asset. We have stocks of most articles of clothing sufficient to last our army for a number of years. There is a large supply of standardized trucks.

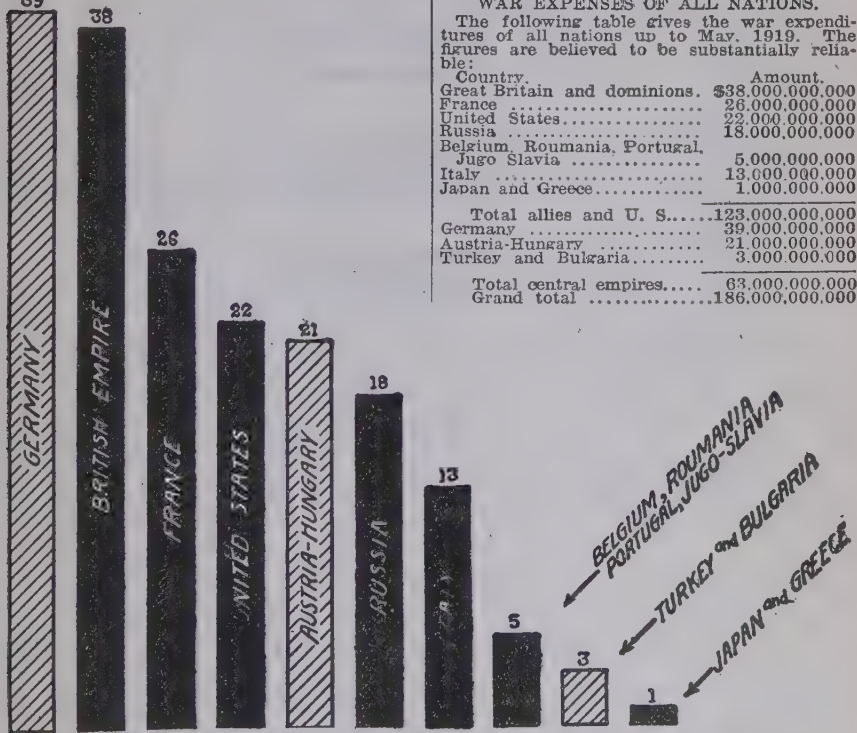
As to rifles and machine guns and their ammunition, light and heavy artillery and ammunition tanks and tractors, of these we have a supply more than sufficient to equip fully an army of a million men and maintain them in active combat for six months. These munitions are of the best quality and latest design—Springfield and Enfield rifles, Browning machine guns and automatic rifles, field guns and howitzers of tried French design. Articles of miscellaneous equipment are available in like quantity and quality.

Thousands of Liberty motors and service planes are immediately available for any emergency. Engineer, signal and medical equipment is on hand to the value of millions of dollars.

WAR EXPENSES OF ALL NATIONS.

The following table gives the war expenditures of all nations up to May, 1919. The figures are believed to be substantially reliable:

Country.	Amount.
Great Britain and dominions	$38,000,000,000
France	26,000,000,000
United States	22,000,000,000
Russia	18,000,000,000
Belgium, Roumania, Portugal, Jugo Slavia	5,000,000,000
Italy	13,000,000,000
Japan and Greece	1,000,000,000
Total allies and U. S.	123,000,000,000
Germany	39,000,000,000
Austria-Hungary	21,000,000,000
Turkey and Bulgaria	3,000,000,000
Total central empires	63,000,000,000
Grand total	186,000,000,000



TOTAL EXPENDITURES OF BELLIGERENTS IN THE EUROPEAN WAR. FIGURES AT THE HEAD OF EACH COLUMN INDICATE BILLIONS OF DOLLARS.

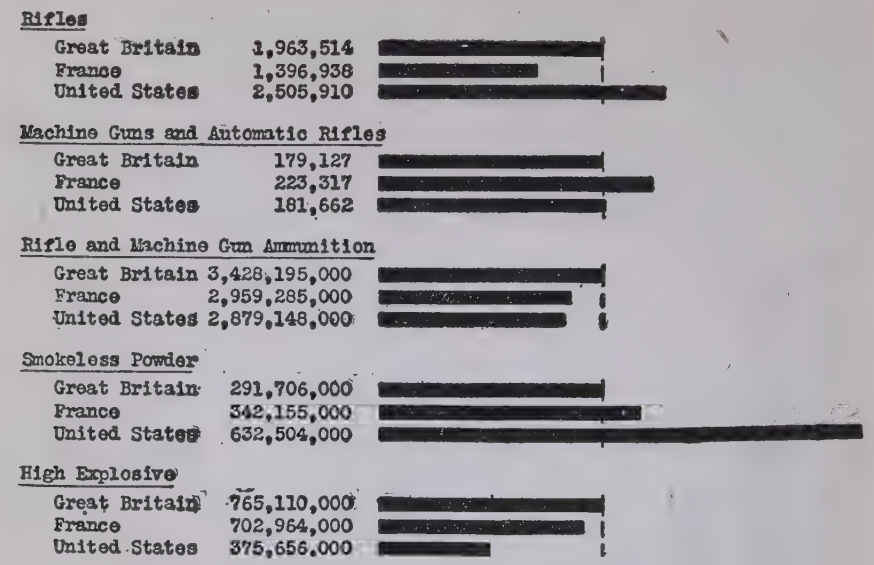
It is noteworthy that the United States spent about one-eighth of the entire cost of the war and something less than one-fifth of the expenditures on the allies' side.

Summary.

1. The war cost the United States considerably more than $1,000,000 an hour for over two years.

2. The direct cost was about $22,000,000,000, or nearly enough to pay the entire cost of running the United States government from 1791 up to the outbreak of the European war.

3. Our expenditure in this war was sufficient to have carried on the revolutionary war continuously for more than 1,000 years at the rate of expenditure which that war actually involved.



PRODUCTION OF ARTICLES OF ORDNANCE FROM APRIL 6, 1917, TO NOV. 11, 1918.

4. In addition to this huge expenditure nearly $10,000,000,000 has been loaned by the United States to the allies.

5. The army expenditures have been over $14,000,000,000, or nearly two-thirds of our total war costs.

6. During the first three months our war expenditures were at the rate of $2,000,000 per day. During the next year they averaged more than $22,000,000 a day. For the final ten months of the period from April, 1917, to April, 1919, the daily average was over $44,000,000.

7. Although the army expenditures are less than two-thirds of our total war costs, they are nearly equal to the value of all the gold produced in the world from the discovery of America up to the outbreak of the European war.

8. The pay of the army during the war cost more than the combined salaries of all the public school principals and teachers in

the United States for the five years from 1912 to 1916.

9. The total war costs of all nations were about $186,000,000,000, of which the allies and the United States spent two-thirds and the enemy one-third.

10. The three nations spending the greatest amounts were Germany, Great Britain and France, in that order. After them come the United States and Austria-Hungary, with substantially equal expenditures.

11. The United States spent about one-eighth of the entire cost of the war, and something less than one-fifth of the expenditures of the allies' side.

HONORS FOR GEN. JOHN J. PERSHING.

Gen. John J. Pershing, who arrived in France June 13, 1917, to prepare the way for the American expeditionary forces, returned to America Sept. 8, 1919. Both before and after his return he was the recipient of many signal marks of honor because of the distinguished part he and the great army under his command had taken in the war resulting in the defeat of the central powers and their allies, Bulgaria and Turkey. Riding at the head of picked American troops, he was acclaimed by millions in the victory celebrations in Paris July 14 and London July 19, 1919, as the chief representative of America's share in the victory. All of the allied countries awarded him the highest military decorations in their power to give. King Albert of Belgium bestowed upon him the Order of Leopold, April 4, 1919; England made him a knight of the grand cross of the Order of the Bath, July 17, 1919; France gave him the grand cross of Legion of Honor Aug. 3, 1918; King Victor Emmanuel conferred upon him the grand cross of the Military Order of Savoy Aug. 18, 1919; Roumania gave him the decoration of the Order of Michael the Brave in December, 1918, and he was also decorated by Belgium, Montenegro, Panama and other countries.

June 25, 1919, Oxford university conferred upon Gen. Pershing the degree of doctor of civil laws and on July 24 following he was honored in a similar way by Cambridge university. He was awarded the gold medal of the city of Paris July 3, 1919 and on July 18, 1919, the city of London presented him with a gold mounted and jeweled sword of honor bearing the inscription:

"Presented by the corporation of the city of London to Gen. John J. Pershing, G. C. B., commander in chief of the American expeditionary forces, in testimony of its high appreciation of the valuable services rendered by him and the troops under his command in the cause of freedom in the great war just concluded."

On July 26, 1919, Gen. Pershing was presented by the Franco-American committee in Paris with an artistic plate inspired by his historic words, "Lafayette, we are here," uttered at the time he laid a wreath on the tomb of America's great friend June 15, 1917, soon after his arrival in France.

After the conclusion of the armistice on Nov. 11, 1918, Gen. Pershing first devoted his energies to organizing the American army of occupation in Germany and then to the sending home for demobilization as rapidly as possible of the soldiers under his command. This work was practically accomplished in the summer of 1919 and by the end of September only those forces assigned to remain for an indef-

inite time in the occupied area remained in Europe. On July 12 Gen. Pershing transferred his headquarters from Chaumont to Paris and on Aug. 22 these headquarters were also definitely closed.

On Sept. 1 Gen. Pershing sailed for America on the Leviathan. Just before leaving he made an address of farewell to France—"to her gallant poilus, to her patriotic men and to her noble women." "The American army," he said, "in fulfillment of the will of the people came to France because we stood for the same principles of right and because the common ideals of the two countries called for mutual action upon this foundation. Close comradeship and co-operation rapidly molded our fresh and aggressive young manhood into a army which under you [Marshal Foch] as the allies' leader was to turn the tide of the war. In leaving with France our dead we are consoled that their graves will be tenderly cared for and become a sacred shrine that will still more firmly bind us together."

The address was in reply to one by Marshal Foch, who came aboard the transport a little while before it sailed. "In leaving France," the marshal said, "you leave your dead in our hands. On our soil we will care for them religiously and zealously, as bearing witness to the powerful aid you brought us. These dead bind still more strongly our already close union."

The Leviathan arrived at New York Sept. 8 and all the way up the harbor and on landing Gen. Pershing was greeted with popular enthusiasm as well as with official greetings delivered personally or by message from innumerable personages. Mayor Hylan of New York, Secretary of War Baker and Chief of Staff March were among the most notable of the men who personally bade him welcome home. President Wilson who had already begun his speechmaking tour of the country in defense of the league of nations sent a telegram in which he said: "You have served the country with fine devotion and admirable efficiency in a war forever memorable as the world's triumphant protest against injustice and its vindication of liberty—the liberty of peoples and of nations."

On the afternoon of Sept. 9 Gen. Pershing appeared before 30,000 school children of New York in Central park, each waving a small American flag. Brief exercises were held and the general thanked the children for their patriotism during the war. The next day Gen. Pershing led 25,000 veterans of the 1st division of regulars on a parade down Fifth avenue, New York, with some 2,000,000 persons crowding up to the line of march to see him and them. On the 11th the general attended a mass meeting and reception given in his honor at Madison Square Garden and on the following day left for Washington, where he was given another hearty welcome home. In the capital on Sept. 17 he led another parade of the 1st division down Pennsylvania avenue and was again applauded by hundreds of thousands of spectators.

The final mark of honor bestowed upon Gen. Pershing by his own country was when congress at a joint session of the house and senate formally thanked him for his services in the war. He had been given the distinguished service medal on Nov. 16, 1918, and by authority granted to the president Sept. 4 had been given the rank and title of "general of the armies of the United States" and the only remaining distinction that could be conferred upon him by congress was the vote of thanks. The resolution as passed by both houses and presented to him in person at a joint session on Sept. 17 was as follows:

"The thanks of the American people and the congress of the United States are due, and are hereby tendered, to Gen. John J. Pershing for his highly distinguished services as commander in chief of the American expeditionary forces in Europe and to the officers and men under his command for their unwavering duty and valor throughout the war."

The program for the joint session consisted of speeches of welcome and congratulation by Senator Albert B. Cummins of Iowa (in the absence of the vice-president), for the senate, Speaker Frederick H. Gillett for the house and Champ Clark for Missouri, the general's native state, and a response by Gen. Pershing.

Having received by name the thanks of congress Gen. Pershing is entitled to admission to the floor of the house of representatives.

WORK OF THE RED CROSS WAR COUNCIL.

Following is the full text of a statement issued by Henry P. Davison, chairman of the war council of the American Red Cross, Feb. 28, 1919:

The war council of the American Red Cross appointed by President Wilson on May 10, 1917, to carry on the work of the American Red Cross during the war, will at its request and by vote of the central committee cease to exist to-morrow.

Immediately the armistice was signed the war council instituted studies to determine when the strictly war work of the organization would have been sufficiently matured to enable the direction of affairs to be resumed by the permanent staff. Henry P. Davison, being in Paris when the armistice was signed, summoned a conference there of the heads of all the Red Cross commissions in Europe to canvass the situation. After considering all the factors it was concluded to make the transition on March 1. The very fortunate choice of Dr. Livingston Farrand as the new chairman of the central committee, and thereby the permanent chief executive of the Red Cross, makes possible the consummation of this plan under the most favorable conditions.

Detailed reports to congress and a complete audit of its accounts by the war department will constitute the final record of Red Cross activity during the war. Although it has been the rule to make public all expenditures when authorized and to give detailed information relative to all work undertaken, the war council in turning over its responsibilities to Dr. Farrand and his associates desires to give a brief resume of Red Cross war time activities to the American people, to whom the Red Cross belongs and whose generous contributions have made possible all that has been accomplished.

During the last twenty-one months the American people have given in cash and supplies to the American Red Cross more than $400,000,000. No value can be placed upon the contributions of service which have been given without stint and oftentimes at great sacrifice by millions of our people.

The effort of the American Red Cross in this war has constituted by far the largest voluntary gifts of money, of hand and heart, ever contributed purely for the relief of human suffering. Through the Red Cross the heart and spirit of the whole American people have been mobilized to take care of our own, to relieve the misery incident to the war, and also to reveal to the world the supreme ideals of our national life.

Every one who has had any part in this war effort of the Red Cross is entitled to congratulate himself. No thanks from any one could be equal in value to the self-satisfaction every one should feel for the part taken. Fully 8,000,000 American women have exerted themselves in Red Cross service.

When we entered the war the American Red Cross had about 500,000 members. To-day, as the result of the recent Christmas membership roll call, there are upward of 17,000,000 full-paid members, outside of the members of the junior Red Cross, numbering, perhaps, 9,000,000 school children additional.

The chief effort of the Red Cross during the war has been to care for our men in service and to aid our army and navy wherever the Red Cross may be called on to assist. As to this phase of the work, Surgeon-General Ireland of the United States army recently said: "The Red Cross has been an enterprise as vast as the war itself. From the beginning it has done those things which the army medical corps wanted done but could not do itself."

Red Cross Endeavor in France.

The Red Cross endeavor in France has naturally been upon an exceptionally large scale where service has been rendered to the American army and to the French army and the French people as well, the latter particularly during the trying period when the allied world was waiting for the American army to arise in force and power. Hospital emergency service for our army in France has greatly diminished, but the Red Cross is still being called upon for service upon a large scale in the great base hospitals, where thousands of American sick and wounded are still receiving attention. At these hospitals the Red Cross supplies huts and facilities for the amusement and recreation of the men as they become convalescent. Our army of occupation in Germany was followed with medical units prepared to render the same emergency aid and supply service which was the primary business of the Red Cross during hostilities. The army canteen service along the lines of travel has actually increased since the armistice.

As for work among the French people, now that hostilities have ceased the French themselves naturally prefer as far as possible to provide for their own. It has accordingly been determined that the guiding principle of Red Cross policy in France henceforth shall be to have punctilious regard to its every responsibility, but to direct its efforts primarily to assisting French relief societies. The liberated and devastated regions of France have been divided by the government into small districts, each officially assigned to a designated French relief organization.

The American Red Cross work in France was initiated by a commission of eighteen men who landed on French shores June 13, 1917. Since then some 9,000 persons have been upon the rolls in France, of whom 7,000 were actively engaged when the armistice was signed. An indication of the present scale of the work will be obtained from the fact that the services of 6,000 persons are still required.

Our American expeditionary force having largely evacuated England, the activities of the Red Cross commission there are naturally upon a diminishing scale. Active operations are still in progress in Archangel and Siberia.

The work in Italy has been almost entirely on behalf of the civilian population of that country. In the critical hours of Italy's struggle the American people, through their Red Cross, sent a practical message of sympathy and relief, for which the government and people of Italy have never ceased to express their gratitude.

In the Near East.

The occasion for such concentration of effort in Italy, England, Belgium, and even in France, having naturally and normally diminished, it has been possible to divert supplies and personnel in large measure to the aid of those people in the near east who have hitherto been inaccessible to outside assistance, but whose sufferings have been upon an appalling scale. The needs of these peoples are so vast that government alone can meet them, but the American Red Cross is making an effort to relieve immediately the more acute distress.

An extensive group of American workers has been dispatched to carry vitally needed supplies, and to work this winter in the various Balkan countries. In order to co-ordinate their activities, a Balkan commission has been established, with headquarters at Rome.

Italy, from which point alone all the Balkan centers can be reached promptly.

A commission has just reached Poland with doctors and nurses, medical supplies, and food for sick children and invalids. An American Red Cross commission has also been appointed to aid in relieving the suffering of Russian prisoners still confined in German prison camps.

An important commission is still working in Palestine. Through the war special co-operation has been given to the Armenian and Syrian relief commission, which was the only agency able to carry relief in the interior of Turkish dominions.

Red Cross effort is thus far-flung. It will continue to be so. But the movement represented in this work has likewise assumed an intimate place in the daily life of our people at home. The army of workers which has been recruited and trained during the war must not be demobilized. All our experience in the war shows clearly that there is an unlimited field for service of the kind which can be performed with peculiar effectiveness by the Red Cross. What its future tasks may be it is yet impossible to forecast. We know that so long as there is an American army in the field the Red Cross will have a special function to perform.

Nothing could be of greater importance to the American Red Cross than the plans just set in motion by the five great Red Cross societies of the world to develop a program of extended activities in the interest of humanity. The conception involves not alone efforts to relieve human suffering, but to prevent it; not alone a movement by the people of an individual nation, but an attempt to arouse all people to a sense of their responsibility for the welfare of their fellow beings throughout the world. It is a program both ideal and practical. Ideal in that its supreme aim is nothing less than veritable "Peace on earth, good will to men," and practical in that it seeks to take means and measures which are actually available and make them effective in meeting without delay the crisis which is daily recurrent in the lives of all peoples.

For accomplishing its mission in the years of peace which must lie ahead of us the Red Cross will require the ablest possible leadership, and must enjoy the continued support, sympathy and participation in its work of the whole American people. It is particularly fortunate that such a man as Dr. Livingston Farrand should have been selected as the permanent head of the organization. The unstinted fashion in which all our people gave of themselves throughout the war is the best assurance that our Red Cross will continue to receive that co-operation which will make its work a source of pride and inspiration to every American.

COMMISSIONER IN EUROPE.

In conformity with plans for carrying out of Red Cross postwar activities abroad, the office of commissioner in Europe was created in March, 1919, to take the place of the commission for Europe, a body established in November, 1918. Robert E. Olds, one of the pioneers of the commission for France, was appointed to the new position with the assimilated rank of lieutenant-colonel.

RECORD OF THE BRITISH GUARDS.

The following figures will indicate the losses sustained and honors won by some of the famous British guard regiments (foot) in the fighting in France from August, 1914, to Nov. 11, 1918:

Grenadier Guards—Killed, 203 officers, 4,436 other ranks.
Wounded, 242 officers, 6,934 other ranks.
Missing, two officers, 85 other ranks.

Wounded, 19 officers, 1,579 other ranks.
Missing, 1 officer.
Decorations won—D. S. O., 2; military cross, 25; D. C. M., 23; military medal, 67.

DEMOBILIZATION OF THE ARMY.

Immediately after the armistice on Nov. 11, 1918, the work of sending back to America the officers and men of the army of more than 2,000,000 sent to France was begun. It was done as expeditiously as possible, all available transports and warships being used for the purpose. The main ports of debarkation were Brest and St. Nazaire in France, though other ports in that country and in England were used. No serious mishaps occurred, and by Nov. 1, 1919, the task had been almost completed. Only a few thousand men and officers, mostly regulars, remained in France and the occupied part of Germany.

On their arrival in the United States the soldiers were sent to the camps nearest their homes and given their discharge papers. The system of demobilizing the men prevented any great parade like that which took place in Washington at the close of the civil war. Divisional parades were held in New York and Washington. Parades by smaller units took place by the hundreds in all the chief cities of the United States and continued throughout the spring and summer until most of the troops had returned home. Every effort was made to show honor to the men who had fought for their country on the battle fields of France.

WAR WORK SUMMARIZED.

Figures are now available showing the quantity of some of the materials required and purchased by the Y. M. C. A. during the period beginning with July, 1917, and ending with March, 1919, to carry out the program of giving pleasures, luxuries and conveniences to more than 4,000,000 men mobilized at home and abroad. The materials reached the men through nearly 1,000 Y. M. C. A. huts in the home camps and through 1,965 Y. M. C. A. buildings in France.

To transport supplies and facilities the Y. M. C. A. used approximately 1,300 automobiles and trucks. Of these 916 were bought in America at an expense of more than $1,000,000 and shipped abroad.

Equipment was provided for baseball, boxing, football, volley ball, basket ball and other games. Among the articles bought and sent abroad or to the home camps were the following:

Baseballs	1,197,766
Bats (for overseas)	155,293
Mitts	44,278
Fielders' gloves	91,060
Catchers' masks	21,875
Sets of bases	1,658
Pairs of boxing gloves	69,296
Footballs	122,788
Volley balls	43,096
Basket balls	42,941
Medicine balls	9,405

Religious and Other Literature.

In the camps at home and in the work overseas, the Y. M. C. A., from the time America entered the war until the end of the period under review, March 31, 1919, distributed 5,500,000 copies of the new testament, the bible and other scripture portions and also 20,000,000 copies of religious pamphlets, booklets and books, or a grand total of 25,500,000.

The Y. M. C. A. expended almost $1,500,000 in the purchase of 6,803,178 books and pamphlets for distribution abroad, a portion of which were textbooks necessary to its educational program. Ultimately these textbooks were taken over, with the educational work, by the army. In addition the Y. M. C. A. expended $228,405.45 for hundreds of thousands of copies of American magazines for the men.

To keep a steady flow of letters from the men in service to the relatives and friends at home, the Y. M. C. A. provided almost a million and three quarters of pen points for the use of the men abroad and more than a million for the men in the United States. More than 360,000 penholders were required and more than 2,000,000 pencils.

To the men abroad the Y. M. C. A. gave more than 400,000,000 sheets of letter paper, almost half as many envelopes and 16,000,000 postcards. It has been estimated that the envelopes sent to France would have reached five times the distance from New York to Brest. The envelopes alone supplied the home camps totaled 270,000,000. All Y. M. C. A. stationery was distributed without charge.

In addition to subscribing to American magazines for the men, the Y. M. C. A. began Oct. 8, 1917, the publication of periodicals at the various home camps. In the beginning it published thirty-two, but this number had in-

creased at the time of the signing of the armistice to forty-five. The total weekly circulation of these periodicals was approximately 700,000.

Entertainment.

The entertainment phase of the Y. M. C. A. war work was made up of two distinct divisions. The first of these was devoted to that type of entertainment which necessitated the sending to the home camps and abroad actors, musicians, vaudeville performers, dramatic directors for training soldier talent, lecturers and theatrical supplies.

In carrying out this part of its program, the Y. M. C. A. sent 675 lecturers and entertainers overseas and made possible the presentation of more than 34,000 entertainments under its auspices, in Europe, to audiences varying from a few hospital patients to 5,000 men. Y. M. C. A. entertainments of this type in the home camps totaled 97,521, with an aggregate attendance estimated at approximately 43,500,000.

Motion Pictures.

The other division of this work was the field of the motion picture. From May 15, 1917, to March 31, 1919, the cinema department of the Y. M. C. A. gave the following showings:

In France and occupied Germany	114,000
On transports and in the navy	98,400
In home camps	109,568
In the West Indies	10,600
In England	12,500
Among allied armies and prisoners	40,000
Total	385,068

The Y. M. C. A. sent more than 1,600 motion picture machines to Europe and used approximately 800 in this country. More than 13,000,000 feet of film were sent or purchased abroad and shown repeatedly. The total attendance of soldiers in France alone between August, 1917 and April, 1919, was in excess of 50,000,000. Not a cent was charged for any of the entertainment provided.

Remittance Service.

For the convenience of the men in the service, the Y. M. C. A. conducted in this period a banking business which involved handling approximately $38,000,000. It sold postal and express money orders at regular rates. In February, 1918, the Y. M. C. A. organized a soldiers' remittance bureau for transmitting money from the soldiers and sailors overseas to their families in this country. The service was conducted without charge to the men. The New York office up to March 31, 1919, disbursed 306,486 remittances, representing $18,159,929.84, or an average of $59.25 per remittance. On July 1, 1919, only 585 remittances, or less than one-fifth of 1 per cent, remained undelivered due to incorrect addresses of payees or the impossibility of locating the original remitters.

Post Exchanges and Canteens.

On Aug. 20, 1917, the commander-in-chief of the A. E. F., asked the organization to undertake the management of the post exchanges in order to release for combat soldiers who would otherwise be needed to conduct the exchanges. The adjutant-general, in a letter dated Sept. 29, 1917, said:

"Inasmuch as this exchange service has been entirely voluntary and as the principal object of the Y. M. C. A. is to minister to the needs of our soldiers it is not believed that any regulations are necessary which would fix the percentage of profits. The history and reputation of the Y. M. C. A. are sufficient guarantees against any unreasonable conduct of the exchanges. Sales will be made at a slight advance over cost plus cost of operations of exchanges."

By direction of the army authorities it was arranged that the post exchanges should be made as nearly self-supporting as possible. Under the original army authorization the Y. M. C. A. was directed to ship all canteen or post exchange supplies by regular merchant marine. The army arrangement provided that on this basis retail prices should be reckoned to include the cost of the merchandise, plus ocean freight, insurance, receiving, storage and delivering expenses in France, plus an item to cover losses due to shrinkage, wastage, damaged goods, etc. Later, through the assistance given by the army, the Y. M. C. A. was enabled to ship much of these supplies by government transports. This reduced the cost of transportation and made it possible to lower retail prices, which was done.

The National War Work council decided that the post exchanges should be permitted to use the Y. M. C. A. huts and abris and that no charge should be made for the service given by secretaries.

Men who have organized huge undertakings are best qualified to appreciate the task undertaken. So far as possible wherever the army went the Y. M. C. A. endeavored to push ahead with it. Buildings were taken over at every possible point where service could be given. By September, 1918, there were approximately 1,500 service centers. In more than 1,000 of these the post exchange service had been set up, as well as in many of the 1,000 or more foyers du soldat with the French army.

Within a few months there had been reared a large chain store system in the face of the most trying obstacles. Experts in this work had been called from America to supervise the task of organization and operation. These men found themselves supervising a merchandising system which in the eleven months ended March 31, 1919, had totaled over $37,000,000 in gross sales in France and in ten months over $2,600,000 in England.

While the bulk of the merchandise disposed of at the post exchanges came from America, the difficulties of ocean transportation made it impossible to obtain a sufficient supply to meet rapidly growing demands. As a solution, the Y. M. C. A., through the courtesy and assistance of the French government, succeeded in reopening forty-four disused French factories for the manufacture of necessary materials. The Y. M. C. A. supplied the raw materials, supervised the manufacture and took the entire product. The twenty biscuit factories, thirteen chocolate factories, three candy factories and eight jam factories operated in this fashion, when working at their maximum, produced monthly: 10,160,000 packages of biscuits; 7,400,000 tablets of drinking chocolate; 3,500,000 bars of sweet chocolate; 1,000,000 bars of milk chocolate; 3,800,000 bars of chocolate cream; 1,500,000 nut-covered chocolate rolls; 3,100,000 cartons of caramels and 2,000,000 tins of jam.

For the manufacture of chocolate, the Y. M. C. A had to transport cocoa beans and at times even the lumber for the cases in which the chocolate was packed, as well as the paper in which it was wrapped. For the manufacture of biscuits, it had to transport ingredients such as flour, sugar, bicarbonate of soda, almonds, peanuts, figs, etc., as well as lumber for packing cases. For the manufacture of confiture, fruit pulp was brought from Spain and southern France. For the manufacture of cans, tin was brought from Bordeaux. For the manufacture of paper and envelopes, it was necessary at times to transport the pulp of which the paper was made, the machinery for its manufacture, lamp-black for the printing-ink, gum arabic for the mucilage on the envelopes, and talc with which to surface the paper. The Y. M. C. A. also had to manufacture writing paper and other supplies. For example, it employed the paper factories in Tolosa, Spain, to manufacture paper. One hundred million sheets were made

there. This employed practically the entire town's population of men, women and children, for a considerable period of time.

In addition to these products manufactured abroad, the Y. M. C. A. in equipping its overseas canteens with supplies purchased 25,000,000 pounds of sugar. It further met the demand for sweets by the purchase of 2,000,000 cans of jam, 1,320,000 pounds of chocolate, 1,000,000 packages of cough drops, 2,500,000 packages of biscuits and crackers, and approximately 1,250,000 pounds of hard candy. Chewing gum was especially in demand and the Y. M. C. A. supplied 30,232,000 packages, enough, it might be said, to provide almost a stick and a half of gum to every man, woman and child in the United States.

At its overseas canteens the Y. M. C. A. served cocoa, sometimes free and sometimes at a nominal charge. To supply this service it purchased 1,873,000 pounds of cocoa powder. Although the soldiers were given coffee at their regular mess, there was a sufficient demand to necessitate the purchase of 393,000 pounds for use abroad. Fresh milk was practically impossible to obtain in France. The Y. M. C. A. bought and sent overseas approximately 4,500,000 cans of condensed milk, and 3,400 cases of dry, powdered and malted milk. The supply of flour for overseas aggregated more than 22,000,000 pounds, purchased at a cost of more than $1,250,000.

Tobacco was one of the largest single items in the Y. M. C. A. purchases for the men overseas. From July, 1917, to March 31, 1919, there were either sold at canteens or distributed as gifts 1,906,186,664 cigarettes, and in addition 50,000,000 cigars and approximately 5,250,000 pounds of smoking and chewing tobacco.

Secretaries were instructed by the Y. M. C. A. to make no charge whatever for any supplies distributed to men going into or coming out of combat. The total valuation of supplies thus distributed was $1,794,771.16.

In February, 1919, the Y. M. C. A., at its own request, was relieved by the army of the post exchange service because of "the increased responsibilities in promoting educational, athletic and entertainment activities, which are placing a rapidly increasing burden on our personnel," as the chief secretary of the A. E. F.-Y. M. C. A. expressed it. The commander-in-chief, in directing that the army resume control of the service, wrote:

"In making this change, permit me to thank you for the very valuable services and assistance which the Y. M. C. A. has rendered to the American expeditionary force in handling these exchanges. Handicapped by a shortage of tonnage and land transportation, the Y. M. C. A. has by extra exertion served the army better than would have been expected, and you may be assured that its aid has been a large factor in the final great accomplishments of the American army."

THE VICTORY LIBERTY LOAN.

Congress in an act known as the "Victory liberty loan act," approved March 3, 1919, authorized the secretary of the treasury to borrow on the credit of the United States not to exceed $7,000,000,000 and to issue notes therefor from time to time in such forms and on such terms as he might prescribe. The full text of this act will be found beginning on page 91 of this volume. The amount and the terms of the bond issue were announced by Secretary Glass on April 13. The total amount was fixed at $4,500,000,000 and the bonds were to be of two classes of short term notes bearing 4¾ and 3¾ per cent interest, respectively. The two classes of securities were further described thus:

"The 4¾ per cent convertible gold notes of the United States are exempt from state and local taxes, except estate and inheritance taxes, and exempt from normal federal income taxes, but not exempt from federal income surtaxes. These notes will mature in four years, be redeemable in three years, and will be convertible into the following class at any time during their life at the option of the holder.

"The 3¾ per cent convertible gold notes of the United States are exempt from all federal, state and local taxes, except estate and inheritance taxes. These notes will mature in four years, be redeemable in three years and will be convertible into notes of the foregoing class at any time during their life at the option of the holder.

"Oversubscriptions will be rejected and allotments made on a graduated scale similar in its general plan to that adopted in connection with the first liberty loan. Allotment will be made in full on subscriptions up to and including $10,000.

"The notes of both series will be dated and bear interest from May 20, 1919, and will mature on May 20, 1923. Interest will be payable on Dec. 15, 1919, and thereafter semi-annually on June 15 and Dec. 15, and at maturity. All or any of the notes may be redeemed before maturity at the option of the United States on June 15 or Dec. 15, 1922, at par and accrued interest."

The "drive" for the loan began April 21 and closed May 10. It was conducted in the same manner as were the previous campaigns by means of posters, advertisements, speeches, personal canvassing, the giving of Victory buttons and "plus" chevrons and by other methods. It was perhaps less spectacular than on former occasions while the war was still in progress but it was equally successful and the issue was heavily oversubscribed.

DETAILS OF LOANS.

First liberty, 30 year 3½ per cent loan—Subscriptions began May 14, 1917, and ended June 16; bonds issued June 15, 1917; maturity, June 15, 1947; interest payable June 15 and Dec. 15 each year; convertible into higher rate bonds but not into short term obligations; exempt from all taxation, except inheritance and estate taxes, both as to principal and interest; redeemable by the government on and after June 15, 1932.

Second liberty, 15 and 30 year, 4 per cent loan—Subscriptions began Oct. 1, 1917, and ended Oct. 27; bonds issued Nov. 15; maturity Nov. 15, 1942, and June 15, 1947; interest payable Nov. 15 and May 15; convertible into subsequent issues of bonds bearing interest at a higher rate than 4 per cent; exempt from state and local taxes and from normal income tax but not from estate, inheritance, supertax, excess and war profits taxes on all incomes above $5,000; redeemable by the government on or after Nov. 15, 1927.

Third liberty, 10 year, 4¼ per cent loan—Subscriptions began April 6, 1918, and ended May 4; issued May 9, 1918; maturity, Sept. 15, 1928; interest payable Sept. 15 and March 15; exemptions same as in second loan; not convertible into future issues and not redeemable until maturity.

Fourth liberty, 15 and 20 year, 4¼ per cent loan—Subscriptions began Sept. 28, 1918, and closed Oct. 18; issued Oct. 24, 1918; maturity, Oct. 15, 1933 and Oct. 15, 1938; interest payable April 15 and Oct. 15; exemption practically the same as in case of second and third loans; not convertible into future issues; redeemable at government's option on and after Oct. 15, 1933.

Fifth victory, 3 and 4 year, 3¾ and 4¾ per cent loan—Subscriptions began April 21, 1919, and ended May 10; issued May 20, 1919; maturity, May 20, 1923; interest payable Dec. 15 and June 15; 3¾ notes exempt from all except state and inheritance taxes; 4¾ notes exempt from all except inheritance, graduated additional income taxes or surtaxes and excess profits and war profits; two series convertible and reconvertible into each other before maturity or call for redemption; redeemable after June 15, 1922, upon four months' notice.

LIBERTY LOAN EXEMPTIONS FROM FEDERAL INCOME TAXES.

The bond department of the Merchants Loan and Trust company of Chicago in the fall of 1919 prepared the following list of liberty and victory loan exemptions from federal income taxes:

1. Any issue 4% and 4¼% during life of bonds	$ 5,000
2. Any issue 4% and 4¼% for five years after close of war	30,000
3. Any issue 4% and 4¼% provided ⅓ of amount is subscribed for in victory loan notes and still held	20,000
4. Fourth loan 4¼% for two years after close of war	30,000
5. Original subscriber holding $30,000 4th loan 4¼% receives 150% additional exemption in any other issue of 4% and 4¼% bonds for two years after close of war	45,000
6. First loan 4¼%, 2nd converted, for two years after close of war	30,000
Total possible exemption	$160,000

Note—First loan 3½% and victory loan 3¾% exempt from all income taxes. Victory loan 4¾% exempt from normal income tax only.

AMERICAN WAR EXPENSE.

Secretary Glass of the treasury department sent a communication July 9, 1919, to Senator Penrose of the senate finance committee and to Representative Fordney a letter in which he set forth the manner in which the United States provided the necessary finances for taking part in the world war from April 6, 1917, to June 30, 1919. In his letter to Mr. Fordney the secretary said:

"I take pleasure in handing you herewith for your information and that of the committee on ways and means the following statements:

"A. Preliminary financial statement of the United States government for the period from April 6, 1917, to June 30, 1919.

"B. Preliminary statement of the public debt on June 30, 1919.

"C. Statement showing classified receipts, exclusive of the principal of the public debt, by months from April 6, 1917, to June 30, 1919, as published in daily treasury statements.

"D. Statement showing classified disbursement, exclusive of the principal of the public debt; by months from April 6, 1917, to June 30, 1919, as published in daily treasury statements.

"Expenditures in the month of June just ended amounted in round figures to $809,000,000, or less than for any month since September, 1917.

"Expenditures for the fiscal year just ended amounted to $18,514,000,000.

"Expenditures for the war period amounted to $32,427,000,000 and of these more than $9,384,000,000, or about 29 per cent, were met out of tax receipts and other revenues than borrowed money, although payment of nearly half of the income and profits taxes for the fiscal year 1919 has not yet been made, such payment being deferred until the fiscal year 1920.

"In this calculation no deduction is made of expenditures for loans to the allies, which on June 30 amounted to $9,102,000,000, or for other investments, such as ships, stocks of the war finance corporation, bonds of the federal land banks, etc.

"If we assume that the expenditures of the government on a peace basis would have been at the rate of $1,000,000,000 a year, or for the period under discussion of nearly twenty-seven months would have equaled $2,250,000,000, then we may estimate the gross cost of the war to June 30, 1919, at $30,177,000,000.

"The gross public debt (without any deduction for loans to the allies or other investments) amounted on June 30, 1919, to $25,484,000,000. Of this sum only $3,634,000,000 was in the form of treasury certificates, or floating debt. Of such certificates more than $608,000,000 matured or were reduced on July 1, 1919, and were paid out of the net balance in the general fund on June 30, 1919, which amounted to $1,251,000,000. Deducting the certificates last referred to, the floating debt on June 30, 1919, was little more than $3,000,000,000, which is roughly the estimated amount of the deferred installments of the income and profits taxes for the fiscal year 1919 and of the deferred installments of the victory loan subscriptions.

"In the announcement given to the press on April 14, 1919, of the terms of the victory liberty loan, I made the following statement with reference to financing the future requirements of the government:

"'This will be the last liberty loan. Although as the remaining war bills are pre-

sented further borrowing must be done, I anticipate that the requirements of the government in excess of the amount of taxes and other incomes can, in view of the decreasing scale of expenditure, be readily financed by the issue of treasury certificates from time to time as heretofore, which may be ultimately refunded by the issue of notes or bonds without the aid of another great popular campaign such as has characterized the liberty loans.'

"I confirm the statement above quoted. The decision then taken has been fully sustained by the experience of the last three months.

"The successful flotation of the victory loan and the adjustment of the amount and terms of the issue have resulted, as I hoped they would, in a strong market at about par for these notes, without the necessity of government support, and in an improving market for the bonds of the second, third and fourth liberty loans, evidenced not only by the firm market quotations but by strong undercurrents of investment buying, which give reason for the hope that, with the continuance of favorable general conditions, there will be consistent appreciation in the market prices of these bonds.

"I do not now think it will be wise to make any further issues of long term bonds before the maturity or redemption of the victory notes, when there will have been such an interval in government offerings of all kinds as must inevitably result in marked improvement of the market prices of the existing issues, with corresponding decreases in the interest bases at which they are selling, and consequent assurance that the government will be able to finance itself for a longer period upon better terms.

"It is not possible at this time, when appropriations for the coming year are under consideration by the congress, when contract claims by and against the United States are still in process of settlement, when demobilization is still incomplete, when the extent of the liability on the wheat guaranty is unascertained, and when the business upon which the income and profits tax receipts in the first half of the calendar year 1920 are to be based is still only half transacted, to make a formal estimate of the receipts and expenditures of the United States during the fiscal year 1920.

"But so large a part of the war expenditures has been paid or provided for out of taxes and the issues of bonds or notes already sold, and so small a part is unfunded, that I confidently expect that the government will be able not only to meet its further temporary requirements for the decreasing scale of expenditure by the sale of treasury certificates of indebtedness bearing interest at the rate of 4½ per cent, in moderate amounts, at convenient intervals, when market conditions are favorable, and upon terms advantageous to the government.

"It will not be desirable to fund all the certificates of indebtedness, for the issue of certificates of indebtedness in anticipation of income and profits tax installments not only furnishes a means of financing the requirements of the government temporarily on easy terms, but constitutes an almost necessary financial expedient to enable the taxpayer to save and to prepare gradually for the great tax payments, and to relieve banking machinery of the government of the great strain which would be imposed upon it if these tax installments had to be paid on a single day without such preparation. * * *

"I need scarcely say to you that the realization of these sanguine expectations is contingent upon the practice of the most rigid economy by the government and the continuance of ample revenues from taxation. Such a course, accompanied by the practice of sober economy and wise investment by our people, and strict avoidance of waste and speculation, will make it possible for the American people to respond to the demands to be made upon them privately for capital and credit by the nations and peoples of Europe—demands which are re-enforced by the strongest and most vital ties of sympathy for the allies who fought and won the war with us, as well as by the most obvious dictates of self-interest.

"I am writing a similar letter to the Hon. Boies Penrose, chairman of the committee on finance.

"It has seemed to me only proper at the end of the last fiscal year of the war period to lay these facts and opinions before the committee on ways and means and the finance committee, which bear so large a measure of responsibility for the war loan legislation; and to make them public also, since they vitally concern the millions of Americans whose purchases of government securities, and tax payments, made this record of war finance possible. CARTER GLASS."

AVIATION LOSSES IN THE WAR.

American.

Casualties in the United States air service personnel, serving with the armies of the United States and the allies at the front, numbered 554. Of the total, 171 men were killed in combat, 135 were taken prisoners, 129 wounded, 73 missing, 42 killed in accidents and four met their deaths from other causes. The record by months shows the rapid rise in casualties as the American flyers began to get into action. It follows: March, 1918, 2; April, 0; May, 27; June, 29; August, 65; September, 181; October, 125; November to the 11th, 43.

In a statement issued by the war department in Washington June 5, 1919, these figures were given, the killed including training casualties and deaths from accident and the missing including also prisoners: Killed, 509, or 50 per cent of the total; wounded, 241, or 23 per cent; missing, 277, or 27 per cent of the actual casualties of American airmen.

French.

Statistics of the losses in French aviation in the war showed that this branch of the French army had proportionately the heaviest casualties of any of the services. The number killed was 1,945. This included pilots and observers. In the battle zone 1,461 were missing and 2,922 were wounded. In the interior zone 1,927 were lost. The total loss was 7,757, or 61 per cent of the total effectives. The total number of airmen in the French aviation service Dec. 1, 1918, was 19,219.

British.

The British aviation casualties were: Killed, 2,680, or 36 per cent; wounded, 2,988, or 40 per cent; missing, 1,837, or 23 per cent. The casualties include both those killed in combat and those killed in accidents.

STRENGTH OF ARMIES ON WESTERN FRONT.

In February, 1919, the statistics branch of the American expeditionary force general staff gave the rifle strength of the allied and German armies on the western front from April 1 to Nov. 1, 1918, by months, as follows:

Date.	Allies.	German.
Apr. 1	1,245,000	1,569,000
May 1	1,343,000	1,600,000
June 1	1,496,000	1,639,000
July 1	1,556,000	1,412,000
Aug. 1	1,672,000	1,395,000
Sept. 1	1,682,000	1,339,000
Oct. 1	1,594,000	1,223,000
Nov. 1	1,485,000	866,000

By "rifle strength" is meant the "number of men standing in the trench ready to go over with the bayonet." There are 12,250 rifles in an American division.

AMERICAN TROOPS IN GERMANY.

The American troops remaining in the occupied part of Germany after Sept. 30, 1919, consisted of the following units:

Unit.	Officers.	Men.
8th infantry	114	3,720
7th machine gun battalion	16	379
2d battalion, 6th F. A.	20	620

Total	201	6,207

FINAL FIGURES ON AMERICAN CASUALTIES IN THE WAR.

The war department on Sept. 1 issued its final report on the casualties of the American army in the European war. These included casualties in the Archangel and Vladivostok expeditions and were as follows:

Killed in action	35,585
Died of wounds	14,742
Total battle deaths	50,327
Died of disease	58,073
Died from accident, etc.	8,092
Total all deaths	116,492
Wounded in action	205,690
Total casualties	322,182

Note—Under the head of "missing" the department announced that all had been accounted for and that no one belonged under that classification.

CASUALTY RATES BY ARM OF SERVICE.

Based on the final returns of the central records office the battle deaths and wounded are measured against the total number of troops in each service reaching France.

BATTLE DEATHS OF OFFICERS.

Of the 11,000 regular army officers who served in the war 148 died on the field of battle. This number included 1 general officer, 5 colonels, 11 lieutenant-colonels, 16 majors, 45 captains, 55 first lieutenants and 15 second lieutenants. Of the 189,000 emergency officers who served in the war, 2,043 were killed. The deaths per 1,000 of regular officers were 13.5 and of emergency officers 10.8.

NAVAL VESSELS LOST IN THE WAR.

The following figures obtained by Reuter's Agency from an authoritative source in Paris, Feb. 28, 1919, show the total war losses incurred by the navies of the allies and the central powers in the period between Aug. 1, 1914, and Nov. 11, 1918:

	Britain.	France.	Italy.	Japan.	U. S.
Battle ships	13	4	3	1	..
Battle cruisers	3	..	..	..	..
Cruisers	27	5	2	4	1
Monitors	6	..	1	..	..
Destroyers	64	14	10	3	2
Torpedo boats	10	8	5	1	..
Submarines	50	14	8	..	1
Small craft	27	9	..	..	..
Total tonnage	550,000	110,000	76,000	50,000	17,000

Total for all the allies—803,000 tons.

	Germany.	Austria-Hungary.
Battle ships	1	3
Battle cruisers	1	..
Cruisers	24	2
Monitors	..	3
Destroyers	72	5
Torpedo boats	51	4
Submarines	205	8
Total tonnage	350,000	65,000

Total for the central powers—415,000 tons.

These figures include vessels lost through accident as well as those sunk through enemy action. This fact accounts for the large number of battle ships figuring in Great Britain's losses.

The total casualties in the British navy were 39,766, of whom 33,361 were killed or died from wounds and other causes.

SCUTTLING OF GERMAN FLEET IN SCAPA FLOW.

Most of the German warships surrendered to the allies under the terms of the armistice and delivered to the British Nov. 20, 21, 24 and Dec. 1, 1918, were sunk by the German officers and crews aboard on June 21, 1919. In accordance with the armistice, ships had been interned with skeleton crews and with no British guards aboard. Immediately after the surrender they were taken to Scapa Flow, a landlocked harbor in the Orkney islands, about 200 miles north of Edinburgh, Scotland. According to a statement made subsequently by the British admiralty ten battleships were sunk, one (the Baden) remaining afloat; five light cruisers were sunk and three beached; thirty destroyers were sunk, eighteen were beached and two remained afloat.

Admiral von Reuter of the German navy, who was in charge of the ships, admitted that he had given orders to sink the ships. His excuse was that he thought the armistice had been terminated and that he acted in obedience to orders given by the emperor early in the war that no German warship should be surrendered. He was placed under arrest and the men under him were interned until the

responsibility for the affair could be placed. It was agreed later that the German government must make reparation for the sinking of the fleet.

There was from the first a division of opinion as to the disposition of the captured German warships, some being in favor of sinking them all in the ocean, while others thought they should be retained and allotted proportionately to the allied powers. No conclusion had been reached by the peace conference at the time when the Germans took matters into their own hands. The vessels surrendered to the British Nov. 21, 1918, were:

Battle ships—Friedrich der Grosse.
Koenig Albert.
Kaiser.
Kronprinz Wilhelm.
Kaiserin.
Bayern.
Markgraf.
Prinzregent Luitpold.
Grosser Kurfuerst.

Battle Cruisers—Seydlitz.
Derfflinger.
Von der Tann.
Hindenburg.
Moltke.

Light Cruisers—Karlsruhe.
Frankfort.
Emden.
Nuernberg.
Brummer.
Koeln.
Bremse.

On Dec. 4, 1918, to make up for deficiencies in the list of the ships surrendered, the battle ship Koenig, the light cruiser Dresden and a destroyer were turned over and on Jan. 10, 1919, the Baden battleship was sent to take the place of the battle cruiser Mackensen which had not reached Scapa Flow.

Fifty destroyers of the latest type and 114 submarines were surrendered.

CASUALTIES IN PARIS BOMBARDMENT.

Official statistics published early in 1919 showed that in the various bombardments from the air and by the long range gun from the beginning to the end of the war the Germans killed 522 and wounded 1,223 persons in Paris and its suburbs. The number of projectiles that fell on the city was 1,049. The casualties caused by airplane bombs and gun shells were divided as follows:

	Projectiles.	Killed.	Wounded.
Airplanes and Zeppelins.	746	266	603
Long distance shells.....	303	256	620
Total.....	1,049	522	1,223

The raids by airplanes and Zeppelins continued more or less frequently throughout the war. The bombardment by the long range gun began March 23, 1918 and ended Aug. 9, the same year. The days on which casualties from the shelling occurred were:

Date.	Killed.	Wounded.
March 23	15	36

TRANSCONTINENTAL AIRPLANE RACE.

Many of the best military aviators in the United States took part in a twice across the American continent race beginning simultaneously on the Atlantic and Pacific coast on Oct. 8 and ending Nov. 1, 1919. It was under the auspices of the army air service in conjunction with the American Flying Club of New York city. Trophies for the best time made were offered by various chambers of commerce in the cities selected as stopping places or controls. Each flyer had to make a stop of half an hour at each halting place and flying after dark, except where unavoidable, was prohibited. There was an observer as well as a pilot on each machine. The distance to be covered in the round trip was 5,400 miles. The official stops and the distance to the next control follow:

Mineola, N. Y., zero; Binghamton, N. Y., 142; Rochester, N. Y., 125; Buffalo, 56; Cleveland, O., 180; Bryan, O., 147; Chicago, 160; Rock Island, Ill., 155; Des Moines, Iowa, 158; Omaha, Neb., 118; St. Paul, Neb., 132; North Platte, Neb., 118; Sidney, Neb., 112; Cheyenne, Wyo., 93; Rawlins, Wyo., 113; Green River, Wyo., 137; Salt Lake City, Utah, 137; Salduro, Utah, 100; Battle Mountain, Nev., 162; Reno, Nev., 169; Sacramento, Cal., 112; San Francisco, Cal., 75.

Sixty-three aviators started in the race on Oct. 8 and several others of more than eighty who had entered started later. Forty-eight ascended from Roosevelt field at Mineola, L. I., and fifteen from San Francisco, Cal. Not all finished. Some met with mishaps of various kinds, which took them out of the race, and a number, unfortunately, were killed by falls or collisions.

The aviator making the most spectacular race and finishing first in the west bound and the round trip race was Lieut. Belvin W. Maynard, a Baptist minister and winner of trip contest between New York and Montreal. Of the sixty-odd who started only eight completed the entire race. These in the order of finish were: Lieut. B. W. Maynard, Capt. J. O. Donaldson, Capt. Lowell H. Smith, Lieut. Alexander Pearson, Jr., Lieut. Earl Manzelman, Lieut.-Col. Hartney, Lieut. R. H. Bagby and Lieut. Robert Worthington.

Race officials in Washington announced unofficially Oct. 23, that Lieut. Alexander Pearson had completed the double trip across the continent in the best time. Pearson, fourth to finish, made the 5,400 miles in 48 hours, 37 minutes and 16 seconds, ten hours less than the time of Capt. Lowell H. Smith or Capt J. O. Donaldson and better than Lieut. B. W. Maynard's record, even after subtracting eighteen hours spent by Maynard in replacing his motor at Wahoo, Neb.

Those who lost their lives in the race were: Maj. D. H. Crissy, pilot, and Sergt. Virgil Thomas, at Salt Lake City, Utah, Oct. 8; Sergt. W. H. Nevitt at Port Deposit, N. Y., Oct. 8; Lieut. E. V. Wales, pilot, near Cheyenne, Wyo., Oct. 9; Worth D. McClure, passenger, at Buffalo, N. Y., Oct. 10; Lieut. French Kirby, pilot, and Lieut. Stanley C. Miller, observer, in Summit county, Utah, Oct. 15.

TREATY OF PEACE WITH GERMANY.

Following is the complete text of the treaty of peace with Germany as finally adopted and signed at Versailles, France, June 28, 1919:

THE UNITED STATES OF AMERICA, THE BRITISH EMPIRE, FRANCE, ITALY and JAPAN,

These Powers being described in the present Treaty as the Principal Allied and Associated Powers,

BELGIUM, BOLIVIA, BRAZIL, CHINA, CUBA, ECUADOR, GREECE, GUATEMALA, HAITI, THE HEDJAZ, HONDURAS, LIBERIA, NICARAGUA, PANAMA, PERU, POLAND, PORTUGAL, ROUMANIA, THE SERB-CROAT-SLOVENE STATE, SIAM, CZECHO-SLOVAKIA and URUGUAY,

These Powers constituting with the Principal Powers mentioned above the Allied and Associated Powers,

of the one part;

And GERMANY,

of the other part;

Bearing in mind that on the request of the Imperial German Government an Armistice was granted on November 11, 1918, to Germany by the Principal Allied and Associated Powers in order that a Treaty of Peace might be concluded with her, and

The Allied and Associated Powers being equally desirous that the war in which they were successively involved directly or indirectly and which originated in the declaration of war by Austria-Hungary on July 28, 1914, against Serbia, the declaration of war by Germany against Russia on August 1, 1914, and against France on August 3, 1914, and in the invasion of Belgium, should be replaced by a firm, just and durable Peace.

WHO having communicated their full powers found in good and due form have AGREED AS FOLLOWS:

From the coming into force of the present Treaty the state of war will terminate. From that moment and subject to the provisions of this Treaty official relations with Germany, and with any of the German States, will be resumed by the Allied and Associated Powers.

PART I.

THE COVENANT OF THE LEAGUE OF NATIONS.

The High Contracting Parties,

In order to promote international co-operation and to achieve international peace and security

by the acceptance of obligations not to resort to war,

by the prescription of open, just and honourable relations between nations,

by the firm establishment of the understandings of international law as the actual rule of conduct among Governments, and

by the maintenance of justice and a scrupulous respect for all treaty obligations in the dealings of organised peoples with one another,

Agree to this Covenant of the League of Nations.

Article 1.

The original Members of the League of Nations shall be those of the Signatories which are named in the Annex to this Covenant and also such of those other States named in the Annex as shall accede without reservation to this Covenant. Such accession shall be effected by a Declaration deposited with the Secretariat within two months of the coming into force of the Covenant. Notice thereof shall be sent to all other Members of the League.

Any fully self-governing State, Dominion or Colony not named in the Annex may become a Member of the League if its admission is agreed to by two-thirds of the Assembly, provided that it shall give effective guarantees of its sincere intention to observe its international obligations, and shall accept such regulations as may be prescribed by the League in regard to its military, naval and air forces and armaments.

Any member of the League may, after two years' notice of its intention so to do, withdraw from the League, provided that all its international obligations and all its obligations under this Covenant shall have been fulfilled at the time of its withdrawal.

Article 2.

The action of the League under this Covenant shall be effected through the instrumentality of an Assembly and of a Council, with a permanent Secretariat.

Article 3.

The Assembly shall consist of Representatives of the Members of the League.

The Assembly shall meet at stated intervals and from time to time as occasion may require at the Seat of the League or at such other place as may be decided upon.

The Assembly may deal at its meetings with any matter within the sphere of action of the League or affecting the peace of the world.

At meetings of the Assembly each Member of the League shall have one vote, and may have not more than three Representatives.

Article 4.

The Council shall consist of Representatives of the Principal Allied and Associated Powers, together with representatives of four other Members of the League. These four members of the League shall be selected by the Assembly from time to time in its discretion. Until the appointment of the Representatives of the four Members of the League first selected by the Assembly, Representatives of Belgium, Brazil, Spain and Greece shall be members of the Council.

With the approval of the majority of the Assembly, the Council may name additional Members of the League whose Representatives shall always be members of the Council; the Council with like approval may increase the number of Members of the League to be selected by the Assembly for representation on the Council.

The Council shall meet from time to time as occasion may require, and at least once a year, at the Seat of the League, or at such other place as may be decided upon.

The Council may deal at its meetings with any matter within the sphere of action of the League or affecting the peace of the world.

Any Member of the League not represented on the Council shall be invited to send a Representative to sit as a member at any meeting of the Council during the consideration of matters specially affecting the interests of that Member of the League.

At meetings of the Council, each Member of the League represented on the Council shall have one vote, and may have not more than one representative.

Article 5.

Except where otherwise expressly provided in this Covenant or by the terms of the present Treaty, decisions at any meeting of the Assembly or of the Council shall require the agreement of all the Members of the League represented at the meeting.

All matters of procedure at meetings of the Assembly or of the Council, including the appointment of Committees to investigate particular matters, shall be regulated by the Assembly or by the Council and may be decided by a majority of the Members of the League represented at the meeting.

The first meeting of the Assembly and the first meeting of the Council shall be summoned by the President of the United States of America.

Article 6.

The permanent Secretariat shall be established at the Seat of the League. The Secretariat shall comprise a Secretary General and such secretaries and staff as may be required.

The first Secretary General shall be the person named in the Annex; thereafter the Secretary General shall be appointed by the Council with the approval of the majority of the Assembly.

The secretaries and staff of the Secretariat shall be appointed by the Secretary General with the approval of the Council.

The Secretary General shall act in that capacity at all meetings of the Assembly and of the Council.

The expenses of the Secretariat shall be borne by the Members of the League in accordance with the apportionment of the expenses of the International Bureau of the Universal Postal Union.

Article 7.

The Seat of the League is established at Geneva.

The Council may at any time decide that the Seat of the League shall be established elsewhere.

All positions under or in connection with the League, including the Secretariat, shall be open equally to men and women.

Representatives of the Members of the League and officials of the League when engaged on the business of the League shall enjoy diplomatic privileges and immunities.

The buildings and other property occupied by the League or its officials or by Representatives attending its meetings shall be inviolable.

Article 8.

The Members of the League recognise that the maintenance of peace requires the reduction of national armaments to the lowest point consistent with national safety and the enforcement by common action of international obligations.

The Council, taking account of the geographical situation and circumstances of each State, shall formulate plans for such reduction for the consideration and action of the several Governments.

Such plans shall be subject to reconsideration and revision at least every ten years.

After these plans shall have been adopted by the several Governments, the limits of armaments therein fixed shall not be exceeded without the concurrence of the Council.

The Members of the League agree that the manufacture by private enterprise of munitions and implements of war is open to grave objections. The Council shall advise how the evil effects attendant upon such manufacture can be prevented, due regard being had to the necessities of those Members of the League which are not able to manufacture the munitions and implements of war necessary for their safety.

The Members of the League undertake to interchange full and frank information as to the scale of their armaments, their military, naval and air programmes and the condition of such of their industries as are adaptable to war-like purposes.

Article 9.

A permanent Commission shall be constituted to advise the Council on the execution of the provisions of Articles 1 and 8 and on military, naval and air questions generally.

Article 10.

The Members of the League undertake to respect and preserve as against external aggression the territorial integrity and existing political independence of all Members of the League. In case of any such aggression or in case of any threat or danger of such aggression the Council shall advise upon the means by which this obligation shall be fulfilled.

Article 11.

Any war or threat of war, whether immediately affecting any of the Members of the League or not, is hereby declared a matter of concern to the whole League, and the League shall take any action that may be deemed wise and effectual to safeguard the peace of nations. In case any such emergency should arise the Secretary General shall on the request of any Member of the League forthwith summon a meeting of the Council.

It is also declared to be the friendly right of each Member of the League to bring to the attention of the Assembly or of the Council any circumstance whatever affecting international relations which threaten to disturb international peace or the good understanding between nations upon which peace depends.

Article 12.

The Members of the League agree that if there should arise between them any dispute likely to lead to a rupture, they will submit the matter either to arbitration or to inquiry by the Council, and they agree in no case to resort to war until three months after the award by the arbitrators or the report by the Council.

In any case under this Article the award of the arbitrators shall be made within a reason-

able time, and the report of the Council shall be made within six months after the submission of the dispute.

Article 13.

The Members of the League agree that whenever any dispute shall arise between them which they recognise to be suitable for submission to arbitration and which cannot be satisfactorily settled by diplomacy, they will submit the whole subject-matter to arbitration.

Disputes as to the interpretation of a treaty, as to any question of international law, as to the existence of any fact which if established would constitute a breach of any international obligation, or as to the extent and nature of the reparation to be made for any such breach, are declared to be among those which are generally suitable for submission to arbitration.

For the consideration of any such dispute the court of arbitration to which the case is referred shall be the Court agreed on by the parties to the dispute or stipulated in any convention existing between them.

The Members of the League agree that they will carry out in full good faith any award that may be rendered, and that they will not resort to war against a Member of the League which complies therewith. In the event of any failure to carry out such an award, the Council shall propose what steps should be taken to give effect thereto.

Article 14.

The Council shall formulate and submit to the Members of the League for adoption plans for the establishment of a Permanent Court of International Justice. The Court shall be competent to hear and determine any dispute of an international character which the parties thereto submit to it. The Court may also give an advisory opinion upon any dispute or question referred to it by the Council or by the Assembly.

Article 15.

If there should arise between Members of the League any dispute likely to lead to a rupture, which is not submitted to arbitration in accordance with Article 13, the Members of the League agree that they will submit the matter to the Council. Any party to the dispute may effect such submission by giving notice of the existence of the dispute to the Secretary General, who will make all necessary arrangements for a full investigation and consideration thereof.

For this purpose the parties to the dispute will communicate to the Secretary General, as promptly as possible, statements of their case with all the relevant facts and papers, and the Council may forthwith direct the publication thereof.

The Council shall endeavour to effect a settlement of the dispute, and if such efforts are successful, a statement shall be made public giving such facts and explanations regarding the dispute and the terms of settlement thereof as the Council may deem appropriate.

If the dispute is not thus settled, the Council either unanimously or by a majority vote shall make and publish a report containing a statement of the facts of the dispute and the recommendations which are deemed just and proper in regard thereto.

Any Member of the League represented on the Council may make public a statement of the facts of the dispute and of its conclusions regarding the same.

If a report by the Council is unanimously agreed to by the members thereof other than the Representatives of one or more of the parties to the dispute, the Members of the League agree that they will not go to war with any party to the dispute which complies with the recommendations of the report.

If the Council fails to reach a report which is unanimously agreed to by the members thereof, other than the Representatives of one or more of the parties to the dispute, the Members of the League reserve to themselves the right to take such action as they shall consider necessary for the maintenance of right and justice.

If the dispute between the parties is claimed by one of them, and is found by the Council, to arise out of a matter which by international law is solely within the domestic jurisdiction of that party, the Council shall so report, and shall make no recommendation as to its settlement.

The Council may in any case under this Article refer the dispute to the Assembly. The dispute shall be so referred at the request of either party to the dispute, provided that such request be made within fourteen days after the submission of the dispute to the Council.

In any case referred to the Assembly, all the provisions of this Article and of Article 12 relating to the action and powers of the Council shall apply to the action and powers of the Assembly, provided that a report made by the Assembly, if concurred in by the Representatives of those Members of the League represented on the Council and of a majority of the other Members of the League, exclusive in each case of the Representatives of the parties to the dispute, shall have the same force as a report by the Council concurred in by all the members thereof other than the Representatives of one or more of the parties to the dispute.

Article 16.

Should any Member of the League resort to war in disregard of its covenants under Articles 12, 13 or 15, it shall ipso facto be deemed to have committed an act of war against all other Members of the League, which hereby undertake immediately to subject it to the severance of all trade or financial relations, the prohibition of all intercourse between their nationals and the nationals of the covenant-breaking State, and the prevention of all financial, commercial or personal intercourse between the nationals of the covenant-breaking State and the nationals of any other State, whether a Member of the League or not.

It shall be the duty of the Council in such case to recommend to the several Governments concerned what effective military, naval or air force the Members of the League shall severally contribute to the armed forces to be used to protect the covenants of the League.

The Members of the League agree, further, that they will mutually support one another in the financial and economic measures which are taken under this Article, in order to minimise the loss and inconvenience resulting from the above measures, and that they will mutually support one another in resisting any special measures aimed at one of their number by the covenant-breaking State, and that they will take the necessary steps to afford passage through their territory to the forces of any of the members of the League which are co-operating to protect the covenants of the League.

Any Member of the League which has violated any covenant of the League may be declared to be no longer a Member of the League by a vote of the Council concurred in by the Representatives of all the other Members of the League represented thereon.

Article 17.

In the event of a dispute between a Member of the League and a State which is not a Member of the League, or between States not Members of the League, the State or States not Members of the League shall be invited to accept the obligations of membership in the League for the purposes of such dispute, upon such conditions as the Council may deem just. If such invitation is accepted, the provisions of Articles 12 to 16 inclusive shall be applied with such modifications as may be deemed necessary by the Council.

Upon such invitation being given the Council shall immediately institute an inquiry into the circumstances of the dispute and recommend such action as may seem best and most effectual in the circumstances.

If a State so invited shall refuse to accept the obligations of membership in the League for the purposes of such dispute, and shall resort to war against a Member of the League, the provisions of Article 16 shall be applicable as against the State taking such action.

If both parties to the dispute when so invited refuse to accept the obligations of membership in the League for the purposes of such dispute, the Council may take such measures and make such recommendations as will prevent hostilities and will result in the settlement of the dispute.

Article 18.

Every treaty or international engagement entered into hereafter by any member of the League shall be forthwith registered with the Secretariat and shall as soon as possible be published by it. No such treaty or international engagement shall be binding until so registered.

Article 19.

The Assembly may from time to time advise the reconsideration by Members of the League of treaties which have become inapplicable and the consideration of international conditions whose continuance might endanger the peace of the world.

Article 20.

The Members of the League severally agree that this Covenant is accepted as abrogating all obligations or understandings inter se which are inconsistent with the terms thereof, and solemnly undertake that they will not hereafter enter into any engagements inconsistent with the terms thereof.

In case any Member of the League shall, before becoming a Member of the League, have undertaken any obligations inconsistent with the terms of this Covenant, it shall be the duty of such Member to take immediate steps to procure its release from such obligations.

Article 21.

Nothing in this Covenant shall be deemed to affect the validity of international engagements, such as treaties of arbitration or regional understandings like the Monroe doctrine, for securing the maintenance of peace.

Article 22.

To those colonies and territories which as a consequence of the late war have ceased to be under the sovereignty of the States which formerly governed them and which are inhabited by peoples not yet able to stand by themselves under the strenuous conditions of the modern world, there should be applied the principle that the well-being and development of such peoples form a sacred trust of civilisation and that securities for the performance of this trust should be embodied in this Covenant.

The best method of giving practical effect to this principle is that the tutelage of such peoples should be entrusted to advanced nations who by reason of their resources, their experience or their geographical position can best undertake this responsibility, and who are willing to accept it, and that this tutelage should be exercised by them as Mandatories on behalf of the League.

The character of the mandate must differ according to the stage of the development of the people, the geographical situation of the territory, its economic conditions and other similar circumstances.

Certain communities formerly belonging to the Turkish Empire have reached a stage of development where their existence as independent nations can be provisionally recognised subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone. The wishes of these communities must be a principal consideration in the selection of the Mandatory.

Other peoples, especially those of Central Africa, are at such a stage that the Mandatory must be responsible for the administration of the territory under conditions which will guarantee freedom of conscience and religion, subject only to the maintenance of public order and morals, the prohibition of abuses such as the slave trade, the arms traffic and the liquor traffic, and the prevention of the establishment of fortifications or military and naval bases and of military training of the natives for other than police purposes and the defence of territory, and will also secure equal opportunities for the trade and commerce of other Members of the League.

There are territories, such as South-West Africa and certain of the South Pacific Islands, which, owing to the sparseness of their population or their small size, or their remoteness from the centres of civilisation, or their geographical contiguity to the territory of the Mandatory, and other circumstances, can be best administered under the laws of the Mandatory as integral portions of its territory, subject to the safeguards above mentioned in the interests of the indigenous population.

In every case of mandate the Mandatory shall render to the Council an annual report in reference to the territory committed to its charge.

The degree of authority, control, or administration to be exercised by the Mandatory shall, if not previously agreed upon by the Members of the League, be explicitly defined in each case by the Council.

A permanent Commission shall be constituted to receive and examine the annual reports of the Mandatories and to advise the Council on all matters relating to the observance of the mandates.

Article 23.

Subject to and in accordance with the provisions of international conventions existing or hereafter to be agreed upon, the Members of the League:

(a) will endeavor to secure and maintain fair and humane conditions of labour for men, women, and children, both in their own countries and in all countries to which their commercial and industrial relations extend, and for that purpose will establish and maintain the necessary international organisations;

(b) undertake to secure just treatment of the native inhabitants of territories under their control;

(c) will entrust the League with the general supervision over the execution of agreements with regard to the traffic in women and children, and the traffic in opium and other dangerous drugs;

(d) will entrust the League with the general supervision of the trade in arms and ammunition with the countries in which the control of this traffic is necessary in the common interest;

(e) will make provision to secure and maintain freedom of communications and of transit and equitable treatment for the commerce of all Members of the League. In this connection, the special necessities of the regions devastated during the war of 1914-1918 shall be borne in mind;

(f) will endeavour to take steps in matters of international concern for the prevention and control of disease.

Article 24.

There shall be placed under the direction of the League all international bureaux already established by general treaties if the parties to such treaties consent. All such international bureaux and all commissions for the regulation of matters of international interest hereafter constituted shall be placed under the direction of the League.

In all matters of international interest which are regulated by general conventions but which are not placed under the control of international bureaux or commissions, the Secretariat of the League shall, subject to the consent of the Council and if desired by the parties, collect and distribute all relevant information and shall render any other assistance which may be necessary or desirable.

The Council may include as part of the expenses of the Secretariat the expenses of any bureau or commission which is placed under the direction of the League.

Article 25.

The Members of the League agree to encourage and promote the establishment and cooperation of duly authorised voluntary national Red Cross organizations having as purposes the improvement of health, the prevention of disease and the mitigation of suffering throughout the world.

Article 26.

Amendments to this Covenant will take effect when ratified by the Members of the League whose Representatives compose the Council and by a majority of the Members of the League whose Representatives compose the Assembly.

No such amendment shall bind any Member of the League which signifies its dissent therefrom, but in that case it shall cease to be a Member of the League.

PART II.

BOUNDARIES OF GERMANY.

Article 27.

The boundaries of Germany will be determined as follows:

1. With Belgium:

From the point common to the three frontiers of Belgium, Holland and Germany and in a southerly direction:

the north-eastern boundary of the former territory of neutral Moresnet, then the eastern boundary of the Kreis of Eupen, then the frontier between Belgium and the Kreis of Montjoie, then the north-eastern and eastern boundary of the Kreis of Malmedy to its junction with the frontier of Luxemburg.

2. With Luxemburg:

The frontier of August 3, 1914, to its junction with the frontier of France of the 18th July, 1870.

3. With France:

The frontier of July 18, 1870, from Luxemburg to Switzerland with the reservations made in Article 48 of Section IV (Saar Basin) of Part III.

4. With Switzerland:

The present frontier.

5. With Austria:

The frontier of August 3, 1914, from Switzerland to Czecho-Slovakia as hereinafter defined.

6. With Czecho-Slovakia:

The frontier of August 3, 1914, between Germany and Austria from its junction with the old administrative boundary separating Bohemia and the province of Upper Austria to the point north of the salient of the old province of Austrian Silesia situated at about 8 kilometres east of Neustadt.

7. With Poland:

From the point defined above to a point to be fixed on the ground about 2 kilometres east of Lorzendorf:

the frontier as it will be fixed in accordance with Article 88 of the present Treaty:

thence in a northerly direction to the point where the administrative boundary of Posnania crosses the river Bartsch:

a line to be fixed on the ground leaving the following places in Poland: Skorischau, Reichthal, Trembatschau, Kunzendorf, Schleise, Gross Kosel, Schreibersdorf, Rippin, Furstlich-Niefken, Pawelau, Tscheschen, Konradau, Johannisdorf, Modzenowe, Bogdaj, and in Germany: Lorzendorf, Kaulwitz, Glausche, Dalbersdorf, Reesewitz, Stradam, Gross Wartenberg, Kraschen, Neu Mittelwalde, Domaslawitz, Wedelsdorf, Tscheschen Hammer;

thence the administrative boundary of Posnania north-westwards to the point where it cuts the Rawitsch-Herrnstadt railway;

thence to the point where the administrative boundary of Posnania cuts the Reisen-Tschirnau road:

a line to be fixed on the ground passing west of Triebusch and Gabel and east of Saborwitz:

thence the administrative boundary of Posnania to its junction with the eastern administrative boundary of the Kreis of Fraustadt:

thence in a north-westerly direction to a point to be chosen on the road between the villages of Unruhstadt and Kopnitz:

a line to be fixed on the ground passing west of Geyersdorf, Brenno, Fehlen, Altkloster, Klebel, and east of Ulbersdorf, Buchwald, Ilgen, Weine, Lupitz, Schwenten;

thence in a northerly direction to the northernmost point of Lake Chlop:

a line to be fixed on the ground following the median line of the lakes; the town and the station of Bentschen, however (including the junction of the lines Schwiebus-Bentschen and Zullichau-Bentschen), remaining in Polish territory;

thence in a north-easterly direction to the point of junction of the boundaries of the Kreise of Schwerin, Birnbaum and Meseritz:

a line to be fixed on the ground passing east of Betsche:

thence in a northerly direction the boundary separating the Kreise of Schwerin and Birnbaum, then in an easterly direction the northern boundary of Posnania to the point where it cuts the river Netze:

thence upstream to its confluence with the Kuddow:

the course of the Netze:

thence upstream to a point to be chosen about 6 kilometres southeast of Schneidemuhl:

the course of the Kuddow:

thence north-eastwards to the most southern point of re-entrant of the northern boundary of Posnania about 5 kilometres west of Stahren:

a line to be fixed on the ground leaving the

Schneidemuhl-Konitz railway in this area entirely in German territory;

thence the boundary of Posnania northeastwards to the point of the salient it makes about 15 kilometres east of Flatow;

thence north-eastwards to the point where the river Kamionka meets the southern boundary of the Kreis of Konitz about 3 kilometres northeast of Grunau;

a line to be fixed on the ground leaving the following places to Poland: Jasdrowo, Gr. Lutau, Kl. Lutau, Witkau, and to Germany: Gr. Butzig, Cziskowo, Battrow, Bock, Grunau;

thence in a northerly direction the boundary between the Kreise of Konitz and Schlochau to the point where this boundary cuts the river Brahe;

thence to a point on the boundary of Pomerania 15 kilometres east of Rummelsburg;

a line to be fixed on the ground leaving the following places in Poland: Konarzin, Kelpin, Adl. Briesen, and in Germany: Sampohl, Neuguth, Steinfort, Gr. Peterkau;

then the boundary of Pomerania in an easterly direction to its junction with the boundary between the Kreise of Konitz and Schlochau;

thence northwards the boundary between Pomerania and West Prussia to the point on the river Rheda about 3 kilometres north-west of Gohra where that river is joined by a tributary from the north-west;

thence to a point to be selected in the bend of the Piasnitz river about 1½ kilometres north-west of Warschkau;

a line to be fixed on the ground;

thence this river downstream, then the median line of Lake Zarnowitz, then the old boundary of West Prussia to the Baltic Sea.

8. With Denmark:

The frontier as it will be fixed in accordance with Articles 109 to 111 of Part III. Section XII (Schleswig).

Article 28.

The boundaries of East Prussia, with the reservations made in Section IX (East Prussia) of Part III, will be determined as follows:

from a point on the coast of the Baltic Sea about 1½ kilometres north of Probbernau church in a direction of about 159 degrees East from true North;

a line to be fixed on the ground for about 2 kilometres;

thence in a straight line to the light at the bend of the Elbing Channel in approximately latitude 54 degrees 19½ minutes North, longitude 19 degrees 26 minutes East of Greenwich;

thence to the easternmost mouth of the Nogat River at a bearing of approximately 209 degrees East from true North;

thence up the course of the Nogat River to the point where the latter leaves the Vistula (Weichsel);

thence up the principal channel of navigation of the Vistula, then the southern boundary of the Kreis of Marienwerder, then that of the Kreis of Rosenberg eastwards to the point where it meets the old boundary of East Prussia.

thence the old boundary between East and West Prussia, then the boundary between the Kreise of Osterode and Neidenburg, then the course of the river Skottau downstream, then the course of the Neide upstream to a point situated about 5 kilometres west of Bialutten, being the nearest point to the old frontier of Russia;

thence in an easterly direction to a point immediately south of the intersection of the road Neidenburg-Mlava with the old frontier of Russia;

a line to be fixed on the ground passing north of Bialutten;

thence the old frontier of Russia to a point east of Schmalleningken, then the principal channel of navigation of the Niemen (Memel) downstream, then the Skierwieth arm of the delta to the Kurisches Haff;

thence a straight line to the point where the eastern shore of the Kurische Nehrung meets the administrative boundary about 4 kilometres southwest of Nidden.

thence this administrative boundary to the western shore of the Kurische Nehrung.

Article 29.

The boundaries as described above are drawn in red on a one-in-a-million map which is annexed to the present Treaty (Map No. 1).

In the case of any discrepancies between the text of the Treaty and this map or any other map which may be annexed the text will be final.

Article 30.

In the case of boundaries which are defined by a waterway the terms "course" and "channel" used in the present Treaty signify: in the case of non-navigable rivers the median line of the waterway or of its principal arm, and, in the case of navigable rivers, the median line of the principal channel of navigation. It will rest with the Boundary Commissions provided by the present Treaty to specify in each case whether the frontier line shall follow any changes of the course or channel which may take place or whether it shall be definitely fixed by the position of the course or channel at the time when the present Treaty comes into force.

PART III.

POLITICAL CLAUSES FOR EUROPE.

Section I.

BELGIUM.

Article 31.

Germany, recognising that the Treaties of April 19, 1839, which established the status of Belgium before the war, no longer conform to the requirements of the situation, consents to the abrogation of the said Treaties and undertakes immediately to recognise and to observe whatever conventions may be entered into by the Principal Allied and Associated Powers, or by any of them, in concert with the Governments of Belgium and of the Netherlands, to replace the said Treaties of 1839. If her formal adhesion should be required to such conventions or to any of their stipulations, Germany undertakes immediately to give it.

Article 32.

Germany recognises the full sovereignty of Belgium over the whole of the contested territory of Moresnet (called Moresnet neutre).

Article 33.

Germany renounces in favour of Belgium all rights and title over the territory of Prussian Moresnet situated on the west of the road from Liege to Aix-la-Chapelle; the road will belong to Belgium where it bounds this territory.

Article 34.

Germany renounces in favour of Belgium all rights and title over the territory comprising the whole of the Kreise of Eupen and of Malmedy.

During the six months after the coming into force of this Treaty registers will be opened by the Belgian authority at Eupen and Malmedy in which the inhabitants of the above territory will be entitled to record in writing a desire to see the whole or part of it remain under German sovereignty.

The results of this public expression of opinion will be communicated by the Belgian government to the League of Nations, and Belgium undertakes to accept the decision of the League.

Article 35.

A Commission of seven persons, five of whom will be appointed by the Principal Allied and Associated Powers, one by Germany

and one by Belgium, will be set up fifteen days after the coming into force of the present Treaty to settle on the spot the new frontier line between Belgium and Germany, taking into account the economic factors and the means of communication.

Decisions will be taken by a majority and will be binding on the parties concerned.

Article 36.

When the transfer of the sovereignty over the territories referred to above has become definite, German nationals habitually resident in the territories will definitively acquire Belgian nationality ipso facto, and will lose their German nationality.

Nevertheless, German nationals who became resident in the territories after August 1, 1914, shall not obtain Belgian nationality without a permit from the Belgian government.

Article 37.

Within the two years following the definitive transfer of the sovereignty over the territories assigned to Belgium under the present Treaty, German nationals over 18 years of age habitually resident in those territories will be entitled to opt for German nationality.

Option by a husband will cover his wife, and option by parents will cover their children under 18 years of age.

Persons who have exercised the above right to opt must within the ensuing twelve months transfer their place of residence to Germany.

They will be entitled to retain their immovable property in the territories acquired by Belgium. They may carry with them their movable property of every description. No export or import duties may be imposed upon them in connection with the removal of such property.

Article 38.

The German Government will hand over without delay to the Belgian Government the archives, registers, plans, title deeds and documents of every kind concerning the civil, military, financial, judicial or other administrations in the territory transferred to Belgian sovereignty.

The German Government will likewise restore to the Belgian Government the archives and documents of every kind carried off during the war by the German authorities from the Belgian public administrations, in particular from the Ministry of Foreign Affairs at Brussels.

Article 39.

The proportion and nature of the financial liabilities of Germany and of Prussia which Belgium will have to bear on account of the territories ceded to her shall be fixed in conformity with Articles 254 and 256 of Part IX (Financial Clauses) of the present Treaty.

Section II.

LUXEMBURG.

Article 40.

With regard to the Grand Duchy of Luxemburg, Germany renounces the benefit of all the provisions inserted in her favour in the Treaties of February 8, 1842, April 2, 1847, October 20-25, 1865, August 18, 1866, February 21 and May 11, 1867, May 10, 1871, June 11, 1872, and November 11, 1902, and in all Conventions consequent upon such Treaties.

Germany recognizes that the Grand Duchy of Luxemburg ceased to form part of the German Zollverein as from January 1, 1919, renounces all rights to the exploitation of the railways, adheres to the termination of the regime of neutrality of the Grand Duchy, and accepts in advance all international arrangements which may be concluded by the Allied and Associated Powers relating to the Grand Duchy.

Article 41.

Germany undertakes to grant to the Grand Duchy of Luxemburg, when a demand to that effect is made to her by the Principal Allied and Associated Powers, the rights and advantages stipulated in favour of such Powers or their nationals in the present Treaty with regard to economic questions, to questions relative to transport and to aerial navigation.

Section III.

LEFT BANK OF THE RHINE.

Article 42.

Germany is forbidden to maintain or construct any fortifications either on the left bank of the Rhine or on the right bank to the west of a line drawn 50 kilometres to the East of the Rhine.

Article 43.

In the area defined above the maintenance and the assembly of armed forces, either permanently or temporarily, and military manœuvres of any kind, as well as the upkeep of all permanent works for mobilization, are in the same way forbidden.

Article 44.

In case Germany violates in any manner whatever the provisions of Articles 42 and 43, she shall be regarded as committing a hostile act against the Powers signatory of the present Treaty and as calculated to disturb the peace of the world.

Section IV.

SAAR BASIN.

Article 45.

As compensation for the destruction of the coal-mines in the north of France and as part payment towards the total reparation due from Germany for the damages resulting from the war, Germany cedes to France in full and absolute possession, with exclusive rights of exploitation, unencumbered and free from all debts and charges of any kind, the coal-mines situated in the Saar Basin as defined in Article 48.

Article 46.

In order to assure the rights and welfare of the population and to guarantee to France complete freedom in working the mines, Germany agrees to the provisions of Chapters I and II of the Annex hereto.

Article 47.

In order to make in due time permanent provision for the government of the Saar Basin in accordance with the wishes of the populations, France and Germany agree to the provisions of Chapter III of the Annex hereto.

Article 48.

The boundaries of the territory of the Saar Basin, as dealt with in the present stipulations, will be fixed as follows:

On the south and south-west: by the frontier of France as fixed by the present Treaty.

On the north-west and north: by a line following the northern administrative boundary of the Kreis of Merzig from the point where it leaves the French frontier to the point where it meets the administrative boundary separating the commune of Saarhombach from the commune of Britten; followir this communal boundary southwards and reaching the administrative boundary of the canton of Merzig so as to include in the territory of the Saar Basin the canton of Mettlach, with the exception of the commune of Britten; following successively the northern administrative boundaries of the cantons of Merzig and Haustadt, which are incorporated in the aforesaid Saar Basin, then successively the administrative boundaries separating the Kreise of Sarrelouis, Ottweiler and Saint-Wendel from the Kreise of Merzig, Treves (Trier)

and the Principality of Birkenfeld as far as a point situated about 500 metres north of the village of Furschweiler (viz., the highest point of the Metzelberg).

On the north-east and east: from the last point defined above to a point about 3½ kilometres east-north-east of Saint-Wendel:

a line to be fixed on the ground passing east of Furschweiler, west of Roschberg, east of points 418, 329 (south of Roschberg), west of Leitersweiler, north-east of point 464, and following the line of the crest southwards to its junction with the administrative boundary of the Kreis of Kusel;

thence in a southerly direction the boundary of the Kreis of Kusel, then the boundary of the Kreis of Homburg towards the south-east to a point situated about 1000 metres west of Dunzweiler;

thence to a point about 1 kilometre south of Hornbach;

a line to be fixed on the ground passing through point 424 (about 1000 meters south-east of Dunzweiler), point 363 (Fuchs-Berg), point 322 (south-west of Waldmohr), then east of Jagersburg and Erbach, then encircling Homburg, passing through the points 361 (about 2½ kilometres north-east by east of that town), 342 (about 2 kilometres south-east of that town), 347 (Schreiners-Berg); 356, 350 (about 1½ kilometres south-east of Schwarzenbach), then passing east of Einod, south-east of points 322 and 333, about 2 kilometres east of Webenheim, about 2 kilometres east of Mimbach, passing east of the plateau which is traversed by the road from Mimbach to Bockweiler (so as to include this road in the territory of the Saar Basin), passing immediately north of the junction of the roads from Bockweiler and Altheim situated about 2 kilometres north of Altheim, then passing south of Ringweilerhof and north of point 322, rejoining the frontier of France at the angle which it makes about 1 kilometre south of Hornbach (see Map No. 2 scale 1|100.000 annexed to the present treaty).

A Commission composed of five members, one appointed by France, one by Germany, and three by the Council of the League of Nations, which will select nationals of other Powers, will be constituted within fifteen days from the coming into force of the present Treaty, to trace on the spot the frontier line described above.

In those parts of the preceding line which do not coincide with administrative boundaries, the Commission will endeavour to keep the line indicated, while taking into consideration, so far as is possible, local economic interests and existing communal boundaries.

The decisions of this Commission will be taken by a majority and will be binding on the parties concerned.

Article 49.

Germany renounces in favour of the League of Nations, in the capacity of trustees, the government of the territory defined above.

At the end of fifteen years from the coming into force of the present Treaty the inhabitants of the said territory shall be called upon to indicate the sovereignty under which they desire to be placed.

Article 50.

The stipulations under which the cession of the mines in the Saar Basin shall be carried out, together with the measures intended to guarantee the rights and the well-being of the inhabitants and the government of the territory, as well as the conditions in accordance with which the plebiscite hereinbefore provided for is to be made, are laid down in the Annex hereto. This Annex shall be considered as an integral part of the present Treaty, and Germany declares her adherence to it.

ANNEX.

In accordance with the provisions of Articles 45 to 50 of the present Treaty, the stipulations under which the cession by Germany to France of the mines of the Saar Basin will be effected, as well as the measures intended to ensure respect for the rights and well-being of the population and the government of the territory, and the conditions in which the inhabitants will be called upon to indicate the sovereignty under which they may wish to be placed, have been laid down as follows:

Chapter I.

CESSION AND EXPLOITATION OF MINING PROPERTY.

1.

From the date of the coming into force of the present Treaty, all the deposits of coal situated within the Saar Basin as defined in Article 48 of the said Treaty, become the complete and absolute property of the French State.

The French State will have the right of working or not working the said mines, or of transferring to a third party the right of working them, without having to obtain any previous authorization or to fulfil any formalities.

The French State may always require that the German mining laws and regulations referred to below shall be applied in order to ensure the determination of its rights.

2.

The right of ownership of the French State will apply not only to the deposits which are free and for which concessions have not yet been granted, but also to the deposits for which concessions have already been granted, whoever may be the present proprietors, irrespective of whether they belong to the Prussian State, to the Bavarian State, to other States or bodies, to companies or to individuals, whether they have been worked or not, or whether a right of exploitation distinct from the right of the owners of the surface of the soil has or has not been recognized.

3.

As far as concerns the mines which are being worked, the transfer of the ownership to the French State will apply to all the accessories and subsidiaries of the said mines, in particular to their plant and equipment both on and below the surface, to their extracting machinery, their plants for transforming coal into electric power, coke and by-products, their workshops, means of communication, electric lines, plant for catching and distributing water, land, buildings such as offices, managers', employees' and workmen's dwellings, schools, hospitals and dispensaries, their stocks and supplies of every description, their archives and plans, and in general everything which those who own or exploit the mines possess or enjoy for the purpose of exploiting the mines and their accessories and subsidiaries.

The transfer will apply also to the debts owing for products delivered before the entry into possession by the French State, and after the signature of the present Treaty, and to deposits of money made by customers, whose rights will be guaranteed by the French State.

4.

The French State will acquire the property free and clear of all debts and charges. Nevertheless, the rights acquired, or in course of being acquired, by the employees of the mines and their accessories and subsidiaries at the date of the coming into force of the present Treaty, in connection with pensions for old age or disability, will not be affected. In return, Germany must pay over to the French State a sum representing the actuarial amounts to which the said employees are entitled.

5.

The value of the property thus ceded to the French State will be determined by the

Reparation Commission referred to in Article 233 of Part VIII (Reparation) of the present Treaty.

This value shall be credited to Germany in part payment of the amount due for reparation.

It will be for Germany to indemnify the proprietors or parties concerned, whoever they may be.

6.

No tariff shall be established on the German railways and canals which may directly or indirectly discriminate to the prejudice of the transport of the personnel or products of the mines and their accessories or subsidiaries, or of the material necessary to their exploitation. Such transport shall enjoy all the rights and privileges which any international railway conventions may guarantee to similar products of French origin.

7.

The equipment and personnel necessary to ensure the despatch and transport of the products of the mines and their accessories and subsidiaries, as well as the carriage of workmen and employees, will be provided by the local railway administration of the Basin.

8.

No obstacle shall be placed in the way of such improvements of railways or waterways as the French State may judge necessary to assure the despatch and the transport of the products of the mines and their accessories and subsidiaries, such as double trackage, enlargement of stations, and construction of yards and appurtenances. The distribution of expenses will, in the event of disagreement, be submitted to arbitration.

The French State may also establish any new means of communication, such as roads, electric lines and telephone connections, which it may consider necessary for the exploitation of the mines.

It may exploit freely and without any restrictions the means of communication of which it may become the owner, particularly those connecting the mines and their accessories and subsidiaries with the means of communication situated in French territory.

9.

The French State shall always be entitled to demand the application of the German mining laws and regulations in force on November 11, 1918, excepting provisions adopted exclusively in view of the state of war, with a view of the acquisition of such land as it may judge necessary for the exploitation of the mines and their accessories and subsidiaries.

The payment for damage caused to immovable property by the working of the said mines and their accessories and subsidiaries shall be made in accordance with the German mining laws and regulations above referred to.

10.

Every person whom the French State may substitute for itself as regards the whole or part of its rights to the exploitation of the mines and their accessories and subsidiaries shall enjoy the benefit of the privileges provided in this Annex.

11.

The mines and other immovable property which become the property of the French State may never be made the subject of measures of forfeiture, forced sale, expropriation or requisition, nor of any other measure affecting the right of property.

The personnel and the plant connected with the exploitation of these mines or their accessories and subsidiaries, as well as the product extracted from the mines or manufactured in their accessories and subsidiaries, may not at any time be made the subject of any measures of requisition.

The exploitation of the mines and their accessories and subsidiaries, which become the property of the French State, will continue, subject to the provisions of paragraph 23 below, to be subject to the regime established by the German laws and regulations in force on November 11, 1918, excepting provisions adopted exclusively in view of the state of war.

The rights of the workmen shall similarly be maintained, subject to the provisions of the said paragraph 23, as established on November 11, 1918, by the German laws and regulations above referred to.

12.

No impediment shall be placed in the way of the introduction or employment in the mines and their accessories and subsidiaries of workmen from without the Basin.

The employees and workmen of French nationality shall have the right to belong to French labour unions.

13.

The amount contributed by the mines and their accessories and subsidiaries, either to the local budget of the territory of the Saar Basin or to the communal funds, shall be fixed with due regard to the ratio of the value of the mines to the total taxable wealth of the Basin.

14.

The French State shall always have the right of establishing and maintaining, as incidental to the mines, primary or technical schools for its employees and their children, and of causing instruction therein to be given in the French language, in accordance with such curriculum and by such teachers as it may select.

It shall also have the right to establish and maintain hospitals, dispensaries, workmen's houses and gardens and other charitable and social institutions.

15.

The French State shall enjoy complete liberty with respect to the distribution, dispatch and sale prices of the products of the mines and their accessories and subsidiaries.

Nevertheless, whatever may be the total product of the mines, the French Government undertakes that the requirements of local consumption for industrial and domestic purposes shall always be satisfied in the proportion existing in 1913 between the amount consumed locally and the total output of the Saar Basin.

Chapter II.

Government of the Territory of the Saar Basin.

16.

The Government of the territory of the Saar Basin shall be entrusted to a Commission representing the League of Nations. This Commission shall sit in the territory of the Saar Basin.

17.

The Governing Commission provided for by paragraph 16 shall consist of five members chosen by the Council of the League of Nations, and will include one citizen of France, one native inhabitant of the Saar Basin, not a citizen of France, and three members belonging to three countries other than France or Germany.

The members of the Governing Commission shall be appointed for one year and may be re-appointed. They can be removed by the Council of the League of Nations, which will provide for their replacement.

The Members of the Governing Commission will be entitled to a salary which will be fixed by the Council of the League of Nations, and charged on the local revenues.

18.

The Chairman of the Governing Commission shall be appointed for one year from

among the members of the Commission by the Council of the League of Nations and may be re-appointed.

The Chairman will act as the executive of the Commission.

19.

Within the territory of the Saar Basin the Governing Commission shall have all the powers of government hitherto belonging to the German Empire, Prussia, or Bavaria, including the appointment and dismissal of officials, and the creation of such administrative and representative bodies as it may deem necessary.

It shall have full powers to administer and operate the railways, canals and the different public services.

Its decisions shall be taken by a majority.

20.

Germany will place at the disposal of the Governing Commission all official documents and archives under the control of Germany, of any German State, or of any local authority, which relate to the territory of the Saar Basin or to the rights of the inhabitants thereof.

21.

It will be the duty of the Governing Commission to ensure, by such means and under such condition as it may deem suitable, the protection abroad of the interests of the inhabitants of the territory of the Saar Basin.

22.

The Governing Commission shall have the full right of user of all property, other than mines, belonging, either in public or in private domain, to the Government of the German Empire, or the Government of any German State, in the territory of the Saar Basin.

As regards the railways an equitable apportionment of rolling stock shall be made by a mixed Commission on which the Government of the territory of the Saar Basin and the German railways will be represented.

Persons, goods, vessels, carriages, wagons and mails coming from or going to the Saar Basin shall enjoy all the rights and privileges relating to transit and transport which are specified in the provisions of Part XII (Ports, Waterways and Railways) of the present Treaty.

23.

The laws and regulations in force on November 11, 1918, in the territory of the Saar Basin (except those enacted in consequence of the state of war) shall continue to apply.

If, for general reasons or to bring these laws and regulations into accord with the provisions of the present Treaty, it is necessary to introduce modifications, these shall be decided on and put into effect by the Governing Commission, after consultation with the elected representatives of the inhabitants in such a manner as the Commission may determine.

No modification may be made in the legal regime for the exploitation of the mines, provided for in paragraph 12, without the French State being previously consulted, unless such modification results from a general regulation respecting labour.

In fixing the conditions and hours of labour for men, women and children, the Governing Commission is to take into consideration the wishes expressed by the local labour organisations, as well as the principles adopted by the League of Nations.

24.

Subject to the provisions of paragraph 4, no rights of the inhabitants of the Saar Basin acquired or in process of acquisition at the date of the coming into force of this Treaty, in respect of any insurance system of Germany or in respect of any pension of any kind, are affected by any of the provisions of the present Treaty.

Germany and the Government of the territory of the Saar Basin will preserve and continue all of the aforesaid rights.

25.

The civil and criminal courts existing in the territory of the Saar Basin shall continue.

A civil and criminal court will be established by the Governing Commission to hear appeals from the decisions of the said courts and to decide matters for which these courts are not competent.

The Governing Commission will be responsible for settling the organisation and jurisdiction of the said court.

Justice will be rendered in the name of the Governing Commission.

26.

The Governing Commission will alone have the power of levying taxes and dues in the territory of Saar Basin.

These taxes and dues will be exclusively applied to the needs of the territory.

The fiscal system existing on November 11, 1918, will be maintained as far as possible, and no new tax except customs duties may be imposed without previously consulting the elected representatives of the inhabitants.

27.

The present stipulations will not affect the existing nationality of the inhabitants of the territory of the Saar Basin.

No hindrance shall be placed in the way of those who wish to acquire a different nationality, but in such case the acquisition of the new nationality will involve the loss of any other.

28.

Under the control of the Governing Commission the inhabitants will retain their local assemblies, their religious liberties, their schools and their language.

The right of voting will not be exercised for any assemblies other than the local assemblies, and will belong to every inhabitant over the age of twenty years, without distinction of sex.

29.

Any of the inhabitants of the Saar Basin who may desire to leave the territory will have full liberty to retain in it their immovable property or to sell it at fair prices, and to remove their movable property free of any charges.

30.

There will be no military service, whether compulsory or voluntary, in the territory of the Saar Basin, and the construction of fortifications therein is forbidden.

Only a local gendarmerie for the maintenance of order may be established.

It will be the duty of the Governing Commission to provide in all cases for the protection of persons and property in the Saar Basin.

31.

The territory of the Saar Basin as defined by Article 48 of the present Treaty shall be subjected to the French customs regime. The receipts from the customs duties on goods intended for local consumption shall be included in the budget of the said territory after deduction of all costs of collection.

No export tax shall be imposed upon metallurgical products or coal exported from the said territory to Germany, nor upon German exports for the use of the industries of the territory of the Saar Basin.

Natural or manufactured products originating in the Basin in transit over German territory and, similarly, German products in transit over the territory of the Basin shall be free of all customs duties.

Products which both originate in and pass from the Basin into Germany shall be free of import duties for a period of five years from the date of the coming into force of the present Treaty, and during the same period arti-

cles imported from Germany into the territory of the Basin for local consumption shall likewise be free of import duties.

During these five years the French Government reserves to itself the right of limiting to the annual average of the quantities imported into Alsace-Lorraine and France in the years 1911 to 1913 the quantities which may be sent into France of all articles coming from the Basin which include raw materials and semi-manufactured goods imported duty free from Germany. Such average shall be determined after reference to all available official information and statistics.

32.

No prohibition or restriction shall be imposed upon the circulation of French money in the territory of the Saar Basin.

The French State shall have the right to use French money in all purchases, payments and contracts connected with the exploitation of the mines or their accessories and subsidiaries.

33.

The Governing Commission shall have power to decide all questions arising from the interpretation of the preceding provisions.

France and Germany agree that any dispute involving a difference of opinion as to the interpretation of the said provisions shall in the same way be submitted to the Governing Commission, and the decision of a majority of the Commission shall be binding on both countries.

Chapter III.

Plebiscite.

34.

At the termination of a period of fifteen years from the coming into force of the present Treaty, the population of the territory of the Saar Basin will be called upon to indicate their desires in the following manner:

A vote will take place by communes or districts, on the three following alternatives: (a) maintenance of the regime established by the present Treaty and by this Annex: (b) union with France; (c) union with Germany.

All persons without distinction of sex, more than twenty years old at the date of voting, resident in the territory at the date of the signature of the present Treaty, will have the right to vote.

The other conditions, methods and the date of the voting shall be fixed by the Council of the League of Nations in such a way as to secure the freedom, secrecy and trustworthiness of the voting.

35.

The League of Nations shall decide on the sovereignty under which the territory is to be placed, taking into account the wishes of the inhabitants as expressed by the voting:

(a) If, for the whole or part of the territory, the League of Nations decides in favour of the maintenance of the regime established by the present Treaty and this Annex, Germany hereby agrees to make such renunciation of her sovereignty in favour of the League of Nations as the latter shall deem necessary. It will be the duty of the League of Nations to take appropriate steps to adapt the regime definitely adopted to the permanent welfare of the territory and the general interest;

(b) If, for the whole or part of the territory the League of Nations decides in favour of union with France, Germany hereby agrees to cede to France in accordance with the decision of the League of Nations all rights and title over the territory specified by the League;

(c) If for the whole or part of the territory the League of Nations decides in favour of union with Germany it will be the duty of the League of Nations to cause the German Government to be re-established in the government of the territory specified by the League.

36.

If the League of Nations decides in favour of the union of the whole or part of the territory of the Saar Basin with Germany, France's rights of ownership in the mines situated in such part of the territory will be repurchased by Germany in their entirety at a price payable in gold. The price to be paid will be fixed by three experts, one nominated by Germany, one by France and one, who shall be neither a Frenchman nor a German, by the Council of the League of Nations; the decision of the experts will be given by a majority.

The obligation of Germany to make such payment shall be taken into account by the Reparation Commission, and for the purpose of this payment Germany may create a prior charge upon her assets or revenues upon such detailed terms as shall be agreed to by the Reparation Commission.

If, nevertheless, Germany after a period of one year from the date on which the payment becomes due shall not have effected the said payment, the Reparation Commission shall do so in accordance with such instructions as may be given by the League of Nations, and, if necessary, by liquidating that part of the mines which is in question.

37.

If, in consequence of the repurchase provided for in paragraph 36, the ownership of the mines or any part of them is transferred to Germany the French State and French nationals shall have the right to purchase such amount of coal of the Saar Basin as their industrial and domestic needs are found at that time to require. An equitable arrangement regarding amounts of coal, duration of contract and prices will be fixed in due time by the Council of the League of Nations.

38.

It is understood that France and Germany may, by special agreements concluded before the time fixed for the payment of the price for the repurchase of the mines, modify the provisions of paragraphs 36 and 37.

39.

The Council of the League of Nations shall make such provisions as may be necessary for the establishment of the regime which is to take effect after the decisions of the League of Nations mentioned in paragraph 35 have become operative, including an equitable apportionment of any obligations of the government of the territory of the Saar Basin arising from loans raised by the Commission or from other causes.

From the coming into force of the new regime the powers of the Governing Commission will terminate, except in the case provided for in paragraph 35 (a).

40.

In all matters dealt with in the present Annex the decisions of the Council of the League of Nations will be taken by a majority.

Section V.

ALSACE-LORRAINE.

The High Contracting Parties, recognizing the moral obligation to redress the wrong done by Germany in 1871 both to the rights of France and to the wishes of the population of Alsace and Lorraine, which were separated from their country in spite of the solemn protest of their representatives at the Assembly of Bordeaux,

Agree upon the following Articles:

Article 51.

The territories which were ceded to Germany in accordance with the Preliminaries of Peace signed at Versailles on February 26, 1871, and the Treaty of Frankfort of May 10, 1871, are restored to French sovereignty as from the date of the Armistice of November 11, 1918.

The provisions of the Treaties establishing the delimitation of the frontiers before 1871 shall be restored.

Article 52.

The German Government shall hand over without delay to the French Government all archives, registers, plans, titles and documents of every kind concerning the civil, military, financial, judicial or other administrations of the territories restored to French sovereignty. If any of these documents, archives, registers, titles or plans have been misplaced they will be restored by the German Government on the demand of the French Government.

Article 53.

Separate agreements shall be made between France and Germany dealing with the interests of the inhabitants of the territories referred to in Article 51, particularly as regards their civil rights, their business and the exercise of their professions, it being understood that Germany undertakes as from the present date to recognise and accept the regulations laid down in the Annex hereto regarding the nationality of the inhabitants or natives of the said territories, not to claim at any time or in any place whatsoever as German nationals those who shall have been declared on any ground to be French, to receive all others in her territory, and to conform, as regards the property of German nationals in the territories indicated in Article 51, with the provisions of Article 297 and the Annex to Section IV of Part X (Economic Clauses) of the present Treaty.

Those German nationals who without acquiring French nationality shall receive permission from the French Government to reside in the said territories shall not be subjected to the provisions of the said Article.

Article 54.

Those persons who have regained French nationality in virtue of paragraph 1 of the Annex hereto will be held to be Alsace-Lorrainers for the purposes of the present Section.

The persons referred to in paragraph 2 of the said Annex will from the day on which they have claimed French nationality be held to be Alsace-Lorrainers with retroactive effect as from November 11, 1918. For those whose application is rejected, the privilege will terminate at the date of the refusal.

Such juridical persons will also have the status of Alsace-Lorrainers as shall have been recognized as possessing this quality, whether by the French administrative authorities or by a judicial decision.

Article 55.

The territories referred to in Article 51 shall return to France free and quit of all public debts under the conditions laid down in Article 255 of Part IX (Financial Clauses) of the present Treaty.

Article 56.

In conformity with the provisions of Article 256 of Part IX (Financial Clauses) of the present Treaty, France shall enter into possession of all property and estate, within the territories referred to in Article 51, which belong to the German Empire or German States, without any payment or credit on this account to any of the States ceding the territories.

This provision applies to all movable or immovable property of public or private domain, together with all rights whatsoever, belonging to the German Empire or German States or to their administrative areas.

Crown property and the property of the former Emperor or other German sovereigns shall be assimilated to property of the public domain.

Article 57.

Germany shall not take any action, either by means of stamping or by any other legal or administrative measures not applying equally to the rest of her territory which may be to the detriment of the legal value or redeemability of German monetary instruments or monies which, at the date of the signature of the present Treaty, are legally current and at that date are in the possession of the French Government.

Article 58.

A special Convention will determine the conditions for repayment in marks of the exceptional war expenditure advanced during the course of the war by Alsace-Lorraine or by the public bodies in Alsace-Lorraine on account of the Empire in accordance with German law, such as payment to the families of persons mobilised, requisitions, billeting of troops and assistance to persons who have been evacuated.

In fixing the amount of these sums Germany shall be credited with that portion which Alsace-Lorraine would have contributed to the Empire to meet the expenses resulting from these payments, this contribution being calculated according to the proportion of the Imperial revenues derived from Alsace-Lorraine in 1913.

Article 59.

The French Government will collect for its own account the imperial taxes, duties and dues of every kind leviable in the territories referred to in Article 51 and not collected at the time of the Armistice of November 11, 1918.

Article 60.

The German Government shall without delay restore to Alsace-Lorrainers (individuals, juridical persons and public institutions) all property, rights and interests belonging to them on November 11, 1918, in so far as these are situated in German territory.

Article 61.

The German Government undertakes to continue and complete without delay the execution of the financial clauses regarding Alsace-Lorraine contained in the Armistice Conventions.

Article 62.

The German Government undertakes to bear the expense of all civil and military pensions which had been earned in Alsace-Lorraine on date of November 11, 1918, and the maintenance of which was a charge on the budget of the German empire.

The German Government shall furnish each year the funds necessary for the payment in francs, at the average rate of exchange for that year, of the sums in marks to which persons resident in Alsace-Lorraine would have been entitled if Alsace-Lorraine had remained under German jurisdiction.

Article 63.

For the purposes of the obligation assumed by Germany in Part VIII (Reparation) of the present Treaty to give compensation for damages caused to the civil populations of the Allied and Associated countries in the form of fines, the inhabitants of the territories referred to in Article 51 shall be assimilated to the above-mentioned populations.

Article 64

The regulations concerning the control of the Rhine and of the Moselle are laid down in Part XII (Ports, Waterways and Railways) of the present Treaty.

Article 65.

Within a period of three weeks after the coming into force of the present Treaty, the port of Strasburg and the port of Kehl shall be constituted, for a period of seven years, a single unit from the point of view of exploitation.

The administration of this single unit will be carried on by a manager named by the Central Rhine Commission, which shall also have power to remove him.

This manager shall be of French nationality. He will reside in Strasburg and will be subject to the supervision of the Central Rhine Commission.

There will be established in the two ports free zones in conformity with Part XII (Ports, Waterways and Railways) of the present Treaty.

A special Convention between France and Germany, which shall be submitted to the approval of the Central Rhine Commission, will fix the details of this organisation, particularly as regards finance.

It is understood that for the purpose of the present Article the port of Kehl includes the whole of the area necessary for the movements of the port and the trains which serve it, including the harbour, quays and railroads, platforms, cranes, sheds and warehouses, silos, elevators and hydro-electric plants, which make up the equipment of the port.

The German Government undertakes to carry out all measures which shall be required of it in order to assure that all the making-up and switching of trains arriving at or departing from Kehl, whether for the right bank or the left bank of the Rhine, shall be carried on in the best conditions possible.

All property rights shall be safeguarded. In particular the administration of the ports shall not prejudice any property rights of the French or Baden railroads.

Equality of treatment as respects traffic shall be assured in both ports to the nationals, vessels and goods of every country.

In case at the end of the sixth year France shall consider that the progress made in the improvement of the port of Strasburg still requires a prolongation of this temporary regime, she may ask for such prolongation from the Central Rhine Commission, which may grant an extension for a period not exceeding three years.

Throughout the whole period of any such extension the free zones above provided for shall be maintained.

Pending appointment of the first manager by the Central Rhine Commission a provisional manager who shall be of French nationality may be appointed by the Principal Allied and Associated Powers subject to the foregoing provisions.

For all purposes of the present Article the Central Rhine Commission will decide by a majority of votes.

Article 66.

The railway and other bridges across the Rhine now existing within the limits of Alsace-Lorraine shall, as to all their parts and their whole length, be the property of the French State, which shall ensure their upkeep.

Article 67.

The French government is substituted in all the rights of the German Empire over all the railways which were administered by the Imperial railway administration and which are actually working or under construction.

The same shall apply to the rights of the Empire with regard to railway and tramway concessions within the territories referred to in Article 51.

This substitution shall not entail any payment on the part of the French State.

The frontier railway stations shall be established by a subsequent agreement, it being stipulated in advance that on the Rhine frontier they shall be situated on the right bank.

Article 68.

In accordance with the provisions of Article 268 of Chapter I of Section I of Part X (Economic Clauses) of the present Treaty, for a period of five years from the coming into force of the present Treaty, natural or manufactured products originating in and coming from the territories referred to in Article 51 shall, on importation into German customs territory, be exempt from all customs duty.

The French government may fix each year, by decree, communicated to the German Government, the nature and amount of the products which shall enjoy this exemption.

The amount of each product which may be sent annually into Germany shall not exceed the average of the amounts sent annually in the years 1911-1913.

Further, during the period of five years above mentioned, the German Government shall allow the free export from Germany and the free reimportation into Germany, exempt from all customs duties and other charges (including internal charges), of yarns, tissues and other textile materials or textile products of any kind and in any condition, sent from Germany into the territories referred to in Article 51, to be subjected there to any finishing process, such as bleaching, dyeing, printing, mercerization gassing, twisting or dressing.

Article 69.

During a period of ten years from the coming into force of the present Treaty, central electric supply works situated in German territory and formerly furnishing electric power to the territories referred to in Article 51 or to any establishment the working of which passes permanently or temporarily from Germany to France, shall be required to continue such supply up to the amount of consumption corresponding to the undertakings and contracts current on November 11, 1918.

Such supply shall be furnished according to the contracts in force and at a rate which shall not be higher than that paid to the said works by German nationals.

Article 70.

It is understood that the French Government preserves its right to prohibit in the future in the territories referred to in Article 51 all new German participation:

(1) In the management or exploitation of the public domain and of public service, such as railways, navigable waterways, water works, gas works, electric power, etc.;

(2) In the ownership of mines and quarries of every kind and in enterprises connected therewith;

(3) In metallurgical establishments, even though their working may not be connected with that of any mine.

Article 71.

As regards the territories referred to in Article 51, Germany renounces on behalf of herself and her nationals as from November 11, 1918, all rights under the law of May 25, 1910, regarding the trade in potash salts, and generally under any stipulations for the intervention of German organisations in the working of the potash mines. Similarly, she renounces on behalf of herself and her nationals all rights under any agreements, stipulations or laws which may exist to her benefit with regard to other products of the aforesaid territories.

Article 72.

The settlement of the questions relating to debts contracted before November 11, 1918, between the German Empire and the German States or their nationals residing in Germany on the one part and Alsace-Lorrainers residing in Alsace-Lorraine on the other part shall be effected in accordance with the provisions of Section III of Part X (Economic Clauses) of the present Treaty, the expression "before the war" therein being replaced by the expression "before November 11, 1918." The rate of exchange applicable in the case of such settlement shall be the average rate quoted on the Geneva Exchange during the month preceding November 11, 1918.

There may be established in the territories referred to in Article 51, for the settlement of the aforesaid debts under the conditions laid

down in Section III of Part X (Economic Clauses) of the present Treaty, a special clearing office, it being understood that this office shall be regarded as a "central office" under the provisions of paragraph 1 of the Annex to the said Section.

Article 73.

The private property, rights and interests of Alsace-Lorrainers in Germany will be regulated by the stipulations of Section IV of Part X (Economic Clauses) of the present Treaty.

Article 74.

The French government reserves the right to retain and liquidate all the property, rights and interests which German nationals or societies controlled by Germany possessed in the territories referred to in Article 51 on November 11, 1918, subject to the conditions laid down in the last paragraph of Article 53 above.

Germany will directly compensate her nationals who may have been dispossessed by the aforesaid liquidations.

The product of these liquidations shall be applied in accordance with the stipulations of Sections III and IV of Part X (Economic Clauses) of the present Treaty.

Article 75.

Notwithstanding the stipulations of Section V of Part X (Economic Clauses) of the present Treaty, all contracts made before the date of the promulgation in Alsace-Lorraine of the French decree of November 30, 1918, between Alsace-Lorrainers (whether individuals or juridical persons) or other resident in Alsace-Lorraine on the one part and the German Empire or German States and their nationals resident in Germany on the other part, the execution of which has been suspended by the Armistice or by subsequent French legislation, shall be maintained.

Nevertheless, any contract of which the French Government shall notify the cancellation to Germany in the general interest within a period of six months from the date of the coming into force of the present Treaty shall be annulled except in respect of any debt or other pecuniary obligation arising out of any act done or money paid thereunder before November 11, 1918. If this dissolution would cause one of the parties substantial prejudice, equitable compensation, calculated solely on the capital employed without taking account of loss of profits, shall be accorded to the prejudiced party.

With regard to prescriptions, limitations and forfeitures in Alsace-Lorraine, the provisions of Articles 300 and 301 of Section V of Part X (Economic Clauses) shall be applied with the substitution for the expression "outbreak of war" of the expression "November 11, 1918," and for the expression "duration of the war" of the expression "period from November 11, 1918, to the date of the coming into force of the present Treaty."

Article 76.

Questions concerning rights in industrial, literary or artistic property of Alsace-Lorrainers shall be regulated in accordance with the general stipulations of Section VII of Part X (Economic Clauses) of the present Treaty, it being understood that Alsace-Lorrainers holding rights of this nature under German legislation will preserve full and entire enjoyment of those rights on German territory.

Article 77.

The German Government undertakes to pay over to the French Government such proportion of all reserves accumulated by the Empire or by public or private bodies dependent upon it, for the purposes of disability and old age insurance, as would fall to the disability and old age insurance fund at Strasburg.

The same shall apply in respect of the capital and reserves accumulated in Germany falling legitimately to other social insurance funds, to miners' superannuation funds, to the fund of the railways of Alsace-Lorraine, to other superannuation organisations established for the benefit of the personnel of public administrations and institutions operating in Alsace-Lorraine, and also in respect of the capital and reserves due by the insurance fund of private employees at Berlin, by reason of engagements entered into for the benefit of insured persons of that category resident in Alsace-Lorraine.

A special Convention shall determine the conditions and procedure of these transfers.

Article 78.

With regard to the execution of judgments, appeals and prosecutions, the following rules shall be applied:

(1) All civil and commercial judgments which shall have been given since August 3, 1914, by the Courts of Alsace-Lorraine between Alsace-Lorrainers, or between Alsace-Lorrainers and foreigners, or between foreigners, and which shall not have been appealed from before November 11, 1918, shall be regarded as final and susceptible of immediate execution without further formality.

When the judgment has been given between Alsace-Lorrainers and Germans or between Alsace-Lorrainers and subjects of the allies of Germany, it shall only be capable of execution after the issue of an exequatur by the corresponding new tribunal in the restored territory referred to in Article 51.

(2) All judgments given by German Courts since August 3, 1914, against Alsace-Lorrainers for political crimes or misdemeanors shall be regarded as null and void.

(3) All sentences passed since November 11, 1918, by the Court of the Empire at Leipzig on appeals against the decisions of the Courts of Alsace-Lorraine shall be regarded as null and void and shall be so pronounced. The papers in regard to the cases in which such sentences have been given shall be returned to the Courts of Alsace-Lorraine concerned.

All appeals to the Court of the Empire against decisions of the Courts of Alsace-Lorraine shall be suspended. The papers shall be returned under the aforesaid conditions for transfer without delay to the French Cour de Cassation, which shall be competent to decide them.

(4) All prosecutions in Alsace-Lorraine for offenses committed during the period between November 11, 1918, and the coming into force of the present Treaty will be conducted under German law except in so far as this has been modified by decrees duly published on the spot by the French authorities.

(5) All other questions as to competence, procedure or administration of justice shall be determined by a special Convention between France and Germany.

Article 79.

The stipulations as to nationality contained in the Annex hereto shall be considered as of equal force with the provisions of the present Section.

All other questions concerning Alsace-Lorraine which are not regulated by the present Section and the Annex thereto or by the general provisions of the present Treaty will form the subject of further conventions between France and Germany.

ANNEX.

1.

As from November 11, 1918, the following persons are ipso facto reinstated in French nationality:

(1) Persons who lost French nationality by the application of the Franco-German Treaty of May 10, 1871, and who have not since that date acquired any nationality other than German:

(2) The legitimate or natural descendants of the persons referred to in the immediately preceding paragraph, with the exception of those whose ascendants in the paternal line include a German who migrated into Alsace-Lorraine after July 15, 1870;

(3) All persons born in Alsace-Lorraine of unknown parents, or whose nationality is unknown.

2.

Within the period of one year from the coming into force of the present Treaty, persons included in any of the following categories may claim French nationality:

(1) All persons not restored to French nationality under paragraph 1 above, whose ascendants include a Frenchman or French woman who lost French nationality under the conditions referred to in the said paragraph;

(2) All foreigners, not nationals of a German State, who acquired the status of a citizen of Alsace-Lorraine before August 3, 1914;

(3) All Germans domiciled in Alsace-Lorraine, if they have been so domiciled since a date previous to July 15, 1870, or if one of their ascendants was at that date domiciled in Alsace-Lorraine;

(4) All Germans born or domiciled in Alsace Lorraine who have served in the Allied or Associated armies during the present war, and their descendants;

(5) All persons born in Alsace-Lorraine before May 10, 1871, of foreign parents, and the descendants of such persons;

(6) The husband or wife of any person whose French nationality may have been restored under paragraph 1, or who may have claimed and obtained French nationality in accordance with the preceding provisions.

The legal representative of a minor may exercise, on behalf of that minor, the right to claim French nationality; and if that right has not been exercised, the minor may claim French nationality within the year following his majority.

Except in the cases provided for in No. (6) of the present paragraph, the French authorities reserve to themselves the right, in individual cases, to reject the claim to French nationality.

3.

Subject to the provisions of paragraph 2, Germans born or domiciled in Alsace-Lorraine shall not acquire French nationality by reason of the restoration of Alsace-Lorraine to France, even though they may have the status of citizens of Alsace-Lorraine.

They may acquire French nationality only by naturalisation, on condition of having been domiciled in Alsace-Lorraine from a date previous to August 3, 1914, and of submitting proof of unbroken residence within the restored territory for a period of three years from November 11, 1918.

France will be solely responsible for their diplomatic and consular protection from the date of their application for French naturalisation.

The French Government shall determine the procedure by which reinstatement in French nationality as of right shall be effected, and the conditions under which decisions shall be given upon claims to such nationality and applications for naturalisation, as provided by the present Annex.

Section VI.

AUSTRIA.

Article 80.

Germany acknowledges and will respect strictly the independence of Austria, within the frontiers which may be fixed in a Treaty between that State and the Principal Allied and Associated Powers; she agrees that this independence shall be inalienable, except with the consent of the Council of the League of Nations.

Section VII.

CZECHO-SLOVAK STATE.

Article 81.

Germany, in conformity with the action already taken by the Allied and Associated Powers, recognises the complete independence of the Czecho-Slovak State which will include the autonomous territory of the Ruthenians to the south of the Carpathians. Germany hereby recognises the frontiers of this State as determined by the Principal Allied and Associated Powers and the other interested States.

Article 82.

The old frontier as it existed on August 3, 1914, between Austria-Hungary and the German Empire will constitute the frontier between Germany and the Czecho-Slovak State.

Article 83.

Germany renounces in favour of the Czecho-Slovak State all rights and title over the portion of Silesian territory defined as follows:

starting from a point about 2 kilometres south-east of Katscher, on the boundary between the Kreise of Leobschutz and Ratibor:

the boundary between the two Kreise;

then, the former boundary between Germany and Austria-Hungary up to a point on the Oder immediately to the south of the Ratibor-Oderberg railway:

thence, towards the north-west and up to a point about 2 kilometres to the south-east of Katscher:

a line to be fixed on the spot passing to the west of Kranowitz.

A Commission composed of seven members, five nominated by the Principal Allied and Associated Powers, one by Poland and one by the Czecho-Slovak State, will be appointed fifteen days after the coming into force of the present Treaty to trace on the spot the frontier line between Poland and the Czecho-Slovak State.

The decisions of this Commission will be taken by a majority and shall be binding on the parties concerned.

Germany hereby agrees to renounce in favour of the Czecho-Slovak State all rights and title over the part of the Kreis of Leobschutz comprised within the following boundaries in case after the determination of the frontier between Germany and Poland the said part of that Kreis should become isolated from Germany:

from the south-eastern extremity of the salient of the former Austrian frontier at about 5 kilometres to the west of Leobschutz southwards and up to the point of junction with the boundary between the Kreise of Leobschutz and Ratibor:

the former frontier between Germany and Austria-Hungary:

then, northwards, the administrative boundary between the Kreise of Leobschutz and Ratibor up to a point situated about 2 kilometres to the south-east of Katscher:

thence, north-westwards and up to the starting-point of this definition:

a line to be fixed on the spot passing to the east of Katscher.

Article 84.

German nationals habitually resident in any of the territories recognised as forming part of the Czecho-Slovak State will obtain Czecho-Slovak nationality ipso facto and lose their German nationality.

Article 85.

Within a period of two years from the coming into force of the present Treaty, German nationals over eighteen years of age habitually resident in any of the territories recognised as forming part of the Czecho-Slovak State will be entitled to opt for German nationality. Czecho-Slovaks who are German nationals and are habitually resident in Germany will have a similar right to opt for Czecho-Slovak nationality.

Option by a husband will cover his wife and option by parents will cover their children under eighteen years of age.

Persons who have exercised the above right to opt must within the succeeding twelve months transfer their place of residence to the State for which they have opted.

They will be entitled to retain their landed property in the territory of the other State where they had their place of residence before exercising the right to opt. They may carry with them their movable property of every description. No export or import duties may be imposed upon them in connection with the removal of such property.

Within the same period Czecho-Slovaks who are German nationals and are in a foreign country will be entitled, in the absence of any provisions to the contrary in the foreign law, and if they have not acquired the foreign nationality, to obtain Czecho-Slovak nationality and lose their German nationality by complying with the requirements laid down by the Czecho-Slovak State.

Article 86.

The Czecho-Slovak State accepts and agrees to embody in a Treaty with the Principal Allied and Associated Powers such provisions as may be deemed necessary by the said Powers to protect the interests of inhabitants of that State who differ from the majority of the population in race, language or religion.

The Czecho-Slovak State further accepts and agrees to embody in a Treaty with the said Powers such provisions as they may deem necessary to protect freedom of transit and equitable treatment of the commerce of other nations.

The proportion and nature of the financial obligations of Germany and Prussia which the Czecho-Slovak State will have to assume on account of the Silesian territory placed under its sovereignty will be determined in accordance with Article 254 of Part IX (Financial Clauses) of the present Treaty.

Subsequent agreements will decide all questions not decided by the present Treaty which may arise in consequence of the cession of the said territory.

Section VIII.

POLAND.

Article 87.

Germany, in conformity with the action already taken by the Allied and Associated Powers, recognizes the complete independence of Poland, and renounces in her favour all rights and title over the territory bounded by the Baltic Sea, the eastern frontier of Germany as laid down in Article 27 of Part II (Boundaries of Germany) of the present Treaty up to a point situated about 2 kilometres to the east of Lorzendorf, then a line to the acute angle which the northern boundary of Upper Silesia makes about 3 kilometres north-west of Simmenau, then the boundary of Upper Silesia to its meeting point with the old frontier between Germany and Russia, then this frontier to the point where it crosses the course of the Niemen, and then the northern frontier of East Prussia as laid down in Article 28 of Part II aforesaid.

The provisions of this Article do not, however, apply to the territories of East Prussia and the Free City of Danzig, as defined in Article 28 of Part II (Boundaries of Germany) and in Article 100 of Section XI (Danzig) of this Part.

The boundaries of Poland not laid down in the present Treaty will be subsequently determined by the Principal Allied and Associated Powers.

A Commission consisting of seven members, five of whom shall be nominated by the Principal Allied and Associated Powers, one by Germany and one by Poland, shall be constituted fifteen days after the coming into force of the present Treaty to delimit on the spot the frontier line between Poland and Germany.

The decisions of the Commission will be taken by a majority of votes and shall be binding upon the parties concerned.

Article 88.

In the portion of Upper Silesia included within the boundaries described below, the inhabitants will be called upon to indicate by a vote whether they wish to be attached to Germany or to Poland:

starting from the northern point of the salient of the old province of Austrian Silesia situated about 8 kilometres east of Neustadt, the former frontier between Germany and Austria to its junction with the boundary between the Kriese of Leobschutz and Ratibor;

thence in a northerly direction to a point about 2 kilometres south-east of Katscher;

the boundary between the Kreise of Leobschutz and Ratibor;

thence in a south-easterly direction to a point on the course of the Oder immediately south of the Ratibor-Oderberg railway;

a line to be fixed on the ground passing south of Kranowitz;

thence the old boundary between Germany and Austria, then the old boundary between Germany and Russia to its junction with the administrative boundary between Posnania and Upper Silesia;

thence this administrative boundary to its junction with the administrative boundary between Upper and Middle Silesia;

thence westwards to the point where the administrative boundary turns in an acute angle to the south-east about 2 kilometres north-west of Simmenau;

the boundary between Upper and Middle Silesia;

then in a westerly direction to a point to be fixed on the ground about 2 kilometres east of Lorzendorf;

a line to be fixed on the ground passing north of Klein Hennersdorf;

thence southwards to the point where the boundary between Upper and Middle Silesia cuts the Stadtel-Karlsruhe road;

a line to be fixed on the ground passing west of Hennersdorf, Polkowitz, Noldau, Steinersdorf and Dammer, and east of Strehlitz, Nassadel, Eckersdorf, Schwirz and Stadtel;

thence the boundary between Upper and Middle Silesia to its junction with the eastern boundary of the Kreis of Falkenberg;

thence the eastern boundary of the Kreis of Falkenberg to the point of the salient which is 3 kilometres east of Puschine;

thence to the northern point of the salient of the old province of Austrian Silesia situated about 8 kilometres east of Neustadt;

a line to be fixed on the ground passing east of Zulz.

The regime under which this plebiscite will be taken and given effect to is laid down in the Annex hereto.

The Polish and German Governments hereby respectively bind themselves to conduct no prosecutions on any part of their territory and to take no exceptional proceedings for any political action performed in Upper Silesia during the period of the regime laid down in the Annex hereto and up to the settlement of the final status of the country.

Germany hereby renounces in favour of Poland all rights and title over the portion of Upper Silesia lying beyond the frontier line fixed by the Principal Allied and Associated Powers as the result of the plebiscite.

ANNEX.

1.

Within fifteen days from the coming into force of the present Treaty the German troops and such officials as may be designated by the Commission set up under the provisions of paragraph 2 shall evacuate the plebiscite area. Up to the moment of the completion of the evacuation they shall refrain from any

form of requisitioning in money or in kind and from all acts likely to prejudice the material interests of the country.

Within the same period the Workmen's and Soldiers' Councils which have been constituted in this area shall be dissolved. Members of such Councils who are natives of another region and are exercising their functions at the date of the coming into force of the present Treaty, or who have gone out of office since March 1, 1919, shall be evacuated.

All military and semi-military unions formed in the said area by inhabitants of the district shall be immediately disbanded. All members of such military organisations who are not domiciled in the said area shall be required to leave it.

2.

The plebiscite area shall be immediately placed under the authority of an International Commission of four members to be designated by the following Powers: The United States of America, France, the British Empire and Italy. It shall be occupied by troops belonging to the Allied and Associated Powers and the German government undertakes to give facilities for the transference of these troops to Upper Silesia.

3.

The Commission shall enjoy all the powers exercised by the German or the Prussian Government, except those of legislation or taxation. It shall also be substituted for the Government of the province and the Regierungsbezirk.

It shall be within the competence of the Commission to interpret the powers hereby conferred upon it and to determine to what extent it shall exercise them and to what extent they shall be left in the hands of the existing authorities.

Changes in the existing laws and the existing taxation shall only be brought into force with the consent of the Commission.

The Commission will maintain order with the help of the troops which will be at its disposal and to the extent which it may deem necessary by means of gendarmerie recruited among the inhabitants of the country.

The Commission shall provide immediately for the replacement of the evacuated German officials and, if occasion arises, shall itself order the evacuation of such authorities and proceed to the replacement of such local authorities as may be required.

It shall take all steps which it thinks proper to insure the freedom, fairness and secrecy of the vote. In particular it shall have the right to order the expulsion of any person who may in any way have attempted to distort the result of the plebiscite by methods of corruption or intimidation.

The Commission shall have full power to settle all questions arising from the execution of the present clauses. It shall be assisted by technical advisers chosen by it from among the local population.

The decisions of the Commission shall be taken by a majority vote.

4.

The vote shall take place at such date as may be determined by the Principal Allied and Associated Powers, but not sooner than six months or later than eighteen months after the establishment of the Commission in the area.

The right to vote shall be given to all persons without distinction of sex who:

(a) Have completed their twentieth year on the 1st January of the year in which the plebiscite takes place;

(b) Were born in the plebiscite area or have been domiciled there since a date to be determined by the Commission, which shall not be subsequent to January 1, 1919, or who have been expelled by the German authorities and have not retained their domicile there.

Persons convicted of political offences shall be enabled to exercise their right of voting.

Every person will vote in the commune where he is domiciled or in which he was born, if he has not retained his domicile in the area.

The result of the vote will be determined by communes according to the majority of votes in each commune.

5.

On the conclusion of the voting the number of votes cast in each commune will be communicated by the Commission to the Principal Allied and Associated Powers, with a full report as to the taking of the vote and a recommendation as to the line which ought to be adopted as the frontier of Germany in Upper Silesia. In this recommendation regard will be paid to the wishes of the inhabitants as shown by the vote, and to the geographical and economic conditions of the locality.

6.

As soon as the frontier has been fixed by the Principal Allied and Associated Powers the German authorities will be notified by the International Commission that they are free to take over the administration of the territory which it is recognised should be German; the said authorities must proceed to do so within one month of such notification and in the manner prescribed by the Commission.

Within the same period and in the manner prescribed by the Commission the Polish Government must proceed to take over the administration of the territory which it is recognised should be Polish.

When the administration of the territory has been provided for by the German and Polish authorities respectively the powers of the Commission will terminate.

The cost of the army of occupation and expenditure by the Commission, whether in discharge of its own functions or in the administration of the territory, will be charge on the area.

Article 89.

Poland undertakes to accord freedom of transit to persons, goods, vessels, carriages, wagons and mails in transit between East Prussia and the rest of Germany over Polish territory, including territorial waters, and to treat them at least as favourably as the persons, goods, vessels, carriages, wagons and mails respectively of Polish or of any other more favoured nationality, origin, importation, starting point, or ownerships as regards facilities, restrictions and all other matters.

Goods in transit shall be exempt from all customs or other similar duties.

Freedom of transit will extend to telegraphic and telephonic services under the conditions laid down by the conventions referred to in Article 98.

Article 90.

Poland undertakes to permit for a period of fifteen years the exportation to Germany of the products of the mines in any part of Upper Silesia transferred to Poland in accordance with the present Treaty.

Such products shall be free from all export duties or other charges or restrictions on exportation.

Poland agrees to take such steps as may be necessary to secure that any such products shall be available for sale to purchasers in Germany on terms as favourable as are applicable to like products sold under similar conditions to purchasers in Poland or in any other country.

Article 91.

German nationals habitually resident in territories recognised as forming part of Poland will acquire Polish nationality ipso facto and will lose their German nationality.

German nationals, however, or their descendants who became resident in these territories after January 1, 1918, will not acquire

Polish nationality without a special authorisation from the Polish State.

Within a period of two years after the coming into force of the present Treaty, German nationals over 18 years of age habitually resident in any of the territories recognised as forming part of Poland will be entitled to opt for German nationality.

Poles who are German nationals over 18 years of age and habitually resident in Germany will have a similar right to opt for Polish nationality.

Option by a husband will cover his wife and option by parents will cover their children under 18 years of age.

Persons who have exercised the above right to opt may within the succeeding twelve months transfer their place of residence to the State for which they have opted.

They will be entitled to retain their immovable property in the territory of the other State where they had their place of residence before exercising the right to opt.

They may carry with them their movable property of every description. No export or import duties or charges may be imposed upon them in connection with the removal of such property.

Within the same period Poles who are German nationals and are in a foreign country will be entitled, in the absence of any provisions to the contrary in the foreign law, and if they have not acquired the foreign nationality, to obtain Polish nationality and to lose their German nationality by complying with the requirements laid down by the Polish State.

In the portion of Upper Silesia submitted to a plebiscite the provisions of this Article shall only come into force as from the definite attribution of the territory.

Article 92.

The proportion and the nature of the financial liabilities of Germany and Prussia which are to be borne by Poland will be determined in accordance with Article 254 of Part IX (Financial Clauses) of the present Treaty.

There shall be excluded from the share of such financial liabilities assumed by Poland that portion of the debt which, according to the finding of the Reparation Commission referred to in the above-mentioned Article, arises from measures adopted by the German and Prussian Governments with a view to German colonisation in Poland.

In fixing under Article 256 of the present Treaty the value of the property and possessions belonging to the German Empire and to the German States which pass to Poland with the territory transferred above, the Reparation Commission shall exclude from the valuation buildings, forests and other State property which belonged to the former Kingdom of Poland; Poland shall acquire these properties free of all costs and charges.

In all the German territory transferred in accordance with the present Treaty and recognised as forming definitively part of Poland, the property, rights and interests of German nationals shall not be liquidated under Article 297 by the Polish Government except in accordance with the following provisions:

(1) The proceeds of the liquidation shall be paid direct to the owner;

(2) If on his application the Mixed Arbitral Tribunal provided for by Section VI of Part X (Economic Clauses) of the present Treaty, or an arbitrator appointed by that Tribunal, is satisfied that the conditions of the sale or measures taken by the Polish Government outside its general legislation were unfairly prejudicial to the price obtained, they shall have discretion to award to the owner equitable compensation to be paid by the Polish Government.

Further agreements will regulate all questions arising out of the cession of the above territory which are not regulated by the present Treaty.

Article 93.

Poland accepts and agrees to embody in a Treaty with the Principal Allied and Associated Powers such provisions as may be deemed necessary by the said Powers to protect the interests of inhabitants of Poland who differ from the majority of the population in race, language or religion.

Poland further accepts and agrees to embody in a Treaty with the said Powers such provisions as they may deem necessary to protect freedom of transit and equitable treatment of the commerce of other nations.

Section IX.

EAST PRUSSIA.

Article 94.

In the area between the southern frontier of East Prussia, as described in Article 28 of Part II (Boundaries of Germany) of the present Treaty, and the line described below, the inhabitants will be called upon to indicate by a vote the State to which they wish to belong:

The western and northern boundary of Regierungsbezirk Allenstein to its junction with the boundary between the Kreise of Oletsko and Angerburg; thence, the northern boundary of the Kreis of Oletsko to its junction with the old frontier of East Prussia.

Article 95.

The German troops and authorities will be withdrawn from the area defined above within a period not exceeding fifteen days after the coming into force of the present Treaty. Until the evacuation is completed they will abstain from all requisitions in money or in kind and from all measures injurious to the economic interests of the country.

On the expiration of the above-mentioned period the said area will be placed under the authority of an International Commission of five members appointed by the Principal Allied and Associated Powers. This Commission will have general powers of administration and, in particular, will be charged with the duty of arranging for the vote and of taking such measures as it may deem necessary to ensure its freedom, fairness and secrecy. The Commission will have all necessary authority to decide any questions to which the execution of these provisions may give rise. The Commission will make such arrangements as may be necessary for assistance in the exercise of its functions by officials chosen by itself from the local population. Its decisions will be taken by a majority.

Every person, irrespective of sex, will be entitled to vote who:

(a) Is 20 years of age at the date of the coming into force of the present Treaty, and

(b) Was born within the area where the vote will take place or has been habitually a resident there from a date to be fixed by the Commission.

Every person will vote in the commune where he is habitually resident or, if not habitually resident in the area, in the commune where he was born.

The result of the vote will be determined by communes (Gemeinde) according to the majority of the votes in each commune.

On the conclusion of the voting the number of votes cast in each commune will be communicated by the Commission to the Principal Allied and Associated Powers, with a full report as to the taking of the vote and a recommendation as to the line which ought to be adopted as the boundary of East Prussia in this region. In this recommendation regard will be paid to the wishes of the inhabitants as shown by the vote and to the geographical and economic conditions of the locality. The Principal Allied and Associated

Powers will then fix the frontier between East Prussia and Poland in this region.

If the line fixed by the Principal Allied and Associated Powers is such as to exclude from East Prussia any part of the territory defined in Article 94, the renunciation of its rights by Germany in favour of Poland, as provided in Article 87 above, will extend to the territories so excluded.

As soon as the line has been fixed by the Principal Allied and Associated Powers, the authorities administering East Prussia will be notified by the International Commission that they are free to take over the administration of the territory to the north of the line so fixed, which they shall proceed to do within one month of such notification and in the manner prescribed by the Commission. Within the same period and as prescribed by the Commission, the Polish Government must proceed to take over the administration of the territory to the south of the line. When the administration of the territory by the East Prussian and Polish authorities respectively has been provided for, the powers of the Commission will terminate.

Expenditure by the Commission, whether in the discharge of its own functions or in the administration of the territory, will be borne by the local revenues. East Prussia will be required to bear such proportion of any deficit as may be fixed by the Principal Allied and Associated Powers.

Article 96.

In the area comprising the Kreise of Stuhm and Rosenberg and the portion of the Kreis of Marienburg which is situated east of the Nogat and that of Marienwerder east of the Vistula, the inhabitants will be called upon to indicate by a vote, to be taken in each commune (Gemeinde), whether they desire the various communes situated in this territory to belong to Poland or to East Prussia.

Article 97.

The German troops and authorities will be withdrawn from the area defined in Article 96 within a period not exceeding fifteen days after the coming into force of the present Treaty. Until the evacuation is completed they will abstain from all requisitions in money or in kind and from all measures injurious to the economic interests of the country.

On the expiration of the above-mentioned period, the said area will be placed under the authority of an International Commission of five members appointed by the Principal Allied and Associated Powers. This Commission, supported if occasion arises by the necessary forces, will have general powers of administration and in particular will be charged with the duty of arranging for the vote and of taking such measures as it may deem necessary to ensure its freedom, fairness and secrecy. The Commission will conform as far as possible to the provisions of the present Treaty relating to the plebiscite in the Allenstein area; its decisions will be taken by a majority.

Expenditure by the Commission, whether in the discharge of its own functions or in the administration of the territory, will be borne by the local revenues.

On the conclusion of the voting the number of votes cast in each commune will be communicated by the Commission to the Principal Allied and Associated Powers with a full report as to the taking of the vote and a recommendation as to the line which ought to be adopted as the boundary of East Prussia in this region. In this recommendation regard will be paid to the wishes of the inhabitants as shown by the vote and to the geographical and economic conditions of the locality. The Principal Allied and Associated Powers will then fix the frontier between East Prussia and Poland in this region, leaving in any case to Poland for the whole of the section bordering on the Vistula full and complete control of the river including the east bank as far east of the river as may be necessary for its regulation and improvement. Germany agrees that in any portion of the said territory which remains German, no fortifications shall at any time be erected.

The Principal Allied and Associated Powers will at the same time draw up regulations for assuring to the population of East Prussia to the fullest extent and under equitable conditions access to the Vistula and the use of it for themselves, their commerce and their boats.

The determination of the frontier and the foregoing regulations shall be binding upon all the parties concerned.

When the administration of the territory has been taken over by the East Prussian and Polish authorities respectively, the powers of the Commission will terminate.

Article 98.

Germany and Poland undertake, within one year of the coming into force of the Treaty, to enter into conventions of which the terms, in case of difference, shall be settled by the Council of the League of Nations, with the object of securing, on the one hand to Germany full and adequate railroad, telegraphic and telephonic facilities for communication between the rest of Germany and East Prussia over the intervening Polish territory, and on the other hand to Poland full and adequate railroad, telegraphic and telephonic facilities for communication between Poland and the Free City of Danzig over any German territory that may, on the right bank of the Vistula, intervene between Poland and the Free City of Danzig.

Section X.

MEMEL.

Article 99.

Germany renounces in favour of the Principal Allied and Associated Powers all rights and title over the territories included between the Baltic, the north-eastern frontier of East Prussia as defined in Article 28 of Part II (Boundaries of Germany) of the present Treaty and the former frontier between Germany and Russia.

Germany undertakes to accept the settlement made by the Principal Allied and Associated Powers in regard to these territories, particularly in so far as concerns the nationality of the inhabitants.

Section XI.

FREE CITY OF DANZIG.

Article 100.

Germany renounces in favour of the Principal Allied and Associated Powers all rights and title over the territory comprised within the following limits:

from the Baltic sea southwards to the point where the principal channels of navigation of the Nogat and the Vistula (Weichsel) meet:

the boundary of East Prussia as described in Article 28 of Part II (Boundaries of Germany) of the present Treaty.

thence the principal of navigation of the Vistuala downstream to a point about 6½ kilometres north of the bridge of Dirschau;

thence north-west to point 5, 1½ kilometres south-east of the church of Guttland.

a line to be fixed on the ground;

thence in a general westerly direction to the salient made by the boundary of the Kreis of Berent 8½ kilometres north-east of Schoneck;

a line to be fixed on the ground passing between Muhlbanz on the south and Rambeltsch on the north;

thence the boundary of the Kreis of Berent westwards to the re-entrant which it forms 6 kilometres north-north-west of Schoneck;

thence to a point on the median line of Lonkener See:
a line to be fixed on the ground passing north of Neu Fietz and Schatarpi and south of Barenhutte and Lonken;
thence the median line of Lonkener See to its northernmost point;
thence to the southern end of Pollenziner See;
a line to be fixed on the ground:
thence the median line of Pollenziner See to its northernmost point;
thence in a north-easterly direction to a point about 1 kilometre south of Kohebken church, where the Danzig-Neustadt railway crosses a stream;
a line to be fixed on the ground passing south-east of Kamehlen, Krissau, Fidlin, Sulmin (Richthof), Mattern, Schaferei, and to the north-west of Neuendorf, Marschau, Czapielken, Hoch- and Klein- Kelpin, Pulvermuhl, Renneberg and the towns of Oliva and Zoppot;
thence the course of the stream mentioned above to the Baltic Sea.

The boundaries described above are drawn in a German map, scale 1/100,000, attached to the present Treaty (Map No. 3).

Article 101.

A Commission composed of three members appointed by the Principal Allied and Associated Powers, including a High Commissioner as President, one member appointed by Germany and one member appointed by Poland, shall be constituted within fifteen days of the coming into force of the present Treaty for the purpose of delimiting on the spot the frontier of the territory as described above, taking into account as far as possible the existing communal boundaries.

Article 102.

The Principal Allied and Associated Powers undertake to establish the town of Danzig, together with the rest of the territory described in Article 100, as a Free City. It will be placed under the protection of the League of Nations.

Article 103.

A constitution for the Free City of Danzig shall be drawn up by the duly appointed representatives of the Free City in agreement with a High Commissioner to be appointed by the League of Nations. This constitution shall be placed under the guarantee of the League of Nations.

The High Commissioner will also be entrusted with the duty of dealing in the first instance with all differences arising between Poland and the Free City of Danzig in regard to this Treaty or any arrangements or agreements made thereunder.

The High Commissioner shall reside at Danzig.

Article 104.

The Principal Allied and Associated Powers undertake to negotiate a Treaty between the Polish Government and the Free City of Danzig, which shall come into force at the same time as the establishment of the said Free City, with the following objects:

(1) To effect the inclusion of the Free City of Danzig within the Polish Customs frontiers, and to establish a free area in the port;

(2) To ensure to Poland without any restriction the free use and service of all waterways, docks, basins, wharves and other works within the territory of the Free City necessary for Polish imports and exports;

(3) To ensure to Poland the control and administration of the Vistula and of the whole railway system within the Free City, except such street and other railways as serve primarily the needs of the Free City, and of postal telegraphic and telephonic communication between Poland and the port of Danzig;

(4) To ensure to Poland the right to develop and improve the waterways, docks, basins, wharves, railways and other works and means of communication mentioned in this Article, as well as to lease or purchase through appropriate processes such land and other property as may be necessary for these purposes;

(5) To provide against any discrimination within the Free City of Danzig to the detriment of citizens of Poland and other persons of Polish origin or speech;

(6) To provide that the Polish Government shall undertake the conduct of the foreign relations of the Free City of Danzig as well as the diplomatic protection of citizens of that city when abroad.

Article 105.

On the coming into force of the present Treaty German nationals ordinarily resident in the territory described in Article 100 will ipso facto lose their German nationality in order to become nationals of the Free City of Danzig.

Article 106.

Within a period of two years from the coming into force of the present Treaty German nationals over 18 years of age ordinarily resident in the territory described in Article 100 will have the right to opt for German nationality.

Option by a husband will cover his wife and option by parents will cover their children less than 18 years of age.

All persons who exercise the right of option referred to above must during the ensuing twelve months transfer their place of residence to Germany.

These persons will be entitled to preserve the immovable property possessed by them in the territory of the Free City of Danzig. They may carry with them their movable property of every description. No export or import duties shall be imposed upon them in this connection.

Article 107.

All property situated within the territory of the Free City of Danzig belonging to the German Empire or to any German State shall pass to the Principal Allied and Associated Powers for transfer to the Free City of Danzig or to the Polish State as they may consider equitable.

Article 108.

The proportion and nature of the financial liabilities of Germany and of Prussia to be borne by the Free City of Danzig shall be fixed in accordance with Article 254 of Part IX (Financial Clauses) of the present Treaty.

All other questions which may arise from the cession of the territory referred to in Article 100 shall be settled by further agreements.

Section XII.

SCHLESWIG.

Article 109.

The frontier between Germany and Denmark shall be fixed in conformity with the wishes of the population.

For this purpose the population inhabiting the territories of the former German Empire situated to the north of a line from East to West (shown by a brown line on the map No. 4, annexed to the present Treaty):

leaving the Baltic Sea about 13 kilometres east-north-east of Flensburg,

running

south-west so as to pass south-east of: Sygum, Ringsberg, Munkbrarup, Adelby, Tastrup, Jarplund, Oversee and north-west of: Langballigholz, Langballig, Bonstrup, Rullschau, Weseby, Kleinwolstrup, Gross-Solt,

thence westwards passing south of Frorup and north of Wanderup,

thence in a south-westerly direction, passing south-east of Oxlund, Stieglund and Ostenau and north-west of the villages on the Wanderup-Kollund road.

thence in a north-westerly direction, passing south-west of Lowenstedt, Joldelund, Goldelund and north-east of Kolkerheide and Hogel to the bend of the Soholmer An, about 1 kilometre east of Soholm, where it meets the southern boundary of the Kreis of Tondern,

following this boundary to the North Sea,

passing south of the islands of Fohr and Amrum and north of the islands of Oland and Langeness,

shall be called upon to pronounce by a vote which will be taken under the following conditions:

(1) Within a period not exceeding ten days from the coming into force of the present Treaty, the German troops and authorities (including the Oberprasidenten, Regierungsprasidenten, Landrathe, Amtsvorsteher, Oberburgermeister) shall evacuate the zone lying to the north of the line above fixed.

Within the same period the Workmen's and Soldiers' Councils which have been constituted in this zone shall be dissolved; members of such Councils who are natives of another region and are exercising their functions at the date of the coming into force of the present Treaty or who have gone out of office since March 1, 1919, shall also be evacuated.

The said zone shall immediately be placed under the authority of an International Commission, composed of five members, of whom three will be designated by the Principal Allied and Associated Powers; the Norwegian and Swedish Governments will each be requested to designate a member; in the event of their failing to do so these two members will be chosen by the Principal Allied and Associated Powers.

The Commission, assisted in case of need by the necessary forces, shall have general powers of administration. In particular it shall at once provide for filling the places of the evacuated German authorities, and if necessary shall itself give orders for their evacuation, and proceed to fill the places of such local authorities as may be required. It shall take all steps which it thinks proper to insure the freedom, fairness and secrecy of the vote. It shall be assisted by German and Danish technical advisers chosen by it from among the local population. Its decisions will be taken by a majority.

One-half of the expenses of the Commission and of the expenditure occasioned by the plebiscite shall be paid by Germany.

(2) The right to vote shall be given to all persons, without distinction of sex, who:

(a) Have completed their twentieth year at the date of the coming into force of the present Treaty; and

(b) Were born in the zone in which the plebiscite is taken, or have been domiciled there since a date before January 1, 1900, or had been expelled by the German authorities without having retained their domicile there.

Every person will vote in the commune (Gemeinde) where he is domiciled or of which he is a native.

Military persons, officers, non-commissioned officers and soldiers of the German army, who are natives of the zone of Schleswig in which the plebiscite is taken, shall be given the opportunity to return to their native place in order to take part in the voting there.

(3) In the section of the evacuated zone lying to the north of a line, from East to West (shown by a red line on map No. 4 which is annexed to the present Treaty):

passing south of the island of Alsen and following the median line of Flensburg Fjord,

leaving the fiord about 6 kilometres north of Flensburg and following the course of the stream flowing past Kupfermahle upstream to a point north of Niebuus,

passing north of Pattburg and Ellund and south of Froslee to meet the eastern boundary of the Kreis of Tondern at its junction with the boundary between the old jurisdictions of Slogs and Kjær (Slogs Herred and Kiœ Herred),

following the latter boundary to where it meets the Scheidebek,

following the course of the Scheidebek (Alte Au), Suder Au and Wied Au downstream successively to the point where the latter bends northwards about 1,500 metres west of Ruttebull,

thence, in a west-north-westerly direction to meet the North Sea north of Sieltoft,

thence, passing north of the island of Sylt; the vote above provided for shall be taken within a period not exceeding three weeks after the evacuation of the country by the German troops and authorities.

The result will be determined by the majority of votes cast in the whole of this section. This result will be immediately communicated by the Commission to the Principal Allied and Associated Powers and proclaimed.

If the vote results in favour of the reincorporation of this territory in the Kingdom of Denmark, the Danish Government in agreement with the Commission will be entitled to effect its occupation with their military and administrative authorities immediately after the proclamation.

(4) In the section of the evacuated zone situated to the south of the preceding section and to the north of the line which starts from the Baltic Sea 13 kilometres from Flensburg and ends north of the islands of Oland and Langeness, the vote will be taken within a period not exceeding five weeks after the plebiscite shall have been held in the first section.

The result will be determined by communes (Gemeinden), in accordance with the majority of the votes cast in each commune (Gemeinde).

Article 110.

Pending a delimitation on the spot, a frontier line will be fixed by the Principal Allied and Associated Powers according to a line based on the result of the voting, and proposed by the International Commission, and taking into account the particular geographical and economic conditions of the localities in question.

From that time the Danish Government may effect the occupation of these territories with the Danish civil and military authorities, and the German Government may reinstate up to the said frontier line the German civil and military authorities whom it has evacuated.

Germany hereby renounces definitely in favour of the Principal Allied and Associated Powers all rights of sovereignty over the territories situated to the north of the frontier line fixed in accordance with the above provisions. The Principal Allied and Associated Powers will hand over the said territories to Denmark.

Article 111.

A Commission composed of seven members, five of whom shall be nominated by the Principal Allied and Associated Powers, one by Denmark, and one by Germany, shall be constituted within fifteen days from the date when the final result of the vote is known, to trace the frontier line on the spot.

The decisions of the Commission will be taken by a majority of votes and shall be binding on the parties concerned.

Article 112.

All the inhabitants of the territory which is returned to Denmark will acquire Danish nationality ipso facto, and will lose their German nationality.

Persons, however, who had become habitually resident in this territory after October 1, 1918, will not be able to acquire Danish nationality without permission from the Danish Government.

Article 113.

Within two years from the date on which the sovereignty over the whole or part of the territory of Schleswig subjected to the plebiscite is restored to Denmark:

Any person over 18 years of age, born in the territory restored to Denmark, not habitually resident in this region, and possessing German nationality, will be entitled to opt for Denmark;

Any person over 18 years of age habitually resident in the territory restored to Denmark will be entitled to opt for Germany.

Option by a husband will cover his wife and option by parents will cover their children less than 18 years of age.

Persons who have exercised the above right to opt must within the ensuing twelve months transfer their place of residence to the State in favour of which they have opted.

They will be entitled to retain the immovable property which they own in the territory of the other State in which they were habitually resident before opting. They may carry with them their movable property of every description. No export or import duties may be imposed upon them in connection with the removal of such property.

Article 114.

The proportion and nature of the financial or other obligations of Germany and Prussia which are to be assumed by Denmark will be fixed in accordance with Article 254 of Part IX (Financial Clauses) of the present Treaty.

Further stipulations will determine any other questions arising out of the transfer to Denmark of the whole or part of the territory of which she was deprived by the Treaty of October 30, 1864.

Section XIII.

HELIGOLAND.

Article 115.

The fortifications, military establishments, and harbours of the Islands of Heligoland and Dune shall be destroyed under the supervision of the Principal Allied Governments by German labour and at the expense of Germany within a period to be determined by the said Governments.

The term "harbours" shall include the north-east mole, the west wall, the outer and inner breakwaters and reclaimed land within them, and all naval and military works, fortifications and buildings, constructed or under construction, between lines connecting the following positions taken from the British Admiralty chart No. 126 of April 19, 1918.

(a) lat. 54° 10′ 49″ N.; long. 7° 53′ 39″ E.;
(b) lat. 54° 10′ 35″ N.; long. 7° 54′ 18″ E.;
(c) lat. 54° 10′ 14″ N.; long. 7° 54′ 00″ E.;
(d) lat. 54° 10′ 17″ N.; long. 7° 53′ 37″ E.;
(e) lat. 54° 10′ 44″ N.; long. 7° 53′ 26″ E.

These fortifications, military establishments and harbours shall not be reconstructed nor shall any similar works be constructed in future.

Section XIV.

RUSSIA AND RUSSIAN STATES.

Article 116.

Germany acknowledges and agrees to respect as permanent and inalienable the independence of all the territories which were part of the former Russian Empire on August 1, 1914.

In accordance with the provisions of Article 259 of Part IX (Financial Clauses) and Article 292 of Part X (Economic Clauses) Germany accepts definitely the abrogation of the Brest-Litovsk Treaties and of all other treaties, conventions and agreements entered into by her with the Maximalist Government in Russia.

The Allied and Associated Powers formally reserve the rights of Russia to obtain from Germany restitution and reparation based on the principles of the present Treaty.

Article 117.

Germany undertakes to recognise the full force of all treaties or agreements which may be entered into by the Allied and Associated Powers with States now existing or coming into existence in future in the whole or part of the former Empire of Russia as it existed on August 1, 1914, and to recognise the frontiers of any such States as determined therein.

Part IV.

GERMAN RIGHTS AND INTERESTS OUTSIDE GERMANY.

Article 118.

In territory outside her European frontiers as fixed by the present Treaty, Germany renounces all rights, titles and privileges whatever in or over territory which belonged to her or to her allies, and all rights, titles and privileges whatever their origin which she held as against the Allied and Associated Powers.

Germany hereby undertakes to recognise and to conform to the measures which may be taken now or in the future by the Principal Allied and Associated Powers, in agreement where necessary with third Powers, in order to carry the above stipulation into effect.

In particular Germany declares her acceptance of the following Articles relating to certain special subjects.

Section 1.

GERMAN COLONIES.

Article 119.

Germany renounces in favour of the Principal Allied and Associated Powers all her rights and titles over her oversea possessions.

Article 120.

All movable and immovable property in such territories belonging to the German Empire or to any German State shall pass to the Government exercising authority over such territories, on the terms laid down in Article 257 of part IX (Financial Clauses) of the present Treaty. The decision of the local courts in any dispute as to the nature of such property shall be final.

Article 121.

The provisions of Sections I and IV of Part X (Economic Clauses) of the present Treaty shall apply in the case of these territories whatever be the form of Government adopted for them.

Article 122.

The Government exercising authority over such territories may make such provisions as it thinks fit with reference to the repatriation from them of German nationals and to the conditions upon which German subjects of European origin shall, or shall not, be allowed to reside, hold property, trade or exercise a profession in them.

Article 123.

The provisions of Article 260 of Part IX (Financial Clauses) of the present Treaty shall apply in the case of all agreements concluded with German nationals for the construction or exploitation of public works in the German oversea possessions, as well as any sub-concessions or contracts resulting therefrom which may have been made to or with such nationals.

Article 124.

Germany hereby undertakes to pay, in accordance with the estimate to be presented by the French Government and approved by the Reparation Commission, reparation for damage suffered by French nationals in the Cameroons or the frontier zone by reason of the acts of the German civil and military authorities and of German private individuals during the period from January 1, 1900, to August 1, 1914.

Article 125.

Germany renounces all rights under the Conventions and Agreements with France of November 4, 1911, and September 28, 1912, relating to Equatorial Africa. She undertakes to pay to the French Government, in accordance with the estimate to be presented by that Government and approved by the Reparation Commission, all the deposits, credits, advances, etc., effected by virtue of these instruments in favour of Germany.

Article 126.

Germany undertakes to accept and observe the agreements made or to be made by the Allied and Associated Powers or some of them with any other Power with regard to the trade in arms and spirits, and to the matters dealt with in the General Act of Berlin of February 26, 1885, the General Act of Brussels of July 2, 1890, and the conventions completing or modifying the same.

Article 127.

The native inhabitants of the former German oversea possessions shall be entitled to the diplomatic protection of the Government exercising authority over those territories.

Section II.

CHINA.

Article 128.

Germany renounces in favour of China all benefits and privileges resulting from the provisions of the final Protocol signed at Peking on September 7, 1901, and from all annexes, notes and documents supplementary thereto. She likewise renounces in favour of China any claim to indemnities accruing thereunder subsequent to March 14, 1917.

Article 129.

From the coming into force of the present Treaty the High Contracting Parties shall apply, in so far as concerns them respectively:

(1) The Arrangement of August 29, 1902, regarding the new Chinese customs tariff;

(2) The Arrangement of September 27, 1905, regarding Whang-Poo, and the provisional supplementary Arrangement of April 4, 1912.

China, however, will no longer be bound to grant to Germany the advantages or privileges which she allowed Germany under these Arrangements.

Article 130.

Subject to the provisions of Section VIII of this Part, Germany cedes to China all the buildings, wharves and pontoons, barracks, forts, arms and munitions of war, vessels of all kinds, wireless telegraphy installations and other public property belonging to the German Government, which are situated or may be in the German Concessions at Tientsin and Hankow or elsewhere in Chinese territory.

It is understood, however, that premises used as diplomatic or consular residences or offices are not included in the above cession, and, furthermore, that no steps shall be taken by the Chinese Government to dispose of the German public and private property situated within the so-called Legation Quarter at Peking without the consent of the Diplomatic Representatives of the Powers which, on the coming into force of the present Treaty, remain Parties to the Final Protocol of September 7, 1901.

Article 131.

Germany undertakes to restore to China within twelve months from the coming into force of the present Treaty all the astronomical instruments which her troops in 1900-1901 carried away from China, and to defray all expenses which may be incurred in effecting such restoration, including the expenses of dismounting, packing, transporting, insurance and installation in Peking.

Article 132.

Germany agrees to the abrogation of the leases from the Chinese Government under which the German Concessions at Hankow and Tientsin are now held.

China, restored to the full exercise of her sovereign rights in the above areas, declares her intention of opening them to international residence and trade. She further declares that the abrogation of the leases under which these concessions are now held shall not affect the property rights of nationals of Allied and Associated Powers who are holders of lots in these concessions.

Article 133.

Germany waives all claims against the Chinese Government or against any Allied or Associated Government arising out of the internment of German nationals in China and their repatriation. She equally renounces all claims arising out of the capture and condemnation of German ships in China, or the liquidation, sequestration or control of German properties, rights and interests in that country since August 14, 1917. This provision, however, shall not affect the rights of the parties interested in the proceeds of any such liquidation, which shall be governed by the provisions of Part X (Economic Clauses) of the present Treaty.

Article 134.

Germany renounces in favour of the Government of His Britannic Majesty the German State property in the British Concession at Shameen at Canton. She renounces in favour of the French and Chinese Governments conjointly the property of the German school situated in the French Concession at Shanghai.

Section III.

SIAM.

Article 135.

Germany recognises that all treaties, conventions and agreements between her and Siam, and all rights, title and privileges derived therefrom, including all rights of extraterritorial jurisdiction, terminated as from July 22, 1917.

Article 136.

All goods and property in Siam belonging to the German Empire or to any German State, with the exception of premises used as diplomatic or consular residences or offices, pass ipso facto and without compensation to the Siamese Government.

The goods, property and private rights of German nationals in Siam shall be dealt with in accordance with the provisions of Part X (Economic Clauses) of the present Treaty.

Article 137.

Germany waives all claims against the Siamese Government on behalf of herself or her nationals arising out of the seizure or condemnation of German ships, the liquidation of German property, or the internment of German nationals in Siam. This provision shall not affect the rights of the parties interested in the proceeds of any such liquidation, which shall be governed by the provisions of Part X (Economic Clauses) of the present Treaty.

Section IV.

LIBERIA.

Article 138.

Germany renounces all rights and privileges arising from the arrangements of 1911 and 1912 regarding Liberia, and particularly the right to nominate a German Receiver of Customs in Liberia.

She further renounces all claim to participate in any measures whatsoever which may be adopted for the rehabilitation of Liberia.

Article 139.

Germany recognizes that all treaties and arrangements between her and Liberia terminated as from August 4, 1917.

Article 140.

The property, rights and interests of Germans in Liberia shall be dealt with in accordance with Part X (Economic Clauses) of the present Treaty.

Section V.

MOROCCO.

Article 141.

Germany renounces all rights, titles and privileges conferred on her by the General Act of Algeciras of April 7, 1906, and by the Franco-German Agreements of February 9, 1909, and November 4, 1911. All treaties, agreements, arrangements and contracts concluded by her with the Sherifian Empire are regarded as abrogated as from August 3, 1914.

In no case can Germany take advantage of these instruments and she undertakes not to intervene in any way in negotiations relating to Morocco which may take place between France and the other Powers.

Article 142.

Germany having recognized the French Protectorate in Morocco, hereby accepts all the consequences of its establishment, and she renounces the regime of the capitulations therein.

This renunciation shall take effect as from August 3, 1914.

Article 143.

The Sherifian Government shall have complete liberty of action in regulating the status of German nationals in Morocco and the conditions in which they may establish themselves there.

German protected persons, semsars and "associes agricoles" shall be considered as having ceased, as from August 3, 1914, to enjoy the privileges attached to their status and shall be subject to the ordinary law.

Article 144.

All property and possessions in the Sherifian Empire of the German Empire and the German States pass to the Maghzen without payment.

For this purpose, the property and possessions of the German Empire and States shall be deemed to include all the property of the Crown, the Empire or the States, and the private property of the former German Emperor and other Royal personages.

All movable and immovable property in the Sherifian Empire belonging to German nationals shall be dealt with in accordance with Sections III and IV of Part X (Economic Clauses) of the present Treaty.

Mining rights which may be recognised as belonging to German nationals by the Court of Arbitration set up under the Moroccan Mining Regulations shall form the subject of a valuation, which the arbitrators shall be requested to make, and these rights shall then be treated in the same way as property in Morocco belonging to German nationals.

Article 145.

The German Government shall ensure the transfer to a person nominated by the French Government of the shares representing Germany's portion of the capital of the State Bank of Morocco. The value of these shares, as assessed by the Reparation Commission, shall be paid to the Reparation Commission for the credit of Germany on account of the sums due for reparation. The German Government shall be responsible for indemnifying its nationals so dispossessed.

This transfer will take place without prejudice to the repayment of debts which German nationals may have contracted towards the State Bank of Morocco.

Article 146.

Moroccan goods entering Germany shall enjoy the treatment accorded to French goods.

Section VI.

EGYPT.

Article 147.

Germany declares that she recognises the Protectorate proclaimed over Egypt by Great Britain on December 18, 1914, and that she renounces the regime of the Capitulations in Egypt.

This renunciation shall take effect as from August 4, 1914.

Article 148.

All treaties, agreements, arrangements and contracts concluded by Germany with Egypt are regarded as abrogated as from August 4, 1914.

In no case can Germany avail herself of these instruments and she undertakes not to intervene in any way in negotiations relating to Egypt which may take place between Great Britain and the other Powers.

Article 149.

Until an Egyptian law of judicial organization establishing courts with universal jurisdiction comes into force, provision shall be made, by means of decrees issued by His Highness the Sultan, for the exercise of jurisdiction over German nationals and property by the British Consular Tribunals.

Article 150.

The Egyptian Government shall have complete liberty of action in regulating the status of German nationals and the conditions under which they may establish themselves in Egypt.

Article 151.

Germany consents to the abrogation of the decree issued by His Highness the Khedive on November 28, 1904, relating to the Commission of the Egyptian Public Debt, or to such changes as the Egyptian Government may think it desirable to make therein.

Article 152.

Germany consents, in so far as she is concerned, to the transfer to His Britannic Majesty's Government of the powers conferred on His Imperial Majesty the Sultan by the Convention signed at Constantinople on October 29, 1888, relating to the free navigation of the Suez Canal.

She renounces all participation in the Sanitary, Maritime, and Quarantine Board of Egypt, and consents, in so far as she is concerned, to the transfer to the Egyptian Authorities of the powers of that Board.

Article 153.

All property and possessions in Egypt of the German Empire and the German States pass to the Egyptian Government without payment.

For this purpose, the property and possessions of the German Empire and States shall be deemed to include all the property of the Crown, the Empire or the States, and the private property of the former German Emperor and other Royal personages.

All movable and immovable property in Egypt belonging to German nationals shall be dealt with in accordance with Sections III and IV of Part X (Economic Clauses) of the present Treaty.

Article 154.

Egyptian goods entering Germany shall enjoy the treatment accorded to British goods.

Section VII.

TURKEY AND BULGARIA.

Article 155.

Germany undertakes to recognise and accept all arrangements which the Allied and Associated Powers may make with Turkey and Bulgaria with reference to any rights, interests and privileges whatever which might be claimed by Germany or her nationals in

Turkey and Bulgaria and which are not dealt with in the provisions of the present Treaty.

Section VIII.

SHANTUNG.

Article 156.

Germany renounces, in favour of Japan, all her rights, title and privileges—particularly those concerning the territory of Kiaochow, railways, mines and submarine cables—which she acquired in virtue of the Treaty concluded by her with China on March 6, 1898, and of all other arrangements relative to the Province of Shantung.

All German rights in the Tsingtao-Tsinanfu Railway, including its branch lines, together with its subsidiary property of all kinds, stations, shops, fixed and rolling stock, mines, plant and material for the exploitation of the mines, are and remain acquired by Japan, together with all rights and privileges attaching thereto.

The German State submarine cables from Tsingtao to Shanghai and from Tsingtao to Chefoo, with all the rights, privileges and properties attaching thereto, are similarly acquired by Japan, free and clear of all charges and incumbrances.

Article 157.

The movable and immovable property owned by the German State in the territory of Kiaochow, as well as all the rights which Germany might claim in consequence of the works or improvements made or of the expenses incurred by her, directly or indirectly, in connection with this territory, are and remain acquired by Japan, free and clear of all charges and incumbrances.

Article 158.

Germany shall hand over to Japan within three months from the coming into force of the present Treaty the archives, registers, plans, title-deeds and documents of every kind, wherever they may be, relating to the administration, whether civil, military, financial, judicial or other, of the territory of Kiaochow.

Within the same period Germany shall give particulars to Japan of all treaties, arrangements or agreements relating to the rights, title or privileges referred to in the two preceding articles.

PART V.

MILITARY, NAVAL AND AIR CLAUSES.

In order to render possible the initiation of a general limitation of the armaments of all nations Germany undertakes strictly to observe the military, naval and air clauses which follow.

Section I.

MILITARY CLAUSES.

Chapter I.

Effectives and Cadres of the German Army.

Article 159.

The German military forces shall be demobilized and reduced as prescribed hereinafter.

Article 160.

(1) By a date which must not be later than March 31, 1920, the German Army must not comprise more than seven divisions of infantry and three divisions of cavalry.

After that date the total number of effectives in the Army of the States constituting Germany must not exceed one hundred thousand men, including officers and establishments of depots. The Army shall be devoted exclusively to the maintenance of order within the territory and to the control of the frontiers.

The total effective strength of officers, including the personnel of staffs, whatever their composition, must not exceed four thousand.

(2) Divisions and Army Corps headquarters staffs shall be organised in accordance with Table No. I annexed at this Section.

The number and strength of the units of infantry, artillery, engineers, technical services and troops laid down in the aforesaid Table constitute maxima which must not be exceeded.

The following units may each have their own depot:

An Infantry regiment;
A Cavalry regiment;
A regiment of Field Artillery;
A battalion of Pioneers.

(3) The divisions must not be grouped under more than two army corps headquarters staffs.

The maintenance or formation of forces differently grouped or of other organisations for the command of troops or for preparation for war is forbidden.

The Great German General Staff and all similar organisations shall be dissolved and may not be reconstituted in any form.

The officers, or persons in the position of officers, in the Ministries of War in the different States in Germany and in the Administrations attached to them, must not exceed three hundred in number and are included in the maximum strength of four thousand laid down in the third sub-paragraph of paragraph (1) of this Article.

Article 161.

Army administrative service consisting of civilian personnel not included in the number of effectives prescribed by the present Treaty will have such personnel reduced in each class to one-tenth of that laid down in the Budget of 1913.

Article 162.

The number of employees or officials of the German States, such as customs officers, forest guards and coastguards, shall not exceed that of the employees or officials functioning in these capacities in 1913.

The number of gendarmes and employees or officials of the local or municipal police may only be increased to an extent corresponding to the increase of population since 1913 in the districts or municipalities in which they are employed.

These employees and officials may not be assembled for military training.

Article 163.

The reduction of the strength of the German military forces as provided for in Article 160 may be effected gradually in the following manner:

Within three months from the coming into force of the present Treaty the total number of effectives must be reduced to 200,000 and the number of units must not exceed twice the number of those laid down in Article 160.

At the expiration of this period, and at the end of each subsequent period of three months, a Conference of military experts of the Principal Allied and Associated Powers will fix the reductions to be made in the ensuing three months, so that by March 31, 1920, at the latest the total number of German effectives does not exceed the maximum number of 100,000 men laid down in Article 160. In these successive reductions the same ratio between the number of officers and of men, and between the various kinds of units, shall be maintained as is laid down in that Article.

Chapter II.

Armament, Munitions and Material.

Article 164.

Up till the time at which Germany is admitted as a member of the League of Nations the German Army must not possess an armament greater than the amounts fixed in Table No. II annexed to this Section, with the exception of an optional increase not exceeding one-twenty-fifth part for small arms and one-fiftieth part for guns, which shall be exclu-

sively used to provide for such eventual replacements as may be necesary.

Germany agrees that after she has become a member of the League of Nations the armaments fixed in the said Table shall remain in force until they are modified by the Council of the League. Furthermore she hereby agrees strictly to observe the decisions of the Council of the League on this subject.

Article 165.

The maximum number of guns, machine guns, trench-mortars, rifles and the amount of ammunition and equipment which Germany is allowed to maintain during the period between the coming into force of the present Treaty and the date of March 31, 1920, referred to in Article 160, shall bear the same proportion to the amount authorized in Table No. III annexed to this Section as the strength of the German Army as reduced from time to time in accordance with Article 163 bears to the strength permitted under Article 160.

Article 166.

At the date of March 31, 1920, the stock of munitions which the German Army may have at its disposal shall not exceed the amounts fixed in Table No. III annexed to this Section.

Within the same period the German Government will store these stocks at points to be notified to the Governments of the Principal Allied and Associated Powers. The German Government is forbidden to establish any other stocks, deposits or reserves of munitions.

Article 167.

The number and calibre of the guns constituting at the date of the coming into force of the present Treaty the armament of the fortified works, fortresses, and any land or coast forts which Germany is allowed to retain must be notified immediately by the German Government to the Governments of the Principal Allied and Associated Powers, and will constitute maximum amounts which may not be exceeded

Within two months from the coming into force of the present Treaty, the maximum stock of ammunition for these guns will be reduced to, and maintained at, the following uniform rates:—fifteen hundred rounds per piece for those the calibre of which is 10.5 cm. and under; five hundred rounds per piece for those of higher calibre.

Article 168.

The manufacture of arms, munitions, or any war material, shall only be carried out in factories or works the location of which shall be communicated to and approved by the Governments of the Principal Allied and Associated Powers, and the number of which they retain the right to restrict.

Within three months from the coming into force of the present Treaty, all other establishments for the manufacture, preparation, storage or design of arms, munitions, or any war material whatever shall be closed down. The same applies to all arsenals except those used as depots for the authorised stocks of munitions. Within the same period the personnel of these arsenals will be dismissed.

Article 169.

Within two months from the coming into force of the present Treaty German arms, munitions and war material, including anti-aircraft material, existing in Germany in excess of the quantities allowed must be surrendered to the Governments of the Principal Allied and Associated Powers to be destroyed or rendered useless. This will also apply to any special plant intended for the manufacture of military material except such as may be recognised as necessary for equipping the authorised strength of the German army.

The surrender in question will be effected at such points in German territory as may be selected by the said Governments.

Within the same period arms, munitions and war material, including antiaircraft material, of origin other than German, in whatever state they may be, will be delivered to the said Governments, who will decide as to their disposal.

Arms and munitions which on account of the successive reductions in the strength of the German army become in excess of the amounts authorised by Tables II and III annexed to this Section must be handed over in the manner laid down above within such periods as may be decided by the Conferences referred to in Article 163.

Article 170.

Importation into Germany of arms, munitions and war material of every kind shall be strictly prohibited.

The same applies to the manufacture for, and export to, foreign countries of arms, munitions and war material of every kind.

Article 171.

The use of asphyxiating, poisonous or other gases and all analogous liquids, materials or devices being prohibited, their manufacture and importation are strictly forbidden in Germany.

The same applies to materials specially intended for the manufacture, storage and use of the said products or devices.

The manufacture and the importation into Germany of armoured cars, tanks and all similar constructions suitable for use in war are also prohibited.

Article 172.

Within a period of three months from the coming into force of the present Treaty, the German Government will disclose to the Governments of the Principal Allied and Associated Powers the nature and mode of manufacture of all explosives, toxic substances or other like chemical preparations used by them in the war or prepared by them for the purpose of being so used.

Chapter III.

Recruiting and Military Training.

Article 173.

Universal compulsory military service shall be abolished in Germany.

The German Army may only be constituted and recruited by means of voluntary enlistment.

Article 174.

The period of enlistment for non-commissioned officers and privates must be twelve consecutive years.

The number of men discharged for any reason before the expiration of their term of enlistment must not exceed in any year 5 per cent. of the total effectives fixed by the second sub-paragraph of paragraph (1) of Article 160 of the present Treaty.

Article 175.

The officers who are retained in the Army must undertake the obligation to serve in it up to the age of forty-five years at least.

Officers newly appointed must undertake to serve on the active list for twenty-five consecutive years at least.

Officers who have previously belonged to any formations whatever of the Army, and who are not retained in the units allowed to be maintained, must not take part in any military exercise whether theoretical or practical and will not be under any military obligations whatever.

The number of officers discharged for any reason before the expiration of their term of service must not exceed in any year five per cent. of the total effectives of officers provided for in the third sub-paragraph (1) of Article 160 of the present Treaty.

Article 176

On the expiration of two months from the coming into force of the present Treaty there

must only exist in Germany the number of military schools which is absolutely indispensable for the recruitment of the officers of the units allowed. These schools will be exclusively intended for the recruitment of officers of each arm, in the proportion of one school per arm.

The number of students admitted to attend the courses of the said schools will be strictly in proportion to the vacancies to be filled in the cadres of officers. The students and the cadres will be reckoned in the effectives fixed by the second and third sub-paragraphs of paragraph (1) of Article 160 of the present Treaty.

Consequently, and during the period fixed above, all military academies or similar institutions in Germany, as well as the different military schools for officers, student officers (Aspiranten), cadets, non-commissioned officers or student non-commissioned officers (Aspiranten), other than the schools above provided for, will be abolished.

Article 177.

Educational establishments, the universities, societies of discharged soldiers, shooting or touring clubs and, generally speaking, associations of every description, whatever be the age of their members, must not occupy themselves with any military matters.

In particular they will be forbidden to instruct or exercise their members, or to allow them to be instructed or exercised, in the profession or use of arms.

These societies, associations, educational establishments and universities must have no connection with the Ministries of War or any other military authority.

Article 178.

All measures of mobilisation or appertaining to mobilisation are forbidden.

In no case must formations, administrative services or General Staffs include supplementary cadres.

Article 179.

Germany agrees, from the coming into force of the present Treaty, not to accredit nor to send to any foreign country any military, naval or air mission, nor to allow any such mission to leave her territory, and Germany further agrees to take appropriate measures to prevent German nationals from leaving her territory to become enrolled in the Army, Navy or Air Service of any foreign Power, or to be attached to such Army, Navy or Air service for the purpose of assisting in the military, naval or air training thereof, or otherwise for the purpose of giving military, naval or air instruction in any foreign country.

The Allied and Associated Powers agree, so far as they are concerned, from the coming into force of the present Treaty, not to enrol in nor to attach to their armies or naval or air forces any German national for the purpose of assisting in the military training of such armies or naval or air forces, or otherwise to employ any such German national as military, naval or aeronautic instructor.

The present provision does not, however, affect the right of France to recruit for the Foreign Legion in accordance with French military laws and regulations.

Chapter IV.

Fortifications.

Article 180.

All fortified works, fortresses and field works situated in German territory to the west of a line drawn fifty kilometres to the east of the Rhine shall be disarmed and dismantled.

Within a period of two months from the coming into force of the present Treaty such of the above fortified works, fortresses and field works as are situated in territory not occupied by Allied and Associated troops shall be disarmed, and within a further period of four months they shall be dismantled. Those which are situated in territory occupied by Allied and Associated troops shall be disarmed and dismantled within such periods as may be fixed by the Allied High Command.

The construction of any new fortification, whatever its nature and importance, is forbidden in the zone referred to in the first paragraph above.

The system of fortified works of the southern and eastern frontiers of Germany shall be maintained in its existing state.

Table No. I.

State and Establishment of Army Corps Headquarters Staffs and of Infantry and Cavalry Division.

These tabular statements do not form a fixed establishment to be imposed on Germany, but the figures contained in them (number of units and strengths) represent maximum figures, which should not in any case be exceeded.

Section II.

NAVAL CLAUSES.

Article 181.

After the expiration of a period of two months from the coming into force of the present Treaty the German naval forces in commission must not exceed:

6 battleships of the Deutschland or Lothringen type.
6 light cruisers.
12 destroyers.
12 torpedo boats.

or an equal number of ships constructed to replace them as provided in Article 190.

No submarines are to be included.

All other warships, except where there is provision to the contrary in the present Treaty, must be placed in reserve or devoted to commercial purposes.

Article 182.

Until the completion of the minesweeping prescribed by Article 193 Germany will keep in commission such number of minesweeping vessels as may be fixed by the Governments of the Principal Allied and Associated Powers.

Article 183.

After the expiration of a period of two months from the coming into force of the present Treaty the total personnel of the German Navy

Article 184.

From the date of the coming into force of the present Treaty all the German surface warships which are not in German ports cease to belong to Germany, who renounces all rights over them.

Vessels which, in compliance with the Armistice of November 11, 1918, are now interned in the ports of the Allied and Associated Powers are declared to be finally surrendered.

Vessels which are now interned in neutral ports will be there surrendered to the Governments of the Principal Allied and Associated Powers. The German Government must address a notification to that effect to the neutral Powers on the coming into force of the present Treaty.

Article 185.

Within a period of two months from the coming into force of the present Treaty the German surface warships enumerated below will be surrendered to the Governments of the Principal Allied and Associated Powers in such Allied ports as the said Powers may direct.

These warships will have been disarmed as provided in Article XXIII of the Armistice of November 11, 1918. Nevertheless, they must have all their guns on board.

Lubeck.	Stuttgart.

and, in addition, forty-two modern destroyers and fifty modern torpedo boats, as chosen by the Governments of the Principal Allied and Associated Powers.

Article 186.

On the coming into force of the present Treaty the German Government must undertake, under the supervision of the Governments of the Principal Allied and Associated Powers, the breaking-up of all the German surface warships now under construction.

Article 187.

The German auxiliary cruisers and fleet

auxiliaries enumerated below will be disarmed and treated as merchant ships:

Interned in Neutral Countries.

Article 188.

On the expiration of one month from the coming into force of the present Treaty all German submarines, submarine salvage vessels and docks for submarines, including the tubular dock, must have been handed over to the Governments of the Principal Allied and Associated Powers.

Such of these submarines, vessels and docks as are considered by the said Governments to be fit to proceed under their own power or to be towed shall be taken by the German Government into such Allied ports as have been indicated.

The remainder, and also those in course of construction, shall be broken up entirely by the German Government under the supervision of the said Governments. The breaking-up must be completed within three months at the most after the coming into force of the present Treaty.

Article 189.

Articles, machinery and material arising from the breaking-up of German warships of all kinds, whether surface vessels or submarines, may not be used except for purely industrial or commercial purposes. They may not be sold or disposed of to foreign countries.

Article 190.

Germany is forbidden to construct or acquire any warships other than those intended to replace the units in commission provided for in Article 181 of the present Treaty.

The warships intended for replacement purposes as above shall not exceed the following displacement:

Armoured ships.....	10,000 tons
Light cruisers.....	6,000 tons
Destroyers	800 tons
Torpedo boats.....	200 tons

Except where a ship has been lost, units of the different classes shall only be replaced at the end of a period of twenty years in the case of battleships and cruisers, and fifteen years in the case of destroyers and torpedo boats, counting from the launching of the ship.

Article 191.

The construction or acquisition of any submarine, even for commercial purposes, shall be forbidden in Germany.

Article 192.

The warships in commission of the German fleet must have on board or in reserve only the allowance of arms, munitions and war material fixed by the Principal Allied and Associated Powers.

Within a month from the fixing of the quantities as above, arms, munitions and war material of all kinds, including mines and torpedoes, now in the hands of the German Government and in excess of the said quantities shall be surrendered to the Governments of the said Powers at places to be indicated by them. Such arms, munitions and war material will be destroyed or rendered useless.

All other stocks, depots or reserves of arms, munitions or naval war material of all kinds are forbidden.

The manufacture of these articles in German territory for, and their export to, foreign countries shall be forbidden.

Article 193.

On the coming into force of the present Treaty Germany will forthwith sweep up the mines in the following areas in the North Sea to the eastward of longitude 4 degrees 0 minutes E. of Greenwich:

(1) Between parallels of latitude 53 degrees 0 minutes N. and 59 degrees 0 minutes N.; (2) To the northward of latitude 60 degrees 30 minutes N.

Germany must keep these areas free from mines.

Germany must also sweep and keep free from mines such areas in the Baltic as may ultimately be notified by the Governments of the Principal Allied and Associated Powers.

Article 194.

The personnel of the German Navy shall be recruited entirely by voluntary engagements entered into for a minimum period of twenty-five consecutive years for officers and warrant officers; twelve consecutive years for petty officers and men.

The number engaged to replace those discharged for any reason before the expiration of their term of service must not exceed five per cent. per annum of the totals laid down in this Section (Article 183).

The personnel discharged from the Navy must not receive any kind of naval or military training or undertake any further service in the Navy or Army.

Officers belonging to the German Navy and not demobilised must engage to serve till the age of forty-five, unless discharged for sufficient reasons.

No officer or man of the German mercantile marine shall receive any training in the Navy.

Article 195.

In order to ensure free passage into the Baltic to all nations, Germany shall not erect any fortifications in the area comprised between latitudes 55 degrees 27 minutes North and 54 degrees 0 minutes N. and longitudes 9 degrees 0 minutes E. and 16 degrees 0 minutes E. of the meridian of Greenwich, nor instal any guns commanding the maritime routes between the North Sea and the Baltic. The fortifications now existing in this area shall be demolished and the guns removed under the supervisions of the Allied Governments and in periods to be fixed by them.

The German Government shall place at the disposal of the Governments of the Principal Allied and Associated Powers all hydrographical information now in its possession concerning the channels and adjoining waters between the Baltic and the North Sea.

Article 196.

All fortified works and fortifications, other than those mentioned in Section XIII (Heligoland) of Part III (Political Clauses for Europe) and in Article 195, now established within fifty kilometres of the German coast or on German islands off that coast shall be considered as of a defensive nature and may remain in their existing condition.

No new fortifications shall be constructed within these limits. The armament of these defences shall not exceed, as regards the number and calibre of guns, those in position at the date of the coming into force of the present Treaty. The German Government shall communicate forthwith particulars thereof to all the European Governments.

On the expiration of a period of two months from the coming into force of the present Treaty the stocks of ammunition for these guns shall be reduced to and maintained at a maximum figure of fifteen hundred rounds per

piece for calibres of 4.1-inch and under, and five hundred rounds per piece for higher calibres.

Article 197.

During the three months following the coming into force of the present Treaty the German high-power wireless telegraphy stations at Nauen, Hanover and Berlin shall not be used for the transmission of messages concerning naval, military or political questions of interest to Germany or any State which has been allied to Germany in the war, without the assent of the Governments of the Principal Allied and Associated Powers. These stations may be used for commercial purposes, but only under the supervision of the said Governments, who will decide the wave-length to be used.

During the same period Germany shall not build any more high-power wireless telegraphy stations in her own territory or that of Austria, Hungary, Bulgaria or Turkey.

Section III.

AIR CLAUSES.

Article 198.

The armed forces of Germany must not include any military or naval air forces.

Germany may, during a period not extending beyond October 1, 1919, maintain a maximum number of one hundred seaplanes or flying boats, which shall be exclusively employed in searching for submarine mines, shall be furnished with the necessary equipment for this purpose, and shall in no case carry arms, munitions or bombs of any nature whatever.

In addition to the engines installed in the seaplanes or flying boats above mentioned, one spare engine may be provided for each engine of each of these craft.

No dirigible shall be kept.

Article 199.

Within two months from the coming into force of the present Treaty the personnel of air forces on the rolls of the German land and sea forces shall be demobilised. Up to October 1, 1919, however, Germany may keep and maintain a total number of one thousand men, including officers, for the whole of the cadres and personnel, flying and non-flying, of all formations and establishments.

Article 200.

Until the complete evacuation of German territory by the Allied and Associated troops, the aircraft of the Allied and Associated Powers shall enjoy in Germany freedom of passage through the air, freedom of transit and of landing.

Article 201.

During the six months following the coming into force of the present Treaty, the manufacture and importation of aircraft, parts of aircraft engines for aircraft, and parts of engines for aircraft, shall be forbidden in all German territory.

Article 202.

On the coming into force of the present Treaty, all military and naval aeronautical material, except the machines mentioned in the second and third paragraphs of Article 198, must be delivered to the Governments of the Principal Allied and Associated Powers.

Delivery must be effected at such places as the said Governments may select, and must be completed within three months.

In particular, this material will include all items under the following heads which are or have been in use or were designed for warlike purposes:

Complete aeroplanes and seaplanes, as well as those being manufactured, repaired or assembled.

Dirigibles able to take the air, being manufactured, repaired or assembled.

Plant for the manufacture of hydrogen.

Dirigible sheds and shelters of every kind for aircraft.

Pending their delivery, dirigibles will, at the expense of Germany, be maintained inflated with hydrogen; the plant for the manufacture of hydrogen, as well as the sheds for dirigibles, may, at the discretion of the said Powers, be left to Germany until the time when the dirigibles are handed over.

Engines for aircraft.

Nacelles and fuselages.

Armament (guns, machine guns, light machine guns, bomb-dropping apparatus, torpedo-dropping apparatus, synchronization apparatus, aiming apparatus).

Munitions (cartridges, shells, bombs loaded or unloaded, stocks of explosives or of material for their manufacture).

Instruments for use on aircraft.

Wireless apparatus and photographic or cinematograph apparatus for use on aircraft.

Component parts of any of the items under the preceding heads.

The material referred to above shall not be removed without special permission from the said Governments.

Section IV.

INTER-ALLIED COMMISSIONS OF CONTROL.

Article 203.

All the military, naval and air clauses contained in the present Treaty, for the execution of which a time-limit is prescribed, shall be executed by Germany under the control of Inter-Allied Commissions specially appointed for this purpose by the Principal Allied and Associated Powers.

Article 204.

The Inter-Allied Commissions of Control will be specially charged with the duty of seeing to the complete execution of the delivery, destruction, demolition and rendering things useless to be carried out at the expense of the German Government in accordance with the present Treaty.

They will communicate to the German authorities the decisions which the Principal Allied and Associated Powers have reserved the right to take, or which the execution of the military, naval and air clauses may necessitate.

Article 205.

The Inter-Allied Commissions of Control may establish their organisations at the seat of the central German Government.

They shall be entitled as often as they think desirable to proceed to any point whatever in German territory, or to send subcommissions, or to authorise one or more of their members to go, to any such point.

Article 206.

The German Government must give all necessary facilities for the accomplishment of their missions to the Inter-Allied Commissions of Control and to their members.

It shall attach a qualified representative to each Inter-Allied Commission of Control for the purpose of receiving the communications which the Commission may have to address to the German Government and of supplying or procuring for the Commission all information or documents which may be required.

The German Government must in all cases furnish at its own cost all labour and material required to effect the deliveries and the works of destruction, dismantling, demolition, and of rendering things useless, provided for in the present Treaty.

Article 207.

The upkeep and cost of the Commissions of Control and the expenses involved by their work shall be borne by Germany.

Article 208.

The Military Inter-Allied Commission of Control will represent the Governments of

the Principal Allied and Associated Powers in dealing with the German Government in all matters concerning the execution of the military clauses.

In particular it will be its duty to receive from the German Government the notifications relating to the location of the stocks and depots of munitions, the armament of the fortified works, fortresses and forts which Germany is allowed to retain, and the location of the works or factories for the production of arms, munitions and war material and their operations.

It will take delivery of the arms, munitions and war material, will select the points where such delivery is to be effected, and will supervise the works of destruction, demolition, and of rendering things useless, which are to be carried out in accordance with the present Treaty.

The German Government must furnish to the Military Inter-Allied Commission of Control all such information and documents as the latter may deem necessary to ensure the complete execution of the military clauses, and in particular all legislative and administrative documents and regulations.

Article 209.

The Naval Inter-Allied Commission of Control will represent the Governments of the Principal Allied and Associated Powers in dealing with the German Government in all matters concerning the execution of the naval clauses.

In particular it will be its duty to proceed to the building yards and to supervise the breaking-up of the ships which are under construction there, to take delivery of all surface ships or submarines, salvage ships, docks and the tubular docks, and to supervise the destruction and breaking-up provided for.

The German Government must furnish to the Naval Inter-Allied Commission of Control all such information and documents as the Commission may deem necessary to ensure the complete execution of the naval clauses, in particular the designs of the warships, the composition of their armaments, the details and models of the guns, munitions, torpedoes, mines, explosives, wireless telegraphic apparatus and, in general, everything relating to naval war material, as well as all legislative or administrative documents or regulations.

Article 210.

The Aeronautical Inter-Allied Commission of Control will represent the Governments of the Principal Allied and Associated Powers in dealing with the German Government in all matters concerning the execution of the air clauses.

In particular it will be its duty to make an inventory of the aeronautical material existing in German territory, to inspect aeroplane, balloon and motor manufactories, and factories producing arms, munitions and explosives capable of being used by aircraft, to visit all aerodromes, sheds, landing grounds, parks and depots, to authorise, where necessary, a removal of material and to take delivery of such material.

The German Government must furnish to the Aeronautical Inter-Allied Commission of Control all such information and legislative, administrative or other documents which the Commission may consider necessary to ensure the complete execution of the air clauses, and in particular a list of the personnel belonging to all the German Air Services, and of the existing material, as well as of that in process of manufacture or on order, and a list of all establishments working for aviation, of their positions, and of all sheds and landing grounds.

Section V.

GENERAL ARTICLES.

Article 211.

After the expiration of a period of three months from the coming into force of the present Treaty the German laws must have been modified and shall be maintained by the German Government in conformity with this Part of the present Treaty.

Within the same period all the administrative or other measures relating to the execution of this Part of the Treaty must have been taken.

Article 212.

The following portions of the Armistice of November 11, 1918: Article VI, the first two and the sixth and seventh paragraphs of Article VII; Article IX; Clauses I, II and V of Annex No. 2, and the Protocol, dated April 4, 1919, supplementing the Armistice of November 11, 1918, remain in force so far as they are not inconsistent with the above stipulations.

Article 213.

So long as the present Treaty remains in force Germany undertakes to give every facility for any investigation which the Council of the League of Nations, acting if need be by a majority vote, may consider necessary.

PART VI.

PRISONERS OF WAR AND GRAVES.

Section I.

PRISONERS OF WAR.

Article 214.

The repatriation of prisoners of war and interned civilians shall take place as soon as possible after the coming into force of the present Treaty and shall be carried out with the greatest rapidity.

Article 215.

The repatriation of German prisoners of war and interned civilians shall, in accordance with Article 214, be carried out by a Commission composed of representatives of the Allied and Associated Powers on the one part and of the German Government on the other part.

For each of the Allied and Associated Powers a Sub-Commission, composed exclusively of Representatives of the interested Power and of Delegates of the German Government, shall regulate the details of carrying into effect the repatriation of the prisoners of war.

Article 216.

From the time of their delivery into the hands of the German authorities the prisoners of war and interned civilians are to be returned without delay to their homes by the said authorities.

Those amongst them who before the war were habitually resident in territory occupied by the troops of the Allied and Associated Powers are likewise to be sent to their homes, subject to the consent and control of the military authorities of the Allied and Associated armies of occupation.

Article 217.

The whole cost of repatriation from the moment of starting shall be borne by the German Government, who shall also provide the land and sea transport and staff considered necessary by the Commission referred to in Article 215.

Article 218.

Prisoners of war and interned civilians awaiting disposal or undergoing sentence for offenses against discipline shall be repatriated irrespective of the completion of their sentence or of the proceedings pending against them.

This stipulation shall not apply to prisoners of war and interned civilians punished for offenses committed subsequent to May 1, 1919.

During the period pending their repatriation all prisoners of war and interned civilians shall remain subject to the existing regulations, more especially as regards work and discipline.

Article 219.

Prisoners of war and interned civilians who

are awaiting disposal or undergoing sentence for offences other than those against discipline may be detained.

Article 220.

The German Government undertakes to admit to its territory without distinction all persons liable to repatriation.

Prisoners of war or other German nationals who do not desire to be repatriated may be excluded from repatriation; but the Allied and Associated Governments reserve to themselves the right either to repatriate them or to take them to a neutral country or to allow them to reside in their own territories.

The German Government undertakes not to institute any exceptional proceedings against these persons or their families nor to take any repressive or vexatious measures of any kind whatsoever against them on this account.

Article 221.

The Allied and Associated Governments reserve the right to make the repatriation of German prisoners of war or German nationals in their hands conditional upon the immediate notification and release by the German Government of any prisoners of war who are nationals of the Allied and Associated Powers and may still be in Germany.

Article 222.

Germany undertakes:

(1) To give every facility to Commissions to enquire into the cases of those who cannot be traced; to furnish such commissions with all necessary means of transport; to allow them access to camps, prisons, hospitals and all other places; and to place at their disposal all documents, whether public or private, which would facilitate their enquiries;

(2) To impose penalties upon any German officials or private persons who have concealed the presence of any nationals of any of the Allied and Associated Powers or have neglected to reveal the presence of any such after it had come to their knowledge.

Article 223.

Germany undertakes to restore without delay from the date of the coming into force of the present Treaty all articles, money, securities and documents which have belonged to nationals of the Allied and Associated Powers and which have been retained by the German authorities.

Article 224.

The High Contracting Parties waive reciprocally all repayment of sums due for the maintenance of prisoners of war in their respective territories.

Section II.

GRAVES.

Article 225.

The Allied and Associated Governments and the German Government will cause to be respected and maintained the graves of the soldiers and sailors buried in their respective territories.

They agree to recognise any commission appointed by an Allied or Associated Government for the purpose of identifying, registering, caring for or erecting suitable memorials over the said graves and to facilitate the discharge of its duties.

Furthermore they agree to afford, so far as the provisions of their laws and the requirements of public health allow, every facility for giving effect to requests that the bodies of their soldiers and sailors may be transferred to their own country.

Article 226.

The graves of prisoners of war and interned civilians who are nationals of the different belligerent States and have died in captivity shall be properly maintained in accordance with Article 225 of the present Treaty.

The Allied and Associated Governments on the one part and the German Government on the other part reciprocally undertake also to furnish to each other:

(1) A complete list of those who have died, together with all information useful for identification;

(2) All information as to the number and position of the graves of all those who have been buried without identification.

Part VII.

PENALTIES.

Article 227.

The Allied and Associated Powers publicly arraign William II of Hohenzollern, formerly German Emperor, for a supreme offense against international morality and the sanctity of treaties.

A special tribunal will be constituted to try the accused thereby assuring him the guarantees essential to the right of defence. It will be composed of five judges, one appointed by each of the following Powers: namely, the United States of America, Great Britain, France, Italy and Japan.

In its decision the tribunal will be guided by the highest motives of international policy, with a view to vindicating the solemn obligations of international undertakings, and the validity of international morality. It will be its duty to fix the punishment which it considers should be imposed

The Allied and Associated Powers will address a request to the Government of the Netherlands for the surrender to them of the ex-Emperor in order that he may be put on trial.

Article 228.

The German Government recognises the right of the Allied and Associated Powers to bring before military tribunals persons accused of having committed acts in violation of the laws and customs of war. Such persons shall, if found guilty, be sentenced to punishments laid down by law. This provision will apply notwithstanding any proceedings or prosecution before a tribunal in Germany or in the territory of her allies.

The German Government shall hand over to the Allied and Associated Powers, or to such one of them as shall so request, all persons accused of having committed an act in violation of the laws and customs of war, who are specified either by name or by the rank office or employment which they held under the German authorities.

Article 229.

Persons guilty of criminal acts against the nationals of one of the Allied and Associated Powers will be brought before the military tribunals of that Power

Persons guilty of criminal acts against the nationals of more than one of the Allied and Associated Powers will be brought before military tribunals composed of members of the military tribunals of the Powers concerned.

In every case the accused will be entitled to name his own counsel.

Article 230.

The German Government undertakes to furnish all documents and information of every kind, the production of which may be considered necessary to ensure the full knowledge of the incriminating acts, the discovery of offenders and the just appreciation of responsibility.

PART VIII.

REPARATION.

Section I.

GENERAL PROVISIONS.

Article 231.

The Allied and Associated Governments affirm and Germany accepts the responsibility of Germany and her allies for causing all the loss and damage to which the Allied and Associated Governments and their nationals have been subjected as a consequence of the war imposed upon them by the aggression of Germany and her allies.

Article 232.

The Allied and Associated Governments recognise that the resources of Germany are not adequate, after taking into account permanent diminutions of such resources which will result from other provisions of the present Treaty, to make complete reparation for all such loss and damage.

The Allied and Associated Governments, however, require, and Germany undertakes, that she will make compensation for all damage done to the civilian population of the Allied and Associated Powers and to their property during the period of the belligerency of each as an Allied or Associated Power against Germany by such aggression by land, by sea and from the air, and in general all damage as defined in Annex I hereto.

In accordance with Germany's pledges, already given, as to complete restoration for Belgium, Germany undertakes, in addition to the compensation for damage elsewhere in this Part provided for, as a consequence of the violation of the Treaty of 1839, to make reimbursement of all sums which Belgium has borrowed from the Allied and Associated Governments up to November 11, 1918, together with interest at the rate of five per cent. (5%) per annum on such sums. This amount shall be determined by the Reparation Commission, and the German Government undertakes thereupon forthwith to make a special issue of bearer bonds to an equivalent amount payable in marks gold, on May 1, 1926, or at the option of the German Government, on the 1st of May in any year up to 1926. Subject to the foregoing, the form of such bonds shall be determined by the Reparation Commission. Such bonds shall be handed over to the Reparation Commission, which has authority to take and acknowledge receipt thereof on behalf of Belgium.

Article 233.

The amount of the above damage for which compensation is to be made by Germany shall be determined by an Inter-Allied Commission, to be called the Reparation Commission and constituted in the form and with the powers set forth hereunder and in Annexes II and VII inclusive hereto.

This Commission shall consider the claims and give to the German Government a just opportunity to be heard.

The findings of the Commission as to the amount of damage defined as above shall be concluded and notified to the German Government on or before May 1, 1921, as representing the extent of that Government's obligations.

The Commission shall concurrently draw up a schedule of payments prescribing the time and manner for securing and discharging the entire obligation within a period of thirty years from May 1, 1921. If, however, within the period mentioned Germany fails to discharge her obligations, any balance remaining unpaid may, within the discretion of the Commission, be postponed for settlement in subsequent years, or may be handled otherwise in such manner as the Allied and Associated Governments, acting in accordance with the procedure laid down in this Part of the present Treaty, shall determine.

Article 234.

The Reparation Commission shall after May 1, 1921, from time to time, consider the resources and capacity of Germany, and, after giving her representatives a just opportunity to be heard, shall have discretion to extend the date, and to modify the form of payments, such as are to be provided for in accordance with Article 233; but not to cancel any part except with the specific authority of the several Governments represented upon the Commission.

Article 235.

In order to enable the Allied and Associated Powers to proceed at once to the restoration of their industrial and economic life, pending the full determination of their claims, Germany shall pay in such instalments and in such manner (whether in gold, commodities, ships, securities or otherwise) as the Reparation Commission may fix, during 1919, 1920 and the first four months of 1921, the equivalent of 20,000,000,000 gold marks. Out of this sum the expenses of the armies of occupation subsequent to the Armistice of November 11, 1918, shall first be met, and such supplies of food and raw materials as may be judged by the Governments of the Principal Allied and Associated Powers to be essential to enable Germany to meet her obligations for reparation may also, with the approval of the said Governments, be paid for out of the above sum. The balance shall be reckoned toward liquidation of the amounts due for reparation. Germany shall further deposit bonds as prescribed in Paragraph 12 (c) of Annex II hereto.

Article 236.

Germany further agrees to the direct application of her economic resources to reparation as specified in Annexes III, IV, V and VI, relating respectively to merchant shipping, to physical restoration, to coal and derivatives of coal, and to dyestuffs and other chemical products; provided always that the value of the property transferred and any services rendered by her under these Annexes, assessed in the manner therein prescribed, shall be credited to her toward liquidation of her obligations under the above Articles.

Article 237.

The successive instalments, including the above sum, paid over by Germany in satisfaction of the above claims will be divided by the Allied and Associated Governments in proportions which have been determined upon by them in advance on a basis of general equity and of the rights of each.

For the purposes of this division the value of property transferred and services rendered under Article 243, and under Annexes III, IV, V, VI and VII, shall be reckoned in the same manner as cash payments effected in that year.

Article 238.

In addition to the payments mentioned above Germany shall effect, in accordance with the procedure laid down by the Reparation Commission, restitution in cash of cash taken away, seized or sequestrated, and also restitution of animals, objects of every nature and securities taken away, seized or sequestrated, in the case in which it proves possible to identify them in territory belonging to Germany or her allies.

Until this procedure is laid down, restitution will continue in accordance with the provisions of the Armistice of November 11, 1918, and its renewals and the Protocols thereto.

Article 239.

The German Government undertakes to make forthwith the restitution contemplated by Article 238 and to make the payments and deliveries contemplated by Articles 233, 234, 235 and 236.

Article 240.

The German Government recognises the Commission provided for by Article 233 as the same may be constituted by the Allied and Associated Governments in accordance with Annex II and agrees irrevocably to the possession and exercise by such Commission of the power and authority given to it under the present Treaty.

The German Government will supply to the Commission all the information which the Commission may require relative to the financial situation and operations and to the property, productive capacity, and stocks and current production of raw materials and manufactured articles of Germany and her nationals, and further any information relative to military operations which in the judgment of

the Commission may be necesary for the assessment of Germany's liability for reparation as defined in Annex I.

The German Government will accord to the members of the Commission and its authorised agents the same rights and immunities as are enjoyed in Germany by duly accredited diplomatic agents of friendly Powers.

Germany further agrees to provide for the salaries and expenses of the Commission and of such staff as it may employ.

Article 241.

Germany undertakes to pass, issue and maintain in force any legislation, orders and decrees that may be necessary to give complete effect to these provisions.

Article 242.

The provisions of this Part of the present Treaty do not apply to the property, rights and interests referred to in Sections III and IV of Part X (Economic Clauses) of the present Treaty, nor to the product of their liquidation, except so far as concerns any final balance in favor of Germany under Article 243 (a).

Article 243.

The following shall be reckoned as credits to Germany in respect of her reparation obligations:

(a) Any final balance in favour of Germany under Section V (Alsace-Lorraine) of Part III (Political Clauses for Europe) and Sections III and IV of Part X (Economic Clauses) of the present Treaty;

(b) Amounts due to Germany in respect of transfers under Section IV (Saar Basin) of Part III (Political Clauses for Europe), Part IX (Financial Clauses), and Part XII (Ports, Waterways and Railways);

(c) Amounts which in the judgment of the Reparation Commission should be credited to Germany on account of any other transfers under the present Treaty of property, rights, concessions or other interests.

In no case however shall credit be given for property restored in accordance with Article 238 of the present Part.

Article 244.

The transfer of the German submarine cables which do not form the subject of particular provisions of the present Treaty is regulated by Annex VII hereto.

ANNEX I.

Compensation may be claimed from Germany under Article 232 above in respect of the total damage under the following categories:

(1) Damage to injured persons and to surviving dependents by personal injury to or death of civilians caused by acts of war, including bombardments or other attacks on land, on sea, or from the air, and of all the direct consequences thereof, and of all operations of war by the two groups of belligerents wherever arising.

(2) Damage caused by Germany or her allies to civilian victims of acts of cruelty, violence or maltreatment (including injuries to life or health as a consequence of imprisonment, deportation, internment or evacuation, of exposure at sea or of being forced to labour), wherever arising, and to the surviving dependents of such victims.

(3) Damage caused by Germany or her allies in their own territory or in occupied or invaded territory to civilian victims of all acts injurious to health or capacity to work, or to honour, as well as to the surviving dependents of such victims.

(4) Damage caused by any kind of maltreatment of prisoners of war.

(5) As damage caused to the peoples of the Allied and Associated Powers, all pensions and compensation in the nature of pensions to naval and military victims of war (including members of the air force), whether mutilated, wounded, sick or invalided, and to the dependents of such victims, the amount due to the Allied and Associated Governments being calculated for each of them as being the capitalised cost of such pensions and compensation at the date of the coming into force of the present Treaty on the basis of the scales in force in France at such date.

(6) The cost of assistance by the Government of the Allied and Associated Powers to prisoners of war and to their families and dependents.

(7) Allowances by the Governments of the Allied and Associated Powers to the families and dependents of mobilised persons or persons serving with the forces, the amount due to them for each calendar year in which hostilities occurred being calculated for each Government on the basis of the average scale for such payments in force in France during that year.

(8) Damage caused to civilians by being forced by Germany or her allies to labour without just remuneration.

(9) Damage in respect of all property wherever situated belonging to any of the Allied or Associated States or their nationals, with the exception of naval and military works or materials, which has been carried off, seized, injured or destroyed by the acts of Germany or her allies on land, on sea or from the air, or damage directly in consequence of hostilities or of any operations of war.

(10) Damage in the form of levies, fines and other similar exactions imposed by Germany or her allies upon the civilian population.

ANNEX II.

1.

The Commission referred to in Article 233 shall be called "The Reparation Commission" and is hereinafter referred to as "the Commission."

2.

Delegates to this Commission shall be nominated by the United States of America, Great Britain, France, Italy, Japan, Belgium and the Serb-Croat-Slovene State. Each of these Powers will appoint one Delegate and also one Assistant Delegate, who will take his place in case of illness or necessary absence, but at other times will only have the right to be present at proceedings without taking any part therein.

On no occasion shall the Delegates of more than five of the above Powers have the right to take part in the proceedings of the Commission and to record their votes. The Delegates of the United States, Great Britain, France and Italy shall have this right on all occasions. The Delegate of Belgium shall have this right on all occasions other than those referred to below. The Delegate of Japan shall have this right on occasions when questions relating to damage at sea and questions arising under Article 260 of Part IX (Financial Clauses) in which Japanese interests are concerned are under consideration. The Delegate of the Serb-Croat-Slovene State shall have this right when questions relating to Austria, Hungary or Bulgaria are under consideration.

Each Government represented on the Commission shall have the right to withdraw therefrom upon twelve months' notice filed with the Commission and confirmed in the course of the sixth month after the date of the original notice.

3.

Such of the other Allied and Associated Powers as may be interested shall have the right to appoint a Delegate to be present and act as Assessor only while their respective claims and interests are under examination or discussion, but without the right to vote.

4.

In case of the death, resignation, or recall of any Delegate, Assistant Delegate or Assessor, a successor to him shall be nominated as soon as possible.

5.

The Commission will have its principal permanent Bureau in Paris and will hold its first

meeting in Paris as soon as practicable after the coming into force of the present Treaty, and thereafter will meet in such place or places and at such time as it may deem convenient and as may be necessary for the most expeditious discharge of its duties.

6.

At its first meeting the Commission shall elect, from among the Delegates referred to above, a Chairman and a Vice-Chairman, who shall hold office for one year and shall be eligible for re-election. If a vacancy in the Chairmanship or Vice-Chairmanship should occur during the annual period, the Commission shall proceed to a new election for the remainder of the said period.

7.

The Commission is authorised to appoint all necessary officers, agents and employees who may be required for the execution of its functions, and to fix their remuneration; to constitute committees, whose members need not necessarily be members of the Commission, and to take all executive steps necessary for the purpose of discharging its duties; and to delegate authority and discretion to officers, agents and committees.

8.

All proceedings of the Commission shall be private, unless, on particular occasions, the Commission shall otherwise determine for special reasons.

9.

The Commission shall be required, if the German Government so desire, to hear, within a period which it will fix from time to time, evidence and arguments on the part of Germany on any question connected with her capacity to pay.

10.

The Commission shall consider the claims and give to the German Government a just opportunity to be heard, but not to take any part whatever in the decisions of the Commission. The Commission shall afford a similar opportunity to the allies of Germany when it shall consider that their interests are in question.

11.

The Commission shall not be bound by any particular code or rules of law or by any particular rule of evidence or of procedure but shall be guided by justice, equity and good faith. Its decisions must follow the same principles and rules in all cases where they are applicable. It will establish rules relating to methods of proof of claims. It may act on any trustworthy modes of computation.

12.

The Commission shall have all the powers conferred upon it, and shall exercise all the functions assigned to it, by the present Treaty.

The Commission shall in general have wide latitude as to its control and handling of the whole reparation problem as dealt with in this Part of the present Treaty and shall have authority to interpret its provisions. Subject to the provisions of the present Treaty, the Commission is constituted by the several Allied and Associated Governments referred to in paragraphs 2 and 3 above as the exclusive agency of the said governments respectively for receiving, selling, holding and distributing the reparation payments to be made by Germany under this Part of the present Treaty. The Commission must comply with the following conditions and provisions:

(a) Whatever part of the full amount of the proved claims is not paid in gold, or in ships, securities and commodities or otherwise, Germany shall be required, under such conditions as the Commission may determine, to cover by way of guarantee by an equivalent issue of bonds, obligations or otherwise, in order to constitute an acknowledgment of the said part of the debt.

(b) In periodically estimating Germany's capacity to pay, the Commission shall examine the German system of taxation first, to the end that the sums for reparation which Germany is required to pay shall become a charge upon all her revenues prior to that for the service or discharge of any domestic loan, and, secondly, so as to satisfy itself that, in general, the German scheme of taxation is fully as heavy proportionately as that of any of the powers represented on the Commission.

(c) In order to facilitate and continue the immediate restoration of the economic life of the Allied and Associated countries, the Commission will as provided in Article 235 take from Germany by way of security for and acknowledgment of her debt a first instalment of gold bearer bonds free of all taxes and charges of every description established or to be established by the Government of the German Empire or of the German States, or by any authority subject to them; these bonds will be delivered on account and in three portions, the Marks gold being payable in conformity with Article 202 of Part IX (Financial Clauses) of the present Treaty as follows:

(1) To be issued forthwith, 20,000,000,000 Marks gold bearer bonds, payable not later than May 1, 1921, without interest. There shall be specially applied towards the amortisation of these bonds the payments which Germany is pledged to make in conformity with Article 235, after deduction of the sums used for the reimbursement of expenses of the armies of occupation and for payment of foodstuffs and raw materials. Such bonds as have not been redeemed by May 1, 1921, shall then be exchanged for new bonds of the same type as those provided for below (paragraph 12, (c) (2).)

(2) To be issued forthwith, further 40,000,000,000 Marks gold bearer bonds, bearing interest at 2½ per cent. per annum between 1921 and 1926, and thereafter at 5 per cent. per annum with an additional 1 per cent. for amortisation beginning in 1926 on the whole amount of the issue.

(3) To be delivered forthwith a covering undertaking in writing to issue when, but not until, the Commission is satisfied that Germany can meet such interest and sinking fund obligations, a further instalment of 40,000,000,000 Marks gold 5 per cent. bearer bonds, the time and mode of payment of principal and interest to be determined by the Commission.

The dates for payment of interest, the manner of applying the amortisation fund, and all other questions relating to the issue, management and regulation of the bond issue shall be determined by the Commission from time to time.

Further issues by way of acknowledgment and security may be required as the Commission subsequently determines from time to time.

(d) In the event of bonds, obligations or other evidence of indebtedness issued by Germany by way of security for or acknowledgment of her reparation debt being disposed of outright, not by way of pledge, to persons other than the several Governments in whose favour Germany's original reparation indebtedness was created, an amount of such reparation indebtedness shall be deemed to be extinguished, corresponding to the nominal value of the bonds, etc., so disposed of outright, and the obligation of Germany in respect of such bonds shall be confined to her liabilities to the holders of the bonds, as expressed upon their face.

(e) The damage for repairing, reconstructing and rebuilding property in the invaded and devastated districts, including reinstallation of furniture, machinery and other equipment, will be calculated according to the cost at the dates when the work is done.

(f) Decisions of the Commission relating to

the total or partial cancellation of the capital or interest of any verified debt of Germany must be accompanied by a statement of its reasons.

13.

As to voting, the Commission will observe the following rules:

When a decision of the Commission is taken the votes of all the Delegates entitled to vote, or in the absence of any of them, of their Assistant Delegates, shall be recorded. Abstention from voting is to be treated as a vote against the proposal under discussion. Assessors have no vote.

On the following questions unanimity is necessary:

(a) Questions involving the sovereignty of any of the Allied and Associated Powers, or the cancellation of the whole or any part of the debt or obligations of Germany:

(b) Questions of determining the amount and conditions of bonds or other obligations to be issued by the German Government and of fixing the time and manner for selling, negotiating or distributing such bonds:

(c) Any postponement, total or partial, beyond the end of 1930, of the payment of instalments falling due between May 1, 1921, and the end of 1926 inclusive:

(d) Any postponement, total or partial, of any instalment falling due after 1926 for a period exceeding three years:

(e) Questions of applying in any particular case a method of measuring damages different from that which has been previously applied in a similar case:

(f) Questions of the interpretation of the provisions of this Part of the present Treaty.

All other questions shall be decided by the vote of the majority.

In case of any difference of opinion among the Delegates, which cannot be solved by reference to their Governments, upon the question whether a given case is one which requires a unanimous vote for its decision or not, such difference shall be referred to the immediate arbitration of some impartial person to be agreed upon by their Governments, whose award the Allied and Associated Governments agree to accept.

14.

Decisions of the Commission, in accordance with the powers conferred upon it, shall forthwith become binding and may be put into immediate execution without further proceedings.

15.

The Commission will issue to each of the interested Powers in such form as the Commission shall fix:

(1) A certificate stating that it holds for the account of the said Power bonds of the issues mentioned above, the said certificate, on the demand of the Power concerned, being divisible in a number of parts not exceeding five:

(2) From time to time certificates stating the goods delivered by Germany on account of her reparation debt which it holds for the account of the said Power.

The said certificates shall be registered, and upon notice to the Commission, may be transferred by endorsement.

When bonds are issued for sale or negotiation, and when goods are delivered by the Commission, certificates to an equivalent value must be withdrawn.

16.

Interest shall be debited to Germany as from May 1, 1921, in respect of her debt as determined by the Commission, after allowing for sums already covered by cash payments or their equivalent, or by bonds issued to the Commission, or under Article 243. The rate of interest shall be 5 per cent, unless the Commission shall determine at some future time that circumstances justify a variation of this rate.

The Commission, in fixing on May 1, 1921, the total amount of the debt of Germany, may take account of interest due on sums arising out of the reparation of material damage as from November 11, 1918, up to May 1, 1921.

17.

In case of default by Germany in the performance of any obligation under this Part of the present Treaty, the Commission will forthwith give notice of such default to each of the interested Powers and may make such recommendations as to the action to be taken in consequence of such default as it may think necessary.

18.

The measures which the Allied and Associated Powers shall have the right to take, in case of voluntary default by Germany, and which Germany agrees not to regard as acts of war, may include economic and financial prohibitions and reprisals and in general such other measures as the respective Governments may determine to be necessary in the circumstances.

19.

Payments required to be made in gold or its equivalent on account of the proved claims of the Allied and Associated Powers may at any time be accepted by the Commission in the form of chattels, properties, commodities, businesses, rights, concessions, within or without German territory, ships, bonds, shares or securities of any kind, or currencies of Germany or other States, the value of such substitutes for gold being fixed at a fair and just amount by the Commission itself.

20.

The Commission, in fixing or accepting payment in specified properties or rights, shall have due regard for any legal or equitable interests of the Allied and Associated Powers or of neutral Powers or of their nationals therein.

21.

No member of the Commission shall be responsible, except to the Government appointing him, for any action or omission as such member. No one of the Allied or Associated Governments assumes any responsibility in respect of any other Government.

22.

Subject to the provisions of the present Treaty this Annex may be amended by the unanimous decision of the Governments represented from time to time upon the Commission.

23.

When all the amounts due from Germany and her allies under the present Treaty or the decisions of the Commission have been discharged and all sums received, or their equivalents, shall have been distributed to the Powers interested, the Commission shall be dissolved.

ANNEX III.

1.

Germany recognises the right of the Allied and Associated Powers to the replacement, ton for ton (gross tonnage) and class for class, of all merchant ships and fishing boats lost or damaged owing to the war.

Nevertheless, and in spite of the fact that the tonnage of German shipping at present in existence is much less than that lost by the Allied and Associated Powers in consequence of the German aggression, the right thus recognised will be enforced on German ships and boats under the following conditions:

The German Government, on behalf of themselves and so as to bind all other persons interested, cede to the Allied and Associated Governments the property in all the German merchant ships which are of 1,600 tons gross and upwards, in one-half, reckoned in tonnage, of the ships which are between 1,000 tons and 1,600 tons gross; in one-quarter, reckoned in tonnage, of the steam trawlers, and in one-quarter, reckoned in tonnage, of the other fishing boats.

2.

The German Government will, within two months of the coming into force of the pres-

ent Treaty, deliver to the Reparation Commission all the ships and boats mentioned in paragraph 1.

3.

The ships and boats mentioned in paragraph 1 include all ships and boats which (a) fly, or may be entitled to fly, the German merchant flag; or (b) are owned by any German national, company or corporation or by any company or corporation belonging to a country other than an Allied or Associated country and under the control or direction of German nationals; or (c) are now under construction (1) in Germany, (2) in other than Allied or Associated countries for the account of any German national, company or corporation.

4.

For the purpose of providing documents of title for the ships and boats to be handed over as above mentioned the German Government will:

(a) Deliver to the Reparation Commission in respect of each vessel a bill of sale or other document of title evidencing the transfer to the Commission of the entire property in the vessel, free from all encumbrances, charges and liens of all kinds, as the Commission may require;

(b) Take all measures that may be indicated by the Reparation Commission for ensuring that the ships themselves shall be placed at its disposal.

5.

As an additional part of reparation, Germany agrees to cause merchant ships to be built in German yards for the account of the Allied and Associated Governments as follows:

(a) Within three months of the coming into force of the present Treaty, the Reparation Commission will notify to the German Government the amount of tonnage to be laid down in German shipyards in each of the two years next succeeding the three months mentioned above.

(b) Within two years of the coming into force of the present Treaty the Reparation Commission will notify to the German Government the amount of tonnage to be laid down in each of the three years following the two years mentioned above.

(c) The amount of tonnage to be laid down in each year shall not exceed 200,000 tons, gross tonnage.

(d) The specifications of the ships to be built, the conditions under which they are to be built and delivered, the price per ton at which they are to be accounted for by the Reparation Commission, and all other questions relating to the accounting, ordering, building and delivery of the ships, shall be determined by the Commission.

Germany undertakes to restore in kind and in normal condition of upkeep to the Allied and Associated Powers, within two months of the coming into force of the present Treaty, in accordance with procedure to be laid down by the Reparation Commission, any boats and other movable appliances belonging to inland navigation which since August 1, 1914, have by any means whatever come into her possession or into the possession of her nationals, and which can be identified.

With a view to make good the loss in inland navigation tonnage, from whatever cause arising, which has been incurred during the war by the Allied and Associated Powers, and which cannot be made good by means of the restitution prescribed above, Germany agrees to cede to the Reparation Commission a portion of the German river fleet up to the amount of the loss mentioned above, provided that such cession shall not exceed 20 per cent. of the river fleet as it existed on November 11, 1918.

The conditions of this cession shall be settled by the arbitrators referred to in Article 339 of Part XII (Ports, Waterways and Railways) of the present Treaty, who are charged with the settlement of difficulties relating to the apportionment of river tonnage resulting from the new international regime applicable to certain river systems or from the territorial changes affecting those systems.

7.

Germany agrees to take any measures that may be indicated to her by the Reparation Commission for obtaining the full title to the property in all ships which have during the war been transferred, or are in process of transfer, to neutral flags, without the consent of the Allied and Associated Governments.

8.

Germany waives all claims of any description against the Allied and Associated Governments and their nationals in respect of the detention, employment, loss or damage of any German ships or boats, exception being made of payments due in respect of the employment of ships in conformity with the Armistice Agreement of January 13, 1919, and subsequent Agreements.

The handing over of the ships of the German mercantile marine must be continued without interruption in accordance with the said Agreement.

9.

Germany waives all claims to vessels or cargoes sunk by or in consequence of naval action and subsequently salved, in which any of the Allied or Associated Governments or their nationals may have any interest either as owners, charterers, insurers or otherwise, notwithstanding any decree of condemnation which may have been made by a Prize Court of Germany or of her allies.

ANNEX IV.

1.

The Allied and Associated Powers require, and Germany undertakes, that in part satisfaction of her obligations expressed in the present Part she will, as hereinafter provided, devote her economic resources directly to the physical restoration of the invaded areas of the Allied and Associated Powers, to the extent that these Powers may determine.

2.

The Allied and Associated Governments may file with the Reparation Commission lists showing:

(a) Animals, machinery, equipment, tools and like articles of a commercial character, which have been seized, consumed or destroyed by Germany or destroyed in direct consequence of military operations, and which such Governments, for the purpose of meeting immediate and urgent needs, desire to have replaced by animals and articles of the same nature which are in being in German territory at the date of the coming into force of the present Treaty.

(b) Reconstruction materials (stones, bricks, refractory bricks, tiles, wood, window-glass, steel, lime, cement, etc.), machinery, heating apparatus, furniture and like articles of a commercial character which the said Governments desire to have produced and manufactured in Germany and delivered to them to permit of the restoration of the invaded areas.

3.

The lists relating to the articles mentioned in 2 (a) above shall be filed within sixty days after the date of the coming into force of the present Treaty.

The lists relating to the articles in 2 (b) above shall be filed on or before December 31, 1919.

The lists shall contain all such details as are customary in commercial contracts dealing with the subject manner, including specifications, dates of delivery (but not extending over more than four years), and places of delivery, but not price or value, which shall be fixed as hereinafter provided by the Commission.

4.

Immediately upon the filing of such lists with the Commission, the Commission shall

consider the amount and number of the materials and animals mentioned in the lists provided for above which are to be required of Germany. In reaching a decision on this matter the Commission shall take into account such domestic requirements of Germany as it deems essential for the maintenance of Germany's social and economic life, the prices and dates at which similar articles can be obtained in the Allied and Associated countries as compared with those to be fixed for German articles, and the general interest of the Allied and Associated Governments that the industrial life of Germany be not so disorganized as to affect adversely the ability of Germany to perform the other acts of reparation stipulated for.

Machinery, equipment, tools and like articles of a commercial character in actual industrial use are not, however, to be demanded of Germany unless there is no free stock of such articles respectively which is not in use and is available, and then not in excess of thirty per cent. of the quantity of such articles in use in any one establishment or undertaking.

The Commission shall give representatives of the German Government an opportunity and a time to be heard as to their capacity to furnish the said materials, articles and animals.

The decision of the Commission shall thereupon and at the earliest possible moment be communicated to the German Government and to the several interested Allied and Associated Governments.

The German Government undertakes to deliver the materials, articles and animals as specified in the said communication, and the interested Allied and Associated Governments severally agree to accept the same, provided they conform to the specification given, or are not, in the judgment of the Commission, unfit to be utilized in the work of reparation.

5.

The Commission shall determine the value to be attributed to the materials, articles and animals to be delivered in accordance with the foregoing, and the Allied or Associated Power receiving the same agrees to be charged with such value, and the amount thereof shall be treated as a payment by Germany to be divided in accordance with Article 237 of this part of the present Treaty.

In cases where the right to require physical restoration as above provided is exercised, the Commission shall ensure that the amount to be credited against the reparation obligation of Germany shall be the fair value of work done or materials supplied by Germany, and that the claim made by the interested Power in respect of the damage so repaired by physical restoration shall be discharged to the extent of the proportion which the damage thus repaired bears to the whole of the damage thus claimed for.

6.

As an immediate advance on account of the animals referred to in paragraph 2 (a) above, Germany undertakes to deliver in equal monthly instalments in the three months following the coming into force of the present Treaty the following quantities of live stock:

(1) To the French Government.

500 stallions (3 to 7 years);
30,000 fillies and mares (18 months to 7 years), type: Ardennais, Boulonnais or Belgian;
2,000 bulls (18 months to 3 years);
90,000 milch cows (2 to 6 years);
1,000 rams;
100,000 sheep;
10,000 goats;

(2) To the Belgian Government.

200 stallions (3 to 7 years), large Belgian type;
5,000 mares (3 to 7 years), large Belgian type;
5,000 fillies (18 months to 3 years), large Belgian type;
2,000 bulls (18 months to 3 years);
50,000 milch cows (2 to 6 years);
40,000 heifers;
200 rams;
20,000 sheep;
15,000 sows;

The animals delivered shall be of average health and condition.

To the extent that animals so delivered cannot be identified as animals taken away or seized, the value of such animals shall be credited against the reparation obligations of Germany in accordance with paragraph 5 of this Annex.

7.

Without waiting for the decisions of the Commission referred to in paragraph 4 of this Annex to be taken, Germany must continue the delivery to France of the agricultural material referred to in Article III of the renewal dated January 16, 1919, of the Armistice.

ANNEX V.

1.

Germany accords the following options for the delivery of coal and derivatives of coal to the undermentioned signatories of the present Treaty.

Germany undertakes to deliver to France seven million tons of coal per year for ten years. In addition, Germany undertakes to deliver to France annually for a period not exceeding ten years an amount of coal equal to the difference between the annual production before the war of the coal mines of the Nord and Pas de Calais, destroyed as a result of the war, and the production of the mines of the same area during the years in question; such delivery not to exceed twenty million tons in any one year of the first five years, and eight million tons in any one year of the succeeding five years.

It is understood that due diligence will be exercised in the restoration of the destroyed mines in the Nord and the Pas de Calais.

3.

Germany undertakes to deliver to Belgium eight million tons of coal annually for ten years.

4.

Germany undertakes to deliver to Italy up to the following quantities of coal.

	Tons.
July, 1919, to June, 1920	4,500,000
July, 1920, to June, 1921	6,000,000
July, 1921, to June, 1922	7,500,000
July, 1922, to June 1923	8,000,000
July, 1923, to June, 1924	8,500,000
and each of the following five years	8,500,000

At least two-thirds of the actual deliveries to be land-borne.

5.

Germany further undertakes to deliver annually to Luxemburg, if directed by the Reparation Commission, a quantity of coal equal to the pre-war annual consumption of German coal in Luxemburg.

6.

The prices to be paid for coal delivered under these options shall be as follows:

(a) For overland delivery, including delivery by barge, the German pithead price to German nationals, plus the freight to French, Belgian, Italian or Luxemburg frontiers, provided that the pithead price does not exceed the pithead price of British coal for export. In the case of Belgian bunker coal, the price shall not exceed the Dutch bunker price.

Railroad and barge tariffs shall not be higher than the lowest similar rates paid in Germany.

(b) For sea delivery, the German export price f. o. b. German ports, or the British

export price f. o. b. British ports, whichever may be lower.

7.

The Allied and Associated Governments interested may demand the delivery in place of coal, of metallurgical coke in the proportion of three tons of coke to four tons of coal.

8.

Germany undertakes to deliver to France, and to transport to the French frontier by rail or by water, the following products, during each of the three years following the coming into force of this Treaty:

	Tons.
Benzol	35,000
Coal tar	50,000
Sulphate of ammonia	30,000

All or part of the coal tar may, at the option of the French Government, be replaced by corresponding quantities of products of distillation, such as light oils, heavy oils, anthracene, naphthalene or pitch.

9.

The price paid for coke and for the articles referred to in the preceding paragraph shall be the same as the price paid by German nationals under the same conditions of shipment to the French frontier or to the German ports, and shall be subject to any advantages which may be accorded similar products furnished to German nationals.

10.

The foregoing options shall be exercised through the intervention of the Reparation Commission, which, subject to the specific provisions hereof, shall have power to determine all questions relative to procedure and the qualities and quantities of products, the quantity of coke which may be substituted for coal, and the times and modes of delivery and payment. In giving notice to the German Government of the foregoing options the Commission shall give at least 120 days' notice of deliveries to be made after January 1, 1920, and at least 30 days' notice of deliveries to be made between the coming into force of this Treaty and January 1, 1920. Until Germany has received the demands referred to in this paragraph, the provisions of the Protocol of December 25, 1918 (Execution of Article VI of the Armistice of November 11, 1918) remain in force. The notice to be given to the German Government of the exercise of the right of substitution accorded by paragraphs 7 and 8 shall be such as the Reparation Commission may consider sufficient. If the Commission shall determine that the full exercise of the foregoing options would interfere unduly with the industrial requirements of Germany, the Commission is authorised to postpone or to cancel deliveries, and in so doing to settle all questions of priority; but the coal to replace coal from destroyed mines shall receive priority over other deliveries.

ANNEX VI.

1.

Germany accords to the Reparation Commission an option to require as part of reparation the delivery by Germany of such quantities and kinds of dyestuffs and chemical drugs as the Commission may designate, not exceeding 50 per cent. of the total stock of each and every kind of dyestuff and chemical drug in Germany or under German control at the date of the coming into force of the present Treaty.

This option shall be exercised within sixty days of the receipt by the Commission of such particulars as to stocks as may be considered necessary by the Commission.

2.

Germany further accords to the Reparation Commission an option to require delivery during the period from the date of the coming into force of the present Treaty until January 1, 1920, and during each period of six months thereafter until January 1, 1925, of any specified kind of dyestuff and chemical drug up to an amount not exceeding 25 per cent of the German production of such dyestuffs and chemical drugs during the previous six months period. If in any case the production during such previous six months was, in the opinion of the Commission, less than normal, the amount required may be 25 per cent. of the normal production.

Such option shall be exercised within four weeks after the receipt of such particulars as to production and in such form as may be considered necessary by the Commission; these particulars shall be furnished by the German Government immediately after the expiration of each six months period.

3.

For dyestuffs and chemical drugs delivered under paragraph 1, the price shall be fixed by the Commission, having regard to pre-war net export prices and to subsequent increases of cost.

For dyestuffs and chemical drugs delivered under paragraph 2, the price shall be fixed by the Commission, having regard to pre-war net export prices and subsequent variations of cost, or the lowest net selling price of similar dyestuffs and chemical drugs to any other purchaser.

4.

All details, including mode and times of exercising the options, and making delivery, and all other questions arising under this arrangement shall be determined by the Reparation Commission; the German Government will furnish to the Commission all necessary information and other assistance which it may require.

5.

The above expression "dyestuffs and chemical drugs" includes all synthetic dyes and drugs and intermediate or other products used in connection with dyeing, so far as they are manufactured for sale. The present arrangement shall also apply to cinchona bark and salts of quinine.

ANNEX VII.

Germany renounces on her own behalf and on behalf of her nationals in favour of the Principal Allied and Associated Powers all rights, titles or privileges of whatever nature in the submarine cables set out below, or in any portions thereof:

Emden-Vigo: from the Straits of Dover to off Vigo;

Emden-Brest: from off Cherbourg to Brest;

Emden-Teneriffe: from off Dunkirk to off Teneriffe;

Emden-Azores (1): from the Straits of Dover to Fayal;

Emden-Azores (2): from the Straits of Dover to Fayal;

Azores-New York (1): from Fayal to New York;

Azores-New York (2): from Fayal to the longitude of Halifax;

Teneriffe-Monrovia: from off Teneriffe to off Monrovia;

Monrovia-Lome:

from about.... { lat. :2° 30′ N.; long. :7° 40′ W. of Greenwich;
to about..... { lat. :2° 20′ N.; long. :5° 30′ W. of Greenwich;
and from about { lat. :3° 48′ N.; long. :0° 00′, to Lome.

Lome-Duala: from Lome to Duala;

Monrovia-Pernambuco: from off Monrovia to off Pernambuco.

Constantinople-Constanza: from Constantinople to Constanza;

Yap-Shanghai, Yap-Guam and Yap-Menado (Celebes): from Yap Island to Shanghai, from Yap Island to Guam Island, and from Yap Island to Menado.

The value of the above mentioned cables or portions thereof in so far as they are privately owned, calculated on the basis of the original

cost less a suitable allowance for depreciation, shall be credited to Germany in the Reparation account.

Section II.

SPECIAL PROVISIONS.

Article 245.

Within six months after the coming into force of the present Treaty the German Government must restore to the French Government the trophies, archives, historical souvenirs or works of art carried away from France by the German authorities in the course of the war of 1870-1871 and during this last war, in accordance with a list which will be communicated to it by the French Government; particularly the French flags taken in the course of the war of 1870-1871 and all the political papers taken by the German authorities on October, 10, 1870, at the chateau of Cercay near Brunoy (Seine-et-Oise), belonging at the time to Mr. Rouher, formerly Minister of State.

Article 246.

Within six months from the coming into force of the present Treaty, Germany will restore to His Majesty the King of the Hedjaz the original Koran of the Caliph Othman, which was removed from Medina by the Turkish authorities and is stated to have been presented to the ex-Emperor William II.

Within the same period Germany will hand over to His Britannic Majesty's Government the skull of the Sultan Mkwawa, which was removed from the Protectorate of German East Africa and taken to Germany.

The delivery of the articles above referred to will be effected in such place and in such conditions as may be laid down by the Governments to which they are to be restored.

Article 247.

Germany undertakes to furnish to the University of Louvain, within three months after a request made by it and transmitted through the intervention of the Reparation Commission, manuscripts, incunabula, printed books, maps and objects of collection corresponding in number and value to those destroyed in the burning by Germany of the Library of Louvain. All details regarding such replacement will be determined by the Reparation Commission.

Germany undertakes to deliver to Belgium, through the Reparation Commission, within six months of the coming into force of the present Treaty, in order to enable Belgium to reconstitute two great artistic works:

(1) The leaves of the triptych of the Mystic Lamb painted by the Van Eyck brothers, formerly in the Church of St. Bavon at Ghent, now in the Berlin Museum;

(2) The leaves of the triptych of the Last Supper, painted by Dierick Bouts, formerly in the Church of St. Peter at Louvain, two of which are now in the Berlin Museum and two in the Old Pinakothek at Munich.

PART IX.

FINANCIAL CLAUSES.

Article 248.

Subject to such exceptions as the Reparation Commission may approve, a first charge upon all the assets and revenues of the German Empire and its constituent States shall be the cost of reparation and all other costs arising under the present Treaty or any treaties or agreements supplementary thereto or under arrangements concluded between Germany and the Allied and Associated Powers during the Armistice or its extensions.

Up to May 1, 1921, the German Government shall not export or dispose of, and shall forbid the export or disposal of, gold without the previous approval of the Allied and Associated Powers acting through the Reparation Commission.

Article 249.

There shall be paid by the German Government the total cost of all armies of the Allied and Associated Governments in occupied German territory from the date of the signature of the Armistice of November 11, 1918, including the keep of men and beasts, lodging and billeting, pay and allowances, salaries and wages, bedding, heating, lighting, clothing, equipment, harness and saddlery, armament and rolling stock, air services, treatment of sick and wounded, veterinary and remount services, transport service of all sorts (such as by rail, sea or river, motor lorries), communications and correspondence, and in general the cost of all administrative or technical services the working of which is necessary for the training of troops and for keeping their numbers up to strength and preserving their military efficiency.

The cost of such liabilities under the above heads so far as they relate to purchases or requisitions by the Allied and Associated Governments in the occupied territories shall be paid by the German Government to the Allied and Associated Governments in marks at the current or agreed rate of exchange. All other of the above costs shall be paid in gold marks.

Article 250.

Germany confirms the surrender of all material handed over to the Allied and Associated Powers in accordance with the Armistice of November 11, 1918, and subsequent Armistice Agreements, and recognises the title of the Allied and Associated Powers to such material.

There shall be credited to the German Government, against the sums due from it to the Allied and Associated Powers for reparation, the value, as assessed by the Reparation Commission, referred to in Article 233 of Part VIII (Reparation) of the present Treaty, of the material handed over in accordance with Article VII of the Armistice of November 11, 1918, or Article III of the Armistice Agreement of January 16, 1919, as well as of any other material handed over in accordance with the Armistice of November 11, 1918, and of subsequent Armistice Agreements, for which, as having nonmilitary value, credit should in the judgment of the Reparation Commission be allowed to the German Government.

Property belonging to the Allied and Associated Governments or their nationals restored or surrendered under the Armistice Agreements in specie shall not be credited to the German Government.

Article 251.

The priority of the charges established by Article 248 shall, subject to the qualifications made below, be as follows:

(a) The cost of the armies of occupation as defined under Article 249 during the Armistice and its extensions;

(b) The cost of any armies of occupation as defined under Article 249 after the coming into force of the present Treaty;

(c) The cost of reparation arising out of the present Treaty or any treaties or conventions supplementary thereto;

(d) The cost of all other obligations incumbent on Germany under the Armistice Conventions or under this Treaty or any treaties or conventions supplementary thereto.

The payment for such supplies of food and raw material for Germany and such other payments as may be judged by the Allied and Associated Powers to be essential to enable Germany to meet her obligations in respect of reparation will have priority to the extent and upon the conditions which have been or may be determined by the Governments of the said Powers.

Article 252.

The right of each of the Allied and Associated Powers to dispose of enemy assets and property within its jurisdiction at the date of the coming into force of the present Treaty is not affected by the foregoing provisions.

Article 253.

Nothing in the foregoing provisions shall prejudice in any manner charges or mortgages lawfully effected in favour of the Allied

or Associated Powers or their nationals respectively, before the date at which a state of war existed between Germany and the Allied or Associated Power concerned, by the German Empire or its constituent States, or by German nationals, on assets in their ownership at that date.

Article 254.

The Powers to which German territory is ceded shall, subject to the qualifications made in Article 255, undertake to pay:

(1) A portion of the debt of the German Empire as it stood on August 1, 1914, calculated on the basis of the ratio between the average for the three financial years 1911, 1912, 1913, of such revenues of the ceded territory, and the average for the same years of such revenues of the whole German Empire as in the judgment of the Reparation Commission are best calculated to represent the relative ability of the respective territories to make payment;

(2) A portion of the debt as it stood on August 1, 1914, of the German State to which the ceded territory belonged, to be determined in accordance with the principle stated above.

Such portions shall be determined by the Reparation Commission.

The method of discharging the obligation both in respect of capital and of interest, so assumed shall be fixed by the Reparation Commission. Such method may take the form, inter alia, of the assumption of the Power to which the territory is ceded of Germany's liability for the German debt held by her nationals. But in the event of the method adopted involving any payments to the German Government, such payments shall be transferred to the Reparation Commission on account of the sums due for reparation so long as any balance in respect of such sums remains unpaid.

Article 255.

(1) As an exception to the above provision and inasmuch as in 1871 Germany refused to undertake any portion of the burden of the French debt, France shall be, in respect of Alsace-Lorraine, exempt from any payment under Article 254.

(2) In the case of Poland that portion of the debt which, in the opinion of the Reparation Commission, is attributable to the measures taken by the German and Prussian Governments for the German colonisation of Poland shall be excluded from the apportionment to be made under Article 254.

(3) In the case of all ceded territories other than Alsace-Lorraine, that portion of the debt of the German Empire of German States which, in the opinion of the Reparation Commission, represents expenditure by the Governments of the German Empire or States upon the Government properties referred to in Article 256 shall be excluded from the apportionment to be made under Article 254.

Article 256.

Powers to which German territory is ceded shall acquire all property and possessions situated therein belonging to the German Empire or to the German States, and the value of such acquisitions shall be fixed by the Reparation Commission, and paid by the State acquiring the territory to the Reparation Commission for the credit of the German Government on account of the sums due for reparation.

For the purposes of this Article the property and possessions of the German Empire and States shall be deemed to include all the property of the Crown, the Empire or the States and the private property of the former German Emperor and other Royal personages.

In view of the terms on which Alsace-Lorraine was ceded to Germany in 1871, France shall be exempt in respect thereof from making any payment or credit under this Article for any property or possessions of the German Empire or States situated therein.

Belgium also shall be exempt from making any payment or credit under this Article for any property or possessions of the German Empire or States situated in German territory ceded to Belgium under the present Treaty.

Article 257.

In the case of the former German territories, including colonies, protectorates or dependencies, administered by a Mandatory under Article 22 of Part I (League of Nations) of the present Treaty, neither the territory nor the Mandatory Power shall be charged with any portion of the debt of the German Empire or States.

All property and possessions belonging to the German Empire or to the German States situated in such territories shall be transferred with the territories to the Mandatory Power in its capacity as such and no payment shall be made nor any credit given to those Governments in consideration of this transfer.

For the purposes of this Article the property and possessions of the German Empire and of the German States shall be deemed to include all the property of the Crown, the Empire or the States and the private property of the Former German Emperor and other Royal personages.

Article 258.

Germany renounces all rights accorded to her or her nationals by treaties, conventions or agreements, of whatsoever kind, to representation upon or participation in the control or administration of commissions, state banks, agencies or other financial or economic organisations of an international character, exercising powers of control or administration, and operating in any of the Allied or Associated States, or in Austria, Hungary, Bulgaria or Turkey, or in the dependencies of these States, or in the former Russian Empire.

Article 259.

(1) Germany agrees to deliver within one month from the date of the coming into force of the present Treaty, to such authority as the Principal Allied and Associated Powers may designate, the sum in gold which was to be deposited in the Reichsbank in the name of the Council of the Administration of the Ottoman Public Debt as security for the first issue of Turkish Government currency notes.

(2) Germany recognises her obligation to make annually for the period of twelve years the payments in gold for which provision is made in the German Treasury Bonds deposited by her from time to time in the name of the Council of the Administration of the Ottoman Public Debt as security for the second and subsequent issues of Turkish Government currency notes.

(3) Germany undertakes to deliver, within one month from the coming into force of the present Treaty, to such authority as the Principal Allied and Associated Powers may designate, the gold deposit constituted in the Reichsbank or elsewhere, representing the residue of the advance in gold agreed to on May 5, 1915, by the Council of the Administration of the Ottoman Public Debt to the Imperial Ottoman Government.

(4) Germany agrees to transfer to the Principal Allied and Associated Powers any title that she may have to the sum in gold and silver transmitted by her to the Turkish Ministry of Finance in November, 1918, in anticipation of the payment to be made in May, 1919, for the service of the Turkish Internal Loan.

(5) Germany undertakes to transfer to the Principal Allied and Associated Powers, within a period of one month from the coming into force of the present Treaty, any sums in gold transferred as pledge or as collateral security to the German Government or its nationals in connection with loans made by them to the Austro-Hungarian Government.

(6) Without prejudice to Article 292 of Part X (Economic Clauses) of the present Treaty, Germany confirms the renunciation provided for in Article XV of the Armistice of November 11, 1918, of any benefit disclosed by the

Treaties of Bucharest and of Brest-Litovsk and by the treaties supplementary thereto.

Germany undertakes to transfer, either to Roumania or to the Principal Allied and Associated Powers as the case may be, all monetary instruments, specie, securities and negotiable instruments, or goods, which she has received under the aforesaid Treaties.

(7) The sums of money and all securities, instruments and goods of whatsoever nature, to be delivered, paid and transferred under the provisions of this article, shall be disposed of by the Principal Allied and Associated Powers in a manner hereafter to be determined by these Powers.

Article 260.

Without prejudice to the renunciation of any rights by Germany on behalf of herself or of her nationals in the other provisions of the present Treaty, the Reparation Commission may within one year from the coming into force of the present Treaty demand that the German Government become possessed of any rights and interests of German nationals in any public utility undertaking or in any concession operating in Russia, China, Turkey, Austria, Hungary and Bulgaria, or in the possessions of dependencies of these States or in any territory formerly belonging to Germany or her allies, to be ceded by Germany or her allies to any Power or to be administered by a Mandatory under the present Treaty, and may require that the German Government transfer, within six months of the date of demand, all such rights and interests and any similar rights and interests the German Government may itself possess to the Reparation Commission.

Germany shall be responsible for indemnifying her nationals so dispossessed, and the Reparation Commission shall credit Germany, on account of sums due for reparation, with such sums in respect of the value of the transferred rights and interests as may be assessed by the Reparation Commission, and the German Government shall, within six months from the coming into force of the present Treaty, communicate to the Reparation Commission all such rights and interests, whether already granted, contingent or not yet exercised, and shall renounce on behalf of itself and its nationals in favour of the Allied and Associated Powers, all such rights and interests which have not been so communicated.

Article 261.

Germany undertakes to transfer to the Allied and Associated Powers any claims she may have to payment or repayment by the governments of Austria, Hungary, Bulgaria or Turkey, and, in particular, any claims which may arise, now or hereafter, from the fulfilment of undertakings made by Germany during the war to those Governments.

Article 262.

Any monetary obligation due by Germany arising out of the present Treaty and expressed in terms of gold marks shall be payable at the option of the creditors in pounds sterling payable in London; gold dollars of the United States of America payable in New York; gold francs payable in Paris; or gold lire payable in Rome.

For the purpose of this Article the gold coins mentioned above shall be defined as being of the weight and fineness of gold as enacted by law on Jan. 1, 1914.

Article 263.

Germany gives a guarantee to the Brazilian Government that all sums representing the sale of coffee belonging to the State of Sao Paolo in the ports of Hamburg, Bremen, Antwerp and Trieste, which were deposited with the Bank of Bleichroeder at Berlin, shall be reimbursed together with interest at the rate or rates agreed upon. Germany having prevented the transfer of the sums in question to the State of Sao Paolo at the proper time, guarantees also that the reimbursement shall be effected at the rate of exchange of the day of the deposit.

PART X.

ECONOMIC CLAUSES.

Section 1.

COMMERCIAL RELATIONS.

Chapter I.

Customs Regulations, Duties and Restrictions.

Article 264.

Germany undertakes that goods the produce or manufacture of any one of the Allied or Associated States imported into German territory, from whatsoever place arriving, shall not be subjected to other or higher duties or charges (including internal charges) than those to which the like goods the produce or manufacture of any other such State or of any other foreign country are subject.

Germany will not maintain or impose any prohibition or restriction on the importation into German territory of any goods the produce or manufacture of the territories of any one of the Allied or Associated States, from whatsoever place arriving, which shall not equally extend to the importation of the like goods the produce or manufacture of any other such State or of any other foreign country.

Article 265.

Germany further undertakes that, in the matter of the regime applicable on importation, no discrimination against the commerce of any of the Allied and Associated States as compared with any other of the said States or any other foreign country shall be made, even by indirect means, such as customs regulations or procedure, methods or verification or analysis conditions of payment of duties, tariff classification, or interpretation, or the operation of monopolies.

Article 266.

In all that concerns exportation Germany undertakes that goods, natural products or manufactured articles, exported from German territory to the territories of any one of the Allied or Associated States shall not be subjected to other or higher duties or charges (including internal charges) than those paid on the like goods exported to any other such State or to any other foreign country.

Germany will not maintain or impose any prohibition or restriction on the exportation of any goods sent from her territory to any one of the Allied or Associated States which shall not equally extend to the exportation of the like goods, natural products or manufactured articles, sent to any other such State or to any other foreign country.

Article 267.

Every favour, immunity or privilege in regard to the importation, exportation or transit of goods granted by Germany to any Allied or Associated State or to any other foreign country whatever shall simultaneously and unconditionally, without request and without compensation, be extended to all the Allied and Associated States.

Article 268.

The provisions of Articles 264 to 267 inclusive of this Chapter and of Article 323 of Part XII (Ports, Waterways and Railways) of the present Treaty are subject to the following exceptions:

(a) For a period of five years from the coming into force of the present Treaty, natural or manufactured products which both originate in and come from the territories of Alsace and Lorraine reunited to France shall, on importation into German customs territory, be exempt from all customs duty.

The French Government shall fix each year, by decree communicated to the German Government, the nature and amount of the products which shall enjoy this exemption.

The amount of each product which may be thus sent annually into Germany shall not exceed the average of the amounts sent annually in the years 1911-1913.

Further, during the period above mentioned the German Government shall allow the free export from Germany and the free re-importation into Germany, exempt from all customs duties and other charges (including internal charges), of yarns, tissues and other textile materials or textile products of any kind and in any condition, sent from Germany into the territories of Alsace or Lorraine, to be subjected there to any finishing process, such as bleaching, dyeing, printing, mercerisation, gassing, twisting or dressing.

(b) During a period of three years from the coming into force of the present Treaty natural or manufactured products which both originate in and come from Polish territories which before the war were part of Germany shall, on importation into German customs territory, be exempt from all customs duty.

The Polish Government shall fix each year, by decree communicated to the German Government, the nature and amount of the products which shall enjoy this exemption.

The amount of each product which may be thus sent annually into Germany shall not exceed the average of the amounts sent annually in the years 1911-1913.

(c) The Allied and Associated Powers reserve the right to require Germany to accord freedom from customs duty, on importation into German customs territory, to natural products and manufactured articles which both originate in and come from the Grand Duchy of Luxemburg, for a period of five years from the coming into force of the present Treaty.

The nature and amount of the products which shall enjoy the benefits of this regime shall be communicated each year to the German Government.

The amount of each product which may be thus sent annually into Germany shall not exceed the average of the amounts sent annually in the years 1911-1913.

Article 269.

During the first six months after the coming into force of the present Treaty, the duties imposed by Germany on imports from Allied and Associated States shall not be higher than the most favourable duties which were applied to imports into Germany on July 31, 1914.

During a further period of thirty months after the expiration of the first six months, this provision shall continue to be applied exclusively with regard to products which, being comprised in Section A of the First Category of the German Customs Tariff of December 25, 1902, enjoyed at the above-mentioned date (July 31, 1914) rates conventionalised by treaties with the Allied and Associated Powers, with the addition of all kinds of wine and vegetable oils, or artificial silk and of washed or scoured wool, whether or not they were the subject of special conventions before July 31, 1914.

Article 270.

The Allied and Associated Powers reserve the right to apply to German territory occupied by their troops a special customs regime as regards imports and exports, in the event of such a measure being necessary in their opinion in order to safeguard the economic interests of the population of these territories.

Chapter II.

SHIPPING.

Article 271.

As regards sea fishing, maritime coasting trade and maritime towage, vessels of the Allied and Associated Powers shall enjoy, in German territorial waters, the treatment accorded to vessels of the most favoured nation.

Article 272.

Germany agrees that, notwithstanding any stipulation to the contrary contained in the Conventions relating to the North Sea fisheries and liquor traffic, all rights of inspection and police shall, in the case of fishing boats of the Allied Powers, be exercised solely by ships belonging to those Powers.

Article 273.

In the case of vessels of the Allied or Associated Powers, all classes of certificates or documents relating to the vessel, which were recognised as valid by Germany before the war, or which may hereafter be recognised as valid by the principal maritime States, shall be recognised by Germany as valid and as equivalent to the corresponding certificates issued to German vessels.

A similar recognition shall be accorded to the certificates and documents issued to their vessels by the Governments of new States, whether they have a sea-coast or not, provided that such certificates and documents shall be issued in conformity with the general practice observed in the principal maritime States.

The High Contracting Parties agree to recognise the flag flown by vessels of an Allied or Associated Power having no sea-coast which are registered at some one specified place situated in its territory; such place shall serve as the port of registry of such vessels.

Chapter III.

Unfair Competition.

Article 274.

Germany undertakes to adopt all the necessary legislative and administrative measures to protect goods the produce or manufacture of any one of the Allied and Associated Powers from all forms of unfair competition in commercial transactions.

Germany undertakes to prohibit and repress by seizure and by other appropriate remedies the importation, exportation, manufacture, distribution, sale or offering for sale in its territory of all goods bearing upon themselves or their usual get-up or wrappings any marks, names, devices or description whatsoever which are calculated to convey directly or indirectly a false indication of the origin, type, nature or special characteristics of such goods.

Article 275.

Germany undertakes on condition that reciprocity is accorded in these matters to respect any law, or any administrative or judicial decision given in conformity with such law, in force in any Allied or Associated State and duly communicated to her by the proper authorities, defining or regulating the right to any regional appellation in respect of wine or spirits produced in the State to which the region belongs, or the conditions under which the use of any such appellation may be permitted, and the importation, exportation, manufacture, distribution, sale or offering for sale of products or articles bearing regional appellations inconsistent with such law or order shall be prohibited by the German Government and repressed by the measures prescribed in the preceding article.

Chapter IV.

Treatment of Nationals of Allied and Associated Powers.

Article 276.

Germany undertakes:

(a) Not to subject the nationals of the Allied and Associated Powers to any prohibition in regard to the exercise of occupations, professions, trade and industry, which shall not be equally applicable to all aliens without exception;

(b) Not to subject the nationals of the Allied and Associated Powers in regard to the rights referred to in paragraph (a) to any regulation or restriction which might contravene directly or indirectly the stipulations of the said paragraph, or which shall be other or more disadvantageous than those which are applicable to nationals of the most favoured nation;

(c) Not to subject the nationals of the Allied and Associated Powers, their property, rights or interests, including companies and

associations in which they are interested, to any charge, tax or impost, direct or indirect, other or higher than those which are or may be imposed on her own nationals or their property, rights or interests;

(d) Not to subject the nationals of any one of the Allied and Associated Powers to any restriction which was not applicable on July 1, 1914 to the nationals of such Powers unless such restriction is likewise imposed on her own nationals.

Article 277.

The nationals of the Allied and Associated Powers shall enjoy in German territory a constant protection for their persons and for their property, rights and interests, and shall have free access to the courts of law.

Article 278.

Germany undertakes to recognise any new nationality which has been or may be acquired by her nationals under the laws of the Allied and Associated Powers and in accordance with the decisions of the competent authorities of these Powers pursuant to naturalisation laws or under treaty stipulations, and to regard such persons as having, in consequence of the acquisition of such new nationality, in all respects severed their allegiance to their country of origin.

Article 279.

The Allied and Associated Powers may appoint consuls-general, consuls, vice-consuls, and consular agents in German towns and ports. Germany undertakes to approve the designation of the consuls-general, consuls, vice-consuls, and consular agents, whose names shall be notified to her, and to admit them to the exercise of their functions in conformity with the usual rules and customs.

Chapter V.

General Articles.

Article 280.

The obligations imposed on Germany by Chapter I and by Articles 271 and 272 of Chapter II above shall cease to have effect five years from the date of the coming into force of the present Treaty, unless otherwise provided in the text, or unless the Council of the League of Nations shall, at least twelve months before the expiration of that period, decide that these obligations shall be maintained for a further period with or without amendment.

Article 276 of Chapter IV shall remain in operation, with or without amendment after the period of five years for such further period, if any, not exceeding five years, as may be determined by a majority of the Council of the League of Nations.

Article 281.

If the German Government engages in international trade, it shall not in respect thereof have or be deemed to have any rights, privileges or immunities of sovereignty.

Section II.

TREATIES.

Article 282.

From the coming into force of the present Treaty and subject to the provisions thereof the multilateral treaties, conventions and agreements of an economic or technical character enumerated below and in the subsequent Articles shall alone be applied as between Germany and those of the Allied and Associated Powers party thereto:

(1) Conventions of March 14, 1884, December 1, 1886, and March 23, 1887, and Final Protocol of July 7, 1887, regarding the protection of submarine cables.

(21) Convention of November 29, 1906, regarding the unification of pharmacopœial formulæ for potent drugs.

(22) Convention of November 16 and 19, 1855, regarding the establishment of a concert pitch.

(23) Convention of June 7, 1905, regarding the creation of an International Agricultural Institute at Rome.

(24) Conventions of November 3, 1881, and April 15, 1889, regarding precautionary measures against phylloxera.

(25) Convention of March 19, 1902, regarding the protection of birds useful to agriculture.

(26) Convention of June 12, 1902, as to the protection of minors.

Article 283.

From the coming into force of the present Treaty the High Contracting Parties shall apply the conventions and agreements hereinafter mentioned, in so far as concerns them, on condition that the special stipulations contained in this Article are fulfilled by Germany.

Postal Conventions:

Conventions and agreements of the Universal Postal Union concluded at Vienna, July 4, 1891.

Conventions and agreements of the Postal Union signed at Washington June 15, 1897.

Conventions and agreements of the Postal Union signed at Rome May 26, 1906.

Telegraphic Conventions:

International Telegraphic Conventions signed at St. Petersburg July 10-22, 1875.

Regulations and Tariffs drawn up by the International Telegraphic Conference, Lisbon, June 11, 1908.

Germany undertakes not to refuse her assent to the conclusion by the new States of the special arrangements referred to in the conventions and arrangements relating to the Universal Postal Union and to the International Telegraphic Union, to which the said new States have adhered or may adhere.

Article 284.

From the coming into force of the present Treaty the High Contracting Parties shall apply, in so far as concerns them, the International Radio-Telegraphic Convention of July 5, 1912, on condition that Germany fulfils the provisional regulations which will be indicated to her by the Allied and Associated Powers.

If within five years after the coming into force of the present Treaty a new convention regulating international radio-telegraphic communications should have been concluded to take the place of the Convention of July 5, 1912, this new convention shall bind Germany, even if Germany should refuse either to take part in drawing up the convention, or to subscribe thereto.

This new convention will likewise replace the provisional regulations in force.

Article 285.

From the coming into force of the present Treaty the High Contracting Parties shall apply in so far as concerns them and under the conditions stipulated in Article 272 the conventions hereinafter mentioned:

(1) The Conventions of May 6, 1882, and February 1, 1889, regulating the fisheries in the North Sea outside territorial waters.

(2) The Conventions and Protocols of November 16, 1887, February 14, 1893, and April 11, 1894, regarding the North Sea liquor traffic.

Article 286.

The International Convention of Paris of March 20, 1883, for the protection of industrial property, revised at Washington on June 2, 1911; and the International Convention of Berne of September 9, 1886, for the protection of literary and artistic works, revised at Berlin on November 13, 1908, and completed by the additional Protocols signed at Berne on March 20, 1914, will again come into effect as from the coming into force of the present Treaty, in so far as they are not affected or modified by the exceptions and restrictions resulting therefrom.

Article 287.

From the coming into force of the present Treaty the High Contracting Parties shall apply, in so far as concerns them, the Convention of the Hague of July 17, 1905, relating to civil procedure. This renewal, however, will not apply to France, Portugal and Roumania.

Article 288.

The special rights and privileges granted to Germany by Article 3 of the Convention of December 2, 1899, relating to Samoa shall be considered to have terminated on August 4, 1914.

Article 289.

Each of the Allied or Associated Powers, being guided by the general principles or special provisions of the present Treaty, shall notify to Germany the bilateral treaties or conventions which such Allied or Associated Power wishes to revive with Germany.

The notification referred to in the present Article shall be made either directly or through the intermediary of another Power. Receipt thereof shall be acknowledged in writing by Germany. The date of the revival shall be that of the notification.

The Allied and Associated Powers undertake among themselves not to revive with Germany any conventions or treaties which are not in accordance with the terms of the present Treaty.

The notification shall mention any provisions of the said conventions and treaties which, not being in accordance with the terms of the present Treaty, shall not be considered as revived.

In case of any difference of opinion, the League of Nations will be called on to decide.

A period of six months from the coming into force of the present Treaty is allowed to the Allied and Associated Powers within which to make the notification.

Only those bilateral treaties and conventions which have been the subject of such a notification shall be revived between the Allied and Associated Powers and Germany; all the others are and shall remain abrogated.

The above regulations apply to all bilateral treaties or conventions existing between all the Allied and Associated Powers signatories to the present Treaty and Germany, even if the said Allied and Associated Powers have not been in a state of war with Germany.

Article 290.

Germany recognises that all the treaties, conventions or agreements which she has concluded with Austria, Hungary, Bulgaria or Turkey since August 1, 1914, until the coming into force of the present Treaty are and remain abrogated by the present Treaty.

Article 291.

Germany undertakes to secure to the Allied and Associated Powers, and to the officials and nationals of the said Powers, the enjoyment of all the rights and advantages of any kind which she may have granted to Austria, Hungary, Bulgaria or Turkey, or to the officials and nationals of these States by treaties, conventions or arrangements concluded before August 1, 1914, so long as those treaties, conventions or arrangements remain in force.

The Allied and Associated Powers reserve the right to accept or not the enjoyment of these rights and advantages.

Article 292.

Germany recognises that all treaties, conventions or arrangements which she concluded with Russia, or with any State or Government of which the territory previously formed a part of Russia, or with Roumania, before August 1, 1914, or after that date until coming into force of the present Treaty, are and remain abrogated.

Article 293.

Should an Allied or Associated Power, Russia, or a State or Government of which the territory formerly constituted a part of Russia, have been forced since August 1, 1914, by reason of military occupation or by any other means or for any other cause, to grant or to allow to be granted by the act of any public authority, concessions, privileges and favours of any kind to Germany or to a German national, such concessions, privileges and favours are ipso facto annulled by the present Treaty.

No claims or indemnities which may result from this annulment shall be charged against the Allied or Associated Powers or the Powers, States, Governments or public authorities which are released from their engagements by the present Article.

Article 294.

From the coming into force of the present Treaty Germany undertakes to give the Allied and Associated Powers and their nationals the benefit ipso facto of the rights and advantages of any kind which she has granted by treaties, conventions, or arrangements to non-belligerent States or their nationals since August 1, 1914, until the coming into force of the present Treaty, so long as those treaties, conventions or arrangements remain in force.

Article 295.

Those of the High Contracting Parties who have not yet signed, or who have signed but not yet ratified, the Opium Convention signed at The Hague on January 23, 1912, agree to bring the said Convention into force, and for this purpose to enact the necessary legislation without delay and in any case within a period of twelve months from the coming into force of the present Treaty.

Furthermore, they agree that ratification of the present Treaty should in the case of Powers which have not yet ratified the Opium Convention be deemed in all respects equivalent to the ratification of that Convention and to the signature of the Special Protocol which

was opened at The Hague in accordance with the resolutions adopted by the Third Opium Conference in 1914 for bringing the said Convention into force.

For this purpose the Government of the French Republic will communicate to the Government of the Netherlands a certified copy of the protocol of the deposit of ratifications of the present Treaty, and will invite the Government of the Netherlands to accept and deposit the said certified copy as if it were a deposit of ratifications of the Opium Convention and a signature of the Additional Protocol of 1914.

Section III.

DEBTS.

Article 296.

There shall be settled through the intervention of clearing offices to be established by each of the High Contracting Parties within three months of the notification referred to in paragraph (e) hereafter the following classes of pecuniary obligations:

(1) Debts payable before the war and due by a national of one of the Contracting Powers, residing within its territory, to a national of an Opposing Power, residing within its territory.

(2) Debts which became payable during the war to nationals of one Contracting Power residing within its territory and arose out of transactions or contracts with the nationals of an Opposing Power, resident within its territory, of which the total or partial execution was suspended on account of the declaration of war.

(3) Interest which has accrued due before and during the war to a national of one of the Contracting Powers in respect of securities issued by an Opposing Power, provided that the payment of interest on such securities to the nationals of that Power or to neutrals has not been suspended during the war.

(4) Capital sums which have become payable before and during the war to nationals of one of the Contracting Powers in respect of securities issued by one of the Opposing Powers, provided that the payment of such capital sums to nationals of that Power or to neutrals has not been suspended during the war.

The proceeds of liquidation of enemy property, rights and interests mentioned in Section IV and in the Annex thereto will be accounted for through the Clearing Offices, in the currency and at the rate of exchange hereinafter provided in paragraph (d), and disposed of by them under the conditions provided by the said Section and Annex.

The settlements provided for in this Article shall be effected according to the following principles and in accordance with the Annex to this Section:

(a) Each of the High Contracting Parties shall prohibit, as from the coming into force of the present Treaty, both the payment and the acceptance of payment of such debts, and also all communications between the interested parties with regard to the settlement of the said debts otherwise than through the clearing offices.

(b) Each of the High Contracting Parties shall be respectively responsible for the payment of such debts due by its nationals, except in the cases where before the war the debtor was in a state of bankruptcy or failure, or had given formal indication of insolvency or where the debt was due by a company whose business has been liquidated under emergency legislation during the war. Nevertheless, debts due by the inhabitants on territory invaded or occupied by the enemy before the Armistice will not be guaranteed by the States of which those territories form part.

(c) The sums due to the nationals of one of the High Contracting Parties by the nationals of an Opposing State will be debited to the Clearing Office of the country of the debtor, and paid to the creditor by the Clearing Office of the country of the creditor.

(d) Debts shall be paid or credited in the currency of such one of the Allied and Associated Powers, their colonies or protectorates or the British Dominions or India, as may be concerned. If the debts are payable in some other currency they shall be paid or credited in the currency of the country concerned, whether an Allied or Associated Power, Colony, Protectorate, British Dominion or India, at the pre-war rate of exchange.

For the purpose of this provision the pre-war rate of exchange shall be defined as the average cable transfer rate prevailing in the Allied or Associated country concerned during the month immediately preceding the outbreak of war between the said country concerned and Germany.

If a contract provides for a fixed rate of exchange governing the conversion of the currency in which the debt is stated into the currency of the Allied or Associated country concerned, then the above provisions concerning the rate of exchange shall not apply.

In the case of new States the currency in which and the rate of exchange at which debts shall be paid or credited shall be determined by the Reparation Commission provided for in Part VIII (Reparation);

(e) The provisions of this Article and of the Annex hereto shall not apply as between Germany on the one hand and any one of the Allied and Associated Powers, their colonies or protectorates or any one of the British Dominions or India on the other hand, unless within a period of one month from the deposit of the ratification of the present Treaty by the Power in question, or of the ratification on behalf of such Dominion or of India, notice to that effect is given to Germany by the Government of such Allied or Associated Power or of such Dominion or of India as the case may be;

(f) The Allied and Associated Powers who have adopted this Article and the Annex hereto may agree between themselves to apply them to their respective nationals established in their territory so far as regards matters between their nationals and German nationals. In this case the payments made by application of the provision will be subject to arrangements between the Allied and Associated Clearing Offices concerned.

ANNEX.

1.

Each of the High Contracting Parties will, within three months from the notification provided for in Article 296, paragraph (e), establish a Clearing Office for the collection and payment of enemy debts.

Local Clearing Offices may be established for any particular portions of the territories of the High Contracting Parties. Such local Clearing Offices may perform all the functions of a central Clearing Office in their respective districts, except that all transactions with the Clearing Office in the Opposing State must be effected through the central Clearing Office.

2.

In this Annex the pecuniary obligations referred to in the first paragraph of Article 296 are described as "enemy debts", the persons from whom the same are due as "enemy debtors", the persons to whom they are due as "enemy creditors", the Clearing Office in the country of the creditor is called the "Creditor Clearing Office", and the Clearing Office in the country of the debtor is called the "Debtor Clearing Office."

3.

The High Contracting Parties will subject contraventions of paragraph (a) of Article 296 to the same penalties as are at present provided by their legislation for trading with the enemy. They will similarly prohibit within their territory all legal process relating to payment of enemy debts except in accordance with the provisions of this Annex.

4.

The Government guarantee specified in paragraph (b) of Article 296 shall take effect whenever, for any reason, a debt shall not be recoverable, except in a case where at the date of the outbreak of war the debt was barred by the laws of prescription in force in the country of the debtor, or where the debtor was at that time in a state of bankruptcy or failure or had given formal indication of insolvency or where the debt was due by a company whose business has been liquidated under emergency legislation during the war. In such case the procedure specified by this Annex shall apply to payment of the dividends.

The terms "bankruptcy" and "failure" refer to the application of legislation providing for such juridical conditions. The expression "formal indication of insolvency" bears the same meaning as it has in English law.

5.

Creditors shall give notice to the Creditor Clearing Office within six months of its establishment of debts due to them, and shall furnish the Clearing Office with any documents and information required of them.

The High Contracting Parties will take all suitable measures to trace and punish collusion between enemy creditors and debtors. The Clearing Offices will communicate to one another any evidence and information which might help the discovery and punishment of such collusion.

The High Contracting Parties will facilitate as much as possible postal and telegraphic communication at the expense of the parties concerned and through the intervention of the Clearing Offices between debtors and creditors desirous of coming to an agreement as to the amount of their debt.

The Creditor Clearing Office will notify the Debtor Clearing Office of all debts declared to it. The Debtor Clearing Office will, in due course, inform the Creditor Clearing Office which debts are admitted and which debts are contested. In the latter case the Debtor Clearing Office will give the grounds for the non-admission of debt.

6.

When a debt has been admitted, in whole or in part, the Debtor Clearing Office will at once credit the Creditor Clearing Office with the amount admitted, and at the same time notify it of such credit.

7.

The debt shall be deemed to be admitted in full and shall be credited forthwith to the Creditor Clearing Office unless within three months from the receipt of the notification or such longer time as may be agreed to by the Creditor Clearing Office notice has been given by the Debtor Clearing Office that it is not admitted.

8.

When the whole or part of a debt is not admitted the two Clearing Offices will examine into the matter jointly and will endeavour to bring the parties to an agreement.

9.

The Creditor Clearing Office will pay to the individual creditor the sums credited to it out of the funds placed at its disposal by the Government of its country and in accordance with the conditions fixed by the said Government, retaining any sums considered necessary to cover risks, expenses or commissions.

10.

Any person having claimed payment of an enemy debt which is not admitted in whole or in part shall pay to the Clearing Office, by way of fine, interest at 5 per cent. on the part not admitted. Any person having unduly refused to admit the whole or part of a debt claimed from him shall pay, by way of fine, interest at 5 per cent. on the amount with regard to which his refusal shall be disallowed.

Such interest shall run from the date of expiration of the period provided for in paragraph 7 until the date on which the claim shall have been disallowed or the debt paid.

Each Clearing Office shall in so far as it is concerned take steps to collect the fines above provided for, and will be responsible if such fines cannot be collected.

The fines will be credited to the other Clearing Office, which shall retain them as a contribution towards the cost of carrying out the present provisions.

11.

The balance between the Clearing Offices shall be struck monthly and the credit balance paid in cash by the debtor State within a week.

Nevertheless, any credit balances which may be due by one or more of the Allied and Associated Powers shall be retained until complete payment shall have been effected of the sums due to the Allied or Associated Powers or their nationals on account of the war.

12.

To facilitate discussion between the Clearing Offices each of them shall have a representative at the place where the other is established.

13.

Except for special reasons, all discussions in regard to claims will, so far as possible, take place at the Debtor Clearing Office.

14.

In conformity with Article 296, paragraph (b), the High Contracting Parties are responsible for the payment of the enemy debts owing by their nationals.

The Debtor Clearing Office will therefore credit the Creditor Clearing Office with all debts admitted, even in case of inability to collect them from the individual debtor. The Governments concerned will, nevertheless, invest their respective Clearing Offices with all necessary powers for the recovery of debts which have been admitted.

As an exception, the admitted debts owing by persons having suffered injury from acts of war shall only be credited to the Creditor Clearing Office when the compensation due to the person concerned in respect of such injury shall have been paid.

15.

Each Government will defray the expenses of the Clearing Office set up in its territory, including the salaries of the staff.

16.

Where the two Clearing Offices are unable to agree whether a debt claimed is due, or in case of a difference between an enemy debtor and an enemy creditor or between the Clearing Offices, the dispute shall either be referred to arbitration if the parties so agree under conditions fixed by agreement between them, or referred to the Mixed Arbitral Tribunal provided for in Section VI hereafter.

At the request of the Creditor Clearing Office the dispute may, however, be submitted to the jurisdiction of the Courts of the place of domicile of the debtor.

17.

Recovery of sums found by the Mixed Arbitral Tribunal, the Court, or the Arbitration Tribunal to be due shall be effected through the Clearing Offices as if these sums were debts admitted by the Debtor Clearing Office.

18.

Each of the Governments concerned shall appoint an agent who will be responsible for the presentation to the Mixed Arbitral Tribunal of the cases conducted on behalf of its Clearing Office. This agent will exercise a general control over the representatives or counsel employed by its nationals.

Decisions will be arrived at on documentary evidence, but it will be open to the Tribunal

to hear the parties in person, or according to their preference by their representatives approved by the two Governments, or by the agent referred to above, who shall be competent to intervene along with the party or to reopen and maintain a claim abandoned by the same.

19.

The Clearing Offices concerned will lay before the Mixed Arbitral Tribunal all the information and documents in their possession, so as to enable the Tribunal to decide rapidly on the cases which are brought before it.

20.

Where one of the parties concerned appeals against the joint decision of the two Clearing Offices he shall make a deposit against the costs which deposit shall only be refunded when the first judgment is modified in favour of the appellant and in proportion to the success he may attain, his opponent in case of such a refund being required to pay an equivalent proportion of the costs and expenses. Security accepted by the Tribunal may be substituted for a deposit.

A fee of 5 per cent. of the amount in dispute shall be charged in respect of all cases brought before the Tribunal. This fee shall, unless the Tribunal directs otherwise, be borne by the unsuccessful party. Such fee shall be added to the deposit referred to. It is also independent of the security.

The Tribunal may award to one of the parties a sum in respect of the expenses of the proceedings.

Any sum payable under this paragraph shall be credited to the Clearing Office of the successful party as a separate item.

21.

With a view to the rapid settlement of claims due regard shall be paid in the appointment of all persons connected with the Clearing Offices or with the Mixed Arbitral Tribunal to their knowledge of the language of the other country concerned.

Each of the Clearing Offices will be at liberty to correspond with the other and to forward documents in its own language.

22.

Subject to any special agreement to the contrary between the Governments concerned, debts shall carry interest in accordance with the following provisions:

Interest shall not be payable on sums of money due by way of dividend, interest or other periodical payments which themselves represent interest on capital.

The rate of interest shall be 5 per cent. per annum except in cases where, by contract, law or custom, the creditor is entitled to payment of interest at a different rate. In such cases the rate to which he is entitled shall prevail.

Interest shall run from the date of commencement of hostilities (or, if the sum of money to be recovered fell due during the war from the date at which it fell due) until the sum is credited to the Clearing Office of the creditor.

Sums due by way of interest shall be treated as debts admitted by the Clearing Offices and shall be credited to the Creditor Clearing Office in the same way as such debts.

23.

Where by decision of the Clearing Offices or the Mixed Arbitral Tribunal a claim is held not to fall within Article 296, the creditor shall be at liberty to prosecute the claim before the Courts or to take such other proceedings as may be open to him.

The presentation of a claim to the Clearing Office suspends the operation of any period of prescription.

24.

The High Contracting Parties agree to regard the decisions of the Mixed Arbitral Tribunal as final and conclusive, and to render them binding upon their nationals.

25.

In any case where a Creditor Clearing Office declines to notify a claim to the Debtor Clearing Office, or to take any step provided for in this Annex, intended to make effective in whole or in part a request of which it has received due notice, the enemy creditor shall be entitled to receive from the Clearing Office a certificate setting out the amount of the claim, and shall then be entitled to prosecute the claim before the courts or to take such other proceedings as may be open to him.

Section IV.

PROPERTY, RIGHTS AND INTERESTS.

Article 297.

The question of private property, rights and interests in an enemy country shall be settled according to the principles laid down in this Section and to the provisions of the Annex hereto.

(a) The exceptional war measures and measures of transfer (defined in paragraph 3 of the Annex hereto) taken by Germany with respect to the property, rights and interests of nationals of Allied or Associated Powers, including companies and associations in which they are interested, when liquidation has not been completed, shall be immediately discontinued or stayed and the property, rights and interests concerned restored to their owners, who shall enjoy full rights therein in accordance with the provisions of Article 298.

(b) Subject to any contrary stipulations which may be provided for in the present Treaty, the Allied and Associated Powers reserve the right to retain and liquidate all property, rights and interests belonging at the date of the coming into force of the present Treaty to German nationals, or companies controlled by them, within their territories, colonies, possessions and protectorates, including territories ceded to them by the present Treaty.

The liquidation shall be carried out in accordance with the laws of the Allied or Associated State concerned, and the German owner shall not be able to dispose of such property, rights or interests nor to subject them to any charge without the consent of that State.

German nationals who acquire ipso facto the nationality of an Allied or Associated Power in accordance with the provisions of the present Treaty will not be considered as German nationals within the meaning of this paragraph.

(c) The price or the amount of compensation in respect of the exercise of the right referred to in the preceding paragraph (b) will be fixed in accordance with the methods of sale or valuation adopted by the laws of the country in which the property has been retained or liquidated.

(d) As between the Allied and Associated Powers or their nationals on the one hand and Germany or her nationals on the other hand, all the exceptional war measures, or measures of transfer, or acts done or to be done in execution of such measures as defined in paragraphs 1 and 3 of the Annex hereto shall be considered as final and binding upon all persons except as regards the reservations laid down in the present Treaty.

(e) The nationals of Allied and Associated Powers shall be entitled to compensation in respect of damage or injury inflicted upon their property, rights or interests, including any company or association in which they are interested, in German territory as it existed on August 1, 1914, by the application either of the exceptional war measures or measures of transfer mentioned in paragraphs 1 and 3 of the Annex hereto. The claims made in this respect by such nationals shall be investigated, and the total of the compensation shall be determined by the Mixed Arbitral Tribunal pro-

vided for in Section VI or by an Arbitrator appointed by that Tribunal. This compensation shall be borne by Germany, and may be charged upon the property of German nationals within the territory or under the control of the claimant's State. This property may be constituted as a pledge for enemy liabilities under the conditions fixed by paragraph 4 of the Annex hereto. The payment of this compensation may be made by the Allied or Associated State and the amount will be debited to Germany.

(f) Whenever a national of an Allied or Associated Power is entitled to property which has been subjected to a measure of transfer in German territory and expresses a desire for its restitution, his claim for compensation in accordance with paragraph (e) shall be satisfied by the restitution of the said property if it still exists in specie.

In such case Germany shall take all necessary steps to restore the evicted owner to the possession of his property, free from all encumbrances or burdens with which it may have been charged after the liquidation, and to indemnify all third parties injured by the restitution.

If the restitution provided for in this paragraph cannot be effected, private agreements arranged by the intermediation of the Powers concerned or the Clearing Offices provided for in the Annex to Section III may be made, in order to secure that the national of the Allied or Associated Power may secure compensation for the injury referred to in paragraph (e) by the grant of advantages or equivalents which he agrees to accept in place of the property, rights or interests of which he was deprived.

Through restitution in accordance with this Article, the price or the amount of compensation fixed by the application of paragraph (e) will be reduced by the actual value of the property restored, account being taken of compensation in respect of loss of use or deterioration.

(g) The rights conferred by paragraph (f) are reserved to owners who are nationals of Allied or Associated Powers within whose territory legislative measures prescribing the general liquidation of enemy property, rights or interests were not applied before the signature of the Armistice.

(h) Except in cases where, by application of paragraph (f), restitutions in specie have been made, the net proceeds of sales of enemy property, rights or interest wherever situated carried out either by virtue of war legislation, or by application of this Article, and in general all cash assets of enemies, shall be dealt with as follows:

(1) As regards Powers adopting Section III and the Annex thereto, the said proceeds and cash assets shall be credited to the Power of which the owner is a national, through the Clearing Office established thereunder; any credit balance in favour of Germany resulting therefrom shall be dealt with as provided in Article 243.

(2) As regards Powers not adopting Section III and the Annex thereto, the proceeds of the property, rights and interests, and the cash assets, of the nationals of Allied or Associated Powers held by Germany shall be paid immediately to the person entitled thereto or to his Government; the proceeds of the property, rights and interests, and the cash assets, of German nationals received by an Allied or Associated Power shall be subject to disposal by such Power in accordance with its laws and regulations and may be applied in payment of the claims and debts defined by this Article or paragraph 4 of the Annex hereto. Any property, rights and interests or proceeds thereof or cash assets not used as above provided may be retained by the said Allied or Associated Power and if retained the cash value thereof shall be dealt with as provided in Article 243.

In the case of liquidations effected in new States which are signatories of the present Treaty as Allied and Associated Powers, or in States which are not entitled to share in the reparation payments to be made by Germany, the proceeds of liquidations effected by such States shall, subject to the rights of the Reparation Commission under the present Treaty, particularly under Articles 235 and 260, be paid direct to the owner. If on the application of that owner, the Mixed Arbitral Tribunal, provided for by Section VI of this Part, or an Arbitrator appointed by that Tribunal, is satisfied that the conditions of the sale or measures taken by the Government of the State in question outside its general legislation were unfairly prejudicial to the price obtained, they shall have discretion to award to the owner equitable compensation to be paid by that State.

(i) Germany undertakes to compensate her nationals in respect of the sale or retention of their property, rights or interests in Allied or Associated States.

(j) The amount of all taxes and imposts upon capital levied or to be levied by Germany on the property, rights and interests of the nationals of the Allied or Associated Powers from November 11, 1918, until three months from the coming into force of the present Treaty, or, in the case of property, rights or interests which have been subjected to exceptional measures of war, until restitution in accordance with the present Treaty, shall be restored to the owners.

Article 298.

Germany undertakes, with regard to the property, rights and interests, including companies and associations in which they were interested, restored to nationals of Allied and Associated Powers in accordance with the provisions of Article 297, paragraph (a) or (f):

(a) to restore and maintain, except as expressly provided in the present Treaty, the property, rights and interests of the nationals of Allied or Associated Powers in the legal position obtaining in respect of the property, rights and interests of German nationals under the laws in force before the war;

(b) not to subject the property, rights or interests of the nationals of the Allied or Associated Powers to any measures in derogation of property rights which are not applied equally to the property, rights and interests of German nationals, and to pay adequate compensation in the event of the application of these measures.

ANNEX.

1.

In accordance with the provisions of Article 297, paragraph (d), the validity of vesting orders and of orders for the winding up of businesses or companies, and of any other orders, directions, decisions or instructions of any court or any department of the Government of any of the High Contracting Parties made or given, or purporting to be made or given, in pursuance of war legislation with regard to enemy property, rights and interests is confirmed. The interests of all persons shall be regarded as having been effectively dealt with by any order, direction, decision or instruction dealing with property in which they may be interested, whether or not such interests are specifically mentioned in the order, direction, decision or instruction. No question shall be raised as to the regularity of a transfer of any property, rights or interests dealt with in pursuance of any such order, direction, decision or instruction. Every action taken with regard to any property, business, or company, whether as regards its investigation, sequestration, compulsory administration, use, requisition, supervision, or winding up, the sale or management of property, rights or interests, the collection or discharge of debts, the payment of costs, charges or expenses, or any other mat-

ter whatsoever, in pursuance of orders, directions, decisions or instructions of any court or of any department of the Government of any of the High Contracting Parties, made or given, or purporting to be made or given, in pursuance of war legislation with regard to enemy property, rights or interests, is confirmed. Provided that the provisions of this paragraph shall not be held to prejudice the titles to property heretofore acquired in good faith and for value and in accordance with the laws of the country in which the property is situated by nationals of the Allied and Associated Powers.

The provisions of this paragraph do not apply to such of the above-mentioned measures as have been taken by the German authorities in invaded or occupied territory, nor to such of the above-mentioned measures as have been taken by Germany or the German authorities since November 11, 1918, all of which shall be void.

2.

No claim or action shall be made or brought against any Allied or Associated Power or against any person acting on behalf of or under the direction of any legal authority or Department of the Government of such a Power by Germany or by any German national wherever resident in respect of any act or omission with regard to his property, rights or interests during the war or in preparation for the war. Similarly no claim or action shall be made or brought against any person in respect of any act or omission under or in accordance with the exceptional war measures, laws or regulations of any Allied or Associated Power.

3.

In Article 297 and this Annex the expression "exceptional war measures" includes measures of all kinds, legislative, administrative, judicial or others, that have been taken or will be taken hereafter with regard to enemy property, and which have had or will have the effect of removing from the proprietors the power of disposition over their property, though without affecting the ownership, such as measures of supervision, of compulsory administration, and of sequestration; or measures which have had or will have as an object the seizure of, the use of, or the interference with enemy assets, for whatsoever motive, under whatsoever form or in whatsoever place. Acts in the execution of these measures include all detentions, instructions, orders or decrees of Government departments or courts applying these measures to enemy property, as well as acts performed by any person connected with the administration or the supervision of enemy property, such as the payment of debts, the collecting of credits, the payment of any costs, charges or expenses, or the collecting of fees.

Measures of transfer are those which have affected or will affect the ownership of enemy property by transferring it in whole or in part to a person other than the enemy owner, and without his consent, such as measures directing the sale, liquidation, or devolution of ownership in enemy property, or the cancelling of titles or securities.

4.

All property, rights and interests of German nationals within the territory of any Allied or Associated Power and the net proceeds of their sale, liquidation or other dealing therewith may be charged by that Allied or Associated Power in the first place with payment of amounts due in respect of claims by the nationals of that Allied or Associated Power with regard to their property, rights and interests, including companies and associations in which they are interested, in German territory, or debts owing to them by German nationals, and with payment of claims growing out of acts committed by the German Government or by any German authorities since July 31, 1914, and before that Allied or Associated Power entered into the war. The amount of such claims may be assessed by an arbitrator appointed by Mr. Gustave Ador, if he is willing, or if no such appointment is made by him, by an arbitrator appointed by the Mixed Arbitral Tribunal provided for in Section VI. They may be charged in the second place with payment of the amounts due in respect of claims by the nationals of such Allied or Associated Power with regard to their property, rights and interests in the territory of other enemy Powers, in so far as those claims are otherwise unsatisfied.

5.

Notwithstanding the provisions of Article 297, where immediately before the outbreak of war a company incorporated in an Allied or Associated State had rights in common with a company controlled by it and incorporated in Germany to the use of trade-marks in third countries, or enjoyed the use in common with such company of unique means of reproduction of goods or articles for sale in third countries, the former company shall alone have the right to use these trade-marks in third countries to the exclusion of the German company, and these unique means of reproduction shall be handed over to the former company, notwithstanding any action taken under German war legislation with regard to the latter company or its business, industrial property or shares. Nevertheless, the former company, if requested, shall deliver the latter company derivative copies permitting the continuation of reproduction of articles for use within German territory.

6.

Up to the time when restitution is carried out in accordance with Article 297, Germany is responsible for the conservation of property, rights and interests of the nationals of Allied or Associated Powers, including companies and associations in which they are interested, that have been subjected by her to exceptional war measures.

7.

Within one year from the coming into force of the present Treaty the Allied or Associated Powers will specify the property, rights and interests over which they intend to exercise the right provided in Article 297, paragraph (f).

8.

The restitution provided in Article 297 will be carried out by order of the German Government or of the authorities which have been substituted for it. Detailed accounts of the action of administrators shall be furnished to the interested persons by the German authorities upon request, which may be made at any time after the coming into force of the present Treaty.

9.

Until completion of the liquidation provided for by Article 297, paragraph (b), the property, rights and interests of German nationals will continue to be subject to exceptional war measures that have been or will be taken with regard to them.

10.

Germany will, within six months from the coming into force of the present Treaty, deliver to each Allied or Associated Power all securities, certificates, deeds, or other documents of title held by its nationals and relating to property, rights or interests situated in the territory of that Allied or Associated Power, including any shares, stock, debentures, debenture stock, or other obligations of any company incorporated in accordance with the laws of that Power.

Germany will at any time on demand of any Allied or Associated Power furnish such information as may be required with regard to the property, rights and interests of German nationals within the territory of such Allied or Associated Power, or with regard to any transactions concerning such property, rights or interests effected since July 1, 1914.

11.

The expression "cash assets" includes all deposits or funds established before or after the declaration of war, as well as all assets coming from deposits, revenues or profits collected by administrators, sequestrators or others from funds placed on deposit or otherwise, but does not include sums belonging to the Allied or Associated Powers or to their component States, Provinces, or Municipalities.

12.

All investments wheresoever effected with the cash assets of nationals of the High Contracting Parties, including companies and associations in which such nationals were interested, by persons responsible for the administration of enemy properties or having control over such administration, or by order of such persons or of any authority whatsoever shall be annulled. These cash assets shall be accounted for irrespective of any such investment.

13.

Within one month from the coming into force of the present Treaty, or on demand at any time, Germany will deliver to the Allied and Associated Powers all accounts, vouchers, records, documents and information of any kind which may be within German territory and which concern the property, rights and interests of the nationals of those Powers, including companies and associations in which they are interested, that have been subjected to an exceptional war measure, or to a measure of transfer either in German territory or in territory occupied by Germany or her allies.

The controllers, supervisors, managers, administrators, sequestrators, liquidators and receivers shall be personally responsible under guarantee of the German Government for the immediate delivery in full of these accounts and documents, and for their accuracy.

14.

The provisions of Article 297 and this Annex relating to property, rights and interests in an enemy country, and the proceeds of the liquidation thereof, apply to debts, credits and accounts, Section III regulating only the method of payment.

In the settlement of matters provided for in Article 297 between Germany and the Allied or Associated States, their colonies or protectorates, or any one of the British Dominions or India, in respect of any of which a declaration shall not have been made that they adopt Section III, and between their respective nationals the provisions of Section III respecting the currency in which payment is to be made and the rate of exchange and of interest shall apply unless the Government of the Allied or Associated Power concerned shall within six months of the coming into force of the present Treaty notify Germany that the said provisions are not to be applied.

15.

The provisions of Article 297 and this Annex apply to industrial, literary and artistic property which has been or will be dealt with in the liquidation of property, rights, interests, companies or businesses under war legislation by the Allied or Associated Powers, or in accordance with the stipulations of Article 297, paragraph (b).

Section V.

CONTRACTS, PRESCRIPTIONS, JUDGMENTS.

Article 299.

(a) Any contract concluded between enemies shall be regarded as having been dissolved as from the time when any two of the parties became enemies, except in respect of any debt or other pecuniary obligation arising out of any act done or money paid thereunder, and subject to the exceptions and special rules with regard to particular contracts or classes of contracts contained herein or in the Annex hereto.

(b) Any contract of which the execution shall be required in the general interest, within six months from the date of the coming into force of the present Treaty, by the Allied or Associated Governments of which one of the parties is a national, shall be excepted from dissolution under this Article.

When the execution of the contract thus kept alive would, owing to the alteration of trade conditions, cause one of the parties substantial prejudice the Mixed Arbitral Tribunal provided for by Section VI shall be empowered to grant to the prejudiced party equitable compensation.

(c) Having regard to the provisions of the constitution and law of the United States of America, of Brazil and of Japan, neither the present Article nor Article 300, nor the Annex hereto shall apply to contracts made between nationals of these States and German nationals; nor shall Article 305 apply to the United States of America or its nationals.

(d) The present Article and the Annex hereto shall not apply to contracts the parties to which became enemies by reason of one of them being an inhabitant of territory of which the sovereignty has been transferred, if such party shall acquire under the present Treaty the nationality of an Allied or Associated Power, nor shall they apply to contracts between nationals of the Allied and Associated Powers between whom trading has been prohibited by reason of one of the parties being in Allied or Associated territory in the occupation of the enemy.

(e) Nothing in the present Article or the Annex hereto shall be deemed to invalidate a transaction lawfully carried out in accordance with a contract between enemies if it has been carried out with the authority of one of the belligerent Powers.

Article 300.

(a) All periods of prescription, or limitation of right of action, whether they began to run before or after the outbreak of war, shall be treated in the territory of the High Contracting Parties, so far as regards relations between enemies, as having been suspended for the duration of the war. They shall begin to run again at earliest three months after the coming into force of the present Treaty. This provision shall apply to the period prescribed for the presentation of interest or dividend coupons or for the presentation for repayment of securities drawn for repayment or repayable on any other ground.

(b) Where, on account of failure to perform any act or comply with any formality during the war, measures of execution have been taken in German territory to the prejudice of a national of an Allied or Associated Power, the claim of such national shall, if the matter does not fall within the competence of the Courts of an Allied or Associated Power, be heard by the Mixed Arbitral Tribunal provided for by Section VI.

(c) Upon the application of any interested person who is a national of an Allied or Associated Power the Mixed Arbitral Tribunal shall order the restoration of the rights which have been prejudiced by the measures of execution referred to in paragraph (b), wherever, having regard to the particular circumstances of the case, such restoration is equitable and possible.

If such restoration is inequitable or impossible the Mixed Arbitral Tribunal may grant compensation to the prejudiced party to be paid by the German Government.

(d) Where a contract between enemies has been dissolved by reason either of failure on the part of either party to carry out its provisions or of the exercise of a right stipulated in the contract itself the party prejudiced may apply to the Mixed Arbitral Tribunal for relief. The Tribunal will have the powers provided for in paragraph (c).

(e) The provisions of the preceding paragraphs of this Article shall apply to the na-

tionals of Allied and Associated Powers who have been prejudiced by reason of measures referred to above taken by Germany in invaded or occupied territory, if they have not been otherwise compensated.

(f) Germany shall compensate any third party who may be prejudiced by any restitution or restoration ordered by the Mixed Arbitral Tribunal under the provisions of the preceding paragraphs of this Article.

(g) As regards negotiable instruments, the period of three months provided under paragraph (a) shall commence as from the date on which any exceptional regulations applied in the territories of the interested Power with regard to negotiable instruments shall have definitely ceased to have force.

Article 301.

As between enemies no negotiable instrument made before the war shall be deemed to have become invalid by reason only of failure within the required time to present the instrument for acceptance or payment or to give notice of non-acceptance or non-payment to drawers or indorsers or to protest the instrument, nor by reason of failure to complete any formality during the war.

Where the period within which a negotiable instrument should have been presented for acceptance or for payment, or within which notice of non-acceptance or non-payment should have been given to the drawer or indorser, or within which the instrument should have been protested, has elapsed during the war, and the party who should have presented or protested the instrument or have given notice of non-acceptance or non-payment has failed to do so during the war, a period of not less than three months from the coming into force of the present Treaty shall be allowed within which presentation, notice of non-acceptance or non-payment or protest may be made.

Article 302.

Judgments given by the Courts of an Allied or Associated Power in all cases, which, under the present Treaty, they are competent to decide, shall be recognised in Germany as final, and shall be enforced without it being necessary to have them declared executory.

If a judgment in respect to any dispute which may have arisen has been given during the war by a German Court against a national of an Allied or Associated State in a case in which he was not able to make his defence, the Allied or Associated national who has suffered prejudice thereby shall be entitled to recover compensation, to be fixed by the Mixed Arbitral Tribunal provided for in Section VI.

At the instance of the national of the Allied or Associated Power the compensation abovementioned may, upon order to that effect of the Mixed Arbitral Tribunal, be effected where it is possible by replacing the parties in the situation which they occupied before the judgment was given by the German Court.

The above compensation may likewise be obtained before the Mixed Arbitral Tribunal by the nationals of Allied or Associated Powers who have suffered prejudice by judicial measures taken in invaded or occupied territories, if they have not been otherwise compensated.

Article 303.

For the purpose of Sections III, IV, V and VII, the expression "during the war" means for each Allied or Associated Power the period between the commencement of the state of war between that Power and Germany and the coming into force of the present Treaty.

ANNEX.

I. General Provisions.

1.

Within the meaning of Articles 299, 300 and 301, the parties to a contract shall be regarded as enemies when trading between them shall have been prohibited or otherwise became unlawful under laws, orders or regulations to which one of those parties was subject. They shall be deemed to have become enemies from the date when such trading was prohibited or otherwise became unlawful.

2.

The following classes of contracts are excepted from dissolution by Article 299 and, without prejudice to the rights contained in Article 297 (b) of Section IV, remain in force subject to the application of domestic laws, orders or regulations made during the war by the Allied and Associated Powers and subject to the terms of the contracts:

(a) Contracts having for their object the transfer of estates or of real or personal property where the property therein had passed or the object had been delivered before the parties became enemies;

(b) Leases and agreements for leases of land and houses;

(c) Contracts of mortgage, pledge or lien;

(d) Concessions concerning mines, quarries or deposits;

(e) Contracts between individuals or companies and States, provinces, municipalities, or other similar juridical persons charged with administrative functions, and concessions granted by States, provinces, municipalities, or other similar juridical persons charged with administrative functions.

3.

If the provisions of a contract are in part dissolved under Article 209, the remaining provisions of that contract shall, subject to the concurrence of the original insurer, be provided for in paragraph 2, continue in force if they are severable, but where they are not severable the contract shall be deemed to have been dissolved in its entirety.

II. Provisions Relating to Certain Classes of Contracts.

Stock Exchange and Commercial Exchange Contracts.

4.

(a) Rules made during the war by any recognised Exchange or Commercial Association providing for the closure of contracts entered into before the war by an enemy are confirmed by the High Contracting Parties, as also any action taken thereunder, provided:

(1) That the contract was expressed to be made subject to the rules of the Exchange or Association in question;

(2) That the rules applied to all persons concerned;

(3) That the conditions attaching to the closure were fair and reasonable.

(b) The preceding paragraph shall not apply to rules made during the occupation by Exchanges or Commercial Associations in the districts occupied by the enemy.

(c) The closure of contracts relating to cotton "futures," which were closed as on July 31, 1914, under the decision of the Liverpool Cotton Association, is also confirmed.

Security.

5.

The sale of a security held for an unpaid debt owing by an enemy shall be deemed to have been valid irrespective of notice to the owner if the creditor acted in good faith and with reasonable care and prudence, and no claim by the debtor on the ground of such sale shall be admitted.

This stipulation shall not apply to any sale of securities effected by an enemy during the occupation in regions invaded or occupied by the enemy.

Negotiable Instruments.

6.

As regards Powers which adopt Section III and the Annex thereto the pecuniary obligations existing between enemies and resulting from the issue of negotiable instruments shall be adjusted in conformity with the said An-

nex by the instrumentality of the Clearing Offices, which shall assume the rights of the holder as regards the various remedies open to him.

7.

If a person has either before or during the war become liable upon a negotiable instrument in accordance with an undertaking given to him by a person who has subsequently become an enemy, the latter shall remain liable to indemnify the former in respect of his liability notwithstanding the outbreak of war.

III. Contracts of Insurance.

8.

Contracts of insurance entered into by any person with another person who subsequently became an enemy will be dealt with in accordance with the following paragraphs.

Fire Insurance.

9.

Contracts for the insurance of property against fire entered into by a person interested in such property with another person who subsequently became an enemy shall not be deemed to have been dissolved by the outbreak of war, or by the fact of the person becoming an enemy, or on account of the failure during the war and for a period of three months thereafter to perform his obligations under the contract, but they shall be dissolved at the date when the annual premium becomes payable for the first time after the expiration of a period of three months after the coming into force of the present Treaty.

A settlement shall be effected of unpaid premiums which became due during the war, or of claims for losses which occurred during the war.

10.

Where by administrative or legislative action an insurance against fire effected before the war has been transferred during the war from the original to another insurer, the transfer will be recognised and the liability of the original insurer will be deemed to have ceased as from the date of the transfer. The original insurer will, however, be entitled to receive on demand full information as to the terms of the transfer, and if it should appear that these terms were not equitable they shall be amended so far as may be necessary to render them equitable.

Furthermore, the insured shall, subject to the concurrence of the original insurer, be entitled to retransfer the contract to the original insurer as from the date of the demand.

Life Insurance.

11.

Contracts of life insurance entered into between an insurer and a person who subsequently became an enemy shall not be deemed to have been dissolved by the outbreak of war, or by the fact of the person becoming an enemy.

Any sum which during the war became due upon a contract deemed not to have been dissolved under the preceding provision shall be recoverable after the war with the addition of interest at five per cent. per annum from the date of its becoming due up to the day of payment.

Where the contract has lapsed during the war owing to non-payment of premiums, or has become void from breach of the conditions of the contract, the assured or his representatives or the person entitled shall have the right at any time within twelve months of the coming into force of the present Treaty to claim from the insurer the surrender value of the policy at the date of its lapse or avoidance.

Where the contract has lapsed during the war owing to non-payment of premiums the payment of which has been prevented by the enforcement of measures of war, the assured or his representative or the persons entitled shall have the right to restore the contract on payment of the premiums with interest at five per cent. per annum within three months from the coming into force of the present Treaty.

12.

Any Allied or Associated Power may within three months of the coming into force of the present Treaty cancel all the contracts of insurance running between a German insurance company and its nationals under conditions which shall protect its nationals from any prejudice.

To this end the German insurance company will hand over to the Allied or Associated Government concerned the proportion of its assets attributable to the policies so cancelled and will be relieved from all liability in respect of such policies. The assets to be handed over shall be determined by an actuary appointed by the Mixed Arbitral Tribunal

13.

Where contracts of life insurance have been entered into by a local branch of an insurance company established in a country which subsequently became an enemy country, the contract shall, in the absence of any stipulation to the contrary in the contract itself, be governed by the local law, but the insurer shall be entitled to demand from the insured or his representatives the refund of sums paid on claims made or enforced under measures taken during the war, if the making or enforcement of such claims was not in accordance with the terms of the contract itself or was not consistent with the laws or treaties existing at the time when it was entered into.

14.

In any case where by the law applicable to the contract the insurer remains bound by the contract notwithstanding the non-payment of premiums until notice is given to the insured of the termination of the contract, he shall be entitled where the giving of such notice was prevented by the war to recover the unpaid premiums with interest at five per cent. per annum from the insured.

15.

Insurance contracts shall be considered as contracts of life assurance for the purpose of paragraphs 11 to 14 when they depend on the probabilities of human life combined with the rate of interest for the calculation of the reciprocal engagements between the two parties.

Marine Insurance.

16.

Contracts of marine insurance including time policies and voyage policies entered into between an insurer and a person who subsequently became an enemy, shall be deemed to have been dissolved on his becoming an enemy, except in cases where the risk undertaken in the contract had attached before he became an enemy.

Where the risk had not attached, money paid by way of premium or otherwise shall be recoverable from the insurer.

Where the risk had attached effect shall be given to the contract notwithstanding the party becoming an enemy, and sums due under the contract either by way of premiums or in respect of losses shall be recoverable after the coming into force of the present Treaty.

In the event of any agreement being come to for the payment of interest on sums due before the war to or by the nationals of States which have been at war and recovered after the war, such interest shall in the case of losses recoverable under contracts of marine insurance run from the expiration of a period of one year from the date of the loss.

17.

No contract of marine insurance with an insured person who subsequently became an enemy shall be deemed to cover losses due to belligerent action by the Power of which the insurer was a national or by the allies or associates of such Power.

18.

Where it is shown that a person who had before the war entered into a contract of marine insurance with an insurer who subsequently became an enemy entered after the outbreak of war into a new contract covering the same risk with an insurer who was not an enemy, the new contract shall be deemed to be substituted for the original contract as from the date when it was entered into, and the premiums payable shall be adjusted on the basis of the original insurer having remained liable on the contract only up till the time when the new contract was entered into.

Other Insurances.

19.

Contracts of insurance entered into before the war between an insurer and a person who subsequently became an enemy, other than contracts dealt with in paragraphs 9 to 18, shall be treated in all respects on the same footing as contracts of fire insurance between the same persons would be dealt with under the said paragraphs.

Re-Insurance.

20.

All treaties of re-insurance with a person who became an enemy shall be regarded as having been abrogated by the person becoming an enemy, but without prejudice in the case of life or marine risks which had attached before the war to the right to recover payment after the war for sums due in respect of such risks.

Nevertheless if, owing to invasion, it has been impossible for the re-insured to find another re-insurer, the treaty shall remain in force until three months after the coming into force of the present Treaty.

Where a re-insurance treaty becomes void under this paragraph, there shall be an adjustment of accounts between the parties in respect both of premiums paid and payable and of liabilities for losses in respect of life or marine risks which had attached before the war. In the case of risks other than those mentioned in paragraphs 11 to 18 the adjustment of accounts shall be made as at the date of the parties becoming enemies without regard to claims for losses which may have occurred since that date.

21.

The provisions of the preceding paragraph will extend equally to re-insurances existing at the date of the parties becoming enemies of particular risks undertaken by the insurer in a contract of insurance against any risks other than life or marine risks.

22.

Re-insurance of life risks effected by particular contracts and not under any general treaty remain in force.

The provisions of paragraph 12 apply to treaties of re-insurance of life insurance contracts in which enemy companies are the re-insurers.

23.

In case of a re-insurance effected before the war of a contract of marine insurance, the cession of a risk which had been ceded to the re-insurer shall, if it had attached before the outbreak of the war, remain valid and effect be given to the contract, notwithstanding the outbreak of war; sums due under the contract of re-insurance in respect either of premiums or of losses shall be recoverable after the war.

24.

The provisions of paragraphs 17 and 18 and the last part of paragraph 16 shall apply to contracts for the re-insurance of marine risks.

Section VI.

MIXED ARBITRAL TRIBUNAL.

Article 304.

(a) Within three months from the date of the coming into force of the present Treaty, a Mixed Arbitral Tribunal shall be established between each of the Allied and Associated Powers on the one hand and Germany on the other hand. Each such Tribunal shall consist of three members. Each of the Governments concerned shall appoint one of these members. The President shall be chosen by agreement between the two Governments concerned.

In case of failure to reach agreement, the President of the Tribunal and two other persons either of whom may in case of need take his place, shall be chosen by the Council of the League of Nations, or, until this is set up, by M. Gustave Ador if he is willing. These persons shall be nationals of Powers that have remained neutral during the war.

If any Government does not proceed within a period of one month in case there is a vacancy to appoint a member of the Tribunal, such member shall be chosen by the other Government from the two persons mentioned above other than the President.

The decision of the majority of the members of the Tribunal shall be the decision of the Tribunal.

(b) The Mixed Arbitral Tribunals established pursuant to paragraph (a) shall decide all questions within their competence under Sections III, IV, V and VII.

In addition, all questions, whatsoever their nature, relating to contracts concluded before the coming into force of the present Treaty between nationals of the Allied and Associated Powers and German nationals shall be decided by the Mixed Arbitral Tribunal, always excepting questions which, under the laws of the Allied, Associated or Neutral Powers, are within the jurisdiction of the National Courts of those Powers. Such questions shall be decided by the National Courts in question, to the exclusion of the Mixed Arbitral Tribunal. The party who is a national of an Allied or Associated Power may nevertheless bring the case before the Mixed Arbitral Tribunal if this is not prohibited by the laws of his country.

(c) If the number of cases justifies it, additional members shall be appointed and each Mixed Arbitral Tribunal shall sit in divisions. Each of these divisions will be constituted as above.

(d) Each Mixed Arbitral Tribunal will settle its own procedure except in so far as it is provided in the following Annex, and it is empowered to award the sums to be paid by the loser in respect of the costs and expenses of the proceedings.

(e) Each Government will pay the remuneration of the member of the Mixed Arbitral Tribunal appointed by it and of any agent whom it may appoint to represent it before the Tribunal. The remuneration of the President will be determined by special agreement between the Governments concerned; and this remuneration and the joint expenses of each Tribunal will be paid by the two Governments in equal moieties.

(f) The High Contracting Parties agree that their courts and authorities shall render to the Mixed Arbitral Tribunals direct all the assistance in their power, particularly as regards transmitting notices and collecting evidence.

(g) The High Contracting Parties agree to regard the decisions of the Mixed Arbitral Tribunal as final and conclusive, and to render them binding upon their nationals.

ANNEX.

1.

Should one of the members of the Tribunal either die, retire, or be unable for any reason whatever to discharge his function, the same procedure will be followed for filling the vacancy as was followed for appointing him.

2

The Tribunal may adopt such rules of procedure as shall be in accordance with justice

and equity and decide the order and time at which each party must conclude its arguments, and may arrange all formalities required for dealing with the evidence.

3.

The agent and counsel of the parties on each side are authorized to present orally and in writing to the Tribunal arguments in support or in defence of each case.

4.

The Tribunal shall keep record of the questions and cases submitted and the proceedings thereon, with the dates of such proceedings.

5.

Each of the Powers concerned may appoint a secretary. These secretaries shall act together as joint secretaries of the Tribunal and shall be subject to its direction. The Tribunal may appoint and employ any other necessary officer or officers to assist in the performance of its duties.

6.

The Tribunal shall decide all questions and matters submitted upon such evidence and information as may be furnished by the parties concerned.

7.

Germany agrees to give the Tribunal all facilities and information required by it for carrying out its investigations.

8.

The language in which the proceedings shall be conducted shall, unless otherwise agreed, be English, French, Italian or Japanese, as may be determined by the Allied or Associated Power concerned.

9.

The place and time for the meetings of each Tribunal shall be determined by the President of the Tribunal.

Article 305.

Whenever a competent court has given or gives a decision in a case covered by Sections III, IV, V, or VII, and such decision is inconsistent with the provisions of such Sections, the party who is prejudiced by the decision shall be entitled to obtain redress which shall be fixed by the Mixed Arbitral Tribunal. At the request of the national of an Allied or Associated Power, the redress may, whenever possible, be effected by the Mixed Arbitral Tribunal directing the replacement of the parties in the position occupied by them before the judgment was given by the German court.

Section VII.

INDUSTRIAL PROPERTY.

Article 306.

Subject to the stipulations of the present Treaty, rights of industrial, literary and artistic property, as such property is defined by the International Conventions of Paris and of Berne, mentioned in Article 286, shall be re-established or restored, as from the coming into force of the present Treaty, in the territories of the High Contracting Parties, in favour of the persons entitled to the benefit of them at the moment when the state of war commenced or their legal representatives. Equally, rights which, except for the war, would have been acquired during the war in consequence of an application made for the protection of industrial property, or the publication of a literary or artistic work, shall be recognised and established in favour of those persons who would have been entitled thereto, from the coming into force of the present Treaty.

Nevertheless, all acts done by virtue of the special measures taken during the war under legislative, executive or administrative authority of any Allied or Associated Power in regard to the rights of German nationals in industrial, literary or artistic property shall remain in force and shall continue to maintain their full effect.

No claim shall be made or action brought by Germany or German nationals in respect of the use during the war by the Government of any Allied or Associated Power, or by any persons acting on behalf or with the assent of such Government, of any rights in industrial, literary or artistic property, nor in respect of the sale, offering for sale, or use of any products, articles or apparatus whatsoever to which such rights applied.

Unless the legislation of any one of the Allied or Associated Powers in force at the moment of the signature of the present Treaty otherwise directs, sums due or paid in virtue of any act or operation resulting from the execution of the special measures mentioned in paragraph I of this Article shall be dealt with in the same way as other sums due to German nationals are directed to be dealt with by the present Treaty; and sums produced by any special measures taken by the German Government in respect of rights in industrial, literary or artistic property belonging to the nationals of the Allied or Associated Powers shall be considered and treated in the same way as other debts due from German nationals.

Each of the Allied and Associated Powers reserves to itself the right to impose such limitations, conditions or restrictions on rights of industrial, literary or artistic property (with the exception of trade-marks) acquired before or during the war, or which may be subsequently acquired in accordance with its legislation, by German nationals, whether by granting licences, or by the working, or by preserving control over their exploitation, or in any other way, as may be considered necessary for national defence, or in the public interest, or for assuring the fair treatment by Germany of the rights of industrial, literary and artistic property held in German territory by its nationals, or for securing the due fulfillment of all the obligations undertaken by Germany in the present Treaty. As regards rights of industrial, literary and artistic property acquired after the coming into force of the present Treaty, the right so reserved by the Allied and Associated Powers shall only be exercised in cases where these limitations, conditions or restrictions may be considered necessary for national defence or in the public interest.

In the event of the application of the provisions of the preceding paragraph by any Allied or Associated Power, there shall be paid reasonable indemnities or royalties, which shall be dealt with in the same way other sums due to German nationals are directed to be dealt with by the present Treaty.

Each of the Allied or Associated Powers reserves the right to treat as void and of no effect any transfer in whole or in part of or other dealing with rights of or in respect of industrial, literary or artistic property effected after August 1, 1914, or in the future, which would have the result of defeating the objects of the provisions of this Article.

The provisions of this Article shall not apply to rights in industrial, literary or artistic property which have been dealt with in the liquidation of businesses or companies under war legislation by the Allied or Associated Powers, or which may be so dealt with by virtue of Article 297, paragraph (b).

Article 307.

A minimum of one year after the coming into force of the present Treaty shall be accorded to the nationals of the High Contracting Parties, without extension fees or other penalty, in order to enable such persons to accomplish any act, fulfil any formality, pay any fees, and generally satisfy any obligation prescribed by the laws or regulations of the respective States relating to the obtaining, preserving, or opposing rights to, or in respect of, industrial property either acquired

before August 1, 1914, or which, except for the war, might have been acquired since that date as a result of an application made before the war or during its continuance, but nothing in this Article shall give any right to reopen interference proceedings in the United States of America where a final hearing has taken place.

All right in, or in respect of, such property which may have lapsed by reason of any failure to accomplish any act, fulfil any formality, or make any payment, shall revive, but subject in the case of patents and designs to the imposition of such conditions as each Allied or Associated Power may deem reasonably necessary for the protection of persons who have manufactured or made use of the subject matter of such property while the rights had lapsed. Further, where rights to patents or designs belonging to German nationals are revived under this Article, they shall be subject in respect of the grant of licences to the same provisions as would have been applicable to them during the war, as well as to all the provisions of the present Treaty.

The period from August 1, 1914, until the coming into force of the present Treaty shall be excluded in considering the time within which a patent should be worked or a trade-mark or design used, and it is further agreed that no patent, registered trade-mark or design in force on August 1, 1914, shall be subject to revocation or cancellation by reason only of the failure to work such patent or use such trade-mark or design for two years after the coming into force of the present Treaty.

Article 308.

The rights of priority, provided by Article 4 of the International Convention for the Protection of Industrial Property of Paris, of March 20, 1883, revised at Washington in 1911 or by any other Convention or Statute, for the filing or registration of applications for patents or models of utility, and for the registration of trade-marks, designs and models which had not expired on August 1, 1914, and those which have arisen during the war or would have arisen but for the war, shall be extended by each of the High Contracting Parties in favour of all nationals of the other High Contracting Parties for a period of six months after the coming into force of the present Treaty.

Nevertheless, such extension shall in no way affect the right of any of the High Contracting Parties or of any person who before the coming into force of the present Treaty was bona fide in possession of any rights of industrial property conflicting with rights applied for by another who claims rights of priority in respect of them, to exercise such rights by itself or himself personally, or by such agents or licencees as derived their rights from it or him before the coming into force of the present Treaty; and such persons shall not be amenable to any action or other process of law in respect of infringement.

Article 309.

No action shall be brought and no claim made by persons residing or carrying on business within the territories of Germany on the one part and of the Allied or Associated Powers on the other, or persons who are nationals of such Powers respectively, or by any one deriving title during the war from such persons, by reason of any action which has taken place within the territory of the other party between the date of the declaration of war and that of the coming into force of the present Treaty, which might constitute an infringement of the rights of industrial property or rights of literary and artistic property, either existing at any time during the war or revived under the provisions of Articles 307 and 308.

Equally, no action for infringement of industrial, literary or artistic property rights by such persons shall at any time be permissible in respect of the sale or offering for sale for a period of one year after the signature of the present Treaty in the territories of the Allied or Associated Powers on the one hand or Germany on the other, of products or articles manufactured, or of literary or artistic works published, during the period between the declaration of war and the signature of the present Treaty, or against those who have acquired and continue to use them. It is understood, nevertheless, that this provision shall not apply when the possessor of the rights was domiciled or had an industrial or commercial establishment in the districts occupied by Germany during the war.

This Article shall not apply as between the United States of America on the one hand and Germany on the other.

Article 310.

Licences in respect of industrial, literary or artistic property concluded before the war between nationals of the Allied or Associated Powers or persons residing in their territory or carrying on business therein, on the one part, and German nationals, on the other part, shall be considered as cancelled as from the date of the declaration of war between Germany and the Allied or Associated Power. But, in any case, the former beneficiary of a contract of this kind shall have the right, within a period of six months after the coming into force of the present Treaty, to demand from the proprietor of the rights the grant of a new licence, the conditions of which, in default of agreement between the parties, shall be fixed by the duly qualified tribunal in the country under whose legislation the rights had been acquired, except in the case of licences held in respect of rights acquired under German law. In such cases the conditions shall be fixed by the Mixed Arbitral Tribunal referred to in Section VI of this Part. The Tribunal may, if necessary, fix also the amount which it may deem just should be paid by reason of the use of the rights during the war.

No licence in respect of industrial, literary or artistic property, granted under the special war legislation of any Allied or Associated Power, shall be affected by the continued existence of any licence entered into before the war, but shall remain valid and of full effect, and a licence so granted to the former beneficiary of a licence entered into before the war shall be considered as substituted for such licence.

Where sums have been paid during the war by virtue of a licence or agreement concluded before the war in respect of rights of industrial property or for the reproduction or the representation of literary, dramatic or artistic works, these sums shall be dealt with in the same manner as other debts or credits of German nationals, as provided by the present Treaty.

This Article shall not apply as between the United States of America on the one hand and Germany on the other.

Article 311.

The inhabitants of territories separated from Germany by virtue of the present Treaty shall, notwithstanding this separation and the change of nationality consequent thereon, continue to enjoy in Germany all the rights in industrial, literary and artistic property to which they were entitled under German legislation at the time of the separation.

Rights of industrial, literary and artistic property which are in force in the territories separated from Germany under the present Treaty at the moment of the separation of these territories from Germany, or which will be re-established or restored in accordance with the provisions of Article 306 of the present Treaty, shall be recognised by the State to which the said territory is transferred and shall remain in force in that territory for the same period of time given them under the German law.

Section VIII.

SOCIAL AND STATE INSURANCE IN CEDED TERRITORY.

Article 312.

Without prejudice to the provisions contained in other Articles of the present Treaty, the German Government undertakes to transfer to any Power to which German territory in Europe is ceded, and to any Power administering former German territory as a mandatory under Article 22 of Part I (League of Nations), such portion of the reserves accumulated by the Government of the German Empire or of German States, or by public or private organisations under their control, as is attributable to the carrying on of Social or State Insurance in such territory.

The Powers to which these funds are transferred must apply them to the performance of the obligations arising from such insurances.

The conditions of the transfer will be determined by special conventions to be concluded between the German Government and the Governments concerned.

In case these special conventions are not concluded in accordance with the above paragraph within three months after the coming into force of the present Treaty, the conditions of transfer shall in each case be referred to a Commission of five members, one of whom shall be appointed by the German Government, one by the other interested Government and three by the Governing Body of the International Labour Office from the nationals of other States. This Commission shall by majority vote within three months after appointment adopt recommendations for submission to the Council of the League of Nations, and the decisions of the Council shall forthwith be accepted as final by Germany and the other Government concerned.

PART XI.

AERIAL NAVIGATION.

Article 313.

The aircraft of the Allied and Associated Powers shall have full liberty of passage and landing over and in the territory and territorial waters of Germany, and shall enjoy the same privileges as German aircraft, particularly in case of distress by land or sea.

Article 314.

The aircraft of the Allied and Associated Powers shall, while in transit to any foreign country whatever, enjoy the right of flying over the territory and territorial waters of Germany without landing, subject always to any regulations which may be made by Germany, and which shall be applicable equally to the aircraft of Germany and to those of the Allied and Associated countries.

Article 315.

All aerodromes in Germany open to national public traffic shall be open for the aircraft of the Allied and Associated Powers, and in any such aerodrome such aircraft shall be treated on a footing of equality with German aircraft as regards charges of every description, including charges for landing and accommodation.

Article 316.

Subject to the present provisions, the rights of passage, transit and landing, provided for in Articles 313, 314 and 315 are subject to the observance of such regulations as Germany may consider it necessary to enact, but such regulations shall be applied without distinction to German aircraft and to those of the Allied and Associated countries.

Article 317.

Certificates of nationality, airworthiness, or competency, and licences, issued or recognised as valid by any of the Allied or Associated Powers, shall be recognised in Germany as valid and as equivalent to the certificates and licences issued by Germany.

Article 318.

As regards internal commercial air traffic, the aircraft of the Allied and Associated Powers shall enjoy in Germany most favoured nation treatment.

Article 319.

Germany undertakes to enforce the necessary measures to ensure that all German aircraft flying over her territory shall comply with the Rules as to lights and signals, Rules of the Air and Rules for Air Traffic on and in the neighbourhood of aerodromes which have been laid down in the Convention relative to Aerial Navigation concluded between the Allied and Associated Powers.

Article 320.

The obligations imposed by the preceding provisions shall remain in force until January 1, 1923, unless before that date Germany shall have been admitted into the League of Nations or shall have been authorised, by consent of the Allied and Associated Powers, to adhere to the Convention relative to Aerial Navigation concluded between those Powers.

PART XII.

PORTS, WATERWAYS AND RAILWAYS.

Section I.

GENERAL PROVISIONS.

Article 321.

Germany undertakes to grant freedom of transit through her territories on the routes most convenient for international transit, either by rail, navigable waterway, or canal, to persons, goods, vessels, carriages, wagons and mails coming from or going to the territories of any of the Allied and Associated Powers (whether contiguous or not); for this purpose the crossing of territorial waters shall be allowed. Such persons, goods, vessels, carriages, wagons and mails shall not be subjected to any transit duty or to any undue delays or restrictions, and shall be entitled in Germany to national treatment as regards charges, facilities, and all other matters

Goods in transit shall be exempt from all Customs or other similar duties.

All charges imposed on transport in transit shall be reasonable, having regard to the conditions of the traffic. No charge, facility or restriction shall depend directly or indirectly on the ownership or on the nationality of the ship or other means of transport on which any part of the through journey has been, or is to be, accomplished.

Article 322.

Germany undertakes neither to impose nor to maintain any control over transmigration traffic through her territories beyond measures necessary to ensure that passengers are bona fide in transit; nor to allow any shipping company or any other private body, corporation or person interested in the traffic to take any part whatever in, or to exercise any direct or indirect influence over, any administrative service that may be necessary for this purpose.

Article 323.

Germany undertakes to make no discrimination or preference, direct or indirect, in the duties, charges and prohibitions relating to importations into or exportations from her territories, or, subject to the special engagements contained in the present Treaty, in the charges and conditions of transport of goods or persons entering or leaving her territories, based on the frontier crossed; or on the kind, ownership or flag of the means of transport (including aircraft) employed; or on the original or immediate place of departure of the vessel, wagon or aircraft or other means of transport employed, or its ultimate or intermediate destination; or on the route of or places of trans-shipment on the journey; or on whether any port through which the goods are imported or exported is a German port of a port belonging to any foreign coun-

try or on whether the goods are imported or exported by sea, by land or by air.

Germany particularly undertakes not to establish against the ports and vessels of any of the Allied and Associated Powers any surtax or any direct or indirect bounty for export or import by German ports or vessels, or by those of another Power, for example by means of combined tariffs. She further undertakes that persons or goods passing through a port or using a vessel of any of the Allied and Associated Powers shall not be subjected to any formality or delay whatever to which such persons or goods would not be subjected if they passed through a German port or a port of any other Power, or used a German vessel or a vessel of any other Power.

Article 324.

All necessary administrative and technical measures shall be taken to shorten as much as possible the transmission of goods across the German frontiers and to ensure their forwarding and transport from such frontiers, irrespective of whether such goods are coming from or going to the territories of the Allied and Associated Powers or are in transit from or to those territories, under the same material conditions in such matters as rapidity of carriage and care en route as are enjoyed by other goods of the same kind carried on German territory under similar conditions of transport.

In particular, the transport of perishable goods shall be promptly and regularly carried out, and the customs formalities shall be effected in such a way as to allow the goods to be carried straight through by trains which make connection.

Article 325.

The seaports of the Allied and Associated Powers are entitled to all the favours and to all reduced tariffs granted on German railways or navigable waterways for the benefit of German ports or of any port of another Power.

Article 326.

Germany may not refuse to participate in the tariffs or combinations of tariffs intended to secure for ports of any of the Allied and Associated Powers advantages similar to those granted by Germany to her own ports or the ports of any other Power.

Section II.

NAVIGATION.

Chapter I.

FREEDOM OF NAVIGATION.

Article 327.

The nationals of any of the Allied and Associated Powers as well as their vessels and property shall enjoy in all German ports and on the inland navigation routes of Germany the same treatment in all respects as German nationals, vessels and property.

In particular the vessels of any one of the Allied or Associated Powers shall be entitled to transport goods of any description, and passengers, to or from any ports or places in German territory to which German vessels may have access, under conditions which shall not be more onerous than those applied in the case of national vessels: they shall be treated on a footing of equality with national vessels as regards port and harbour facilities and charges of every description, including facilities for stationing, loading and unloading, and duties and charges of tonnage, harbour, pilotage, lighthouse, quarantine, and all analogous duties and charges of whatsoever nature, levied in the name of or for the profit of the Government, public functionaries, private individuals, corporations or establishments of any kind.

In the event of Germany granting a preferential regime to any of the Allied or Associated Powers or to any other foreign Power, this regime shall be extended immediately and unconditionally to all the Allied and Associated Powers.

There shall be no impediment to the movement of persons or vessels other than those arising from prescriptions concerning customs, police, sanitation, emigration and immigration, and those relating to the import and export of prohibited goods. Such regulations must be reasonable and uniform and must not impede traffic unnecessarily.

Chapter II.

FREE ZONES IN PORTS.

Article 328.

The free zones existing in German ports on August 1, 1914, shall be maintained. These free zones, and any other free zones which may be established in German territory by the present Treaty, shall be subject to the regime provided for in the following Articles.

Goods entering or leaving a free zone shall not be subjected to any import or export duty, other than those provided for in Article 330.

Vessels and goods entering a free zone may be subjected to the charges established to cover expenses of administration, upkeep and improvement of the port, as well as to the charges for the use of various installations, provided that these charges shall be reasonable having regard to the expenditure incurred, and shall be levied in the conditions of equality provided for in Article 327.

Goods shall not be subjected to any other charges except a statistical duty which shall not exceed 1 per mille ad valorem, and which shall be devoted exclusively to defraying the expenses of compiling statements of the traffic in the port.

Article 329.

The facilities granted for the erection of warehouses, for packing and for unpacking goods, shall be in accordance with trade requirements for the time being. All goods allowed to be consumed in the free zone shall be exempt from duty, whether of excise or of any other description, apart from the statistical duty provided for in Article 328 above.

There shall be no discrimination in regard to any of the provisions of the present Article between persons belonging to different nationalities or between goods of different origin or destination.

Article 330.

Import duties may be levied on goods leaving the free zone for consumption in the country on the territory of which the port is situated. Conversely, export duties may be levied on goods coming from such country and brought into the free zone. These import and export duties shall be levied on the same basis and at the same rates as similar duties levied at the other Customs frontiers of the country concerned. On the other hand, Germany shall not levy, under any denomination, any import, export or transit duty on goods carried by land or water across her territory to or from the free zone from or to any other State.

Germany shall draw up the necessary regulations to secure and guarantee such freedom of transit over such railways and waterways in her territory as normally give access to the free zone.

Chapter III.

Clauses Relating to the Elbe, the Oder, the Niemen (Russstrom-Memel-Niemen) and the Danube.

(1)—General Clauses.

Article 331.

The following rivers are declared international:

the Elbe (Labe) from its confluence with the Vltava (Moldau), and the Vltava (Moldau) from Prague:

the Oder (Odra) from its confluence with the Oppa;
the Niemen (Russstrom-Memel-Niemen) from Grodno;
the Danube from Ulm;

and all navigable parts of these river systems which naturally provide more than one State with access to the sea, with or without transshipment from one vessel to another; together with lateral canals and channels constructed either to duplicate or to improve naturally navigable sections of the specified river systems, or to connect two naturally navigable sections of the same river.

The same shall apply to the Rhine-Danube navigable waterway, should such a waterway be constructed under the conditions laid down in Article 353.

Article 332.

On the waterways declared to be international in the preceding Article, the nationals, property and flags of all Powers shall be treated on a footing of perfect equality, no distinction being made to the detriment of the nationals, property or flag of any Power between them and the nationals, property or flag of the riparian State itself or of the most favoured nation.

Nevertheless, German vessels shall not be entitled to carry passengers or goods by regular services between the ports of any Allied or Associated Power, without special authority from such Power.

Article 333.

Where such charges are not precluded by any existing conventions, charges varying on different sections of a river may be levied on vessels using the navigable channels or their approaches, provided that they are intended solely to cover equitably the cost of maintaining in a navigable condition, or of improving, the river and its approaches, or to meet expenditure incurred in the interests of navigation. The schedule of such charges shall be calculated on the basis of such expenditure and shall be posted up in the ports. These charges shall be levied in such a manner as to render any detailed examination of cargoes unnecessary, except in cases of suspected fraud or contravention.

Article 334.

The transit of vessels, passengers and goods on these waterways shall be effected in accordance with the general conditions prescribed for transit in Section I above.

When the two banks of an international river are within the same State goods in transit may be placed under seal or in the custody of customs agents. When the river forms a frontier goods and passengers in transit shall be exempt from all customs formalities; the loading and unloading of goods, and the embarkation and disembarkation of passengers shall only take place in the ports specified by the riparian State.

Article 335.

No dues of any kind other than those provided for in the present Part shall be levied along the course or at the mouth of these rivers.

This provision shall not prevent the fixing by the riparian States of customs, local octroi or consumption duties, or the creation of reasonable and uniform charges levied in the ports, in accordance with public tariffs, for the use of cranes, elevators, quays, warehouses, etc.

Article 336.

In default of any special organisation for carrying out the works connected with the upkeep and improvement of the international portion of a navigable system, each riparian State shall be bound to take suitable measures to remove any obstacle or danger to navigation, and to ensure the maintenance of good conditions of navigation.

If a State neglects to comply with this obligation any riparian State, or any State represented on the International Commission, if there is one, may appeal to the tribunal instituted for this purpose by the League of Nations.

Article 337.

The same procedure shall be followed in the case of a riparian State undertaking any works of a nature to impede navigation in the international section. The tribunal mentioned in the preceding Article shall be entitled to enforce the suspension or suppression of such works, making due allowance in its divisions for all rights in connection with irrigation, water power, fisheries and other national interests, which, with the consent of all the riparian States or of all the States represented on the International Commission, if there is one, shall be given priority over the requirements of navigation.

Appeal to the tribunal of the League of Nations does not require the suspension of the works.

Article 338.

The regime set out in Articles 332 to 337 above shall be superseded by one to be laid down in a General Convention drawn up by the Allied and Associated Powers, and approved by the League of Nations, relating to the waterways recognised in such Convention as having an international character. This Convention shall apply in particular to the whole or part of the above mentioned river systems of the Elbe (Labe), the Oder (Odra), the Niemen (Russstrom-Memel-Niemen), and the Danube, and such other parts of these river systems as may be covered by a general definition.

Germany undertakes, in accordance with the provisions of Article 379, to adhere to the said General Convention as well as to all projects prepared in accordance with Article 343 below for the revision of existing international agreements and regulations.

Article 339.

Germany shall cede to the Allied and Associated Powers concerned, within a maximum period of three months from the date on which notification shall be given her, a proportion of the tugs and vessels remaining registered in the ports of the river systems referred to in Article 331 after the deduction of those surrendered by way of restitution or reparation. Germany shall in the same way cede material of all kinds necessary to the Allied and Associated Powers concerned for the utilisation of those river systems.

The number of the tugs and boats, and the amount of the material so ceded, and their distribution, shall be determined by an arbitrator or arbitrators nominated by the United States of America, due regard being had to the legitimate needs of the parties concerned, and particularly to the shipping traffic during the five years preceding the war.

All craft so ceded shall be provided with their fittings and gear, shall be in a good state of repair and in condition to carry goods, and shall be selected from among those most recently built.

The cessions provided for in the present Article shall entail a credit of which the total amount, settled in a lump sum by the arbitrator or arbitrators, shall not in any case exceed the value of the capital expended in the initial establishment of the material ceded, and shall be set off against the total sums due from Germany; in consequence the indemnification of the proprietors shall be a matter for Germany to deal with

(2) Special Clauses Relating to the Elbe, the Oder and the Niemen (Russstrom-Nemel-Niemen).

Article 340.

The Elbe (Labe) shall be placed under the administration of an International Commission which shall comprise:

4 representatives of the German States bordering on the river;
2 representatives of the Czecho-Slovak States;
1 representative of Great Britain;

1 representative of France;
1 representative of Italy;
1 representative of Belgium.

Whatever be the number of members present, each delegation shall have the right to record a number of votes equal to the number of representatives allotted to it.

If certain of these representatives cannot be appointed at the time of the coming into force of the present Treaty, the decisions of the Commission shall nevertheless be valid.

Article 341.

The Oder (Odra) shall be placed under the administration of an International Commission, which shall comprise:

1 representative of Poland;
3 representatives of Prussia;
1 representative of the Czecho-Slovak State;
1 representative of Great Britain;
1 representative of France;
1 representative of Denmark;
1 representative of Sweden.

If certain of these representatives cannot be appointed at the time of the coming into force of the present Treaty, the decisions of the Commission shall nevertheless be valid.

Article 342.

On a request being made to the League of Nations by any riparian State, the Niemen (Russstrom-Nemel-Niemen) shall be placed under the administration of an International Commission, which shall comprise one representative of each riparian State, and three representatives of other States specified by the League of Nations.

Article 343.

The International Commissions referred to in Articles 340 and 341 shall meet within three months of the date of the coming into force of the present Treaty. The International Commission referred to in Article 342 shall meet within three months from the date of the request made by a riparian State. Each of these Commissions shall proceed immediately to prepare a project for the revision of the existing international agreements and regulations, drawn up in conformity with the General Convention referred to in Article 338 should such Convention have been already concluded. In the absence of such Convention, the project for revision shall be in conformity with the principles of Articles 332 to 337 above.

Article 344.

The projects referred to in the preceding Article shall, inter alia:

(a) designate the headquarters of the International Commission, and prescribe the manner in which its President is to be nominated;

(b) specify the extent of the Commission's powers, particularly in regard to the execution of works of maintenance, control and improvement on the river system, the financial regime, and fixing and collection of charges, and regulations for navigation;

(c) define the sections of the river or its tributaries to which the international regime shall be applied.

Article 345.

The international agreements and regulations at present governing the navigation of the Elbe (Labe), the Oder (Odra), and the Niemen (Russstrom-Nemel-Niemen) shall be provisionally maintained in force until the ratification of the above-mentioned projects. Nevertheless, in all cases where such agreements and regulations in force are in conflict with the provisions of Articles 332 to 337 above, or of the General Convention to be concluded, the latter provisions shall prevail.

(3) Special Clauses Relating to the Danube.

Article 346.

The European Commission of the Danube reassumes the powers it possessed before the war. Nevertheless, as a provisional measure, only representatives of Great Britain, France, Italy and Roumania shall constitute this Commission.

Article 347.

From the point where the competence of the European Commission ceases, the Danube system referred to in Article 331 shall be placed under the administration of an International Commission composed as follows:

2 representatives of German riparian States;
1 representative of each other riparian State;
1 representative of each non-riparian State represented in the future on the European Commission of the Danube.

If certain of these representatives cannot be appointed at the time of the coming into force of the present Treaty, the decisions of the Commission shall nevertheless be valid.

Article 348.

The International Commission provided for in the preceding Article shall meet as soon as possible after the coming into force of the present Treaty, and shall undertake provisionally the administration of the river in conformity with the provisions of Articles 332 to 337, until such time as a definite statute regarding the Danube is concluded by the Powers nominated by the Allied and Associated Powers.

Article 349.

Germany agrees to accept the regime which shall be laid down for the Danube by a Conference of the Powers nominated by the Allied and Associated Powers, which shall meet within one year after the coming into force of the present Treaty, and at which German representatives may be present.

Article 350.

The mandate given by Article 57 of the Treaty of Berlin of July 13, 1878, to Austria-Hungary, and transferred by her to Hungary, to carry out works at the Iron Gates, is abrogated. The Commission entrusted with the administration of this part of the river shall lay down provisions for the settlement of accounts subject to the financial provisions of the present Treaty. Charges which may be necessary shall in no case be levied by Hungary.

Article 351.

Should the Czecho-Slovak State, the Serb-Croat-Slovene State or Roumania with the authorisation of or under mandate from the International Commission, undertake maintenance, improvement, weir, or other works on a part of the river system which forms a frontier, these States shall enjoy on the opposite bank, and also on the part of the bed which is outside their territory, all necessary facilities for the survey, execution and maintenance of such works.

Article 352.

Germany shall be obliged to make to the European Commission of the Danube all restitutions, reparations and indemnities for damages inflicted on the Commission during the war.

Article 353.

Should a deep draught Rhine-Danube navigable waterway be constructed, Germany undertakes to apply thereto the regime prescribed in Articles 332 to 338.

Chapter IV.

Clauses Relating to the Rhine and the Moselle.

Article 354.

As from the coming into force of the present Treaty, the Convention of Mannheim of October 17, 1868, together with the Final Protocol thereof, shall continue to govern navigation on the Rhine, subject to the conditions hereinafter laid down.

In the event of any provisions of the said Convention being in conflict with those laid down by the General Convention referred to in Article 338 (which shall apply to the Rhine) the provisions of the General Convention shall prevail.

Within a maximum period of six months from the coming into force of the present

Treaty, the Central Commission referred to in Article 355 shall meet to draw up a project of revision of the Convention of Mannheim. This project shall be drawn up in harmony with the provisions of the General Convention referred to above, should this have been concluded by that time, and shall be submitted to the Powers represented on the Central Commission. Germany hereby agrees to adhere to the project so drawn up.

Further, the modifications set out in the following Articles shall immediately be made in the Convention of Mannheim.

The Allied and Associated Powers reserve to themselves the right to arrive at an understanding in this connection with Holland, and Germany hereby agrees to accede if required to any such understanding.

Article 355.

The Central Commission provided for in the Convention of Mannheim shall consist of nineteen members, viz:

2 representatives of the Netherlands;
2 representatives of Switzerland;
4 representatives of German riparian States;
4 representatives of France, which in addition shall appoint the President of the commission;
2 representatives of Great Britain;
2 representatives of Italy;
2 representatives of Belgium.

The headquarters of the Central Commission shall be at Strasburg.

Whatever be the number of members present, each Delegation shall have the right to record a number of votes equal to the number of representatives allotted to it.

If certain of these representatives cannot be appointed at the time of the coming into force of the present Treaty, the decisions of the Commission shall nevertheless be valid.

Article 356.

Vessels of all nations, and their cargoes, shall have the same rights and privileges as those which are granted to vessels belonging to the Rhine navigation, and to their cargoes.

None of the provisions contained in Articles 15 to 20 and 26 of the above-mentioned Convention of Mannheim, in Article 4 of the Final Protocol thereof, or in later Conventions shall impede the free navigation of vessels and crews of all nations on the Rhine and on waterways to which such Conventions apply, subject to compliance with the regulations concerning pilotage and other police measures drawn up by the Central Commission.

The provisions of Article 22 of the Convention of Mannheim and of Article 5 of the Final Protocol thereof shall be applied only to vessels registered on the Rhine. The Central Commission shall decide on the steps to be taken to ensure that other vessels satisfy the conditions of the general regulations applying to navigation on the Rhine.

Article 357.

Within a maximum period of three months from the date on which notification shall be given Germany shall cede to France tugs and vessels, from among those remaining registered in German Rhine ports after the deduction of those surrendered by way of restitution or reparation, or shares in German Rhine navigation companies.

When vessels and tugs are ceded, such vessels and tugs, together with their fittings and gear, shall be in good state of repair, shall be in condition to carry on commercial traffic on the Rhine, and shall be selected from among those most recently built.

The same procedure shall be followed in the matter of the cession by Germany to France of:

(1) the installations, berthing and anchorage accommodation, platforms, docks, warehouses, plant, etc., which German subjects or German companies owned on August 1, 1914, in the port of Rotterdam, and

(2) the shares or interests which Germany or German nationals possessed in such installations at the same date.

The amount and specifications of such cessions shall be determined within one year of the coming into force of the present Treaty by an arbitrator or arbitrators appointed by the United States of America, due regard being had to the legitimate needs of the parties concerned.

The cessions provided for in the present Article shall entail a credit of which the total amount, settled in a lump sum by the arbitrator or arbitrators mentioned above, shall not in any case exceed the value of the capital expended in the initial establishment of the ceded material and installations, and shall be set off against the total sums due from Germany; in consequence, the indemnification of the proprietors shall be a matter for Germany to deal with.

Article 358.

Subject to the obligation to comply with the provisions of the Convention of Mannheim or of the Convention which may be substituted therefor, and to the stipulations of the present Treaty, France shall have on the whole course of the Rhine included between the two extreme points of the French frontiers:

(a) the right to take water from the Rhine to feed navigation and irrigation canals (constructed or to be constructed) or for any other purpose, and to execute on the German bank all works necessary for the exercise of this right;

(b) the exclusive right to the power derived from works of regulation on the river, subject to the payment to Germany of the value of half the power actually produced, this payment, which will take into account the cost of the works necessary for producing the power, being made either in money or in power and in default of an agreement being determined by arbitration. For this purpose France alone shall have the right to carry out in this part of the river all works of regulation (weirs or other works) which she may consider necessary for the production of power. Similarly, the right of taking water from the Rhine is accorded to Belgium to feed the Rhine-Meuse navigable waterway provided for below.

The exercise of the rights mentioned under (a) and (b) of the present Article shall not interfere with navigability nor reduce the facilities for navigation, either in the bed of the Rhine or in the derivations which may be substituted therefor, nor shall it involve any increase in the tolls formerly levied under the Convention in force. All proposed schemes shall be laid before the Central Commission in order that that Commission may assure itself that these conditions are complied with.

To ensure the proper and faithful execution of the provisions contained in (a) and (b) above, Germany:

(1) binds herself not to undertake or to allow the construction of any lateral canal or any derivation on the right bank of the river opposite the French frontiers;

(2) recognises the possession by France of the right of support on and the right of way over all lands situated on the right bank which may be required in order to survey, to build, and to operate weirs which France, with the consent of the Central Commission, may subsequently decide to establish. In accordance with such consent, France shall be entitled to decide upon and fix the limits of the necessary sites, and she shall be permitted to occupy such lands after a period of two months after simple notification, subject to the payment by her to Germany of indemnities of which the total amount shall be fixed by the Central Commission. Germany shall make it her business to indemnify the proprietors whose property will be burdened with such servitudes or permanently occupied by the works.

Should Switzerland so demand, and if the

Central Commission approves, the same rights shall be accorded to Switzerland for the part of the river forming her frontier with other riparian States;

(3) shall hand over to the French Government, during the month following the coming into force of the present Treaty, all projects, designs, drafts of concessions and of specifications concerning the regulation of the Rhine for any purpose whatever which have been drawn up or received by the Governments of Alsace-Lorraine or of the Grand Duchy of Baden.

Article 359.

Subject to the preceding provisions, no works shall be carried out in the bed or on either bank of the Rhine where it forms the boundary of France and Germany without the previous approval of the Central Commission or of its agents.

Article 360.

France reserves the option of substituting herself as regards the rights and obligations resulting from agreements arrived at between the Government of Alsace-Lorraine and the Grand Duchy of Baden concerning the works to be carried out on the Rhine; she may also denounce such agreements within a term of five years dating from the coming into force of the present Treaty.

France shall also have the option of causing works to be carried out which may be recognised as necessary by the Central Commission for the upkeep or improvement of the navigability of the Rhine above Mannheim.

Article 361.

Should Belgium within a period of 25 years from the coming into force of the present Treaty decide to create a deep-draught Rhine-Meuse navigable waterway, in the region of Ruhrort, Germany shall be bound to construct, in accordance with plans to be communicated to her by the Belgian Government, after agreement with the Central Commission, the portion of this navigable waterway situated within her territory.

The Belgian Government shall, for this purpose, have the right to carry out on the ground all necessary surveys.

Should Germany fail to carry out all or part of these works, the Central Commission shall be entitled to carry them out instead; and, for this purpose, the Commission may decide upon and fix the limits of the necessary sites and occupy the ground after a period of two months after simple notification, subject to the payment of indemnities to be fixed by it and paid by Germany.

This navigable waterway shall be placed under the same administrative regime as the Rhine itself, and the division of the cost of initial construction, including the above indemnities, among the States crossed thereby shall be made by the Central Commission.

Article 362.

Germany hereby agrees to offer no objection to any proposals of the Central Rhine Commission for extending its jurisdiction:

(1) to the Moselle below the Franco-Luxemburg frontier down to the Rhine, subject to the consent of Luxemburg;

(2) to the Rhine above Basle up to the Lake of Constance, subject to the consent of Switzerland;

(3) to the lateral canals and channels which may be established either to duplicate or to improve naturally navigable sections of the Rhine or the Moselle, or to connect two naturally navigable sections of these rivers, and also any other parts of the Rhine river system which may be covered by the General Convention provided for in Article 338 above.

Chapter V.

Clauses Giving to the Czecho-Slovak State the Use of Northern Ports.

Article 363.

In the ports of Hamburg and Stettin Germany shall lease to the Czecho-Slovak State, for a period of 99 years, areas which shall be placed under the general regime of free zones and shall be used for the direct transit of goods coming from or going to that State.

Article 364.

The delimitation of these areas, and their equipment, their exploitation, and in general all conditions for their utilisation, including the amount of the rental, shall be decided by a Commission consisting of one delegate of Germany, one delegate of the Czecho-Slovak State and one delegate of Great Britain. These conditions shall be susceptible of revision every ten years in the same manner.

Germany declares in advance that she will adhere to the decisions so taken.

Section III.

RAILWAYS

Chapter I.

Clauses Relating to International Transport.

Article 365.

Goods coming from the territories of the Allied and Associated Powers, and going to Germany, or in transit through Germany from or to the territories of the Allied and Associated Powers, shall enjoy on the German railways as regards charges to be collected (rebates and drawbacks being taken into account), facilities, and all other matters, the most favourable treatment applied to goods of the same kind carried on any German lines, either in internal traffic, or for export, import or in transit, under similar conditions of transport, for example as regards length of route. The same rule shall be applied, on the request of one or more of the Allied and Associated Powers, to goods specially designated by such Power or Powers coming from Germany and going to their territories.

International tariffs established in accordance with the rates referred to in the preceding paragraph and involving through waybills shall be established when one of the Allied and Associated Powers shall require it from Germany.

Article 366.

From the coming into force of the present Treaty the High Contracting Parties shall renew, in so far as concerns them and under the reserves indicated in the second paragraph of the present Article, the conventions and arrangements signed at Berne on October 14, 1890, September 20, 1893, July 16, 1895, June 16, 1898, and September 19, 1906, regarding the transportation of goods by rail.

If within five years from the date of the coming into force of the present Treaty a new convention for the transportation of passengers, luggage and goods by rail shall have been concluded to replace the Berne Convention of October 14, 1890, and the subsequent additions referred to above, this new convention and the supplementary provisions for international transport by rail which may be based on it shall bind Germany, even if she shall have refused to take part in the preparation of the convention or to subscribe to it. Until a new convention shall have been concluded, Germany shall conform to the provisions of the Berne Convention and the subsequent additions referred to above, and to the current supplementary provisions.

Article 367.

Germany shall be bound to co-operate in the establishment of through ticket services (for passengers and their luggage which shall be required by any of the Allied and Associated Powers to ensure their communication by rail with each other and with all other countries by transit across the territories of Germany; in particular Germany shall, for this purpose, accept trains and carriages coming from the territories of the Allied and Associated Powers and shall forward them with a speed at least equal to that of her best long-distance trains on the same lines. The rates applicable to such through services shall not in any case be higher than the rates collected on German internal services for the same dis-

tance, under the same conditions of speed and comfort.

The tariffs applicable under the same conditions of speed and comfort to the transportation of emigrants going to or coming from ports of the Allied and Associated Powers and using the German railways shall not be at a higher kilometric rate than the most favourable tariffs (drawbacks and rebates being taken into account) enjoyed on the said railways by emigrants going to or coming from any other ports.

Article 368.

Germany shall not apply specially to such through services, or to the transportation of emigrants going to or coming from the ports of the Allied and Associated Powers, any technical, fiscal or administrative measures, such as measures of customs examination, general police, sanitary police, and control, the result of which would be to impede or delay such services.

Article 369.

In case of transport partly by rail and partly by international navigation, with or without through way-bill, the preceding Article shall apply to the part of the journey performed by rail.

Chapter II.

Rolling-Stock.

Article 370.

Germany undertakes that German wagons shall be fitted with apparatus allowing:

(1) of their inclusion in goods trains on the lines of such of the Allied and Associated Powers as are parties to the Berne Convention of May 15, 1886, as modified on May 18, 1907, without hampering the action of the continuous brake which may be adopted in such countries within ten years of the coming into force of the present Treaty, and

(2) of the acceptance of wagons of such countries in all goods trains on the German lines.

The rolling stock of the Allied and Associated Powers shall enjoy on the German lines the same treatment as German rolling-stock as regards movement, upkeep and repairs.

Chapter III.

Cessions of Railway Lines.

Article 371.

Subject to any special provisions concerning the cession of ports, waterways and railways situated in the territories over which Germany abandons her sovereignty and to the financial conditions relating to the concessionnaires and the pensioning of the personnel, the cession of railways will take place under the following conditions:

(1) The works and installations of all the railroads shall be handed over complete and in good condition.

(2) When a railway system possessing its own rolling-stock is handed over in its entirety by Germany to one of the Allied and Associated Powers, such stock shall be handed over complete, in accordance with the last inventory before November 11, 1918, and in a normal state of upkeep.

(3) As regards lines without any special rolling-stock, Commissions of experts designated by the Allied and Associated Powers, on which Germany shall be represented, shall fix the proportion of the stock existing on the system to which those lines belong to be handed over. These Commissions shall have regard to the amount of the material registered on these lines in the last inventory before November 11, 1918, the length of track (sidings included) and the nature and amount of the traffic. These Commissions shall also specify the locomotives, carriages and wagons to be handed over in each case; they shall decide upon the conditions of their acceptance, and shall make the provisional arrangements necessary to ensure their repair in German workshops.

(4) Stocks of stores, fittings and plant shall be handed over under the same conditions as the rolling-stock.

The provisions of paragraphs 3 and 4 above shall be applied to the lines of former Russian Poland converted by Germany to the German gauge, such lines being regarded as detached from the Prussian State System.

Chapter IV.

Provisions Relating to Certain Railway Lines.

Article 372.

When as a result of the fixing of new frontiers a railway connection between two parts of the same country crosses another country, or a branch line from one country has its terminus in another, the conditions of working, if not specifically provided for in the present Treaty, shall be laid down in a convention between the railway administrations concerned. If the administrations cannot come to an agreement as to the terms of such convention, the points of difference shall be decided by commissions of experts composed as provided in the preceding Article.

Article 373.

Within a period of five years from the coming into force of the present Treaty the Czecho-Slovak State may require the construction of a railway line in German territory between the stations of Schlauney and Nachod. The cost of construction shall be borne by the Czecho-Slovak State.

Article 374.

Germany undertakes to accept, within ten years of the coming into force of the present Treaty, on request being made by the Swiss Government after agreement with the Italian Government, the denunciation of the International Convention of October 13, 1909, relative to the St. Gothard railway. In the absence of agreement as to the conditions of such denunciation, Germany hereby agrees to accept the decision of an arbitrator designated by the United States of America.

Chapter V.

Transitory Provisions.

Article 375.

Germany shall carry out the instructions given her, in regard to transport, by an authorised body acting on behalf of the Allied and Associated Powers:

(1) For the carriage of troops under the provisions of the present Treaty, and of material, ammunition and supplies for army use;

(2) As a temporary measure, for the transportation of supplies for certain regions, as well as for the restoration, as rapidly as possible, of the normal conditions of transport, and for the organisation of postal and telegraphic services.

Section IV.

Disputes; Revision of Permanent Clauses.

Article 376.

Disputes which may arise between interested Powers with regard to the interpretation and application of the preceding Articles shall be settled as provided by the League of Nations.

Article 377.

At any time the League of Nations may recommend the revision of such of these Articles as relate to a permanent administrative regime.

Article 378.

The stipulations in Articles 321 to 330, 332, 365, and 367 to 369 shall be subject to revision by the Council of the League of Nations at any time after five years from the coming into force of the present Treaty.

Failing such revision, no Allied or Associated Power can claim after the expiration of the above period of five years the benefit of any of the stipulations in the Articles enumerated above on behalf of any portion of its territories in which reciprocity is not accorded in respect of such stipulations. The period of five years during which reciprocity

cannot be demanded may be prolonged by the Council of the League of Nations.

Section V.

Special Provision.

Article 379.

Without prejudice to the special obligations imposed on her by the present Treaty for the benefit of the Allied and Associated Powers, Germany undertakes to adhere to any General Conventions regarding the international regime of transit, waterways, ports or railways which may be concluded by the Allied and Associated Powers, with the approval of the League of Nations, within five years of the coming into force of the present Treaty.

Section VI.

Clauses Relating to the Kiel Canal.

Article 380.

The Kiel Canal and its approaches shall be maintained free and open to the vessels of commerce and of war of all nations at peace with Germany on terms of entire equality.

Article 381.

The nationals, property and vessels of all Powers shall, in respect of charges, facilities, and in all other respects, be treated on a footing of perfect equality in the use of the Canal, no distinction being made to the detriment of nationals, property and vessels of any Power between them and the nationals, property and vessels of Germany or of the most favoured nation.

No impediment shall be placed on the movement of persons or vessels other than those arising out of police, customs, sanitary, emigration or immigration regulations and those relating to the import or export of prohibited goods. Such regulations must be reasonable and uniform and must not unnecessarily impede traffic.

Article 382.

Only such charges may be levied on vessels using the Canal or its approaches as are intended to cover in an equitable manner the cost of maintaining in a navigable condition, or of improving, the Canal or its approaches, or to meet expenses incurred in the interests of navigation. The schedule of such charges shall be calculated on the basis of such expenses, and shall be posted up in the ports.

These charges shall be levied in such a manner as to render any detailed examination of cargoes unnecessary, except in the case of suspected fraud or contravention.

Article 383.

Goods in transit may be placed under seal or in the custody of customs agents; the loading and unloading of goods, and the embarkation and disembarkation of passengers, shall only take place in the ports specified by Germany.

Article 384.

No charges of any kind other than those provided for in the present Treaty shall be levied along the course or at the approaches of the Kiel Canal.

Article 385.

Germany shall be bound to take suitable measures to remove any obstacle or danger to navigation, and to ensure the maintenance of good conditions of navigation. She shall not undertake any works of a nature to impede navigation on the Canal or its approaches.

Article 386.

In the event of violation of any of the conditions of Articles 380 to 386, or of disputes as to the interpretation of these Articles, any interested Power can appeal to the jurisdiction instituted for the purpose by the League of Nations

In order to avoid reference of small questions to the League of Nations Germany will establish a local authority at Kiel qualified to deal with disputes in the first instance and to give satisfaction so far as possible to complaints which may be presented through the consular representatives of the interested Powers.

PART XIII.

Labour.

Section 1.

Organisation of Labour.

Whereas the League of Nations has for its object the establishment of universal peace and such a peace can be established only if it is based upon social justice;

And whereas conditions of labour exist involving such injustice, hardship and privation to large numbers of people as to produce unrest so great that the peace and harmony of the world are imperiled; and an improvement of those conditions is urgently required; as, for example, by the regulation of the hours of work, including the establishment of a maximum working day and week, the regulation of the labour supply, the prevention of unemployment, the provision of an adequate living wage, the protection of the worker against sickness, disease and injury arising out of his employment, the protection of children, young persons and women, provision for old age and injury, protection of the interests of workers when employed in countries other than their own, recognition of the principle of freedom of association, the organisation of vocational and technical education and other measures;

Whereas also the failure of any nation to adopt humane conditions of labour is an obstacle in the way of other nations which desire to improve the conditions in their own countries;

The High Contracting Parties, moved by sentiments of justice and humanity as well as by the desire to secure the permanent peace of the world, agree to the following:

Chapter I.

Organisation.

Article 387.

A permanent organisation is hereby established for the promotion of the objects set forth in the Preamble.

The original Members of the League of Nations shall be the original Members of this organisation, and hereafter membership of the League of Nations shall carry with it membership of the said organisation.

Article 388.

The permanent organisation shall consist of:

(1) a General conference of Representatives of the Members and,

(2) an international Labour Office controlled by the Governing Body described in Article 393.

Article 389.

The meetings of the General Conference of Representatives of the Members shall be held from time to time as occasion may require, and at least once in every year. It shall be composed of four Representatives of each of the Members, of whom two shall be Government Delegates and the two others shall be Delegates representing respectively the employers and the workpeople of each of the Members.

Each Delegate may be accompanied by advisers, who shall not exceed two in number for each item on the agenda of the meeting. When questions specially affecting women are to be considered by the Conference one at least of the advisers should be a woman.

The Members undertake to nominate non-Government Delegates and advisers chosen in agreement with the industrial organisations, if such organisations exist, which are most representative of employers or workpeople, as the case may be, in their respective countries.

Advisers shall not speak except on a request made by the Delegate whom they ac-

company and by the special authorisation of the President of the Conference, and may not vote.

A Delegate may by notice in writing addressed to the President appoint one of his advisers to act as his deputy, and the adviser, while so acting, shall be allowed to speak and vote.

The names of the Delegates and their advisers will be communicated to the International Labour Office by the Government of each of the Members.

The credentials of Delegates and their advisers shall be subject to scrutiny by the Conference, which may, by two-thirds of the votes cast by the Delegates present, refuse to admit any Delegate or adviser whom it deems not to have been nominated in accordance with this Article.

Article 390.

Every Delegate shall be entitled to vote individually on all matters which are taken into consideration by the Conference.

If one of the Members fails to nominate one of the non-Government Delegates whom it is entitled to nominate, the other non-Government Delegate shall be allowed to sit and speak at the Conference, but not to vote.

If in accordance with Article 389 the Conference refuses admission to a Delegate of one of the Members, the provisions of the present Article shall apply as if that Delegate had not been nominated

Article 391.

The meetings of the Conference shall be held at the seat of the League of Nations, or at such other place as may be decided by the Conference at a previous meeting by two-thirds of the votes cast by the Delegates present.

Article 392.

The International Labour Office shall be established at the seat of the League of Nations as part of the organisation of the League.

Article 393.

The International Labour Office shall be under the control of a Governing Body consisting of twenty-four persons, appointed in accordance with the following provisions:

The Governing Body of the International Labour Office shall be constituted as follows:

Twelve persons representing the Governments:

Six persons elected by the Delegates to the Conference representing the employers;

Six persons elected by the Delegates to the Conference representing the workers.

Of the twelve persons representing the Governments eight shall be nominated by the Members which are of the chief industrial importance, and four shall be nominated by the Members selected for the purpose by the Government Delegates to the Conference, excluding the Delegates of the eight Members mentioned above.

Any question as to which are the Members of the chief industrial importance shall be decided by the Council of the League of Nations.

The period of office of the Members of the Governing Body will be three years. The method of filling vacancies and other similar questions may be determined by the Governing Body subject to the approval of the Conference.

The Governing Body shall, from time to time, elect one of its members to act as its Chairman, shall regulate its own procedure and shall fix its own times of meeting. A special meeting shall be held if a written request to that effect is made by at least ten members of the Governing Body.

Article 394.

There shall be a Director of the International Labour Office, who shall be appointed by the Governing Body, and, subject to the instructions of the Governing Body, shall be responsible for the efficient conduct of the International Labour Office and for such other duties as may be assigned to him.

The Director or his deputy shall attend all meetings of the Governing Body.

Article 395.

The staff of the International Labour Office shall be appointed by the Director, who shall, so far as is possible with due regard to the efficiency of the work of the office, select persons of different nationalities. A certain number of these persons shall be women.

Article 396.

The functions of the International Labour Office shall include the collection and distribution of information on all subjects relating to the international adjustment of conditions of industrial life and labour, and particularly the examination of subjects which it is proposed to bring before the Conference with a view to the conclusion of international conventions, and the conduct of such special investigations as may be ordered by the Conference.

It will prepare the agenda for the meetings of the Conference.

It will carry out the duties required of it by the provisions of this Part of the present Treaty in connection with international disputes.

It will edit and publish in French and English, and in such other languages as the Governing Body may think desirable, a periodical paper dealing with problems of industry and employment of international interest.

Generally, in addition to the functions set out in this Article, it shall have such other powers and duties as may be assigned to it by the Conference.

Article 397.

The Government Departments of any of the Members which deal with questions of industry and employment may communicate directly with the Director through the Representative of their Government on the Governing Body of the International Labour Office, or failing any such Representative, through such other qualified official as the Government may nominate for the purpose.

Article 398.

The International Labour Office shall be entitled to the assistance of the Secretary-General of the League of Nations in any matter in which it can be given.

Article 399.

Each of the Members will pay the travelling and subsistence expenses of its Delegates and their advisers and of its Representatives attending the meetings of the Conference or Governing Body, as the case may be.

All the other expenses of the International Labour Office and of the meetings of the Conference or Governing Body shall be paid to the Director by the Secretary-General of the League of Nations out of the general funds of the League.

The Director shall be responsible to the Secretary-General of the League for the proper expenditure of all moneys paid to him in pursuance of this Article.

Chapter II.

Procedure.

Article 400.

The agenda for all meetings of the Conference will be settled by the Governing Body, who shall consider any suggestion as to the agenda that may be made by the Government of any of the Members or by any representative organisation recognized for the purpose of Article 389.

Article 401.

The Director shall act as the Secretary of the Conference, and shall transmit the agenda so as to reach the Members four months be-

fore the meeting of the Conference, and, through them, the non-Government Delegates when appointed.

Article 402.

Any of the Governments of the Members may formally object to the inclusion of any item or items in the agenda. The grounds for such objection shall be set forth in a reasoned statement addressed to the Director, who shall circulate it to all the Members of the Permanent Organisation.

Items to which such objection has been made shall not, however, be excluded from the agenda, if at the Conference a majority of two-thirds of the votes cast by the Delegates present is in favour of considering them.

If the Conference decides (otherwise than under the preceding paragraph) by two-thirds of the votes cast by the Delegates present that any subject shall be considered by the Conference, that subject shall be included in the agenda for the following meeting.

Article 403.

The Conference shall regulate its own procedure, shall elect its own President, and may appoint committees to consider and report on any matter.

Except as otherwise expressly provided in this Part of the present Treaty, all matters shall be decided by a simple majority of the votes cast by the Delegates present.

The voting is void unless the total number of votes cast is equal to half the number of the delegates attending the Conference.

Article 404.

The Conference may add to any committees which it appoints technical experts, who shall be assessors without power to vote.

Article 405.

When the Conference has decided on the adoption of proposals with regard to an item in the agenda, it will rest with the Conference to determine whether these proposals should take the form: (a) of a recommendation to be submitted to the Members for consideration with a view to effect being given to it by national legislation or otherwise, or (b) of a draft international convention for ratification by the Members.

In either case a majority of two-thirds of the votes cast by the Delegates present shall be necessary on the final vote for the adoption of the recommendation or draft convention as the case may be by the Conference.

In framing any recommendation or draft convention of general application the Conference shall have due regard to those countries in which climatic conditions, the imperfect development of industrial organisation or other special circumstances make the industrial conditions substantially different and shall suggest the modifications, if any, which it considers may be required to meet the case of such countries.

A copy of the recommendation or draft convention shall be authenticated by the signature of the President of the Conference and of the Director and shall be deposited with the Secretary-General of the League of Nations. The Secretary-General will communicate a certified copy of the recommendation or draft convention to each of the Members.

Each of the Members undertakes that it will, within the period of one year at most from the closing of the session of the Conference, or if it is impossible, owing to exceptional circumstances, to do so within the period of one year, then at the earliest practicable moment and in no case later than eighteen months from the closing of the session of the conference, bring the recommendation or draft convention before the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action.

In the case of a recommendation, the Members will inform the Secretary-General of the action taken.

In the case of a draft convention, the Member will, if it obtains the consent of the authority or authorities within whose competence the matter lies, communicate the formal ratification of the convention to the Secretary-General and will take such action as may be necessary to make effective the provisions of such convention.

If on a recommendation no legislative or other action is taken to make a recommendation effective, or if the draft convention fails to obtain the consent of the authority or authorities within whose competence the matter lies, no further obligation shall rest upon the Member.

In the case of a federal State the power of which to enter into conventions on labour matters is subject to limitations it shall be in the discretion of that Government to treat a draft convention to which such limitations apply as a recommendation only, and the provisions of this Article with respect to recommendations shall apply in such case.

The above Article shall be interpreted in accordance with the following principle:

In no case shall any Member be asked or required, as a result of the adoption of any recommendation or draft convention by the Conference, to lessen the protection afforded by its existing legislation to the workers concerned.

Article 406.

Any convention so ratified shall be registered by the Secretary-General of the League of Nations, but shall only be binding upon the Members which ratify it.

Article 407.

If any convention coming before the Conference for final consideration fails to secure the support of two-thirds of the votes cast by the Delegates present it shall nevertheless be within the right of any of the Members of the Permanent Organisation to agree to such convention among themselves.

Any convention so agreed to shall be communicated by the Governments concerned to the Secretary-General of the League of Nations, who shall register it.

Article 408.

Each of the Members agrees to make an annual report to the International Labour Office on the measures which it has taken to give effect to the provisions of conventions to which it is a party. These reports shall be made in such form and shall contain such particulars as the Governing Body may request. The Director shall lay a summary of these reports before the next meeting of the Conference.

Article 409.

In the event of any representation being made to the International Labour Office by an industrial association of employers or of workers that any of the Members has failed to secure in any respect the effective observance within its jurisdiction of any convention to which it is a party the Governing Body may communicate this representation to the Government against which it is made and may invite that Government to make such statement on the subject as it may think fit.

Article 410.

If no statement is received within a reasonable time from the Government in question, or if the statement when received is not deemed to be satisfactory by the Governing Body, the latter shall have the right to publish the representation and the statement, if any, made in reply to it.

Article 411.

Any of the Members shall have the right to file a complaint with the International Labour Office if it is not satisfied that any other

Member is securing the effective observance of any convention which both have ratified in accordance for the foregoing Articles.

The Governing Body may, if it thinks fit, before referring such a complaint to a Commission of Enquiry, as hereinafter provided for, communicate with the Government in question in the manner described in Article 409.

If the Governing Body does not think it necessary to communicate the complaint to the Government in question, or if, when they have made such communication, no statement in reply has been received within a reasonable time which the Governing Body considers to be satisfactory, the Governing Body may apply for the appointment of a Commission of Enquiry to consider the complaint and to report thereon.

The Governing Body may adopt the same procedure either of its own motion or on receipt of a complaint from a Delegate to the Conference.

When any matter arising out of Articles 410 or 411 is being considered by the Governing Body the Government in question shall, if not already represented thereon, be entitled to send a representative to take part in the proceedings of the Governing Body while the matter is under consideration. Adequate notice of the date on which the matter will be considered shall be given to the Government in question.

Article 412.

The Commission of Enquiry shall be constituted in accordance with the following provisions:

Each of the Members agrees to nominate within six months of the date on which the present Treaty comes into force three persons of industrial experience, of whom one shall be a representative of employers, one a representative of workers and one a person of independent standing, who shall together form a panel from which the members of the Commission of Enquiry shall be drawn.

The qualifications of the persons so nominated shall be subject to scrutiny by the Governing Body, which may by two-thirds of the votes cast by the representatives present refuse to accept the nomination of any person whose qualifications do not in its opinion comply with the requirements of the present Article.

Upon the application of the Governing Body, the Secretary-General of the League of Nations shall nominate three persons, one from each section of this panel, to constitute the Commission of Enquiry, and shall designate one of them as the President of the Commission. None of these three persons shall be a person nominated to the panel by any Member directly concerned in the complaint.

Article 413.

The Members agree that, in the event of the reference of a complaint to a Commission of Enquiry under Article 411, they will each, whether directly concerned in the complaint or not, place at the disposal of the Commission all the information in their possession which bears upon the subject-matter of the complaint.

Article 414.

When the Commission of Enquiry has fully considered the complaint, it shall prepare a report embodying its findings on all questions of fact relevant to determining the issue between the parties and containing such recommendations as it may think proper as to the steps which should be taken to meet the complaint and the time within which they should be taken.

It shall also indicate in this report the measures, if any, of an economic character against a defaulting Government which it considers to be appropriate, and which it considers other Governments would be justified in adopting.

Article 415.

The Secretary-General of the League of Nations shall communicate the report of the Commission of Enquiry to each of the Governments concerned in the complaint, and shall cause it to be published.

Each of these Governments shall within one month inform the Secretary-General of the League of Nations whether or not it accepts the recommendations contained in the report of the Commission, and if not, whether it proposes to refer the complaint to the Permanent Court of International Justice of the League of Nations.

Article 416.

In the event of any Member failing to take the action required by Article 405, with regard to a recommendation or draft Convention, any other Member shall be entitled to refer the matter to the Permanent Court of International Justice.

Article 417.

The decision of the Permanent Court of International Justice in regard to a complaint or matter which has been referred to it in pursuance of Article 415 or Article 416 shall be final.

Article 418.

The Permanent Court of International Justice may affirm, vary or reverse any of the findings or recommendations of the Commission of Enquiry, if any, and shall in its decision indicate the measures, if any, of an economic character which it considers to be appropriate, and which other Governments would be justified in adopting against a defaulting Government.

Article 419.

In the event of any Member failing to carry out within the time specified the recommendations, if any, contained in the report of the Commission of Enquiry, or in the decision of the Permanent Court of International Justice as the case may be, any other Member may take against that Member the measures of an economic character indicated in the report of the Commission or in the decision of the Court as appropriate to the case.

Article 420.

The defaulting Government may at any time inform the Governing Body that it has taken the steps necessary to comply with the recommendations of the Commission of Enquiry or with those in the decision of the Permanent Court of International Justice, as the case may be, and may request it to apply to the Secretary-General of the League to constitute a Commission of Enquiry to verify its contention. In this case the provisions of Articles 412, 413, 414, 415, 417 and 418 shall apply, and if the report of the Commission of Enquiry or the decision of the Permanent Court of International Justice is in favour of the defaulting Government, the other Governments shall forthwith discontinue the measures of an economic character that they have taken against the defaulting Government.

Chapter III.

General.

Article 421.

The Members engage to apply conventions which they have ratified in accordance with the provisions of this Part of the present Treaty to their colonies, protectorates and possessions which are not fully self-governing:

(1) Except where owing to local conditions the convention is inapplicable, or

(2) Subject to such modifications as may be necessary to adapt the convention to local conditions.

And each of the Members shall notify to the International Labour Office the action taken in respect of each of its colonies, protectorates and possessions which are not fully self-governing.

Article 422.

Amendments to this Part of the present Treaty which are adopted by the Conference by a majority of two-thirds of the votes cast by the Delegates present shall take effect when ratified by the States whose representatives compose the Council of the League of Nations and by three-fourths of the Members.

Article 423.

Any question or dispute relating to the interpretation of this Part of the present Treaty or of any subsequent convention concluded by the Members in pursuance of the provisions of this Part of the present Treaty shall be referred for decision to the Permanent Court of International Justice.

Chapter IV.

Transitory Provisions.

Article 424.

The first meeting of the Conference shall take place in October, 1919. The place and agenda for this meeting shall be as specified in the Annex hereto.

Arrangements for the convening and the organisation of the first meeting of the Conference will be made by the Government designated for the purpose in the said Annex. That Government shall be assisted in the preparation of the documents for submission to the Conference by an international Committee constituted as provided in the said Annex.

The expenses of the first meeting and of all subsequent meetings held before the League of Nations has been able to establish a general fund, other than the expenses of Delegates and their advisers, will be borne by the Members in accordance with the apportionment of the expenses of the International Bureau of the Universal Postal Union.

Article 425.

Until the League of Nations has been constituted all communications which under the provisions of the foregoing Articles should be addressed to the Secretary-General of the League will be preserved by the Director of the International Labour Office, who will transmit them to the Secretary-General of the League.

Article 426.

Pending the creation of a Permanent Court of International Justice disputes which in accordance with this Part of the present Treaty would be submitted to it for decision will be referred to a tribunal of three persons appointed by the Council of the League of Nations.

ANNEX.

First Meeting of Annual Labour Conference, 1919.

The place of meeting will be Washington.

The Government of the United States of America is requested to convene the Conference.

The International Organising Committee will consist of seven Members, appointed by the United States of America, Great Britain, France, Italy, Japan Belgium and Switzerland. The Committee may, if it thinks necessary, invite other Members to appoint representatives.

(1) Application of principle of the 8-hours day or of the 48-hours week.

(2) Question of preventing or providing against unemployment.

(3) Women's employment:
  (a) Before and after child-birth, including the question of maternity benefit;
  (b) During the night;
  (c) In unhealthy processes.

(4) Employment of children:
  (a) Minimum age of employment;
  (b) During the night;
  (c) In unhealthy processes.

(5) Extension and application of the International Conventions adopted at Berne in 1906 on the prohibition of night work for women employed in industry and the prohibition of the use of white phosphorus in the manufacture of matches.

Section II.

General Principles.

Article 427.

The High Contracting Parties, recognising that the well being, physical, moral and intellectual, of the industrial wage-earners is of supreme international importance, have framed, in order to further this great end, the permanent machinery provided for in Section I and associated with that of the League of Nations.

They recognise that differences of climate, habits and customs, of economic opportunity and industrial tradition, make strict uniformity in the conditions of labour difficult of immediate attainment. But, holding as they do that labour should not be regarded merely as an article of commerce, they think that there are methods and principles for regulating labour conditions which all industrial communities should endeavor to apply, so far as their special circumstances will permit.

Among these methods and principles, the following seem to the High Contracting Parties to be of special and urgent importance:

First.—The guiding principle above enunciated that labour should not be regarded merely as a commodity or article of commerce.

Second.—The right of association for all lawful purposes by the employed as well as by the employers.

Third.—The payment to the employed of a wage adequate to maintain a reasonable standard of life as this is understood in their time and country.

Fourth.—The adoption of an eight hours day or a forty-eight hours week as the standard to be aimed at where it has not already been attained.

Fifth.—The adoption of a weekly rest of at least twenty-four hours, which should include Sunday wherever practicable.

Sixth.—The abolition of child labour and the imposition of such limitations on the labour of young persons as shall permit the continuation of their education and assure their proper physical development.

Seventh.—The principle that men and women should receive equal remuneration for work of equal value.

Eighth.—The standard set by law in each country with respect to the conditions of labour should have due regard to the equitable economic treatment of all workers lawfully resident therein.

Ninth.—Each State should make provision for a system of inspection in which women should take part, in order to ensure the enforcement of the laws and regulations for the protection of the employed.

Without claiming that these methods and principles are either complete or final, the High Contracting Parties are of opinion that they are well fitted to guide the policy of the League of Nations; and that, if adopted by the industrial communities who are members of the League, and safeguarded in practice by an adequate system of such inspection, they will confer lasting benefits upon the wage earners of the world.

PART XIV.

Guarantees.

Section 1.

Western Europe.

Article 428.

As a guarantee for the execution of the present Treaty by Germany, the German territory situated to the west of the Rhine, together with the bridgeheads, will be occupied by Allied and Associated troops for a

period of fifteen years from the coming into force of the present Treaty.

Article 429.

If the conditions of the present Treaty are faithfully carried out by Germany, the occupation referred to in Article 428 will be successively restricted as follows:

(1) At the expiration of five years there will be evacuated: The bridgehead of Cologne and the territories north of a line running along the Ruhr, then along the railway Julich, Duren, Euskirchen, Rheinbach, thence along the road Rheinbach to Sinzig, and reaching the Rhine at the confluence with the Ahr; the roads, railways and places mentioned above being excluded from the area evacuated.

(2) At the expiration of ten years there will be evacuated: The bridgehead of Coblenz and the territories north of a line to be drawn from the intersection between the frontiers of Belgium, Germany and Holland, running about from 4 kilometres south of Aix-la-Chapelle, then to and following the crest of Forst Gemund, then east of the railway of the Urft Valley, then along Blankenheim, Valdorf, Dreis, Ulmen to and following the Moselle from Bremm to Nehren, then passing by Kappel and Simmern, then following the ridge of the heights between Simmern and the Rhine and reaching this river at Bacharach; all the places, valleys, roads and railways mentioned above being excluded from the area evacuated.

(3) At the expiration of fifteen years there will be evacuated: The bridgehead of Mainz, the bridgehead of Kehl and the remainder of the German territory under occupation.

If at that date the guarantees against unprovoked aggression by Germany are not considered sufficient by the Allied and Associated Governments, the evacuation of the occupying troops may be delayed to the extent regarded as necessary for the purpose of obtaining the required guarantees.

Article 430.

In case either during the occupation or after the expiration of the fifteen years referred to above the Reparation Commission finds that Germany refuses to observe the whole or part of her obligations under the present Treaty with regard to reparation, the whole or part of the areas specified in Article 429 will be re-occupied immediately by the Allied and Associated forces.

Article 431.

If before the expiration of the period of fifteen years Germany complies with all the undertakings resulting from the present Treaty the occupying forces will be withdrawn immediately.

Article 432.

All matters relating to the occupation and not provided for by the present Treaty shall be regulated by subsequent agreements, which Germany hereby undertakes to observe.

Section II.

Eastern Europe

Article 433.

As a guarantee for the execution of the provisions of the present Treaty, by which Germany accepts definitely the abrogation of the Brest-Litovsk Treaty, and of all treaties, conventions and agr ements entered into by her with the Maximalist Government in Russia, and in order to ensure the restoration of peace and good government in the Baltic Provinces and Lithuania, all German troops at present in the said territori s shall return to within the frontiers of Germany as soon as the Governments of the Principal Allied and Associated Powers shall think the moment suitable, having regard to the internal situation of these territories. These troops shall abstain from all requisitions and seizures and from any other coercive measures, with a view to obtaining supplies intended for Germany, and shall in no way interfere with such measures for national defence as may be adopted by the Provisional Government of Esthonia, Latvia and Lithuania.

No other German troops shall, pending the evacuation or after the evacuation is complete, be admitted to the said territories.

PART XV.

Miscellaneous Provisions.

Article 434.

Germany undertakes to recognise the full force of the Treaties of Peace and Additional Conventions which may be concluded by the Allied and Associated Powers with the Powers who fought on the side of Germany and to recognise whatever dispositions may be made concerning the territories of the former Austro-Hungarian Monarchy, of the Kingdom of Bulgaria and of the Ottoman Empire, and to recognise the new States within their frontiers as there laid down.

Article 435.

The High Contracting Parties, while they recognise the guarantees stipulated by the Treaties of 1815, and especially by the Act of November 20, 1815, in favour of Switzerland, the said guarantees constituting international obligations for the maintenance of peace, declare nevertheless that the provisions of these treaties, conventions, declarations and other supplementary Acts concerning the neutralised zone of Savoy, as laid down in paragraph 1 of Article 92 of the Final Act of the Congress of Vienna and in paragraph 2 of Article 3 of the Treaty of Paris of November 20, 1815, are no longer consistent with present conditions. For this reason the High Contracting Parties take note of the agreement reached between the French Government and the Swiss Government for the abrogation of the stipulations relating to this zone which are and remain abrogated.

The High Contracting Parties also agree that the stipulations of the Treaties of 1815, and of the other supplementary Acts concerning the free zones of Upper Savoy and the Gex district are no longer consistent with present conditions, and that it is for France and Switzerland to come to an agreement together with a view to settling between themselves the status of these territories under such conditions as shall be considered suitable by both countries.

ANNEX.

I.

The Swiss Federal Council has informed the French Government on May 5, 1919, that after examining the provisions of Article 435 in a like spirit of sincere friendship it has happily reached the conclusion that it was possible to acquiesce in it under the following conditions and reservations:

(1) The neutralised zone of Haute-Savoie:

(a) It will be understood that as long as the Federal Chambers have not ratified the agreement come to between the two Governments concerning the abrogation of the stipulations in respect of the neutralised zone of Savoy, nothing will be definitely settled on one side or the other in regard to this subject.

(b) The assent given by the Swiss Government to the abrogation of the above mentioned stipulations presupposes, in conformity with the text adopted, the recognition of the guarantees formulated in favour of Switzerland by the Treaties of 1815 and particularly by the Declaration of November 20, 1815.

(c) The agreement between the Governments of France and Switzerland for the abrogation of the above mentioned stipulations will only be considered as valid if the Treaty of Peace contains this Article in its present wording. In addition the parties to the Treaty of Peace should endeavour to obtain the assent of the signatory Powers of the Treaties of 1815 and of the Declaration of November 20, 1815,

which are not signatories of the present Treaty of Peace.

(2) Free zone of Haute-Savoie and the district of Gex:

(a) The Federal Council makes the most express reservations to the interpretation to be given to the statement mentioned in the last paragraph of the above Article for insertion in the Treaty of Peace, which provides that "the stipulations of the Treaties of 1815 and other supplementary acts concerning the free zones of Haute-Savoie and the Gex district are no longer consistent with present conditions." The Federal Council would not wish that its acceptance of the above wording should lead to the conclusion that it would agree to the suppression of a system intended to give neighbouring territory the benefit of a special regime which is appropriate to the geographical and economical situation and which has been well tested.

In the opinion of the Federal Council the question is not the modification of the customs system of the zones as set up by the Treaties mentioned above, but only the regulation in a manner more appropriate to the economic conditions of the present day of the terms of the exchange of goods between the regions in question. The Federal Council has been led to make the preceding observations by the perusal of the draft Convention concerning the future constitution of the zones which was annexed to the note of April 26 from the French Government. While making the above reservations the Federal Council declares its readiness to examine in the most friendly spirit any proposals which the French Government may deem it convenient to make on the subject.

(b) It is conceded that the stipulations of the Treaties of 1815 and other supplementary acts relative to the free zones will remain in force until a new arrangement is come to between France and Switzerland to regulate matters in this territory.

II.

The French Government have addressed to the Swiss Government on May 18, 1919, the following note in reply to the communication set out in the preceding paragraph:

In a note dated May 5 the Swiss Legation in Paris was good enough to inform the Government of the French Republic that the Federal Government adhered to the proposed Article to be inserted in the Treaty of Peace between the Allied and Associated Governments and Germany.

The French Government have taken note with much pleasure of the agreement thus reached, and, at their request, the proposed Article, which has been accepted by the Allied and Associated Governments, has been inserted under No. 435 in the Peace conditions presented to the German Plenipotentiaries.

The Swiss Government, in their note of May 5 on this subject, have expressed various views and reservations.

Concerning the observations relating to the free zones of Haute-Savoie and the Gex district, the French Government have the honour to observe that the provisions of the last paragraph of Article 435 are so clear that their purport cannot be misapprehended, especially where it implies that no other Power but France and Switzerland will in future be interested in that question.

The French Government, on their part, are anxious to protect the interests of the French territories concerned, and, with that object, having their special situation in view, they bear in mind the desirability of assuring them a suitable customs regime and determining, in a manner better suited to present conditions, the methods of exchanges between these territories and the adjacent Swiss territories, while taking into account the reciprocal interests of both regions.

It is understood that this must in no way prejudice the right of France to adjust her customs line in this region in conformity with her political frontier, as is done on the other portions of her territorial boundaries, and as was done by Switzerland long ago on her own boundaries in this region.

The French Government are pleased to note on this subject in what a friendly disposition the Swiss Government take this opportunity of declaring their willingness to consider any French proposal dealing with the system to be substituted for the present regime of the said free zones, which the French Government intend to formulate in the same friendly spirit.

Moreover, the French Government have no doubt that the provisional maintenance of the regime of 1815 as to the free zones referred to in the above mentioned paragraph of the note from the Swiss Legation of May 5, whose object is to provide for the passage from the present régime to the conventional regime, will cause no delay whatsoever in the establishment of the new situation which has been found necessary by the two governments. This remark applies also to the ratification by the Federal Chambers, dealt with in paragraph 1 (a), of the Swiss note of May 5, under the heading "Neutralized zone of Haute-Savoie."

Article 436.

The High Contracting Parties declare and place on record that they have taken note of the Treaty signed by the Government of the French Republic on July 17, 1918, with His Serene Highness the Prince of Monaco defining the relations between France and the Principality.

Article 437.

The High Contracting Parties agree that, in the absence of a subsequent agreement to the contrary, the Chairman of any Commission established by the present Treaty shall in the event of an equality of votes be entitled to a second vote.

Article 438.

The Allied and Associated Powers agree that where Christian religious missions were being maintained by German societies or persons in territory belonging to them, or of which the government is entrusted to them in accordance with the present Treaty, the property which these missions or missionary societies possessed, including that of trading societies whose profits were devoted to the support of missions, shall continue to be devoted to missionary purposes. In order to ensure the due execution of this undertaking the Allied and Associated Governments will hand over such property to boards of trustees appointed by or approved by the Governments and composed of persons holding the faith of the mission whose property is involved.

The Allied and Associated Governments, while continuing to maintain full control as to the individuals by whom the missions are conducted, will safeguard the interests of such missions.

Germany, taking note of the above undertaking, agrees to accept all arrangements made or to be made by the Allied or Associated Government concerned for carrying on the work of said missions or trading societies and waives all claims on their behalf.

Article 439.

Without prejudice to the provisions of the present Treaty, Germany undertakes not to put forward directly or indirectly against any Allied or Associated Powers, signatory of the present Treaty, including those which, without having declared war, have broken off diplomatic relations with the German Empire, any pecuniary claim based on events which occurred at any time before the coming into force of the present Treaty.

The present stipulation will bar completely

and finally all claims of this nature, which will be thenceforward extinguished, whoever may be the parties in interest.

Article 440.

Germany accepts and recognises as valid and binding all decrees and orders concerning German shops and goods and all orders relating to the payment of costs made by any Prize Court of any of the Allied or Associated Powers, and undertakes not to put forward any claim arising out of such decrees or orders on behalf of any German national.

The Allied and Associated Powers reserve the right to examine in such manner as they may determine all decisions and orders of German Prize Courts, whether affecting the property rights of nationals of those Powers or of neutral Powers. Germany agrees to furnish copies of all the documents constituting the record of the cases, including the decisions and orders made, and to accept and give effect to the recommendations made after such examination of the cases.

The present Treaty, of which the French and English texts are both authentic, shall be ratified.

The deposit of ratifications shall be made at Paris as soon as possible

Powers of which the seat of the Government is outside Europe will be entitled merely to inform the Government of the French Republic through their diplomatic representative at Paris that their ratification has been given; in that case they must transmit the instrument of ratification as soon as possible.

A first proces-verbal of the deposit of ratifications will be drawn up as soon as the Treaty has been ratified by Germany on the one hand, and by three of the Principal Allied and Associated Powers on the other hand.

From the date of this first proces-verbal the Treaty will come into force between the High Contracting Parties who have ratified it. For the determination of all periods of time provided for in the present Treaty this date will be the date of the coming into force of the Treaty.

In all other respects the Treaty will enter into force for each Power at the date of the deposit of its ratification.

The French Government will transmit to all the signatory Powers a certified copy of the proces-verbaux of the deposit of ratifications.

IN FAITH WHEREOF the above-named Plenipotentiaries have signed the present Treaty.

Done at Versailles, the twenty-eighth day of June, one thousand nine hundred and nineteen, in a single copy which will remain deposited in the archives of the French Republic, and of which authenticated copies will be transmitted to each of the signatory Powers.

TREATY WITH POLAND.

Under article 93 of the treaty of peace with Germany, Poland was asked to sign a treaty submitted by the supreme council of the principal allied and associated powers. This treaty was transmitted to M. Paderewski on June 24, 1919, accompanied by a letter from M. Clemenceau explaining the considerations by which the allied and associated powers were guided in dealing with the question. In the letter the president of the conference pointed out that the treaty did not constitute any fresh departure. "It has for a long time," wrote M. Clemenceau, "been the established procedure of the public law of Europe that when a state is created, or even when large accessions are made to an established state, the joint and formal recognition by the great powers should be accompanied by the requirement that such state should, in the form of a binding international convention, undertake to comply with certain principles of government.

"In this connection I must also recall to your consideration the fact that it is to the endeavors and sacrifices of the powers in whose name I am addressing you that the Polish nation owes the recovery of its independence. It is by their decision that Polish sovereignty is being re-established over the territories in question and that the inhabitants of these territories are being incorporated in the Polish nation. It is on the support which the resources of these powers will afford to the league of nations that for the future Poland will to a large extent depend for the secure possession of these territories."

In explaining some of the individual clauses in the treaty M. Clemenceau wrote: "Article 2 guarantees to all inhabitants those elementary rights, which are, as a matter of fact, secured in every civilized state. Clauses 3 to 6 are designed to insure that all the genuine residents in the territories now transferred to Polish sovereignty shall in fact be assured of the full privileges of citizenship. Articles 7 and 8, which are in accordance with precedent, provide against any discrimination against those Polish citizens who by their religion, their language or their race differ from the large mass of the Polish population.

"Clauses 10 and 12 deal specifically with the Jewish citizens of Poland. The information at the disposal of the principal allied and associated powers as to the existing relations between the Jews and the other Polish citizens has led them to the conclusion that, in view of the historical development of the Jewish question and the great animosity aroused by it, special protection is necessary for the Jews in Poland. These clauses have been limited to the minimum which seems necessary under the circumstances of the present day, viz., the maintenance of Jewish schools and the protection of the Jews in the religious observance of their sabbath. It is believed that these stipulations will not create any obstacle to the political unity of Poland. They do not constitute any recognition of the Jews as a separate political community within the Polish state. The educational provisions contain nothing beyond what is in fact provided in the educational institutions of many highly organized modern states. Ample safeguards against the use of non-Polish languages to encourage a spirit of national separation have been provided in the express acknowledgment that the provisions of this treaty do not prevent the Polish state from making the Polish language obligatory in all its schools and educational institutions."

TEXT OF THE TREATY.

"The United States of America, the British empire, France, Italy and Japan, the principal allied and associated powers, on the one hand; and Poland on the other hand;

"Whereas the allied and associated powers have by the success of their arms restored to the Polish nation the independence of which it had been unjustly deprived; and

"Whereas by the proclamation of March 30, 1917, the government of Russia assented to the re-establishment of an independent Polish state; and

"Whereas the Polish state, which now in fact exercises sovereignty over those portions of the former Russian empire which are inhabited by a majority of Poles, has already been recognized as a sovereign and independent state by the principal allied and associated powers; and

"Whereas under the treaty of peace concluded with Germany by the allied and associated powers, a treaty of which Poland is a signatory, certain portions of the former German empire will be incorporated in the territory of Poland; and

"Whereas under the terms of the said treaty of peace, the boundaries of Poland not already laid down are to be subsequently determined by the principal allied and associated powers;

"The United States of America, the British empire, France, Italy and Japan, on the one hand, confirming their recognition of the Polish state, constituted within the said limits as a sovereign and independent member of the family of nations, and being anxious to insure the execution of the provisions of article 93 of the said treaty of peace with Germany;

"Poland, on the other hand, desiring to conform her institutions to the principles of liberty and justice, and to give a sure guaranty to the inhabitants of the territory over which she has assumed sovereignty;

"For this purpose the high contracting parties represented as follows:

"The president of the United States of America, by:

"The Honorable Woodrow Wilson, president of the United States, acting in his own name and by his own proper authority;

"The Honorable Robert Lansing, secretary of state;

"The Honorable Henry White, formerly ambassador extraordinary and plenipotentiary of the United States at Rome and Paris;

"The Honorable Edward M House;

"Gen. Tasker H. Bliss, military representative of the United States on the supreme war council;

"His majesty the king of the United Kingdom of Great Britain and Ireland and of the British dominions beyond the seas, emperor of India, by:

"The Right Honorable Andrew Bonar Law, M. P., his lord privy seal;

"The Right Honorable Viscount Milner, G. C. B., G. C. M. G., his secretary of state for the colonies;

"The Right Honorable Arthur James Balfour, O. M., M. P., his secretary of state for foreign affairs;

"The Right Honorable George Nicoll Barnes, M. P., minister without portfolio;

"And

"For the Dominion of Canada, by:

"The Honorable Charles Joseph Doherty, minister of justice;

"The Honorable Arthur Lewis Sifton, minister of customs;

"For the Commonwealth of Australia, by:

"The Right Honorable William Morris Hughes, attorney-general and prime minister;

"The Right Honorable Sir Joseph Cook, G. C. M. G., minister for the navy;

"For the Union of South Africa by:

"Gen. the Right Honorable Louis Botha, minister of native affairs and prime minister;

"Lieut.-Gen. the Right Honorable Jan Christiaan Smuts, K. C., minister of defense;

"For the Dominion of New Zealand, by:

"The Right Honorable William Ferguson Massey, minister of labor and prime minister;

"For India, by:

"The Right Honorable Edwin Samuel Montagu, M. P., his secretary of state for dia;

"Maj.-Gen. his highness Maharaja Sir Ganga Singh Bahadur, maharaja of Bikaner, G. C. S. I., G. C. I. E., G. C. V. O., K. C. B., A. D. C.

"The president of the French republic, by:

"Mr. Georges Clemenceau, president of the council, minister of war;

"Mr. Stephen Pichon minister of foreign affairs;

"Mr. Louis Lucien Klotz, minister of finance;

"Mr. Andre Tardieu, commissary general for Franco-American military affairs;

"Mr. Jules Cambon, ambassador of France;

"His majesty the king of Italy, by:

"Baron S. Sonnino, deputy;

"Marquis G. Imperiali, senator, ambassador of his majesty the king of Italy at London;

"Mr. S. Crespi, deputy;

"His majesty the emperor of Japan, by:

"Marquis Saionzi, formerly president of the council of ministers;

"Baron Makino, formerly minister of foreign affairs, member of the diplomatic council;

"Viscount Chinda, ambassador extraordinary and plenipotentiary of H. M. the emperor of Japan at Paris;

"Mr. K. Matsui, ambassador extraordinary and plenipotentiary of H. M. the emperor of Japan at London;

"Mr. H. Ijuin, ambassador extraordinary and plenipotentiary of H. M. the emperor of Japan at Rome;

"The president of the Polish republic, by:

"Mr. Ignace J. Paderewski, president of the council of ministers, minister of foreign affairs;

"Mr. Roman Dmowski, president of the Polish national committee;

"After having exchanged their full powers, found in good and due form, have agreed as follows:

Chapter I.

Article 1.

"Poland undertakes that the stipulations contained in articles 2 to 8 of this chapter shall be recognized as fundamental laws, and that no law, regulation or official action shall conflict or interfere with the stipulations, nor shall any law, regulation or official action prevail over them.

Article 2.

"Poland undertakes to assure full and complete protection of life and liberty to all inhabitants of Poland without distinction of birth, nationality, language, race or religion.

"All inhabitants of Poland shall be entitled to the free exercise, whether public or private, of any creed, religion or belief whose practices are not inconsistent with public order or public morals.

Article 3.

"Poland admits and declares to be Polish nationals ipso facto and without the requirement of any formality German, Austrian, Hungarian or Russian nationals habitually resident at the date of the coming into force of the present treaty in territory which is or may be recognized as forming part of Poland, but subject to any provisions in the treaties of peace with Germany or Austria respectively relating to persons who became resident in such territory after a specified date.

"Nevertheless, the persons referred to above who are over 18 years of age will be entitled under the conditions contained in the said treaties to opt for any other nationality which may be open to them. Option by a husband will cover his wife and option by parents will cover their children under 18 years of age.

"Persons who have exercised the above right to opt must, except where it is otherwise provided in the treaty of peace with Germany, transfer within the succeeding twelve months their place of residence to the state for which they have opted. They will be entitled to retain their immovable property in Polish territory. They may carry with them their movable property of every description. No export duties may be imposed upon them in connection with the removal of such property.

Article 4.

"Poland admits and declares to be Polish nationals ipso facto and without the requirement of any formality persons of German, Austrian, Hungarian or Russian nationality who were born in the said territory of parents habitually resident there, even if at the date

of the coming into force of the present treaty they are not themselves habitually resident there.

"Nevertheless, within two years after the coming into force of the present treaty, these persons may make a declaration before the competent Polish authorities in the country in which they are resident, stating that they abandon Polish nationality, and they will then cease to be considered as Polish nationals. In this connection a declaration by a husband will cover his wife, and a declaration by parents will cover their children under 18 years of age.

Article 5.

"Poland undertakes to put no hindrance in the way of the exercise of the right which the persons concerned have, under the treaties concluded or to be concluded by the allied and associated powers with Germany, Austria, Hungary or Russia, to choose whether or not they will acquire Polish nationality.

Article 6.

"All persons born in Polish territory who are not born nationals of another state shall ipso facto become Polish nationals.

Article 7.

"All Polish nationals shall be equal before the law and shall enjoy the same civil and political rights without distinction as to race, language or religion.

"Differences of religion, creed or confession shall not prejudice any Polish national in matters relating to the enjoyment of civil or political rights, as for instance admission to public employments, functions and honors, or the exercise of professions and industries.

"No restriction shall be imposed on the free use by any Polish national of any language in private intercourse, in commerce, in religion, in the press or in publications of any kind or at public meetings.

"Notwithstanding any establishment by the Polish government of an official language, adequate facilities shall be given to Polish nationals of non-Polish speech for the use of their language, either orally or in writing, before the courts.

Article 8.

"Polish nationals who belong to racial, religious or linguistic minorities shall enjoy the same treatment and security in law and in fact as the other Polish nationals. In particular they shall have an equal right to establish, manage and control at their own expense charitable, religious and social institutions, schools and other educational establishments, with the right to use their own language and to exercise their religion freely therein.

Article 9.

"Poland will provide in the public educational system in towns and districts in which a considerable proportion of Polish nationals of other than Polish speech are residents adequate facilities for insuring that in the primary schools the instruction shall be given to the children of such Polish nationals through the medium of their own language. This provision shall not prevent the Polish government from making the teaching of the Polish language obligatory in the said schools.

"In towns and districts where there is a considerable proportion of Polish nationals belonging to racial, religious or linguistic minorities, these minorities shall be assured an equitable share in the enjoyment and application of the sums which may be provided out of public funds under the state, municipal or other budget, for educational, religious or charitable purposes.

"The provisions of this article shall apply to Polish citizens of German speech only in that part of Poland which was German territory on Aug. 1, 1914.

Article 10.

"Educational committees appointed locally by the Jewish communities of Poland will, subject to the general control of the state, provide for the distribution of the proportional share of public funds allocated to Jewish schools in accordance with article 9 and for the organization and management of these schools.

"The provisions of article 9 concerning the use of languages in schools shall apply to these schools.

Article 11.

"Jews shall not be compelled to perform any act which constitutes a violation of their Sabbath, nor shall they be placed under any disability by reason of their refusal to attend courts of law or to perform any legal business on their Sabbath. This provision, however, shall not exempt Jews from such obligations as shall be imposed upon all other Polish citizens for the necessary purposes of military service, national defense or the preservation of public order.

"Poland declares her intention to refrain from ordering or permitting elections, whether general or local, to be held on a Saturday, nor will registration for electional or other purposes be compelled to be performed on a Saturday.

Article 12.

"Poland agrees that the stipulation in the foregoing articles, so far as they affect persons belonging to racial, religious or linguistic minorities, constitute obligations of international concern and shall be placed under the guaranty of the League of Nations. They shall not be modified without the assent of a majority of the council of the League of Nations. The United States, the British empire, France, Italy and Japan hereby agree not to withhold their assent from any modification in these articles which is in due form assented to by a majority of the council of the League of Nations.

"Poland agrees that any member of the council of the League of Nations shall have the right to bring to the attention of the council any infraction, or any danger of infraction, of any of these obligations, and that the council may thereupon take such action and give such direction as it may deem proper and effective in the circumstances.

"Poland further agrees that any difference of opinion as to questions of law or fact arising out of these articles between the Polish government and any of the principal allied and associated powers or any other power, a member of the council of the League of Nations, shall be held to be a dispute of an international character under article 14 of the covenant of the League of Nations. The Polish government hereby consents that any such dispute shall, if the other party thereto demands, be referred to the permanent court of international justice. The decision of the permanent court shall be final and shall have the same force and effect as an award under article 13 of the covenant.

Chapter II.

Article 13.

"Each of the principal allied and associated powers on the one part and Poland on the other shall be at liberty to appoint diplomatic representatives to reside in their respective capitals, as well as consuls-general, consuls, vice-consuls and consular agents to reside in the towns and ports of their respective territories.

"Consuls-general, consuls, vice-consuls and consular agents, however, shall not enter upon their duties until they have been admitted in the usual manner by the government in the territory of which they are stationed.

"Consuls-general, consuls, vice-consuls and consular agents shall enjoy all the facilities, privileges, exemptions and immunities of every kind which are or shall be granted to consular officers of the most favored nation.

Article 14.

"Pending the establishment of an import tariff by the Polish government, goods originating in the allied and associated states shall not be subject to any higher duties on importa-

tion into Poland than the most favorable rates of duty applicable to goods of the same kind under either the German, Austro-Hungarian or Russian customs tariffs on July 1, 1914.

Article 15.

"Poland undertakes to make no treaty, convention or arrangement and to take no other action which will prevent her from joining in any general agreement for the equitable treatment of the commerce of other states that may be concluded under the auspices of the League of Nations within five years from the coming into force of the present treaty.

"Poland also undertakes to extend to all the allied and associated states any favors or privileges in customs matters which she may grant during the same period of five years to any state with which since August, 1914, the allies have been at war, or to any state which may have concluded with Austria special customs arrangements as provided for in the treaty of peace to be concluded with Austria.

Article 16.

"Pending the conclusion of the general agreement referred to above, Poland undertakes to treat on the same footing as national vessels or vessels of the most favored nation the vessels of all the allied and associated states which accord similar treatment to Polish vessels.

"By way of exception from this provision, the right of Poland or of any other allied or associated state to confine her maritime coasting trade to national vessels is expressly reserved.

Article 17.

"Pending the conclusion under the auspices of the league of nations of a general convention to secure and maintain freedom of communications and of transit, Poland undertakes to accord freedom of transit to persons, goods, vessels, carriages, wagons and mails in transit to or from any allied or associated state over Polish territory, including territorial waters, and to treat them as least as favorably as the persons, goods, vessels, carriages, wagons and mails respectively of Polish or of any other most favored nationality, origin, importation or ownership, as regards facilities, charges, restrictions and all other matters.

"All charges imposed in Poland on such traffic in transit shall be reasonable, having regard to the conditions of the traffic. Goods in transit shall be exempt from all customs or other duties. Tariffs for transit traffic across Poland and tariffs between Poland and any allied or associated power involving through tickets or waybills shall be established at the request of that allied or associated power.

"Freedom of transit shall extend to postal, telegraphic and telephonic services.

"It is agreed that no allied or associated power can claim the benefit of these provisions on behalf of any part of its territory in which reciprocal treatment is not accorded in respect to the same subject matter.

"If within a period of five years from the coming into force of the present treaty no general convention as aforesaid shall have been concluded under the auspices of the League of Nations, Poland shall be at liberty at any time thereafter to give twelve months' notice to the secretary-general of the League of Nations to terminate the obligations of this article.

Article 18.

"Pending the conclusion of a general convention on the international regime of waterways, Poland undertakes to apply to the river system of the Vistula (including the Bug and the Narev), the regime applicable to international waterways set out in articles 332 to 337 of the treaty of peace with Germany.

Article 19.

"Poland undertakes to adhere within twelve months of the coming into force of the present treaty to the international conventions specified in Annex I.

"Poland undertakes to adhere to any new convention, concluded with the approval of the council of the league of nations within five years of the coming into force of the present treaty, to replace any of the international instruments specified in Annex I.

"The Polish government undertakes within twelve months to notify the secretary-general of the league of nations whether or not Poland desires to adhere to either or both of the international conventions specified in Annex II.

"Until Poland has adhered to the two conventions last specified in Annex I, she agrees on condition of reciprocity, to protect by effective measures the industrial, literary and artistic property of nationals of the allied and associated states. In the case of any allied or associated state not adhering to the said conventions Poland agrees to continue to afford such effective protection on the same conditions until the conclusion of a special bilateral treaty or agreement for that purpose with such allied or associated state.

"Pending her adhesion to the other conventions specified in Annex I Poland will secure to the nationals of the allied and associated powers the advantages to which they would be entitled under the said conventions.

"Poland further agrees, on condition of reciprocity, to recognize and protect all rights in any industrial, literary or artistic property belonging to the nationals of the allied and associated states in force or which but for the war would have been in force in any part of her territories before transfer to Poland. For such purposes she will accord the extension of time agreed to in articles 307 and 308 of the treaty with Germany.

Annex I.

Telegraphic or Radio-Telegraphic Conventions.

"International telegraphic convention signed at St. Petersburg, July 10-22, 1875.

"International convention of Bern of Sept. 9, 1886, revised at Berlin on Nov. 13, 1908, and completed by the additional protocol signed at Bern on March 20, 1914, for the protection of literary and artistic work.

Annex II.

"Agreement of Madrid of April 14, 1891, for the prevention of false indications of origin of goods, revised at Washington in 1911, and

"Agreement of Madrid of April 14, 1891, for the international registration of trade marks, revised at Washington in 1911.

Article 20.

"All rights and privileges accorded by the foregoing articles to the allied and associated states shall be accorded equally to all states members of the League of Nations.

Article 21.

"Poland agrees to assume responsibility for such proportion of the Russian public debt and other Russian public liabilities of any kind as may be assigned to her under a special convention between the principal allied and associated powers on the one hand and Poland on the other, to be prepared by a commission appointed by the above states. In the event of the commission not arriving at an agreement the point at issue shall be referred for immediate arbitration to the League of Nations.

"The present treaty, of which the French and English texts are both authentic, shall be ratified. It shall come into force at the same time as the treaty of peace with Germany.

"The deposit of ratifications shall be made at Paris.

"Powers of which the seat of the government is outside of Europe will be entitled merely to inform the government of the French republic through their diplomatic representative at Paris that their ratification has been given; in that case they must transmit the instrument of ratification as soon as possible.

"A proces-verbal of the deposit of ratification will be drawn up.

"The French government will transmit to all the signatory powers a certified copy of the proces-verbal of the deposit of ratifications.

"In faith whereof the above named plenipotentiaries have signed the present treaty.

"Done at Versailles, the 28th day of June, 1919, in a single copy, which will remain deposited in the archives of the French republic, and of which authenticated copies will be transmitted to each of the signatory powers."

[The foregoing treaty was signed at Versailles, June 28, 1919.]

CONQUEST OF MESOPOTAMIA.

In November, 1914, the British landed the Poona division of the Indian army at the head of the Persian gulf to protect the oil fields to the northeast of Basra and interests in Persia and Arabia. Still another purpose in sending an expedition into Mesopotamia was to prevent the Germans from making use of the Bagdad railway to launch gunboats and submarines on the Persian gulf to cut the British communications by sea with Australia and India. The following is a summary of the campaign that followed and finally resulted in the conquest of Mesopotamia by the Anglo-Indian forces:

Basra was captured by the British Nov. 22, 1914. Fighting of an unimportant character followed after the Mesopotamian army had been re-enforced by two divisions of infantry and one of cavalry. The commander of the army was Gen. Sir John Nixon and of the divisions Maj.-Gen. Townshend and Maj.-Gen. Gorringe. In the summer of 1915 the Turks were defeated at Nasiriyeh and Amara. In September the 6th division under Townshend captured Kut-el-Amara. He was ordered to advance on Bagdad, though his forces were depleted and poorly equipped. He did so against his will and on Nov. 22, 1915, won the battle of Ctesiphon. Then the Turks, commanded by the German general Marshal von der Goltz, attacked and forced the British to retreat to Kut-el-Amara, where they were besieged and forced to surrender April 29, 1916, after some 20,000 men had been sacrificed in attempts to rescue them. Gen. Nixon had been succeeded in command of the army by Sir Percy Lake. The Kut-el-Amara disaster cost the British 40,000 men in killed and wounded and prisoners.

Sir Percy Lake was succeeded by Lieut.-Gen. Sir Stanley Maude, who, after several months spent in the reorganization of the army, began an advance which finally resulted in the complete overthrow of the Turks in Mesopotamia. Every movement was carefully planned and energetically carried out, with the result that no further reverses of a serious nature occurred. Kut-el-Amara was retaken Feb. 24, 1917, by the 13th British and three Indian divisions and on March 11 the same force captured Bagdad. On April 23 Samara was taken and on Sept. 29, Ramadie, on the Euphrates river, was in the possession of the British. Tekrit on the Tigris fell Nov. 5. Gen. Maude died Nov. 18 and was succeeded by Lieut.-Gen. W. R. Marshall, who in 1918 continued the victorious advance up the Tigris and the Euphrates rivers. Hit-on-the-Euphrates was captured March 10 and Khan Bagdadie on March 26. A column of troops advancing along the Shatt-el-Adhaim defeated the Turks at Tauk and Kirkuk April 27-30 and in conjunction with another column, which had come up on the west bank of the Tigris, took Ashur and Kalat Shergal Oct. 28-29.

On Oct. 30, 1918, the Indo-British forces occupied Mosul and the ruins of ancient Nineveh on the east bank of the Tigris. This terminated the campaign, as the Turks on that day capitulated to the allies.

FRENCH ARMY FOURRAGERE DECORATION.

[From Army and Navy Journal.]

The French have three different military medals. The Legion of Honor, with a red ribbon; the military medal, with a yellow and green ribbon; and the war cross, with a green and red ribbon. There are several grades of the Legion of Honor, some awarded for military and some for civilian merit. Its military award is always to an officer, except in the most unusual circumstances, when it may be awarded to a soldier. The military medal is given almost exclusively to soldiers, and it is a peace as well as a war award, as is the Legion of Honor decoration. The military medal may be awarded to general officers, but only in recognition of exceptionally meritorious service in the field. It is worn by Marshal Foch and Marshal Joffre. The war cross is awarded to both officers and soldiers and is exclusively a military medal.

At times a regiment, or an isolated company or battalion, will be cited for special gallantry in action as a whole, and when so cited its colors are decorated with one of these medals. If an organization is cited two or three times each man in it is awarded the fourragere, or cord, made of the colors of the war cross, green and red. If cited four or five times the colors are decorated with the military medal and the cord worn by the men in the organization is made of yellow and green. For six or more citations the colors get the Legion of Honor medal and a solid cord of red is awarded every man. Thus the citations in order are the war cross, the military medal and the medal of the Legion of Honor.

TREATY OF PEACE WITH AUSTRIA.

Following is the text of the treaty of peace with Austria as presented to the United States senate Sept. 15, 1919, and printed in the Congressional Record for that date. It is an authentic copy of the original treaty, signed Sept. 10:

TREATY OF PEACE BETWEEN THE PRINCIPAL ALLIED AND ASSOCIATED POWERS AND AUSTRIA.

THE UNITED STATES OF AMERICA, THE BRITISH EMPIRE, FRANCE, ITALY and JAPAN.

These powers being described in the present treaty as the principal allied and associated powers:

BELGIUM, BOLIVIA, BRAZIL, CHINA, CUBA, ECUADOR, GREECE, GUATEMALA, HAITI, THE HEDJAZ, HONDURAS, LIBERIA, NICARAGUA, PANAMA, PERU, POLAND, PORTUGAL, ROUMANIA, THE SERB-CROAT-SLOVENE STATE, SIAM, CZECHO-SLOVAKIA and URUGUAY.

These powers constituting, with the principal powers mentioned above, the allied and associated powers,

of the one part;

And AUSTRIA,

of the other part;

Whereas, on the request of the former imperial and royal Austro-Hungarian government an armistice was granted to Austria-Hungary on Nov. 3, 1918, by the principal allied and associated powers in order that a treaty of peace might be concluded, and,

Whereas, the allied and associated powers are equally desirous that the war in which certain among them were successively involved, directly or indirectly, against Austria-Hungary, and which originated in the declaration of war against Serbia on July 28, 1914, by the former imperial and royal Austro-Hungarian government, and in the hostilities conducted by Germany in alliance with Austria-Hungary, should be replaced by a firm, just and durable peace, and,

Whereas, the former Austro-Hungarian monarchy has now ceased to exist, and has been replaced in Austria by a republican government, and

Whereas, the principal allied and associated powers have already recognized that the Czecho-Slovak state, in which are incorporated certain portions of the said monarchy, is a free, independent and allied state, and,

Whereas, the said powers have also recognized the union of certain portions of the said monarchy with the territory of the kingdom of Serbia as a free, independent and allied state, under the name of the Serb-Croat-Slovene state, and,

Whereas, it is necessary, while restoring peace, to regulate the situation which has arisen from the dissolution of the said monarchy and the formation of the said states, and to establish the government of these countries on a firm foundation of justice and equity;

from point 1509 (Pec) eastward to point 1817 (Malestiger).
the crest of the Karavanken;
from point 1817 (Malestiger) and in a northeasterly direction as far as the Drave at a point situated about 1 kilometer southeast of the railway bridge on the eastern branch of the bend made by that river about six kilometers east of Villach.
a line to be fixed on the ground cutting the railway between Mallestig and Faak and passing through point 666 (Polana):
thence in a southeasterly direction to a point about two kilometers above St. Martin,
the course of the Drave:
thence in a northerly direction as far as

point 871, about ten kilometers to the east-northeast of Villach.

a line running approximately from south to north to be fixed on the ground:

thence east-north-eastward to a point to be chosen near point 725 about ten kilometers northwest of Klagenfurt on the administrative boundary between the districts of St. Veit and Klagenfurt.

a line to be fixed on the ground passing through points 1069 (Taubenbuhel), 1045 (Gallinberg) and 815 (Freudenberg):

thence eastward to a point to be chosen on the ground west of point 1075 (Steinbruch Kogel),

the administrative boundary between the districts of St. Veit and Klagenfurt;

thence northeastward to the point on the Gurk where the administrative boundary of the district of Volkermarkt leaves this river,

a line to be fixed on the ground passing through point 1076;

thence northeastward to point 1899 (Speikkogel),

the administrative boundary between the districts of St. Veit and Volkermarkt;

thence southeastward to point 842 (1 kilometer west of Kasparstein),

the northeastern boundary of the district of Volkermarkt;

thence eastward to point 1522 (Huhner Kogel),

a line to be fixed on the ground passing north of Lavamund.

4. With the Serb-Croat-Slovene state, subject to the provisions of section II. of part III. (Political Clauses for Europe):

From point 1522 (Huhner Kogel) eastward to point 917 St. Lorenzen,

a line to be fixed on the ground passing through point 1330;

thence eastward to the point where it meets the administrative boundary between the districts of Marburg and Leibnitz,

the watershed between the basins of the Drave to the south and the Saggau to the north;

thence northeastward to the point where this administrative boundary meets the Mur,

the above mentioned administrative boundary;

thence to the point where it meets the old frontiers of 1867 between Austria and Hungary five kilometers southeast of Radkersburg,

the principal course of the Mur downstream;

thence northward to a point to be fixed east of point 400 about sixteen kilometers north of Radkersburg,

the old frontier of 1867 between Austria and Hungary;

thence northeastward to a point to be fixed on the watershed between the basins of the Raab and the Mur about two kilometers east of Toka,

a line to be fixed on the ground, passing between the villages of Bonisfalva and Gedoudvar.

This point is the point common to the three frontiers of Austria, Hungary and the Serb-Croat-Slovene state.

5. With Hungary:

From the point above defined northeastward to point 353 about six kilometers north-northeast of Szentgotthard,

a line to be fixed on the ground passing through point 353 (Janke B.), then west of the Radkersburg-Szentgotthard road and east of the villages of Nagyfalva, Nemetlak and Rabakeresztur;

thence in a general northeasterly direction to point 234 about seven kilometers north-northeast of Pinka-Mindszent,

a line to be fixed on the ground passing through point 323 (Hochkogel), then south of the villages of Zsamand, Nemetbukkos and Karacsfa, and between Nagysaroslak and Pinka-Mindszent;

thence northward to point 883 (Trott Ko) about nine kilometers southwest of Koszeg,

a line to be fixed on the ground passing through points 241, 260 and 273, then east of Nagynarda and Rohoncz and west of Dozmat and Butsching;

thence northeastward to point 265 (Kamenje) about two kilometers southeast of Nikitsch,

a line to be fixed on the ground, passing southeast of Liebing, Olmod and Locsmand and northwest of Koszeg and the road from Koszeg to Salamonfa;

thence northward to a point to be selected on the southern shore of Neusiedler See between Holling and Hidegseg,

a line to be fixed on the ground, passing east of Nikitsch and Zinkendorf and west of Kovesd and Nemet-Pereszteg;

thence eastward to point 115 situated about eight kilometers southwest of St. Johann,

a line to be fixed on the ground, crossing the Neusiedler See, passing south of the island containing point 117, leaving in Hungary the branch railway running northwestward from the station of Mexiko as well as the entire Einser canal, and passing south of Pamhagen;

thence northward to a point to be selected about one kilometer west of Antonienhof (east of Kittsee), this point being the point common to the three frontiers of Austria, Hungary and the Czecho-Slovak state,

a line to be fixed on the ground, leaving entirely in Hungarian territory the Csorna-Karlburg railway and passing west of Wust-Sommerein and Kr. Jahrndorf, and east of Andau, Nikelsdorf, D. Jahrndorf and Kittsee.

6. With the Czecho-Slovak state:

From the point above defined northwestward to the bend of the old frontier of 1867 between Austria and Hungary about two and a half kilometers northeast of Berg,

a line to be fixed on the ground, cutting the Kittsee-Pressburg road about two kilometers north of Kittsee;

thence northward to a point to be selected on the principal channel of navigation of the Danube about four and a half kilometers upstream from the Pressburg bridge,

a line to be fixed on the ground following as much as possible the old frontier of 1867 between Austria and Hungary:

thence westward to the confluence of the Morava (March) with the Danube,

the principal channel of navigation of the Danube;

thence the course of the Morava upstream, then the course of the Thaya upstream to a point to be selected about two kilometers southeast of the intersection of the Rabensburg-Themenau road with the Rabensburg-Lundenburg railway;

thence west-northwestward the above mentioned administrative boundary between Lower Austria and Moravia situated about 400 meters south of the point where this boundary cuts Nikolsburg-Feldsberg railway,

a line to be fixed on the ground passing through points 187 (Dlouhyvrch), 221 (Rosenbergen), 223 (Wolfsberg), 291 (Raistenberg), 249 and 279 (Kallerhaide);

thence west-northwestward the above mentioned administrative boundary;

thence westward to a point to be selected about 3 kilometers east of the village of Franzensthal,

the old administrative boundary between Lower Austria and Bohemia;

thence southward to point 498 (Gelsenberg) about 5 kilometers north-northwest of Gmund,

a line to be fixed on the ground passing east of the Rottenschachen-Zuggers road and through points 537 and 522 (G. Nagel B.);

thence southward and then west-northwestward to a point on the old administrative boundary between Lower Austria and Bohemia situated about 200 meters north of the point where it cuts the Gratzen-Weitra road,

a line to be fixed on the ground passing between Zuggers and Breitensee, then through the most southeasterly point of the railway bridge over the Lainsitz while leaving to Austria the town of Gmund and to the Czecho-

Slovak state the station and railway works of Gmund (Wolfshof) and the junction of the Gmund-Budweis and Gmund-Wittingau railways, then passing through points 524 (Grundbuhel), 577 (north of Hohenberg) and 681 (Lagerberg);

thence southwestward the above mentioned administrative boundary, then northwestward the old administrative boundary between Upper Austria and Bohemia to its point of junction with the frontier of Germany.

7. With Germany:

The frontier of Aug. 3, 1914.

Article 28.

The frontiers described by the present treaty are traced, for such parts as are defined, on the one in a million map attached to the present treaty. In case of differences between the text and the maps, the text will prevail.

Article 29.

Boundary commissions, whose composition is fixed by the present treaty, or will be fixed by a treaty between the principal allied and associated powers and the, or any, interested states, will have to trace these frontiers on the ground.

They shall have the power, not only of fixing those portions which are defined as "a line to be fixed on the ground," but also, where a request to that effect is made by one of the states concerned, and the commission is satisfied that it is desirable to do so, of revising portions defined by administrative boundaries; this shall not, however, apply in the case of international boundaries existing in August, 1914, where the task of the commission will confine itself to the re-establishment of signposts and boundary marks.

They shall endeavor in both cases to follow as nearly as possible the descriptions given in the treaties, taking into account as far as possible administrative boundaries and local economic interests.

The decisions of the commissions will be taken by a majority and shall be binding on the parties concerned.

The expenses of the boundary commissions will be borne in equal shares by the two states concerned.

Article 30.

In so far as frontiers defined by a waterway are concerned, the phrases "course" or "channel" used in the descriptions of the present treaty signify, as regards non-navigable rivers, the median line of the waterway or of its principal branch, and, as regards navigable rivers, the median line of the principal channel of navigation. It will rest with the boundary commissions provided for by the present treaty to specify whether the frontier line shall follow any changes of the course or channel which may take place, or whether it shall be definitely fixed by the position of the course or channel at the time when the present treaty comes into force.

Article 31.

The various states interested undertake to furnish to the commissions all documents necessary for their tasks, especially authentic copies of agreements fixing existing or old frontiers, all large scale maps in existence, geodetic data, surveys completed but unpublished, and information concerning the changes of frontier watercourses.

They also undertake to instruct the local authorities to communicate to the commissions all documents, especially plans, cadastral and land books, and to furnish on demand all details regarding property, existing economic conditions and other necessary information.

Article 32.

The various states interested undertake to give every assistance to the boundary commissions, whether directly or through local authorities, in everything that concerns transport, accommodation, labor, material (signposts, boundary pillars) necessary for the accomplishment of their mission.

Article 33.

The various states interested undertake to safeguard the trigonometrical points, signals, posts or frontier marks erected by the commission.

Article 34.

The pillars will be placed so as to be intervisible; they will be numbered and their position and their number will be noted on a cartographic document.

Article 35.

The protocols defining the boundary and the maps and documents attached thereto will be made out in triplicate, of which two copies will be forwarded to the governments of the limitrophe states and the third to the government of the French republic, which will deliver authentic copies to the powers who sign the present treaty.

PART III.
POLITICAL CLAUSES FOR EUROPE

Section I.—Italy.

Article 36.

Austria renounces, so far as she is concerned, in favor of Italy all rights and title over the territory of the former Austro-Hungarian monarchy situated beyond the frontier laid down in article 27 (2) and lying between that frontier, the former Austro-Hungarian frontier, the Adriatic sea and the eastern frontier of Italy as subsequently determined.

Austria similarly renounces, so far as she is concerned, in favor of Italy all rights and title over other territory of the former Austro-Hungarian monarchy which may be recognized as forming part of Italy by any treaties which may be concluded for the purpose of completing the present settlement.

A commission composed of five members, one nominated by Italy, three by the other principal allied and associated powers and one by Austria, shall be constituted within fifteen days from the coming into force of the present treaty to trace on the spot the frontier line between Italy and Austria. The decisions of the commission will be taken by a majority and shall be binding on the parties concerned.

Article 37.

Notwithstanding the provisions of article 260 of part X. (economic clauses), persons having their usual residence in the territories of the former Austro-Hungarian monarchy transferred to Italy who, during the war, have been outside the territories of the former Austro-Hungarian monarchy or have been imprisoned, interned or evacuated, shall enjoy the full benefit of the provisions of articles 252 and 253 of part X. (Economic Clauses).

Article 38.

A special convention will determine the terms of repayment in Austrian currency of the special war expenditures advanced during the war by territory of the former Austro-Hungarian monarchy transferred to Italy or by public associations in that territory on account of the Austro-Hungarian monarchy under its legislation, such as allowances to the families of persons mobilized, requisitions, billeting of troops and relief to persons who have been evacuated.

In fixing the amount of the sums Austria shall be credited with the amount which the territory would have contributed to Austria-Hungary to meet the expenses resulting from these payments, this contribution being calculated according to the proportion of the revenues of the former Austro-Hungarian monarchy derived from the territory in 1913.

Article 39.

The Italian government will collect for its own account the taxes, dues and charges of every kind leviable in the territories transferred to Italy and not collected on Nov. 3, 1918.

Article 40.

No sum shall be due by Italy on the ground of her entry into possession of the Palazzo Venezia at Rome.

Article 41.

Subject to the provisions of article 204 of part IX. (Financial Clauses) relative to the acquisition of and payment for state property and possessions, the Italian government is substituted in all the right which the Austrian state possessed over all the railways in the territories transferred to Italy which were administered by the railway administration of the said state and which are actually working or under construction.

The same shall apply to the rights of the former Austro-Hungarian monarchy with regard to railway and tramway concessions within the above mentioned territories.

The frontier railway stations shall be determined by a subsequent agreement.

Article 42.

Austria shall restore to Italy within a period of three months all the wagons belonging to the Italian railways which before the outbreak of the war had passed into Austria and have not returned to Italy.

Article 43.

Austria renounces as from Nov. 3, 1918, on behalf of herself and her nationals in regard to territories transferred to Italy all rights to which she may be entitled with regard to the products of the aforesaid territories under any agreements, stipulations or laws establishing trusts, cartels or other similar organizations.

Article 44.

For a period of ten years from the coming into force of the present treaty central electric power stations situated in Austrian territory and formerly furnishing electric power to the territories transferred to Italy or to any other establishment the exploitation of which passes to Italy shall be required to continue furnishing this supply up to an amount corresponding to the undertakings and contracts in force on Nov. 3, 1918.

Austria further admits the right of Italy to the free use of the waters of Lake Raibl and its derivative watercourse and to divert the said waters to the basin of the Korinitza.

Article 45.

1. Judgments rendered since Aug. 4, 1914, by the courts in the territory transferred to Italy in civil and commercial cases between the inhabitants of such territory and other nationals of the former Austrian empire, or between such inhabitants and the subjects of the allies of the Austro-Hungarian monarchy, shall not be carried into effect until after indorsement by the corresponding new court in such territory.

2. All decisions rendered for political crimes or offenses since Aug. 4, 1914, by the judicial authorities of the former Austro-Hungarian monarchy against Italian nationals, including persons who obtain Italian nationality under the present treaty, shall be annulled.

3. In all matters relating to proceedings initiated before the coming into force of the present treaty before the competent authorities of the territory transferred to Italy, the Italian and Austrian judicial authorities respectively shall until the coming into force of a special convention on this subject be authorized to correspond with each other direct. Requests thus presented shall be given effect to so far as the laws of a public character allow in the country to the authorities of which the request is addressed.

4. All appeals to the higher Austrian judicial and administrative authorities beyond the limits of the territory transferred to Italy against decisions of the administrative or judicial authorities of this territory shall be suspended. The records shall be submitted to the authorities against whose decision the appeal was entered. They must be transmitted to the competent Italian authorities without delay.

5. All other questions as to jurisdiction, procedure or the administration of justice will be determined by a special convention between Italy and Austria.

Section II.—Serb-Croat-Slovene State.

Article 46.

Austria, in conformity with the action already taken by the allied and associated powers, recognizes the complete independence of the Serb-Croat-Slovene state.

Article 47.

Austria renounces so far as she is concerned in favor of the Serb-Croat-Slovene state all rights and title over the territories of the former Austro-Hungarian monarchy situated outside the frontiers of Austria as laid down in Article 27 of Part II. (Frontiers of Austria) and recognized by the present treaty, or by any treaties concluded for the purpose of completing the present settlement, as forming part of the Serb-Croat-Slovene state.

Article 48.

A commission consisting of seven members, five nominated by the principal allied and associated powers, one by the Serb-Croat-Slovene state and one by Austria, shall be constituted within fifteen days from the coming into force of the present treaty to trace on the spot the frontier line described in Article 27 (4) of Part II. (Frontiers of Austria).

The decisions of the commission will be taken by a majority and shall be binding on the parties concerned.

Article 49.

The inhabitants of the Klagenfurt area will be called upon, to the extent stated below, to indicate by a vote the state to which they wish the territory to belong.

The boundaries of the Klagenfurt area are as follows:

From point 871, about ten kilometers to the east-northeast of Villach, southward to a point on the Drave about two kilometers above St. Martin,

a line running approximately from north to south to be fixed on the ground;

thence in a northwesterly direction as far as a point about one kilometer southeast of the railway bridge on the eastern branch of the bend formed by the Drave about six kilometers to the east of Villach,

the course of the Drave;

thence in a southwesterly direction to point 1817 (Malestiger),

a line to be fixed on the ground passing through point 666 (Polana) and cutting the railway between Mallestig and Faak;

thence in an east-southeasterly direction, then northwest to point 1929 (Gushowa),

the watershed between the basins of the Drave to the north and the Save to the south;

thence northeast to point 1054 (Strojna),

a line to be fixed on the ground following in a general manner the western boundary of the basin of the Miess, passing through points 1558, 2124 and 1185;

thence northeast to point 1522 (Huhner Kogel),

a line to be fixed on the ground, crossing the Drave to the south of Lavamund;

from the Huhner Kogel westward to point 842, one kilometer west of Kasparstein,

a line to be fixed on the ground passing to the north of Lavamund;

thence as far as point 1899 (Speikkogl),

the northeastern administrative boundary of the district of Volkermarkt;

thence in a southwesterly direction as far as the river Gurk,

the northwestern administrative boundary of the district of Volkermarkt;

thence in a southwesterly direction as far as a point on the administrative boundary to the west of point 1075 (Steinbruch Kogel),

a line to be fixed on the ground, passing through point 1076;

thence in a westerly direction and as far as a point to be fixed near point 725, about ten kilometers northwest of Klagenfurt,

the administrative boundary between the districts of St. Veit and Klagenfurt;
thence as far as point 871, which was the starting point of this description,
a line to be fixed on the ground, passing through points 815 (Freudenberg), 1045 (Gallinberg) and 1069 (Taubenbuhel).

Article 50.

With a view to the organization of a plebiscite, the Klagenfurt area will be divided into two zones, the first to the south and the second to the north of a transversal line of which the following is a description:
From the point where the western boundary of the area leaves the Drave in a northerly direction as far as the point about one kilometer to the east of Rosegg (Saint-Michael),
the course of the Drave downstream;
thence in a northeasterly direction and as far as the western extremity of the Worther See, south of Velden,
a line to be fixed on the ground;
thence in an easterly direction to the outlet of the Glanfurt from the lake,
the median line of that lake;
thence eastward to its confluence with the River Glan,
the course of the Glanfurt downstream;
thence eastward to its confluence with the River Gurk,
the course of the Glan downstream;
thence in a northeasterly direction, to the point where the northern boundary of the Klangenfurt area crosses the River Gurk,
the course of the Gurk.

The Klagenfurt area will be placed under the control of a commission intrusted with the duty of preparing the plebiscite in that area and assuring the impartial administration thereof. This commission will be composed as follows: Four members nominated respectively by the United States, Great Britain, France and Italy, one by Austria, one by the Serb-Croat-Slovene state, the Austrian member only taking part in the deliberations of the commission in regard to the second zone, and the Serb-Croat-Slovene member only taking part therein with regard to the first zone. The decisions of the commission will be taken by a majority.

The second zone will be occupied by the Austrian troops and administered in accordance with the general regulations of the Austrian legislation.

The first zone will be occupied by the troops of the Serb-Croat-Slovene state and administered in accordance with the general regulations of the legislation of that state.

In both zones the troops, whether Austrian or Serb-Croat-Slovene, shall be reduced to the numbers which the commission may consider necessary for the preservation of order, and shall carry out their mission under the control of the commission. These troops shall be replaced as speedily as possible by a police force recruited on the spot.

The commission will be charged with the duty of arranging for the vote and of taking such measures as it may deem necessary to insure its freedom, fairness and secrecy.

In the first zone the plebiscite will be held within three months from the coming into force of the present treaty, at a date fixed by the commission.

If the vote is in favor of the Serb-Croat-Slovene state, a plebiscite will be held in the second zone within three weeks from the proclamation of the result of the plebiscite in the first zone, at a date to be fixed by the commission.

If, on the other hand, the vote in the first zone is in favor of Austria, no plebiscite will be held in the second zone, and the whole of the area will remain definitively under Austrian sovereignty.

The right of voting will be granted to every person without distinction of sex who:

(a) Has attained the age of 20 years on or before Jan. 1, 1919;

(b) Has on Jan. 1, 1919, his or her habitual residence within the zone subjected to the plebiscite; and,

(c) Was born within the said zone, or has had his or her habitual residence or rights of citizenship (pertinenza) there from a date previous to Jan. 1, 1912.

The result of the vote will be determined by the majority of votes in the whole of each zone.

On the conclusion of each vote the result will be communicated by the commission to the principal allied and associated powers, with a full report as to the taking of the vote, and will be proclaimed.

If the vote is in favor of the incorporation either of the first zone or of both zones in the Serb-Croat-Slovene state, Austria hereby renounces, so far as she is concerned and to the extent corresponding to the result of the vote, in favor of the Serb-Croat-Slovene state all rights and title over these territories.

After agreement with the commission the Serb-Croat-Slovene government may definitively establish its authority over the said territories.

If the vote in the first or second zone is in favor of Austria, the Austrian government, after agreement with the commission, will be entitled definitively to re-establish its authority over the whole of the Klagenfurt area, or in the second zone, as the case may be.

When the administration of the country, either by the Serb-Croat-Slovene state or by Austria, as the case may be, has been thus assured, the powers of the commission will terminate.

Expenditure by the commission will be borne by Austria and the Serb-Croat-Slovene state in equal moieties.

Article 51.

The Serb-Croat-Slovene state accepts and agrees to embody in a treaty with the principal allied and associated powers such provisions as may be deemed necessary by these powers to protect the interests of inhabitants of that state who differ from the majority of the population in race, language or religion.

The Serb-Croat-Slovene state further accepts and agrees to embody in a treaty with the principal allied and associated powers such provisions as these powers may deem necessary to protect freedom of transit and equitable treatment of the commerce of other nations.

Article 52.

The proportion and nature of the financial obligations of the former Austrian empire which the Serb-Croat-Slovene state will have to assume on account of the territory placed under its sovereignty will be determined in accordance with article 203 of part IX. (Financial Clauses) of the present treaty.

Subsequent agreements will decide all questions which are not decided by the present treaty and which may arise in consequence of the cession of the said territory.

Section III.—Czecho-Slovak State.

Article 53.

Austria, in conformity with the action already taken by the allied and associated powers, recognizes the complete independence of the Czecho-Slovak state, which will include the autonomous territory of the Ruthenians to the south of the Carpathians.

Article 54.

Austria renounces so far as she is concerned in favor of the Czecho-Slovak state all rights and title over the territories of the former Austro-Hungarian monarchy situated outside the frontiers of Austria as laid down in article 27 of part II. (Frontiers of Austria) and recognized in accordance with the present treaty as forming part of the Czecho-Slovak state.

Article 55.

A commission composed of seven members, five nominated by the principal allied and associated powers, one by the Czecho-Slovak state, and one by Austria, will be appointed fifteen days after the coming into force of the

present treaty to trace on the spot the frontier line laid down in article 27 (6) of part II. (Frontiers of Austria) of the present treaty.

The decisions of this commission will be taken by a majority and shall be binding on the parties concerned.

Article 56.

The Czecho-Slovak state undertakes not to erect any military works in that portion of its territory which lies on the right bank of the Danube to the south of Bratislava (Pressburg).

Article 57.

The Czecho-Slovak state accepts and agrees to embody in a treaty with the principal allied and associated powers such provisions as may be deemed necessary by these powers to protect the interests of inhabitants of that state who differ from the majority of the population in race, language or religion.

The Czecho-Slovak state further accepts and agrees to embody in a treaty with the principal allied and associated powers such provisions as these powers may deem necessary to protect freedom of transit and equitable treatment for the commerce of other nations.

Article 58.

The proportion and nature of the financial obligations of the former Austrian empire which the Czecho-Slovak state will have to assume on account of the territory placed under its sovereignty will be determined in accordance with article 203 of part IX. (Financial Clauses) of the present treaty.

Subsequent agreements will decide all questions which are not decided by the present treaty and which may arise in consequence of the cession of the said territory.

Section IV.—Roumania.

Article 59.

Austria renounces, so far as she is concerned, in favor of Roumania all rights and title over such portion of the former duchy of Bukovina as lies within the frontiers of Roumania, which may ultimately be fixed by the principal allied and associated powers.

Article 60.

Roumania accepts and agrees to embody in a treaty with the principal allied and associated powers such provisions as may be deemed necessary by these powers to protect the interests of inhabitants of that state who differ from the majority of the population in race, language or religion.

Roumania further accepts and agrees to embody in a treaty with the principal allied and associated powers such provisions as these powers may deem necessary to protect freedom of transit and equitable treatment for the commerce of other nations.

Article 61.

The proportion and nature of the financial obligations of the former Austrian empire which Roumania will have to assume on account of the territory placed under her sovereignty will be determined in accordance with article 203 of part IX. (Financial Clauses) of the present treaty.

Subsequent agreements will decide all questions which are not decided by the present treaty and which may arise in consequence of the cession of the said territory.

Section V.—Protection of Minorities.

Article 62.

Austria undertakes that the stipulations contained in this section shall be recognized as fundamental laws, and that no law, regulation or official action shall conflict or interfere with these stipulations, nor shall any law, regulation or official action prevail over them.

Article 63.

Austria undertakes to assure full and complete protection of life and liberty to all inhabitants of Austria without distinction of birth, nationality, language, race or religion.

All inhabitants of Austria shall be entitled to the free exercise, whether public or private, of any creed, religion or belief, whose practices are not inconsistent with public order or public morals.

Article 64.

Austria admits and declares to be Austrian nationals ipso facto and without the requirement of any formality all persons possessing at the date of the coming into force of the present treaty rights of citizenship (pertinenza) within Austrian territory who are not nationals of any other state.

Article 65.

All persons born in Austrian territory who are not born nationals of another state shall ipso facto become Austrian nationals.

Article 66.

All Austrian nationals shall be equal before the law and shall enjoy the same civil and political rights without distinction as to race, language or religion.

Differences of religion, creed or confession shall not prejudice any Austrian national in matters relating to the enjoyment of civil or political rights, as for instance admission to public employments, functions and honors or the exercise of professions and industries.

No restriction shall be imposed on the free use by any Austrian national of any language in private intercourse, in commerce, in religion, in the press or in publications of any kind, or at public meetings.

Notwithstanding any establishment by the Austrian government of an official language, adequate facilities shall be given to Austrian nationals of non-German speech for the use of their language, either orally or in writing, before the courts.

Article 67

Austrian nationals who belong to racial, religious or linguistic minorities shall enjoy the same treatment and security in law and in fact as the other Austrian nationals. In particular they shall have an equal right to establish, manage and control at their own expense charitable, religious and social institutions, schools and other educational establishments, with the right to use their own language and to exercise their religion freely therein.

Article 68.

Austria will provide in the public educational system in towns and districts in which a considerable proportion of Austrian nationals of other than German speech are residents adequate facilities for insuring that in the primary schools the instruction shall be given to the children of such Austrian nationals through the medium of their own language. This provision shall not prevent the Austrian government from making the teaching of the German language obligatory in the said schools.

In towns and districts where there is a considerable proportion of Austrian nationals belonging to racial, religious or linguistic minorities, these minorities shall be assured an equitable share in the enjoyment and application of the sums which may be provided out of public funds under the state, municipal or other budgets for educational, religious or charitable purposes.

Article 69

Austria agrees that the stipulations in the foregoing articles of this section, so far as they affect persons belonging to racial, religious or linguistic minorities, constitute obligations of international concern and shall be placed under the guaranty of the league of nations. They shall not be modified without the assent of a majority of the council of the league of nations. The allied and associated powers represented on the council severally agree not to withhold their assent from any modification in these articles which is in due form assented to by a majority of the council of the league of nations.

Austria agrees that any member of the council of the league of nations shall have the

right to bring to the attention of the council any infraction, or any danger of infraction, of any of these obligations, and that the council may thereupon take such action and give such direction as it may deem proper and effective in the circumstances.

Austria further agrees that any difference of opinion as to questions of law or fact arising out of these articles between the Austrian government and any one of the principal allied and associated powers or any other power, a member of the council of the league of nations, shall be held to be a dispute of an international character under article 14 of the covenant of the league of nations. The Austrian government hereby consents that any such dispute shall, if the other party thereto demands, be referred to the permanent court of international justice. The decision of the permanent court shall be final and shall have the same force and effect as an award under article 13 of the covenant.

Section VI.—Clauses Relating to Nationality.

Article 70.

Every person possessing rights of citizenship (pertinenza) in territory which formed part of the territories of the former Austro-Hungarian monarchy shall obtain ipso facto to the exclusion of Austrian nationality the nationality of the state exercising sovereignty over such territory.

Article 71.

Notwithstanding the provisions of article 70, Italian nationality shall not, in the case of territory transferred to Italy, be acquired ipso facto:

1. By persons possessing rights of citizenship in such territory who were not born there;

2. By persons who acquired their rights of citizenship in such territory after May 24, 1915, or who acquired them only by reason of their official position.

Article 72.

The persons referred to in article 71, as well as those who (a) formerly possessed rights of citizenship in the territories transferred to Italy, or whose father, or mother if the father is unknown, possessed rights of citizenship in such territories, or (b) have served in the Italian army during the present war, and their descendants, may claim Italian nationality subject to the conditions prescribed in article 78 for the right of option.

Article 73.

The claim to Italian nationality by the persons referred to in article 72 may in individual cases be refused by the competent Italian authority.

Article 74.

Where the claim to Italian nationality under article 72 is not made, or is refused, the persons concerned will obtain ipso facto the nationality of the state exercising sovereignty over the territory in which they possessed rights of citizenship before acquiring such rights in the territory transferred to Italy.

Article 75.

Juridical persons established in the territories transferred to Italy shall be considered Italian if they are recognized as such either by the Italian administrative authorities or by an Italian judicial decision.

Article 76.

Notwithstanding the provisions of article 70, persons who acquired rights of citizenship after Jan. 1, 1910, in territory transferred under the present treaty to the Serb-Croat-Slovene state, or to the Czecho-Slovak state, will not acquire Serb-Croat-Slovene or Czecho-Slovak nationality without a permit from the Serb-Croat-Slovene state or the Czecho-Slovak state respectively.

Article 77.

If the permit referred to in article 76 is not applied for, or is refused, the persons concerned will obtain ipso facto the nationality of the state exercising sovereignty over the territory in which they previously possessed rights of citizenship.

Article 78.

Persons over 18 years of age losing their Austrian nationality and obtaining ipso facto a new nationality under article 70, shall be entitled within a period of one year from the coming into force of the present treaty to opt for the nationality of the state in which they possessed rights of citizenship before acquiring such rights in the territory transferred.

Option by a husband will cover his wife and option by parents will cover their children under 18 years of age.

Persons who have exercised the above right to opt must within the succeeding twelve months transfer their place of residence to the state for which they have opted.

They will be entitled to retain their immovable property in the territory of the other state where they had their place of residence before exercising their rights to opt.

They may carry with them their movable property of every description. No export or import duties may be imposed upon them in connection with the removal of such property.

Article 79.

Persons entitled to vote in plebiscites provided for in the present treaty shall within a period of six months after the definitive attribution of the area in which the plebiscite has taken place be entitled to opt for the nationality of the state to which the area is not assigned.

The provisions of article 78 relating to the right of option shall apply equally to the exercise of the right under this article.

Article 80.

Persons possessing rights of citizenship in territory forming part of the former Austro-Hungarian monarchy, and differing in race and language from the majority of the population of such territory, shall within six months of the coming into force of the present treaty severally be entitled to opt for Austria, Italy, Poland, Roumania, the Serb-Croat-Slovene state, or the Czecho-Slovak state, if the majority of the population of the state selected is of the same race and language as the person exercising the right to opt. The provisions of article 78 as to the exercise of the right of option shall apply to the right of option given by this article.

Article 81.

The high contracting parties undertake to put no hindrance in the way of the exercise of the right which the persons concerned have under the present treaty, or under treaties concluded by the allied and associated powers with Germany, Hungary or Russia, or between any of the allied and associated powers themselves, to choose any other nationality which may be open to them.

Article 82.

For the purposes of the provisions of this section, the status of a married woman will be governed by that of her husband, and the status of children under 18 years of age by that of their parents.

Section VII.—Political Clauses Relating to Certain European States.

1. Belgium.

Article 83.

Austria, recognizing that the treaties of April 19, 1839, which established the status of Belgium before the war, no longer conform to the requirements of the situation, consents so far as she is concerned to the abrogation of the said treaties and undertakes immediately to recognize and to observe whatever conventions may be entered into by the principal allied and associated powers, or by any of them, in concert with the governments of Belgium and of the Netherlands, to replace the said treaties of 1839. If her formal adhesion should be required to such conventions or to

any of their stipulations, Austria undertakes immediately to give it.

2. Luxemburg.

Article 84.

Austria agrees, so far as she is concerned, to the termination of the regime of neutrality of the grand duchy of Luxemburg, and accepts in advance all international arrangements which may be concluded by the allied and associated powers relating to the grand duchy.

3. Schleswig.

Article 85.

Austria hereby accepts so far as she is concerned all arrangements made by the allied and associated powers with Germany concerning the territories whose abandonment was imposed upon Denmark by the treaty of Oct. 30, 1864.

4. Turkey and Bulgaria.

Article 86.

Austria undertakes to recognize and accept as far as she is concerned all arrangements which the allied and associated powers may make with Turkey and with Bulgaria with reference to any rights, interests and privileges whatever which might be claimed by Austria or her nationals in Turkey or Bulgaria and which are not dealt with in the provisions of the present treaty.

5. Russia and Russian States.

Article 87.

1. Austria acknowledges and agrees to respect as permanent and inalienable the independence of all the territories which were part of the former Russian empire on Aug. 1, 1914.

In accordance with the provisions of article 210 of part IX. (Financial Clauses) and article 244 of part X. (Economic Clauses) of the present treaty, Austria accepts definitely so far as she is concerned the abrogation of the Brest-Litovsk treaties and of all treaties, conventions and agreements entered into by the former Austro-Hungarian government with the maximalist government in Russia.

The allied and associated powers formally reserve the rights of Russia to obtain from Austria restitution and reparation based on the principles of the present treaty.

2. Austria undertakes to recognize the full force of all treaties or agreements which may be entered into by the allied and associated powers with states now existing or coming into existence in future in the whole or part of the former empire of Russia as it existed on Aug. 1, 1914, and to recognize the frontiers of any such states as determined therein.

Section VIII.—General Provisions.

Article 88.

The independence of Austria is inalienable otherwise than with the consent of the council of the league of nations. Consequently Austria undertakes in the absence of the consent of the said council to abstain from any act which might directly or indirectly or by any means whatever compromise her independence, particularly, and until her admission to membership of the league of nations, by participation in the affairs of another power.

Article 89.

Austria hereby recognizes and accepts the frontiers of Bulgaria, Greece, Hungary, Poland, Roumania, the Serb-Croat-Slovene state and the Czecho-Slovak state as these frontiers may be determined by the principal allied and associated powers.

Article 90.

Austria undertakes to recognize the full force of the treaties of peace and additional conventions which have been or may be concluded by the allied and associated powers with the powers who fought on the side of the former Austro-Hungarian monarchy, and to recognize whatever dispositions have been or may be made concerning the territories of the former German empire, of Hungary, of the kingdom of Bulgaria and of the Ottoman empire, and to recognize the new states within their frontiers as there laid down.

Article 91.

Austria renounces so far as she is concerned in favor of the principal allied and associated powers all rights and title over the territories which previously belonged to the former Austro-Hungarian monarchy and which, being situated outside the new frontiers of Austria as described in article 27 of part II. (Frontiers of Austria), have not at present been assigned to any state.

Austria undertakes to accept the settlement made by the principal allied and associated powers in regard to these territories, particularly in so far as concerns the nationality of the inhabitants.

Article 92.

No inhabitant of the territories of the former Austro-Hungarian monarchy shall be disturbed or molested on account either of his political attitude between July 28, 1914, and the definitive settlement of the sovereignty over these territories, or of the determination of his nationality effected by the present treaty.

Article 93.

Austria will hand over without delay to the allied and associated governments concerned archives, registers, plans, title deeds and documents of every kind belonging to the civil, military, financial, judicial or other forms of administration in the ceded territories. If any one of these documents, archives, registers, title deeds or plans is missing, it shall be restored by Austria upon the demand of the allied or associated government concerned.

In case the archives, registers, plans, title deeds or documents referred to in the preceding paragraph, exclusive of those of a military character, concern equally the administrations in Austria, and cannot therefore be handed over without inconvenience to such administrations, Austria undertakes, subject to reciprocity, to give access thereto to the allied and associated governments concerned.

Article 94.

Separate conventions between Austria and each of the states to which territory of the former Austrian empire is transferred, and each of the states arising from the dismemberment of the former Austro-Hungarian monarchy, will provide for the interests of the inhabitants, especially in connection with their civil rights, their commerce and the exercise of their professions.

PART IV.

AUSTRIAN INTERESTS OUTSIDE EUROPE.

Article 95.

In territory outside her frontiers as fixed by the present treaty Austria renounces so far as she is concerned all rights, titles and privileges whatever in or over territory outside Europe, which belonged to the former Austro-Hungarian monarchy, or to its allies, and all rights, titles and privileges whatever their origin which it held as against the allied and associated powers.

Austria undertakes immediately to recognize and to conform to the measures which may be taken now or in the future by the principal allied and associated powers, in agreement where necessary with third powers, in order to carry the above stipulation into effect.

Section I.—Morocco.

Article 96.

Austria renounces so far as she is concerned all rights, titles and privileges conferred on her by the general act of Algeciras of April 7, 1906, and by the Franco-German agreements of Feb. 9, 1909, and Nov. 4, 1911. All treaties, agreements, arrangements and contracts concluded by the former Austro-Hungarian monarchy with the Sherifian empire are regarded as abrogated as from Aug. 12, 1914.

In no case can Austria avail herself of these acts and she undertakes not to intervene in

any way in negotiations relating to Morocco which may take place between France and the other powers.

Article 97.

Austria hereby accepts all the consequences of the establishment of the French protectorate in Morocco, which had been recognized by the government of the former Austro-Hungarian monarchy, and she renounces, so far as she is concerned, the regime of the capitulations in Morocco.

This renunciation shall take effect as from Aug. 12. 1914.

Article 98.

The Sherifian government shall have complete liberty of action in regulating the status of Austrian nationals in Morocco and the conditions in which they can establish themselves there.

Austrian protected persons, semsars and "associes agricoles" shall be considered to have ceased, as from Aug. 12. 1914, to enjoy the privileges attached to their status and shall be subject to the ordinary law.

Article 99.

All movable and immovable property in the Sherifian empire belonging to the former Austro-Hungarian monarchy passes ipso facto to the Maghzen without compensation.

For this purpose the property and possessions of the former Austro-Hungarian monarchy shall be deemed to include all the property of the crown, and the private property of members of the former royal family of Austria-Hungary.

All movable and immovable property in the Sherifian empire belonging to Austrian nationals shall be dealt with in accordance with sections III. and IV. of part X. (Economic Clauses) of the present treaty.

Mining rights which may be recognized as belonging to the Austrian nationals by the court of arbitration set up under the Moroccan mining regulations shall be treated in the same way as property in Morocco belonging to Austrian nationals.

Article 100.

The Austrian government shall insure the transfer to the person nominated by the French government of the shares representing Austria's portion of the capital of the State Bank of Morocco. This person will repay to the persons entitled thereto the value of these shares, which shall be indicated by the state bank.

This transfer will take place without prejudice to the repayment of debts which Austrian nationals may have contracted toward the State Bank of Morocco.

Article 101.

Moroccan goods entering Austria shall enjoy the treatment accorded to French goods.

Section II.—Egypt.

Article 102.

Austria declares that she recognizes the protectorate proclaimed over Egypt by Great Britain on Dec. 18, 1914, and that she renounces so far as she is concerned the regime of the capitulations in Egypt.

This renunciation shall take effect as from Aug. 12. 1914.

Article 103.

All treaties, agreements, arrangements and contracts concluded by the government of the former Austro-Hungarian monarchy with Egypt are regarded as abrogated as from Aug. 12. 1914.

In no case can Austria avail herself of these instruments, and she undertakes not to intervene in any way in negotiations relating to Egypt which may take place between Great Britain and the other powers.

Article 104.

Until an Egyptian law of judicial organization establishing courts with universal jurisdiction comes into force, provision shall be made, by means of decrees issued by his highness the sultan for the exercise of jurisdiction over Austrian nationals and property by the British consular tribunals.

Article 105.

The Egyptian government shall have complete liberty of action in regulating the status of Austrian nationals and the conditions under which they may establish themselves in Egypt.

Article 106.

Austria consents so far as she is concerned to the abrogation of the decree issued by his highness the khedive on Nov. 28. 1904, relating to the commission of the Egyptian public debt, or to such changes as the Egyptian government may think it desirable to make therein.

Article 107.

Austria consents, in so far as she is concerned, to the transfer to his Britannic majesty's government of the powers conferred on his imperial majesty the sultan by the convention signed at Constantinople on Oct. 29, 1888, relating to the free navigation of the Suez canal.

She renounces all participation in the sanitary, maritime and quarantine board of Egypt and consents, in so far as she is concerned, to the transfer to the Egyptian authorities of the powers of that board.

Article 108.

All property and possessions in Egypt of the former Austro-Hungarian monarchy pass to the Egyptian government without payment.

For this purpose, the property and possessions of the former Austro-Hungarian monarchy shall be deemed to include all the property of the crown, and the private property of members of the former royal family of Austria-Hungary.

All movable and immovable property in Egypt belonging to Austrian nationals shall be dealt with in accordance with sections III. and IV. of part X. (Economic Clauses) of the present treaty.

Article 109.

Egyptian goods entering Austria shall enjoy the treatment accorded to British goods.

Section III.—Siam.

Article 110.

Austria recognizes, so far as she is concerned, that all treaties, conventions and agreements between the former Austro-Hungarian monarchy and Siam, and all rights, title and privileges derived therefrom, including all rights of extraterritorial jurisdiction, terminated as from July 22, 1917.

Article 111.

Austria, so far as she is concerned, cedes to Siam all her rights over the goods and property in Siam which belonged to the former Austro-Hungarian monarchy, with the exception of premises used as diplomatic or consular residences or offices as well as the effects and furniture which they contain. These goods and property pass ipso facto and without compensation to the Siamese government.

The goods, property and private rights of Austrian nationals in Siam shall be dealt with in accordance with the provisions of part X. (Economic Clauses) of the present treaty.

Article 112.

Austria waives all claims against the Siamese government on behalf of herself or her nationals arising out of the liquidation of Austrian property or the internment of Austrian nationals in Siam. This provision shall not affect the rights of the parties interested in the proceeds of any such liquidation, which shall be governed by the provisions of part X. (Economic Clauses) of the present treaty.

Section IV.—China.

Article 113.

Austria renounces, so far as she is concerned, in favor of China all benefits and privileges resulting from the provisions of the final protocol signed at Peking on Sept. 7, 1901, and

from all annexes, notes and documents supplementary thereto. She likewise renounces in favor of China any claim to indemnities accruing thereunder subsequent to Aug. 14, 1917.

Article 114.

From the coming into force of the present treaty the high contracting parties shall apply, in so far as concerns them respectively:

(1) The arrangement of Aug. 29, 1902, regarding the new Chinese customs tariff;

(2) The arrangement of Sept. 27, 1905, regarding Whang-Poo, and the provisional supplementary arrangement of April 4, 1912.

China, however, will not be bound to grant to Austria the advantages or privileges which she allowed to the former Austro-Hungarian monarchy under these arrangements.

Article 115.

Austria, so far as she is concerned, cedes to China all her rights over the buildings, wharves and pontoons, barracks, forts, arms and munitions of war, vessels of all kinds, wireless telegraphy installations and other public property which belonged to the former Austro-Hungarian monarchy, and which are situated or may be in the Austro-Hungarian concession at Tientsin or elsewhere in Chinese territory.

It is understood, however, that premises used as diplomatic or consular residences or offices, as well as the effects and furniture contained therein, are not included in the above cession, and, furthermore, that no steps shall be taken by the Chinese government to dispose of the public and private property belonging to the former Austro-Hungarian monarchy situated within the so-called legation quarter at Peking without the consent of the diplomatic representatives of the powers which, on the coming into force of the present treaty, remain parties to the final protocol of Sept. 7, 1901.

Article 116.

Austria agrees so far as she is concerned to the abrogation of the leases from the Chinese government under which the Austro-Hungarian concession at Tientsin is now held.

China, restored to the full exercise of her sovereign rights in the above area, declares her intention of opening it to international residence and trade. She further declares that the abrogation of the leases under which the said concession is now held shall not affect the property rights of nationals of allied and associated powers who are holders of lots in this concession.

Article 117.

Austria waives all claims against the Chinese government or against any allied or associated government arising out of the internment of Austrian nationals in China and their repatriation. She equally renounces, so far as she is concerned, all claims arising out of the capture and condemnation of Austro-Hungarian ships in China, or the liquidation, sequestration or control of Austrian properties, rights and interests in that country since Aug. 14, 1917. This provision, however, shall not affect the rights of the parties interested in the proceeds of any such liquidation, which shall be governed by the provisions of part X. (Economic Clauses) of the present treaty.

PART V.

MILITARY, NAVAL AND AIR CLAUSES.

In order to render possible the initiation of a general limitation of the armaments of all nations, Austria undertakes strictly to observe the military, naval and air clauses which follow.

Section I.

Military Clauses.

Chapter I.—General.

Article 118.

Within three months of the coming into force of the present treaty, the military forces of Austria shall be demobilized to the extent prescribed hereinafter.

Article 119.

Universal compulsory military service shall be abolished in Austria. The Austrian army shall in future only be constituted and recruited by means of voluntary enlistment.

Chapter II.—Effectives and Cadres of the Austrian Army.

Article 120.

The total number of military forces in the Austrian army shall not exceed 30,000 men, including officers and depot troops.

Subject to the following limitations, the formations composing the Austrian army shall be fixed in accordance with the wishes of Austria:

(1) The effectives of units must be fixed between the maximum and minimum figures shown in table IV. annexed to this section.

(2) The proportion of officers, including the personnel of staffs and special services, shall not exceed one-twentieth of the total effectives with the colors, and that of noncommissioned officers shall not exceed one-fifteenth of the total effectives with the colors.

(3) The number of machine guns, guns and howitzers shall not exceed per thousand men of the total effectives with the colors those fixed in table V. annexed to this section.

The Austrian army shall be devoted exclusively to the maintenance of order within the territory of Austria, and to the control of her frontiers.

Article 121.

The maximum strength of the staffs and of all formations which Austria may be permitted to raise are given in the tables annexed to this section; these figures need not be exactly followed, but must not be exceeded.

All other organizations for the command of troops or for preparation for war are forbidden.

Article 122.

All measures of mobilization, or appertaining to mobilization, are forbidden.

In no case must formations, administrative services or staffs include supplementary cadres.

The carrying out of any preparatory measures with a view to requisitioning animals or other means of military transport is forbidden.

Article 123.

The number of gendarmes, customs officers, foresters, members of the local or municipal police or other like officials may not exceed the number of men employed in a similar capacity in 1913 within the boundaries of Austria as fixed by the present treaty.

The number of these officials shall not be increased in the future except as may be necessary to maintain the same proportion between the number of officials and the total population in the localities or municipalities which employ them.

These officials, as well as officials employed in the railway service, must not be assembled for the purpose of taking part in any military exercises.

Article 124.

Every formation of troops not included in the tables annexed to this section is forbidden. Such other formations as may exist in excess of the 30,000 effectives authorized shall be suppressed within the period laid down by article 118.

Chapter III.—Recruiting and Military Training.

Article 125.

All officers must be regulars (officiers de carriere). Officers now serving who are retained in the army must undertake the obligation to service in it up to the age of 40 years at least. Officers now serving who do not join the new army will be released from all military obligations; they must not take part in any military exercises, whether theoretical or practical.

Officers newly appointed must undertake to serve on the active list for twenty consecutive years at least.

The number of officers discharged for any reason before the expiration of their term of service must not exceed in any year one-twentieth of the total of officers provided for in article 120. If this proportion is unavoidably exceeded the resulting shortage must not be made good by fresh appointments.

Article 126.

The period of enlistment for noncommissioned officers and privates must be for a total period of not less than twelve consecutive years, including at least six years with the colors.

The proportion of men discharged before the expiration of the period of their enlistment for reasons of health or as a result of disciplinary measures or for any other reasons must not in any year exceed one-twentieth of the total strength fixed by article 120. If this proportion is unavoidably exceeded, the resulting shortage must not be made good by fresh enlistments.

Chapter IV.—Schools, Educational Establishments, Military Clubs and Societies.

Article 127.

The number of students admitted to attend the courses in military schools shall be strictly in proportion to the vacancies to be filled in the cadres of officers. The students and the cadres shall be included in the effectives fixed by article 120 of the present section.

Consequently all military schools not required for this purpose shall be abolished.

Article 128.

Educational establishments, other than those referred to in article 127, as well as all sporting and other clubs, must not occupy themselves with any military matters.

Chapter V.—Armament, Munitions and Material; Fortifications.

Article 129.

On the expiration of three months from the coming into force of the present treaty the armament of the Austrian army shall not exceed the figures fixed per thousand men in table V. annexed to this section. Any excess in relation to effectives shall only be used for such replacements as may eventually be necessary.

Article 130.

The stock of munitions at the disposal of the Austrian army shall not exceed the amounts fixed in table V. annexed to this section.

Within three months from the coming into force of the present treaty the Austrian government shall deposit any existing surplus of armament and munitions in such places as shall be notified to it by the principal allied and associated powers.

No other stock, depot or reserve of munitions shall be formed

Article 131.

The number and caliber of guns constituting the fixed normal armament of fortified places existing at the present moment in Austria shall be immediately notified to the principal allied and associated powers, and will constitute maximum amounts which must not be exceeded.

Within three months of the coming into force of the present treaty the maximum stock of ammunition for these guns shall be reduced to and maintained at the following uniform rates:

One thousand five hundred rounds per gun for those the caliber of which is 105 mm. and under;

Five hundred rounds per gun for those of higher caliber.

Article 132.

The manufacture of arms, munitions and war material shall only be carried on in one single factory, which shall be controlled by and belong to the state, and whose output shall be strictly limited to the manufacture of such arms, munitions and war material as is necessary for the military forces and armaments referred to in articles 120, 123, 129, 130 and 131.

The manufacture of sporting weapons is not forbidden, provided that sporting weapons manufactured in Austria taking ball cartridge are not of the same caliber as that of military weapons used in any European army.

Within three months from the coming into force of the present treaty all other establishments for the manufacture, preparation, storage or design of arms, munitions or any other war material shall be closed down or converted to purely commercial uses.

Within the same length of time, all arsenals shall also be closed down, except those to be used as depots for the authorized stocks of munitions, and their staffs discharged.

The plant of any establishments or arsenals in excess of the amount required for the manufacture authorized shall be rendered useless or converted to purely commercial purposes in accordance with the decisions of the military interallied commission of control referred to in article 153.

Article 133.

Within three months from the coming into force of the present treaty, all arms, munitions and war material, including any kind of antiaircraft material, of whatever origin, existing in Austria in excess of the quantity authorized shall be handed over to the principal allied and associated powers.

Delivery shall take place at such points in Austrian territory as may be appointed by the said powers, who shall also decide on the disposal of such material.

Article 134.

The importation into Austria of arms, munitions and war material of all kinds is strictly forbidden.

The manufacture for foreign countries and the exportation of arms, munitions and war material shall also be forbidden.

Article 135.

The use of flame throwers, asphyxiating, poisonous or other gases, and all similar liquids, materials or devices being prohibited, their manufacture and importation are strictly forbidden in Austria.

Material specially intended for the manufacture, storage or use of the said products or devices is equally forbidden.

The manufacture and importation into Austria of armored cars, tanks or any similar machines suitable for use in war are equally forbidden.

Section II.—Naval Clauses.

Article 136.

From the date of the coming into force of the present treaty all Austro-Hungarian warships, submarines included, are declared to be finally surrendered to the principal allied and associated powers.

All the monitors, torpedo boats and armed vessels of the Danube flotilla will be surrendered to the principal allied and associated powers.

Austria will, however, have the right to maintain on the Danube for the use of the river police three patrol boats to be selected by the commission referred to in article 154 of the present treaty.

Article 137.

The Austro-Hungarian auxiliary cruisers and fleet auxiliaries enumerated below will be disarmed and treated as merchant ships:

Bosnia.	Baron Bruck.
Gablonz.	Nixe.
Carolina.	Gigante.
Africa.	Dalmat.
Tirol.	Persia.
Argentina.	Prince Hohenlohe.
Lussin.	Gastein.

Pola.	Melcavich.
Najade	Baron Call.
Pluto.	Gaea.
President Wilson (ex-Kaiser Franz Josef).	Cyclop.
Trieste.	Vesta.
	Nymphe.
	Buffet.

Article 138.

All warships, including submarines now under construction in Austrian ports, or in ports which previously belonged to the Austro-Hungarian monarchy, shall be broken up.

The work of breaking up these vessels will be commenced as soon as possible after the coming into force of the present treaty.

Article 139.

Articles, machinery and material arising from the breaking up of Austro-Hungarian warships of all kinds, whether surface vessels or submarines, may not be used except for purely industrial or commercial purposes.

They may not be sold or disposed of to foreign countries.

Article 140.

The construction or acquisition of any submarine, even for commercial purposes, shall be forbidden in Austria.

Article 141.

All arms, ammunition and other naval war material, including mines and torpedoes, which belonged to Austria-Hungary at the date of the signature of the armistice of Nov. 3, 1918, are declared to be finally surrendered to the principal allied and associated powers.

Article 142.

Austria is held responsible for the delivery (articles 136 and 141), the disarmament (article 137), the demolition (article 138),

as well as the disposal (article 137) and the use (article 139) of the objects mentioned in the preceding articles only so far as these remain in her own territory.

Article 143.

During the three months following the coming into force of the present treaty, the Austrian high power wireless telegraphy station at Vienna shall not be used for the transmission of messages concerning naval, military or political questions of interest to Austria, or any state which has been allied to Austria-Hungary in the war, without the assent of the principal allied and associated powers. This station may be used for commercial purposes, but only under the supervision of the said powers, who will decide the wave length to be used.

During the same period Austria shall not build any more high power wireless telegraphy stations in her own territory or that of Hungary, Germany, Bulgaria or Turkey.

Section III.—Air Clauses.

Article 144.

The armed forces of Austria must not include any military or naval air forces.

No dirigible shall be kept.

Article 145.

Within two months from the coming into force of the present treaty, the personnel of the air forces on the rolls of the Austrian land and sea forces shall be demobilized.

Article 146.

Until the complete evacuation of Austrian territory by the allied and associated troops the aircraft of the allied and associated powers shall enjoy in Austria freedom of passage through the air, freedom of transit and of landing.

Article 147.

During the six months following the coming into force of the present treaty, the manufacture, importation and exportation of aircraft, parts of aircraft, engines for aircraft, and parts of engines for aircraft shall be forbidden in all Austrian territory.

Article 148.

On the coming into force of the present treaty, all military and naval aeronautical material must be delivered by Austria and at her expense to the principal allied and associated powers.

Delivery must be effected at such places as the governments of the said powers may select, and must be completed within three months.

In particular, this material will include all items under the following heads which are or have been in use or were designed for warlike purposes:

Complete airplanes and seaplanes, as well as those being manufactured, repaired or assembled.

Dirigibles able to take the air, being manufactured, repaired or assembled.

Plant for the manufacture of hydrogen.

Dirigible sheds and shelters of every kind for aircraft.

Pending their delivery, dirigibles will, at the expense of Austria, be maintained inflated with hydrogen; the plant for the manufacture of hydrogen, as well as the sheds for dirigibles, may, at the discretion of the said powers, be left to Austria until the time when the dirigibles are handed over.

Engines for aircraft.

Nacelles and fuselages.

Armament (guns, machine guns, light machine guns, bomb dropping apparatus, torpedo apparatus, synchronization apparatus, aiming apparatus).

Munitions (cartridges, shells, bombs loaded or unloaded, stocks of explosives or of material for their manufacture).

Instruments for use on aircraft.

Wireless apparatus and photographic or cinematograph apparatus for use on aircraft.

Component parts of any of the items under the preceding heads.

The material referred to above shall not be removed without special permission from the said governments.

Section IV.—Interallied Commissions of Control.

Article 149.

All the military, naval and air clauses contained in the present treaty for the execution of which a time limit is prescribed shall be executed by Austria under the control of interallied commissions specially appointed for this purpose by the principal allied and associated powers.

The above mentioned commissions will represent the governments of the principal allied and associated powers in dealing with the Austrian government in all matters concerning the execution of the military, naval and air clauses. They will communicate to the Austrian authorities the decisions which the principal allied and associated powers have reserved the right to take or which the execution of the said clauses may necessitate.

Article 150.

The interallied commissions of control may establish their organizations at Vienna and shall be entitled, as often as they think desirable, to proceed to any point whatever in Austrian territory, or to send a subcommission, or to authorize one or more of their members to go, to any such point.

Article 151.

The Austrian government must furnish to the interallied commissions of control all such information and documents as the latter may deem necessary to insure the execution of their mission, and all means (both in personnel and in material) which the above mentioned commissions may need to insure the complete execution of the military, naval or air clauses.

The Austrian government must attach a qualified representative to each interallied commission of control with the duty of receiving from the latter any communication which it may have to address to the Austrian government, and furnishing it with, or procuring, all information or documents demanded.

Article 152.

The upkeep and cost of the commissions of control and the expense involved by their work shall be borne by Austria.

Article 153.

It will be the special duty of the military interallied commission of control to receive from the Austrian government the notifications relating to the location of the stocks and depots of munitions, the armament of the fortified works, fortresses and forts, and the location of the works or factories for the production of arms, munitions and war material and their operations.

It will take delivery of the arms, munitions, war material and plant intended for war construction, will select the points where such delivery is to be effected, and will supervise the works of destruction, and rendering things useless, or of transformation of material, which are to be carried out in accordance with the present treaty.

Article 154.

It will be the special duty of the naval interallied commission of control to proceed to the building yards and to supervise the breaking up of the ships which are under construction there, to take delivery of arms, munitions and naval war material, and to supervise the destruction and breaking up provided for.

The Austrian government must furnish to the naval interallied commission of control all such information and documents as the commission may deem necessary to insure the com-

plete execution of the naval clauses, in particular the designs of the warships, the composition of their armaments, the details and models of the guns, munitions, torpedoes, mines, explosives, wireless telegraphic apparatus, and in general everything relating to naval war material, as well as all legislative or administrative documents or regulations.

Article 155.

It will be the special duty of the aeronautical interallied commission of control to make an inventory of the aeronautical material which is actually in the possession of the Austrian government, to inspect airplane, balloon and motor manufactories, and factories producing arms, munitions and explosives capable of being used by aircraft, to visit all aerodromes, sheds, landing grounds, parks and depots which are now in Austrian territory, and to authorize where necessary a removal of material and to take delivery of such material.

The Austrian government must furnish to the aeronautical interallied commission of control all such information and legislative, administrative or other documents which the commission may consider necessary to insure the complete execution of the air clauses, and, in particular, a list of the personnel belonging to all the air services of Austria and of the existing material, as well as of that in process of manufacture or on order, and a list of all establishments working for aviation, of their positions, and of all sheds and landing grounds.

Section V.—General Articles.

Article 156.

After the expiration of a period of three months from the coming into force of the present treaty, the Austrian laws must have been modified and shall be maintained by the Austrian government in conformity with this part of the present treaty.

Within the same period all the administrative or other measures relating to the execution of this part must have been taken by the Austrian government.

Article 157.

The following portions of the armistice of Nov. 3, 1918; paragraphs 2 and 3 of chapter I. (Military Clauses), paragraphs 2, 3 and 6 of chapter I. of the annexed protocol (Military Clauses), remain in force so far as they are not inconsistent with the above stipulations.

Article 158.

Austria undertakes, from the coming into force of the present treaty, not to accredit nor to send to any foreign country any military, naval or air mission, nor to allow any such mission to leave her territory; Austria further agrees to take the necessary measures to prevent Austrian nationals from leaving her territory to enlist in the army, navy or air service of any foreign power, or to be attached to such army, navy or air service for the purpose of assisting in the military, naval or air training thereof, or generally for the purpose of giving military, naval or air instruction in any foreign country.

The allied and associated powers undertake, so far as they are concerned, that from the coming into force of the present treaty they will not enroll in nor attach to their armies or naval or air forces any Austrian national for the purpose of assisting in the military training of such armies or naval or air forces, or otherwise employ any such Austrian national as military, naval or aeronautic instructor.

The present provision does not, however, affect the right of France to recruit for the foreign legion in accordance with French military laws and regulations.

Article 159.

So long as the present treaty remains in force Austria undertakes to submit to any investigation which the council of the league of nations, acting if need be by a majority vote, may consider necessary.

PART VI.—PRISONERS OF WAR AND GRAVES.

Section I.—Prisoners of War.

Article 160.

The repatriation of Austrian prisoners of war and interned civilians shall take place as soon as possible after the coming into force of the present treaty, and shall be carried out with the greatest rapidity.

Article 161.

The repatriation of Austrian prisoners of war and interned civilians shall, in accordance with article 160, be carried out by a commission composed of representatives of the allied and associated powers on the one part and of the Austrian government on the other part.

For each of the allied and associated powers a subcommission composed exclusively of representatives of the interested power and of delegates of the Austrian government shall regulate the details of carrying into effect the repatriation of prisoners of war.

Article 162.

From the time of their delivery into the hands of the Austrian authorities the prisoners of war and interned civilians are to be returned without delay to their homes by the said authorities.

Those among them who, before the war, were habitually resident in territory occupied by the troops of the allied and associated powers are likewise to be sent to their homes, subject to the consent and control of the military authorities of the allied and associated armies of occupation.

Article 163.

The whole cost of repatriation from the moment of starting shall be borne by the Austrian government, who shall also provide means of transport and working personnel as considered necessary by the commission referred to in article 161.

Article 164.

Prisoners of war and interned civilians awaiting disposal or undergoing sentence for offenses against discipline shall be repatriated irrespective of the completion of their sentence or of the proceedings pending against them.

This stipulation shall not apply to prisoners of war and interned civilians punished for offenses committed subsequent to June 1, 1919.

During the period pending their repatriation all prisoners of war and interned civilians shall remain subject to the existing regulations, more especially as regards work and discipline.

Article 165.

Prisoners of war and interned civilians who are awaiting trial or undergoing sentence for offenses other than those against discipline may be detained.

Article 166.

The Austrian government undertakes to admit to its territory without distinction all persons liable to repatriation.

Prisoners of war or Austrian nationals who do not desire to be repatriated may be excluded from repatriation; but the allied and associated governments reserve to themselves the right either to repatriate them or to take them to a neutral country or to allow them to reside in their own territories.

The Austrian government undertakes not to institute any exceptional proceedings against these persons or their families, nor to take any repressive or vexatious measures of any kind whatsoever against them on this account.

Article 167.

The allied and associated governments reserve the right to make the repatriation of Austrian prisoners of war or Austrian nationals in their hands conditional upon the immediate notification and release by the Austrian government of any prisoners of war and other nationals of the allied and associated powers who are still held in Austria against their will.

Article 168.

The Austrian government undertakes:

1. To give every facility to commissions to inquire into the cases of those who cannot be traced: to furnish such commissions with all necessary means of transport: to allow them access to camps, prisons, hospitals and all other places, and to place at their disposal all documents, whether public or private, which would facilitate their inquiries.

2. To impose penalties upon any Austrian officials or private persons who have concealed the presence of any nationals of any of the allied or associated powers, or who have neglected to reveal the presence of any such after it had come to their knowledge.

Article 169.

The Austrian government undertakes to restore without delay from the date of the coming into force of the present treaty all articles, money, securities and documents which have belonged to nationals of the allied and associated powers and which have been retained by the Austrian authorities.

Article 170.

The high contracting parties waive reciprocally all repayment of sums due for the maintenance of prisoners of war in their respective territories.

Section II.—Graves.

Article 171.

The allied and associated governments and the Austrian government will cause to be respected and maintained the graves of the soldiers and sailors buried in their respective territories.

They agree to recognize any commission appointed by the several governments for the purpose of identifying, registering, caring for or erecting suitable memorials over the said graves, and to facilitate the discharge of its duties.

Furthermore they agree to afford, so far as the provisions of their laws and the requirements of public health allow, every facility for giving effect to requests that the bodies of their soldiers and sailors may be transferred to their own country.

Article 172.

The graves of prisoners of war and interned civilians who are nationals of the different belligerent states and have died in captivity shall be properly maintained in accordance with article 171 of this part of the present treaty.

The allied and associated powers on the one part and the Austrian government on the other part reciprocally undertake also to furnish to each other:

(1) A complete list of those who have died, together with all information useful for identification;

(2) All information as to the number and positions of the graves of all those who have been buried without identification.

Part VII.—Penalties.

Article 173.

The Austrian government recognizes the right of the allied and associated powers to bring before military tribunals persons accused of having committed acts in violation of the laws and customs of war. Such persons shall, if found guilty, be sentenced to punishments laid down by law. This provision will apply notwithstanding any proceedings or prosecutions before a tribunal in Austria or in the territory of her allies.

The Austrian government shall hand over to the allied and associated powers, or to such one of them as shall so request, all persons accused of having committed an act in violation of the laws and customs of war, who are specified either by name or by the rank, office or employment which they held under the Austrian authorities.

Article 174.

Persons guilty of criminal acts against the nationals of one of the allied and associated powers will be brought before the military tribunals of that power.

Persons guilty of criminal acts against the nationals of more than one of the allied and associated powers will be brought before military tribunals composed of members of the military tribunals of the powers concerned.

In every case the accused will be entitled to name his own counsel.

Article 175.

The Austrian government undertakes to furnish all documents and information of every kind, the production of which may be considered necessary to insure the full knowledge of the incriminating acts, the discovery of offenders and the just appreciation of responsibility.

Article 176.

The provisions of articles 173 to 175 apply similarly to the governments of the states to which territory belonging to the former Austro-Hungarian monarchy has been assigned, in so far as concerns persons accused of having committed acts contrary to the laws and customs of war who are in the territory or at the disposal of the said states.

If the persons in question have acquired the nationality of one of the said states the government of such state undertakes to take, at the request of the power concerned and in agreement with it, all the measures necessary to insure the prosecution and punishment of such persons.

Article 177.

The allied and associated governments affirm and Austria accepts the responsibility of Austria and her allies for causing the loss and damage to which the allied and associated governments and their nationals have been subjected as a consequence of the war imposed upon them by the aggression of Austria-Hungary and her allies.

Article 178.

The allied and associated governments recognize that the resources of Austria are not adequate, after taking into account the permanent diminutions of such resources which will result from other provisions of the present treaty, to make complete reparation for such loss and damage.

The allied and associated governments, however, require, and Austria undertakes, that she will make compensation as hereinafter determined for damage done to the civilian population of the allied and associated powers and to their property during the period of the belligerency of each as an allied and associated power against Austria by the said aggression by land, by sea and from the air, and in general damages defined in annex I. hereto.

Article 179.

The amount of such damage for which compensation is to be made by Austria shall be determined by an interallied commission to be called the reparation commission and constituted in the form and with the powers set forth hereunder and in annexes Nos. II.-V. inclusive hereto. The commission is the same as that provided for under article 233 of the treaty with Germany, subject to any modifications resulting from the present treaty. The commission shall constitute a section to consider the special questions raised by the application of the present treaty; this section shall have consultative power only, except in cases in which the commission shall delegate to it such powers as may be deemed convenient.

The reparation commission shall consider the claims and give to the Austrian government a just opportunity to be heard.

The commission shall concurrently draw up a schedule of payments prescribing the time and manner for securing and discharging by Austria, within thirty years dating from May 1, 1921, that part of the debt which shall have been assigned to her after the commission has decided whether Germany is in a position to pay the balance of the total amount of claims presented against Germany and her

allies and approved by the commission. If, however, within the period mentioned Austria fails to discharge her obligations any balance remaining unpaid may within the discretion of the commission, be postponed for settlement in subsequent years or may be handled otherwise in such manner as the allied and associated governments acting in accordance with the procedure laid down in this part of the present treaty shall determine.

Article 180.

The reparation commission shall, after May 1, 1921, from time to time consider the resources and capacity of Austria, and, after giving her representatives a just opportunity to be heard, shall have discretion to extend the date and to modify the form of payments such as are to be provided for in accordance with article 179, but not to cancel any part except with the specific authority of the several governments represented on the commission.

Article 181.

Austria shall pay in the course of the years 1919, 1920 and the first four months of 1921, in such installments and in such manner (whether in gold, commodities, ships, securities or otherwise) as the reparation commission may lay down, a reasonable sum which shall be determined by the commission.

Out of this sum the expenses of the armies of occupation subsequent to the armistice of Nov. 3, 1918, shall first be met, and such supplies of food and raw materials as may be judged by the governments of the principal allied and associated powers essential to enable Austria to meet her obligations for reparation may also, with the approval of the said governments, be paid for out of the above sum. The balance shall be reckoned toward the liquidation of the amount due for reparation.

Annex I.

Compensation may be claimed from Austria in accordance with article 178 above in respect of the total damage under the following categories:

1. Damage to injured persons and to surviving dependents by personal injury to or death of civilians caused by acts of war, including bombardment or other attacks on land, on sea or from the air, and of the direct consequences thereof and of all operations of war by the two groups or belligerents wherever arising;

2. Damage caused by Austria or her allies to civilian victims of acts of cruelty, violence or maltreatment (including injuries to life or health as a consequence of imprisonment, deportation, internment or evacuation, or exposure at sea, or of being forced to labor) wherever arising, and to the surviving dependents of such victims;

3. Damage caused by Austria or her allies in their own territory or in occupied or invaded territory to civilian victims of all acts injurious to health or capacity to work or to honor, as well as to the surviving dependents of such victims;

4. Damage caused by any kind of maltreatment of prisoners of war.

5. As damage caused to the peoples of the allied and associated powers, all pensions or compensations in the way of pensions to naval and military victims of war, including members of the air force, whether mutilated, wounded, sick or invalided, and to the dependents of such victims, the amount due to the allied and associated governments being calculated for each individual as being the capitalized cost of such pensions and compensations at the date of the coming into force of the present treaty on the basis of the scales in force in France on May 1, 1919.

6. The cost of assistance by the governments of the allied and associated powers to prisoners of war, to their families and dependents.

7. Allowances by the governments of the allied and associated powers to the families and dependents of mobilized persons or persons serving with the forces, the amount due to them for each calendar year in which hostilities occurred being calculated for each government on the basis of the average scale for such payments in force in France during that year.

8. Damage caused to civilians by being forced by Austria or her allies to labor without just remuneration.

9. Damage in respect of all property, wherever situated belonging to any of the allied or associated states or their nationals, with the exception of naval or military works or materials, which has been carried off, seized, injured or destroyed by the acts of Austria or her allies on land, on sea, or from the air, or damage directly in consequence of hostilities or of any operations of war.

10. Damage in the form of levies, fines and other similar exactions imposed by Austria or her allies upon the civilian population.

Annex II.

1. The commission referred to in article 179 shall be called the "reparation commission" and is hereafter referred to as the "commission."

2. The delegates to this commission shall be appointed by the United States of America, Great Britain, France, Italy, Japan, Belgium, Greece, Poland, Roumania, the Serb-Croat-Slovene state and Czecho-Slovakia. The United States of America, Great Britain, France, Italy, Japan and Belgium shall each appoint a delegate. The other five powers shall appoint a delegate to represent them all under the conditions indicated in the third sub-paragraph of paragraph 3 hereafter. At the time when each delegate is appointed there shall also be appointed an assistant delegate, who will take his place in case of illness or necessary absence, but at other times will only have the right to be present at the proceedings without taking any part therein.

On no occasion shall delegates of more than five of the above powers have the right to take part in the proceedings of the commission and to record their votes. The delegates of the United States, Great Britain, France and Italy shall have this right on all occasions other than those referred to below. The delegate of Belgium shall have this right on all occasions other than those referred to below. The delegate of Japan will have this right when questions relating to damage at sea are under consideration. The delegate representing the five remaining powers mentioned above shall have this right when questions relating to Austria and Hungary or Bulgaria are under consideration.

Each of the governments represented on the commission shall have the right to withdraw after giving twelve months' notice to the commission and confirming it six months after the date of the original notification.

3. Such of the allied and associated powers as may be interested shall have the right to name a delegate to be present and act as assessor only while their respective claims and interests are under examination or discussion, but without the right to vote.

The section to be established by the commission under article 179 of the present part shall include representatives of the following powers: The United States of America, Great Britain, France, Italy, Greece, Poland, Roumania, the Serb-Croat-Slovene state and Czecho-Slovakia. This composition of the section shall in no way prejudge the admissibility of any claims. In voting the representatives of the United States of America, Great Britain, France and Italy shall each have two votes.

The representatives of the five remaining powers mentioned above shall appoint a delegate to represent them all, who shall sit upon the reparation commission in the circumstances described in paragraph 2 of the present annex. This delegate, who shall be appointed for one year, shall be chosen successively from the nationals of each of the said five powers.

4. In the case of death, resignation or re-

call of any delegate, assistant delegate or assessor, a successor to him shall be nominated as soon as possible.

5. The commission shall have its principal permanent bureau in Paris, and shall hold its first meeting in Paris as soon as practicable after the coming into force of the present treaty, and thereafter will meet in such place or places and at such time as may be deemed convenient and as may be necessary for the most expeditious discharge of its duties.

6. At its first meeting the commission shall elect from among the delegates referred to above a chairman and a vice-chairman, who shall hold office for a year and shall be eligible for re-election. If a vacancy in the chairmanship or vice-chairmanship should occur during the annual period, the commission shall proceed to a new election for the remainder of the said period.

7. The commission is authorized to appoint all necessary officers, agents and employes who may be required for the execution of its functions, and to fix their remuneration; to constitute sections or committees whose members need not necessarily be members of the commission, and to take all executive steps necessary for the purpose of discharging its duties; and to delegate authority and discretion to officers, agents, sections and committees.

8. All the proceedings of the commission shall be private unless on particular occasions the commission shall otherwise determine for special reasons.

9. The commission shall be required, if the Austrian government so desire, to hear within a period which it will fix from time to time evidence and arguments on the part of Austria on any questions connected with her capacity to pay.

10. The commission shall consider the claims and give to the Austrian government a just opportunity to be heard, but not to take any part whatever in the decisions of the commission. The commission shall afford a similar opportunity to the allies of Austria when it shall consider that their interests are in question.

11. The commission shall not be bound by any particular code or rules of law or by any particular rule of evidence or of procedure, but shall be guided by justice, equity and good faith. Its decisions must follow the same principles and rules in all cases where they are applicable. It will establish rules relating to methods of proof of claims. It may act on any trustworthy modes of computation.

12. The commission shall have all the powers conferred upon it and shall exercise all the functions assigned to it by the present treaty.

The commission shall, in general, have wide latitude as to its control and handling of the whole reparation problem as dealt with in this part, and shall have authority to interpret its provisions. Subject to the provisions of the present treaty, the commission is constituted by the several allied and associated governments referred to in paragraphs 2 and 3 above as the exclusive agency of the said governments respectively for receiving, selling, holding and distributing the reparation payments to be made by Austria. The commission must comply with the following conditions and provisions:

(a) Whatever part of the full amount of the proved claims is not paid in gold or in ships, securities, commodities or otherwise, Austria shall be required, under such conditions as the commission may determine, to cover by way of guaranty, by an equivalent issue of bonds, obligations or otherwise, in order to constitute an acknowledgment of the said part of the debt.

(b) In periodically estimating Austria's capacity to pay the commission shall examine the Austrian system of taxation; first, to the end that the sums for reparation which Austria is required to pay shall become a charge upon all her revenues prior to that for the service or discharge of any domestic loan, and, second, so as to satisfy itself that in general the Austrian scheme of taxation is fully as heavy proportionately as that of any of the powers represented on the commission.

The reparation commission shall receive instructions to take account of:

(1) The actual economic and financial position of Austrian territory as delimited by the present treaty; and

(2) The diminution of its resources and of its capacity for payment resulting from the clauses of the present treaty.

As long as the position of Austria is not modified the commission shall take account of these considerations in fixing the final amount of the obligations to be imposed on Austria, the payments by which these are to be discharged, and any postponement of payment of interest which may be asked for by Austria.

(c) The commission shall, as provided in article 181, take from Austria, by way of security for and acknowledgment of her debt, gold bearer bonds free of all taxes or charges of every description established or to be established by the Austrian government or by any authorities subject to them. These bonds will be delivered at any time that may be judged expedient by the commission, and in three portions, of which the respective amounts will be also fixed by the commission, the crowns gold being payable in conformity with article 213 of part X. (Financial Clauses) of the present treaty:

(1) A first issue in bearer bonds, payable not later than May 1, 1921, without interest. There shall be specially applied to the amortization of these bonds the payments which Austria is pledged to make in conformity with article 181 of this part, after deduction of the sums used for the reimbursement of the expenses of the armies of occupation and other payments for foodstuffs and raw materials. Such bonds as may not have been redeemed by May 1, 1921, shall then be exchanged for new bonds of the same type as those provided for below (paragraph 12, (c), 2).

(2) A second issue in bearer bonds bearing interest at 2½ per cent, between 1921 and 1926, and thereafter at 5 per cent, with an additional 1 per cent for amortization, beginning in 1926 on the whole amount of the issue.

(3) An undertaking in writing to issue, when, but not until, the commission is satisfied that Austria can meet the interest and sinking fund obligations, a further installment of bearer bonds, bearing interest at 5 per cent, the time and mode of payment of principal and interest to be determined by the commission.

The dates for the payment of interest, the manner of employing the amortization fund and all other questions relating to the issue, management and regulation of the bond issue shall be determined by the commission from time to time.

Further issues by way of acknowledgment and security may be required as the commission subsequently determines from time to time.

In case the reparation commission should proceed to fix definitely and no longer provisionally the sum of the common charges to be borne by Austria as a result of the claims of the allied and associated powers, the commission shall immediately annul all bonds which have been issued in excess of this sum.

(d) In the event of bonds, obligations or other evidence of indebtedness issued by Austria by way of security for or acknowledgment of her reparation debt being disposed of outright, not by way of pledge, to persons other than the several governments in whose favor Austria's original reparation indebtedness was created, an amount of such reparation indebtedness shall be deemed to

be extinguished corresponding to the nominal value of the bonds, etc., so disposed of outright, and the obligation of Austria in respect of such bonds shall be confined to her liabilities to the holders of the bonds, as expressed upon their face.

(e) The damage for repairing, reconstructing and rebuilding property situated in the invaded and devastated districts, including reinstallation of furniture, machinery and other equipment, will be calculated according to the cost at the date when the work is done.

(f) Decisions of the commission relating to the total or partial cancellation of the capital or interest of any of the verified debt of Austria must be accompanied by a statement of its reasons.

13. As to voting the commission will observe the following rules:

When a decision of the commission is taken the votes of all the delegates entitled to vote, or in the absence of any of them, of their assistant delegates, shall be recorded. Abstention from voting is to be treated as a vote against the proposal under discussion. Assessors shall have no vote.

On the following questions unanimity is necessary:

(a) Questions involving the sovereignty of any of the allied and associated powers or the cancellation of the whole or any part of the debt or obligations of Austria;

(b) Questions of determining the amount and conditions of bonds or other obligations to be issued by the Austrian government and of fixing the time and manner for selling, negotiating or distributing such bonds;

(c) Any postponement, total or partial, beyond the end of 1930, of the payment of installments falling due between May 1, 1921, and the end of 1926 inclusive.

(d) Any postponement, total or partial, of any installments falling due after 1926 for a period exceeding three years.

(e) Questions of applying in any particular case a method of measuring damages different from that which has been previously applied in a similar case.

(f) Questions of the interpretation of the provisions of this part of the present treaty.

All other questions shall be decided by the vote of the majority.

In the case of any difference of opinion among the delegates, which cannot be solved by reference to their governments, upon the question whether a given case is one which requires a unanimous vote for its decision or not, such difference shall be referred to the immediate arbitration of some impartial person to be agreed upon by their governments, whose award the allied and associated governments agree to accept.

14. Decisions of the commission, in accordance with the powers conferred upon it, shall forthwith become binding and may be put into immediate execution without further proceedings.

15. The commission shall issue to each of the interested powers in such form as the commission shall fix:

(1) A certificate stating that it holds for the account of the said power bonds of the issues mentioned above, the said certificate on the demand of the power concerned being divisible into a number of parts not exceeding five;

(2) From time to time certificates stating the goods delivered by Austria on account of her reparation debt which it holds for the account of the said power.

Such certificates shall be registered and, upon notice to the commission, may be transferred by indorsement.

When bonds are issued for sale or negotiation, and when goods are delivered by the commission, certificates to an equivalent value must be withdrawn.

16. Interest, shall be debited to Austria as from May 1, 1921, in respect of her debt as determined by the commission after allowing for sums already covered by cash payments or their equivalent by bonds issued to the commission or under article 189. The rate of interest shall be 5 per cent unless the commission shall determine at some future time that circumstances justify a variation of this rate.

The commission, in fixing on May 1, 1921, the total amount of the debt of Austria, may take account of interest due on sums arising out of reparation and of material damage as from Nov. 11, 1918, up to May 1, 1921.

17. In case of default by Austria in the performance of any obligation under this part of the present treaty the commission will forthwith give notice of such default to each of the interested powers and may make such recommendations as to the action to be taken in consequence of such default as it may think necessary.

18. The measures which the allied and associated powers shall have the right to take, in the case of voluntary default by Austria, and which Austria agrees not to regard as acts of war, may include economic and financial prohibitions and reprisals and in general such other measures as the respective governments may determine to be necessary in the circumstances.

19. Payments required to be made in gold or its equivalent on account of the proved claims of the allied and associated powers may at any time be accepted by the commission in the form of chattels, properties, commodities, businesses, rights, concessions within or without Austrian territory, ships, bonds, shares or securities of any kind or currencies of Austria or other states, the value of such substitutes for gold being fixed at a fair and just amount by the commission itself.

20. The commission in fixing or accepting payment in specified properties or rights shall have due regard for any legal or equitable interests of the allied and associated powers or of their nationals therein.

21. No member of the commission shall be responsible, except to the government appointing him, for any action or omission as such member. No one of the allied and associated governments assumes any responsibility in respect of any other government.

22 Subject to the provisions of the present treaty this annex may be amended by the unanimous decision of the governments represented from time to time upon the commission.

23 When all the amounts due from Austria and her allies under the present treaty or the decisions of the commission have been discharged, and all sums received, or their equivalents, have been distributed to the powers interested, the commission shall be dissolved.

Annex III.

1. Austria recognizes the right of the allied and associated powers to the replacement, ton for ton (gross tonnage) and class for class, of all merchant ships and fishing boats lost or damaged owing to the war.

Nevertheless, and in spite of the fact that the tonnage of Austrian shipping at present in existence is much less than that lost by the allied and associated powers in consequence of the aggression of Austria and her allies, the right thus recognized will be enforced on the Austrian ships and boats under the following conditions:

The Austrian government on behalf of themselves and so as to bind all other persons interested cede to the allied and associated governments the property in all merchant ships and fishing boats belonging to nationals of the former Austrian empire.

2. The Austrian government will within two months of the coming into force of the present treaty deliver to the reparation commission all the ships and boats mentioned in paragraph 1.

3. The ships and boats in paragraph 1 include all ships and boats which (a) fly or

may be entitled to fly the Austro-Hungarian merchant flag and are registered in a port of the former Austrian empire, or (b) are owned by any national, company or corporation of the former Austrian empire or by any company or corporation belonging to a country other than an allied or associated country and under the control or direction of nationals of the former Austrian empire; or (c), which are now under construction (1), in the former Austrian empire; (2), in other than allied or associated countries for the account of any national, company or corporation of the former Austrian empire.

4. For the purpose of providing documents of title for the ships and boats to be handed over as above mentioned the Austrian government will:

(a) Deliver to the reparation commission in respect of each vessel a bill of sale or other document of title evidencing the transfer to the commission of the entire property in the vessel, free from all incumbrances, charges and liens of all kinds as the commission may require;

(b) Take all measures that may be indicated by the reparation commission for insuring that the ships themselves shall be placed at its disposal.

5. Austria undertakes to restore in kind and in normal condition of upkeep to the allied and associated powers within two months of the coming into force of the present treaty in accordance with procedure to be laid down by the reparation commission any boats and other movable appliances belonging to inland navigation which since July 28, 1914, have by any means whatever come into her possession or into the possession of her nationals and which can be identified.

With a view to make good the loss in inland navigation tonnage from whatever cause arising which has been incurred during the war by the allied and associated powers and which cannot be made good by means of the restitution prescribed above, Austria agrees to cede to the reparation commission a portion of the Austrian river fleet up to the amount of the loss mentioned above, provided such cession shall not exceed 20 per cent of the river fleet as it existed on Nov. 3, 1918.

The conditions of this cession shall be settled by the arbitrators referred to in article 300 of part XII. (Ports, Waterways and Railways) of the present treaty, who are charged with the settlement of difficulties relating to the apportionment of river tonnage resulting from the new international regime applicable to certain river systems or from the territorial changes affecting those systems.

6. Austria agrees to take any measures that may be indicated to her by the reparation commission for obtaining a full title to the property in all ships which have, during the war, been transferred or are in process of transfer to neutral flags without the consent of the allied and associated governments.

7. Austria waives all claims of any description against the allied and associated governments and their nationals in respect of the detention, employment, loss or damage of any Austrian ships or boats.

8. Austria renounces all claims to vessels or cargoes sunk by or in consequence of naval action and subsequently salved in which any of the allied or associated governments or their nationals may have any interest either as owners, charterers, insurers or otherwise, notwithstanding any decree of condemnation which may have been made by a prize court of the former Austro-Hungarian monarchy or of its allies.

Annex IV.

1. The allied and associated powers require and Austria undertakes that in part satisfaction of her obligations expressed in this part she will, as hereinafter provided, devote her economic resources directly to the physical restoration of the invaded areas of the allied and associated powers to the extent that these powers may determine.

2. The allied and associated governments may file with the reparation commission lists showing:

(a) Animals, machinery, equipment, tools and like articles of a commercial character which have been seized, consumed or destroyed by Austria, or destroyed in direct consequence of military operations, and which such governments, for the purpose of meeting immediate and urgent needs, desire to have replaced by animals and articles of the same nature which are in being in Austrian territory at the date of the coming into force of the present treaty;

(b) Reconstruction materials (stones, bricks refractory bricks, tiles, wood, window glass, steel, lime, cement, etc.), machinery, heating apparatus, furniture and like articles of a commercial character, which the said governments desire to have produced and manufactured in Austria and delivered to them to permit of the restoration of the invaded areas.

3. The lists relating to the articles mentioned in 2 (a) above shall be filed within sixty days after the date of the coming into force of the present treaty.

The lists relating to the articles in 2 (b) shall be filed on or before Dec. 31, 1919.

The lists shall contain all such details as are customary in commercial contracts dealing with the subject matter, including specifications, dates of delivery (but not extending over more than four years) and places of delivery, but not prices or value, which shall be fixed as hereinafter provided by the commission.

4. Immediately upon the filing of such lists with the commission the commission shall consider the amount and number of the materials and animals mentioned in the lists provided for above which are to be required of Austria. In reaching a decision on this matter the commission shall take into account such domestic requirements of Austria as it deems essential for the maintenance of Austrian social and economic life, the prices and dates at which similar articles can be obtained in the allied and associated countries as compared with those to be fixed for Austrian articles and the general interest of the allied and associated governments that the industrial life of Austria be not so disorganized as to affect adversely the ability of Austria to perform the other acts of reparation stipulated for.

Machinery equipment, tools and like articles of a commercial character in actual industrial use are not, however, to be demanded of Austria unless there is no free stock of such articles respectively which is not in use and is available, and then not in excess of 30 per cent of the quantity of such articles in use in any one establishment or undertaking.

The commission shall give representatives of the Austrian government an opportunity and a time to be heard as to their capacity to furnish the said materials, articles and animals.

The decision of the commission shall thereupon and at the earliest possible moment be communicated to the Austrian government and to the several interested allied and associated governments.

The Austrian government undertakes to deliver the materials, articles and animals as specified in the said communication, and the interested allied and associated governments severally agree to accept the same, provided they conform to the specification given or are not, in the judgment of the commission, unfit to be utilized in the work of reparation.

5. The commission shall determine the value to be attached to the materials, articles and animals to be delivered in accordance with the foregoing, and the allied or associated power receiving the same agrees to be charged with such value, and the amount thereof shall be treated as a payment by Austria to be divided in accordance with article 183 of this part of the present treaty.

In cases where the right to require physical

restoration as above provided is exercised, the commission shall insure that the amount to be credited against the reparation obligations of Austria shall be fair value for work done or material supplied by Austria, and that the claim made by the interested power in respect of the damage so repaired by physical restoration shall be discharged to the extent of the proportion which the damage thus repaired bears to the whole of the damage thus claimed for.

6. As an immediate advance on account of the animals referred to in paragraph 2 above, Austria undertakes to deliver in equal monthly installments in the three months following the coming into force of the present treaty the following quantities of live stock:

To the Italian Government.

4,000 milch cows of from 3 to 5 years.
1,000 heifers.
50 bulls from 18 months to 3 years.
1,000 calves.
1,000 working bullocks.
2,000 sows.

To the Serb-Croat-Slovene Government.

1,000 milch cows of from 3 to 5 years.
300 heifers.
25 bulls from 18 months to 3 years.
1,000 calves.
500 working bullocks.
1,000 draft horses.
1,000 sheep.

To the Roumanian Government.

1,000 milch cows of from 3 to 5 years.
500 heifers.
25 bulls from 18 months to 3 years.
1,000 calves.
500 working bullocks.
1,000 draft horses.
1,000 sheep.

The animals delivered shall be of average health and condition.

If the animals so delivered cannot be identified as animals taken away or seized, the value of such animals shall be credited against the reparation obligations of Austria in accordance with paragraph 5 of this annex.

7. As an immediate advance on account of the articles referred to in paragraph 2 above, Austria undertakes to deliver during the six months following the coming into force of the present treaty, in equal monthly installments, such supplies of furniture in hard and soft wood, intended for sale in Austria, as the allied and associated powers shall ask for month by month through the reparation commission and which the commission shall consider justified on the one hand by the seizures and destruction carried out in the course of the war on the territory of the said powers and on the other hand proportionate to the supplies at the disposal of Austria. The price of the articles so supplied shall be carried to the credit of Austria under the conditions provided for in paragraph 5 of this annex.

Annex V.

1. Austria shall give, as partial reparation, to the allied and associated governments severally an option during the five years following the coming into force of the present treaty for the annual delivery of the raw materials hereinafter enumerated: the amounts delivered to bear the same relation to their annual importations of these materials before the war from Austria-Hungary as the resources of Austria as now delimited by the present treaty bear to the resources before the war of the former Austro-Hungarian monarchy.

Timber and timber manufactures;
Iron and iron alloys;
Magnesite.

2. The price paid for the products referred to in the preceding paragraph shall be the same as the price paid by Austrian nationals under the same conditions of shipment to the Austrian frontier and shall be subect to any advantages which may be accorded similar products furnished to Austrian nationals.

3. The foregoing options shall be exercised through the intervention of the reparation commission, which subject to the specific provisions hereof shall have power to determine all questions relative to procedure and qualities and quantities of products and the times and modes of delivery and payment. In giving notice to the Austrian government of the foregoing options, the commission shall give at least 120 days' notice of deliveries to be made after Jan. 1, 1920, and at least thirty days' notice of deliveries to be made between the coming into force of the present treaty and Jan. 1, 1920. If the commission shall determine that the full exercise of the foregoing options would interfere unduly with the industrial requirements of Austria, the commission is authorized to postpone or to cancel deliveries and in so doing to settle all questions of priority.

Annex VI.

Austria renounces on her own behalf and on behalf of her nationals in favor of Italy all rights, titles or privileges of whatever nature in any submarine cables or portions of cables connecting Italian territory, including the territories which are assigned to Italy under the present treaty.

Austria also renounces on her own behalf and on behalf of her nationals in favor of the principal allied and associated powers all rights, titles and privileges of whatever nature in the submarine cables or portions thereof, connecting the territories ceded by Austria under the terms of the present treaty to the various allied and associated powers.

The states concerned shall provide for the upkeep of the installations and the proper working of the said cables.

As regards the cable from Trieste to Corfu, the Italian government shall enjoy in its relations with the company owning this cable the same position as that held by the Austro-Hungarian government.

The value of the cables or portions of cables referred to in the two first paragraphs of the present annex, calculated on the basis of the original cost, less a suitable allowance for depreciation, shall be credited to Austria in the reparation account.

Section II.—Special Provisions.

Article 191.

In carrying out the provisions of article 184 of this part Austria undertakes to surrender to each of the allied and associated powers respectively all records, documents, objects of antiquity and of art and all scientific and bibliographical material taken away from the invaded territories, whether they belong to the state or to provincial, communal, charitable or ecclesiastical administrations or other public or private institutions.

Article 192.

Austria shall in the same manner restore objects of the same nature as those referred to in the preceding article which may have been taken away since June 1, 1914, from the ceded territories, with the exception of objects bought from private owners.

The reparation commission will apply to these objects the provisions of article 208 of part IX. (Financial Clauses) of the present treaty, if these are appropriate.

Article 193.

Austria will give up to each of the allied and associated governments respectively all the records, documents and historical material possessed by public institutions which may have a direct bearing on the history of the ceded territories and which have been removed during the last ten years. This last mentioned period, as far as concerns Italy, shall be extended to the date of the proclamation of the kingdom (1861).

The new states arising out of the former Austro-Hungarian monarchy and the states which receive part of the territory of that

monarchy undertake on their part to hand over to Austria the records, documents and material dating from a period not exceeding twenty years which have a direct bearing on the history or administration of the territory of Austria and which may be found in the territories transferred.

Article 194.

Austria acknowledges that she remains bound, as regards Italy, to execute the obligations referred to in article 15 of the treaty of Zurich of Nov. 10, 1859, in article 18 of the treaty of Vienna of Oct. 3, 1866, and in the convention of Florence of July 14, 1868, concluded between Italy and Austria-Hungary, in so far as the articles referred to have not in fact been executed in their entirety and in so far as the documents and objects in question are situated in the territory of Austria or her allies.

Article 195.

Within a period of twelve months after the coming into force of the present treaty a committee of three jurists appointed by the reparation commission shall examine the conditions under which the objects or manuscripts in possession of Austria, enumerated in annex I. hereto, were carried off by the house of Hapsburg and by the other houses which have reigned in Italy. If it is found that the said objects or manuscripts were carried off in violation of the rights of the Italian provinces the reparation commission, on the report of the committee referred to, shall order their restitution. Italy and Austria agree to accept the decisions of the commission.

Belgium, Poland and Czecho-Slovakia may also submit claims for restitution to be examined by the same committee of three jurists, relating to the objects and documents enumerated in annexes II., III. and IV. hereto. Belgium, Poland, Czecho-Slovakia and Austria undertake to accept the decisions taken by the reparation commission as the result of the report of the said commitee.

Article 196.

With regard to all objects of artistic, archæological, scientific or historic character forming part of collections which formerly belonged to the government or the crown of the Austro-Hungarian monarchy and are not otherwise provided for in this present treaty Austria undertakes:

(a) To negotiate, when required, with the states concerned for an amicable arrangement whereby any portion thereof or any objects belonging thereto which ought to form part of the intellectual patrimony of the ceded districts may be returned to their districts of origin on terms of reciprocity, and

(b) For twenty years, unless a special arrangement is previously arrived at, not to alienate or disperse any of the said collections or to dispose of any of the above objects, but at all times to insure their safety and good condition and to make them available, together with inventories, catalogues and administrative documents relating to the said collection, at all reasonable times to students who are nationals of any of the allied and associated powers.

Annex I.—Tuscany.

The crown jewels (such part as remains after their dispersion), the private jewels of the Princess Electress of Medici, the medals which form part of the Medici heirlooms and other precious objects—all being domanial property according to contractual agreements and testamentary dispositions—removed to Vienna during the eighteenth century.

Furniture and silver plate belonging to the house of Medici and the "jewel of Aspasios" in payment of debts owed by the house of Austria to the crown of Tuscany.

The ancient instruments of astronomy and physics belonging to the Academy of Cimento removed by the house of Lorraine and sent as a present to the cousins of the imperial house of Vienna.

Modena.

A "Virgin" by Andrea del Sarto and four drawings by Correggio belonging to the Pinakothek of Modena and removed in 1859 by Duke Francis V.

The three following MSS. belonging to the library of Modena:

Biblia vulgata (Cod. Lat. 422/23).

Breviarium Romanum (Cod. Lat. 424) and Officium Beatæ Virginis (Cod. Lat. 262), carried off by Duke Francis V. in 1859.

The bronzes carried off under the same circumstances in 1859.

Certain objects (among others, two pictures by Salvator Rosa and a portrait by Dosso Dossi) claimed by the Duke of Modena in 1868 as a condition of the execution of the convention of June 20, 1868, and other objects given up in 1872 in the same circumstances.

Palermo.

Objects made in Palermo in the twelfth century for the Norman kings and employed in the coronation of the emperors, which were carried off from Palermo and are now in Vienna.

Naples.

Ninety-eight MSS. carried off from the library of S. Giovanni a Carbonara and other libraries at Naples in 1718 under the orders of Austria and sent to Vienna.

Various documents carried off at different times from the state archives of Milan, Mantua, Vienna, Modena and Florence.

Annex II.

I. The "Triptych of Saint Ildephonse," by Rubens, from the abbey of Saint-Jacques sur Cowdenberg at Brussels, bought in 1777 and removed to Vienna.

II. Objects and documents removed for safety from Belgium to Austria in 1794:

(a) Arms, armor and other objects from the old arsenal of Brussels.

(b) The Treasure of the "Toison d'Or" preserved in previous times in the "Chapelle de la Cour" at Brussels.

(c) Coinage, stamps, medals and counters by Theodore van Berckel, which were an essential feature in the archives of the "Chambre des Comptes" at Brussels.

(d) The original manuscript copies of the "carte chorographique" of the Austrian low countries, drawn up by Lieut.-Gen. Comte Jas de Ferraris between 1770 and 1777, and the documents relating thereto.

Annex III.

Object removed from the territory forming part of Poland subsequent to the first partition in 1772:

The gold cup of King Ladislas IV., No. 1114 of the Court Museum at Vienna.

Annex IV.

(1) Documents, historical memoirs, manuscripts, maps, etc., claimed by the present state of Czecho-Slovakia, which Thaulaw von Rosenthal removed by order of Maria Theresa.

(2) The documents originally belonging to the Royal Aulic Chancellery of Bohemia and the Aulic Chamber of Accounts of Bohemia, and the works of art which formed part of the installation of the Royal Chateau of Prague and other royal castles in Bohemia, which were removed by the Emperors Mathias, Ferdinand II., Charles VI. (about 1718, 1723 and 1737) and Francis Joseph I.; all of which are now in the archives, imperial castles, museums and other central public institutions at Vienna.

PART IX.
FINANCIAL CLAUSES.

Article 197.

Subject to such exceptions as the reparation commission may make, the first charge upon all the assets and revenues of Austria shall be the cost of reparation and all other costs arising under the present treaty or any treaties or agreements supplementary thereto.

or under arrangements concluded between Austria and the allied and associated powers during the armistice signed on Nov. 3, 1918.

Up to May 1, 1921, the Austrian government shall not export or dispose of, and shall forbid the export or disposal of, gold without the previous approval of the allied and associated powers acting through the reparation commission.

Article 198.

There shall be paid by the government of Austria the total cost of all armies of the allied and associated governments occupying territory within the boundaries of Austria as defined by the present treaty from the date of the signature of the armistice of Nov. 3, 1918, including the keep of men and beasts, lodging and billeting, pay and allowances, salaries and wages, bedding, heating, lighting, clothing, equipment, harness and saddlery, armament and rolling stock, air services, treatment of sick and wounded, veterinary and remount services, transport services of all sorts (such as by rail, sea or river, motor lorries), communications and correspondence, and, in general, the cost of all administrative or technical services the working of which is necessary for the training of troops and for keeping their numbers up to strength and preserving their military efficiency.

The cost of such liabilities under the above heads, so far as they relate to purchases or requisitions by the allied and associated governments in the occupied territory, shall be paid by the Austrian government to the allied and associated governments in crowns or any legal currency of Austria which may be substituted for crowns at the current or agreed rate of exchange.

All other of the above costs shall be paid in the currency of the country to which the payment is due.

Article 199.

Austria confirms the surrender of all material handed over or to be handed over to the allied and associated powers in accordance with the armistice of Nov. 3, 1918, and subsequent armistice agreements and recognizes the title of the allied and associated powers to such material.

There shall be credited to the government of Austria, against the sums due from it to the allied and associated powers for reparation, the value, as assessed by the reparation commission, of such of the above material for which, as having nonmilitary value, credit should, in the judgment of the reparation commission, be allowed to the government of Austria.

Property belonging to the allied and associated governments or their nationals restored or surrendered under the armistice agreements in specie shall not be credited to the government of Austria.

Article 200.

The priority of the charges established by article 197 shall, subject to the qualifications made in the last paragraph of this article, be as follows:

(a) The cost of the armies of occupation, as defined under article 198, during the armistice;

(b) The cost of any armies of occupation, as defined under article 198, after the coming into force of the present treaty;

(c) The cost of reparation arising out of the present treaty or any treaties or conventions supplementary thereto;

(d) The cost of all other obligations incumbent on Austria under the armistice conventions or under this treaty or any treaties or conventions supplementary thereto.

The payment for such supplies of food and raw material for Austria and such other payments as may be judged by the principal allied and associated powers to be essential to enable Austria to meet her obligations in respect of reparation shall have priority to the extent and upon the conditions which have been or may be determined by the governments of the said powers.

Article 201.

The right of each of the allied and associated powers to dispose of enemy assets and property within its jurisdiction at the date of the coming into force of the present treaty is not affected by the foregoing provisions.

Article 202.

Nothing in the foregoing provisions shall prejudice in any manner charges or mortgages lawfully effected in favor of the allied and associated powers or their nationals respectively before the date at which a state of war existed between Austria-Hungary and the allied or associated powers concerned by the former Austrian government or by nationals of the former Austrian empire on assets in their ownership at that date, except in so far as variations of such charges or mortgages are specifically provided for under the terms of the present treaty or conventions supplementary thereto.

Article 203.

1. Each of the states to which territory of the former Austro-Hungarian monarchy is transferred and each of the states arising from the dismemberment of that monarchy, including Austria, shall assume responsibility for a portion of the debt of the former Austrian government which is specifically secured on railways, salt mines or other property, and which was in existence on July 28, 1914. The portion to be so assumed by each state shall be such portion as in the opinion of the reparation commission represents the secured debt in respect of the railways, salt mines and other properties transferred to the state under the terms of this treaty or conventions supplementary thereto.

The amount of the liability in respect of secured debt so assumed by each state, other than Austria, shall be valued by the reparation commission, on such basis as the commission may consider equitable and the value so ascertained shall be deducted from the amount payable by the state in question to Austria in respect of property of the former or existing Austrian government which the state acquires with the territory. Each state shall be solely responsible in respect of that portion of the secured debt for which it assumes responsibility under the terms of this article, and holders of the debt for which responsibility is assumed by states other than Austria shall have no recourse against the government of any other state.

Any property which was specifically pledged to secure any debt referred to in this article shall remain specifically pledged to secure the new debt. But in case the property so pledged is situated as the result of the present treaty in more than one state that portion of the property which is situated in a particular state shall constitute the security only for that part of the debt which is apportioned to that state and not for any other part of the debt.

For the purposes of the present article there shall be regarded as secured debt payments due by the former Austrian government in connection with the purchase of railways or similar property; the distribution of the liability for such payments will be determined by the reparation commission in the same manner as in the case of secured debt.

Debts for which the responsibility is transferred under the terms of this article shall be expressed in terms of the currency of the state assuming the responsibility, if the original debt was expressed in terms of Austro-Hungarian paper currency. For the purposes of this conversion the currency of the assuming state shall be valued in terms of Austro-Hungarian paper kronen at the rate at which those kronen were exchanged into the currency of the assuming state by that state when it first substituted its own currency for Austro-Hungarian kronen. The basis of

this conversion of the currency unit in which the bonds are expressed shall be subject to the approval of the reparation commission, which shall, if it thinks fit, require the state effecting the conversion to modify the terms thereof. Such modification shall only be required if, in the opinion of the commission, the foreign exchange value of the currency unit or units substituted for the currency unit in which the old bonds are expressed is substantially less at the date of the conversion than the foreign exchange value of the original currency unit.

If the original Austrian debt was expressed in terms of a foreign currency or foreign currencies, the new debt shall be expressed in terms of the same currency or currencies.

If the original Austrian debt was expressed in terms of Austro-Hungarian gold coin, the new debt shall be expressed in terms of equivalent amounts of pounds sterling and gold dollars of the United States of America, the equivalents being calculated on the basis of the weight and the fineness of gold of the three coins as enacted by law on Jan. 1, 1914.

Any foreign exchange options, whether at fixed rates or otherwise, embodied explicitly or implicitly in the old bonds shall be embodied in the new bonds also.

2. Each of the states to which territory of the former Austro-Hungarian monarchy is transferred and each of the states arising from the dismemberment of that monarchy, including Austria, shall assume responsibility for a portion of the unsecured bonded debt of the former Austrian government which was in existence on July 28, 1914, calculated on the basis of the ratio between the average for the three financial years 1911, 1912, 1913, of such revenues of the distributed territory and the average for the same years of such revenues of the whole of the former Austrian territories as in the judgment of the reparation commission are best calculated to represent the financial capacity of the respective territories. In making the above calculation the revenues of Bosnia and Herzegovina shall not be included.

The responsibilities in respect of bonded debt to be assumed under the terms of this article shall be discharged in the manner laid down in the annex hereto.

The Austrian government shall be solely responsible for all the liabilities of the former Austrian government incurred prior to July 28, 1914, other than those evidenced by the bonds, bills, securities and currency notes, which are specifically provided for under the terms of the present treaty.

Neither the provisions of this article nor the provisions of the annex hereto shall apply to securities of the former Austrian government deposited with the Austro-Hungarian bank as security for the currency notes issued by that bank.

Annex.

The amount of the former unsecured Austrian government bonded debt, the responsibility for which is to be distributed under the provisions of article 203, shall be the amount of that debt as it stood on July 28, 1914, after deducting that portion which represents the liability of the former Hungarian government for that debt as provided by the additional convention relating to the contribution of the countries of the sacred Hungarian crown to the charges of the general debt of the Austro-Hungarian state approved by the Austro-Hungarian law of Dec. 30, 1907, B. L. I. No. 278.

Each state, assuming responsibility for the old unsecured Austrian government debt shall, within three months of the coming into force of the present treaty, if it has not already done so, stamp with the stamp of its own government all the bonds of that debt existing in its own territory. The distinguishing numbers of the bonds so stamped shall be recorded and shall be furnished, together with the other records of the stamping, to the reparation commission.

Holders of bonds within the territory of a state which is required to stamp old Austrian bonds under the terms of this annex shall, from the date of the coming into force of the present treaty, be creditors in respect of these bonds of that state only, and they shall have no recourse against the government of any other state.

Each state which, under the terms of article 203, is required to assume responsibility for a portion of the old unsecured Austrian government debt, and which has ascertained by means of stamping the old Austrian bonds that the bonds of any particular issue of such old Austrian bonds held within its territory were smaller in amount than the amount of that issue for which, in accordance with the assessment of the reparation commission, it is held responsible, shall deliver to the reparation commission new bonds equal in amount to the difference between the amount of the issue for which it is responsible and the amount of the same issue recorded as held within its own territory. Such new bonds shall be of such denominations as the reparation commission may require. They shall carry the same rights as regards interest and amortization as the old bonds for which they are substituted, and in all other respects the conditions of the new bonds shall be fixed subject to the approval of the reparation commission.

If the original bond was expressed in terms of Austro-Hungarian paper currency the new bond by which it is replaced shall be expressed in terms of the currency of the state issuing the new bonds, and for the purpose of this currency conversion, the currency of the new state shall be valued in terms of Austro-Hungarian paper kronen at the rate at which those kronen were exchanged for the currency of the new state by that state when it first substituted its own currency for Austro-Hungarian paper kronen. The basis of this conversion of the currency unit in which the bonds are expressed shall be subject to the approval of the reparation commission, which shall, if it thinks fit, require the state effecting the conversion to modify the terms thereof. Such modification shall only be required if, in the opinion of the commission, the foreign exchange value of the currency unit or units substituted for the currency unit in which the old bonds are expressed is substantially less at the date of the conversion than the foreign exchange value of the original currency unit.

If the original bond was expressed in terms of a foreign currency or foreign currencies the new bond shall be expressed in terms of the same currency or currencies. If the original bond was expressed in terms of Austro-Hungarian gold coin the new bond shall be expressed in terms of equivalent amounts of pounds sterling and gold dollars of the United States of America, the equivalents being calculated on the basis of the weight and fineness of gold of the three coins as enacted by law on Jan. 1, 1914.

Any foreign exchange options, whether at fixed rates or otherwise, embodied explicitly or implicitly in the old bonds shall be embodied in the new bonds also.

Each state which under the terms of article 203 is required to assume responsibility for a portion of the old unsecured Austrian government debt, which has ascertained by means of stamping the old Austrian bonds that the bonds of any particular issue of such old Austrian bonds held within its territory were larger in amount than the amount of that issue for which it is held responsible in accordance with the assessment of the reparation commission shall receive from the reparation commission its due proportionate share of each of the new issues of bonds issued in accordance with the provisions of this annex.

Holders of unsecured bonds of the old Aus-

trian government debt held outside the boundaries of the states to which territory of the former Austro-Hungarian monarchy is transferred, or of states arising from the dismemberment of that monarchy, including Austria, shall deliver through the agency of their respective governments to the reparation commission the bonds which they hold, and in exchange therefor the reparation commission shall deliver to them certificates entitling them to their due proportionate share of each of the new issues of bonds corresponding to and issued in exchange for their surrendered bonds under the provisions of this annex.

The share of each state or private holder entitled to a share in any new issue of bonds issued in accordance with the provisions of this annex shall bear such proportion to the total amount of bonds of that new issue as the holding of the state or private owner in question of the old issue of bonds bears to the total amount of the old issue presented to the reparation commission for exchange into new bonds in accordance with the provisions of this annex. Each such participating state or private holder will also be entitled to its or his due proportionate share of the new bonds issued under the terms of the treaty with Hungary in exchange for that portion of the former Austrian government debt for which Hungary accepted liability under the agreement of 1907.

The reparation commission shall, if it think fit, arrange with the holders of the new bonds provided for by this annex a consolidation loan of each debtor state, the bonds of which loan shall be substituted for the various different issues of new bonds on such terms as may be agreed upon by the commission and the bondholders.

The state assuming liability for any bond of the former Austrian government shall assume any liability attaching to the bond in respect of unpaid coupons or sinking fund installments accrued since the date of the coming into force of the present treaty.

Article 204.

1. In case the new boundaries of any states, as laid down by the present treaty, shall divide any local area which was a single unit for borrowing purposes and which had a legally constituted public debt, such debt shall be divided between the new divisions of the area in a proportion to be determined by the reparation commission in accordance with the principles laid down for the reapportionment of government debts under article 203, and the responsibility so assumed shall be discharged in such a manner as the reparation commission shall determine.

2. The public debt of Bosnia and Herzegovina shall be regarded as the debt of a local area and not as part of the public debt of the former Austro-Hungarian monarchy.

Article 205.

Within two months of the coming into force of the present treaty, each one of the states to which territory of the former Austro-Hungarian monarchy is transferred and each one of the states arising from the dismemberment of that monarchy, including Austria, shall, if it has not already done so, stamp with the stamp of its own government the securities of various kinds which are separately provided for, representing the bonded war debt of the former Austrian government as legally constituted prior to Oct. 27, 1918, and existing in their respective territories.

The securities thus stamped shall be withdrawn and replaced by certificates, their distinguishing numbers shall be recorded, and any securities withdrawn, together with the documents recording the transaction, shall be sent to the reparation commission.

The stamping and replacement of a security by a certificate under the provisions of this article shall not imply that the state so stamping and replacing a security thereby assumes or recognizes any obligation in respect of it, unless the state in question desires that the stamping and replacement should have this implication.

The aforementioned states, with the exception of Austria, shall be free from any obligation in respect of the war debt of the former Austrian government, wherever that debt may be held, but neither the governments of those states nor their nationals shall have recourse under any circumstances whatever against any other states, including Austria, in respect of the war debt bonds of which they or their nationals are the beneficial owners.

The war debt of the former Austrian government, which was prior to the signature of the present treaty in the beneficial ownership of nationals or governments or states other than those to which territory of the former Austro-Hungarian monarchy is assigned shall be a charge upon the government of Austria only, and no one of the other states aforementioned shall be held responsible for any part thereof.

The provisions of this article shall not apply to the securities of the former Austrian government deposited by that government with the Austro-Hungarian bank as security for the currency notes of the said bank.

The existing Austrian government shall be solely responsible for all the liabilities of the former Austrian government incurred during the war, other than those evidenced by the bonds, bills, securities and currency notes which are specifically provided for under the terms of the present treaty.

Article 206.

1. Within two months of the coming into force of the present treaty, each one of the states to which territory of the former Austro-Hungarian monarchy is transferred, and each one of the states arising from the dismemberment of that monarchy, including Austria and the present Hungary, shall, if it has not already done so, stamp with the stamp of its own government the currency notes of the Austro-Hungarian bank existing in its territory.

2. Within twelve months of the coming into force of the present treaty, each one of the states to which territory of the former Austro-Hungarian monarchy is transferred, and each one of the states arising from the dismemberment of that monarchy, including Austria and the present Hungary, shall replace, as it may think fit, the stamped notes referred to above by its own or a new currency.

3. The governments of such states as have already converted the currency notes of the Austro-Hungarian bank by stamping or by the issue of their own or a new currency, and in carrying out this operation have withdrawn, without stamping them, a portion or all of the currency notes circulating in their territory, shall either stamp the notes so withdrawn or hold them at the disposal of the reparation commission.

4. Within fourteen months of the coming into force of the present treaty those governments which have replaced notes of the bank by their own or new currency in accordance with the provisions of this article, shall transfer to the reparation commission all the notes, stamped or unstamped, of the bank which have been withdrawn in the course of this replacement.

5. All notes transferred to the reparation commission under the provisions of this article shall be dealt with by that commission in accordance with the provisions of the annex hereto.

6. The Austro-Hungarian bank shall be liquidated as from the day succeeding the day of the signature of this treaty.

7. The liquidation shall be conducted by receivers specially appointed for that purpose by the reparation commission. In conducting the liquidation of the bank the receivers shall follow the rules laid down in the statutes or

other valid instruments regulating the constitution of the bank, subject, however, to the special provisions of this article. In the case of any doubt arising as to the interpretation of the rules concerning the liquidation of the bank, whether laid down in these articles and annexes or in the statutes of the bank, the decision of the reparation commission or any arbitrator appointed by it for that purpose shall be final.

8. The currency notes issued by the bank subsequent to Oct. 27, 1918, shall have a claim on the securities issued by the Austrian and Hungarian governments, both former and existing, and deposited with the bank by those governments as security for these notes, but they shall not have a claim on any other assets of the bank.

9. The currency notes issued by the bank on or prior to Oct. 27, 1918 (in so far as they are entitled to rank at all in conformity with these articles), shall all rank equally as claims against all the assets of the bank other than the Austrian and Hungarian government securities deposited as security for the various note issues.

10. The securities deposited by the Austrian and Hungarian governments, both former and existing, with the bank as security for the currency notes issued on or prior to Oct. 27, 1918, shall be canceled in so far as they represent the notes converted in the territory of the former Austro-Hungarian monarchy as it existed on July 28, 1914, by states to which territory of that monarchy is transferred or by states arising from the dismemberment of that monarchy, including Austria and the present Hungary.

11. The remainder of the securities deposited by the Austrian and Hungarian governments, both former and existing, with the bank as security for the currency notes issued on or prior to Oct. 27, 1918, shall be retained in force as security for, and in so far as they represent, the notes issued on or prior to Oct. 27, 1918, which on June 15, 1919, were outside the limits of the former Austro-Hungarian monarchy as it existed on July 28, 1914; that is to say, firstly, all notes of this description which are presented to the reparation commission in accordance with paragraph 4 of this article, and, secondly, all notes of this description which may be held elsewhere and are presented to the receivers of the bank in accordance with the annex hereto.

12. No claims on account of any other currency notes issued on or prior to Oct. 27, 1918, shall rank either against the general assets of the bank or against the securities deposited by the Austrian and Hungarian governments, both former and existing, as security for the notes, and any balance of such securities remaining after the amount of securities mentioned in paragraphs 10 and 11 has been calculated and deducted shall be canceled.

13. All securities deposited by the Austrian and Hungarian governments, both former and existing, with the bank as security for currency note issues and which are maintained in force shall be the obligations respectively of the governments of Austria and the present Hungary only and not of any other states.

14. The holders of currency notes of the Austro-Hungarian bank shall have no recourse against the governments of Austria or the present Hungary or any other government in respect of any loss which they may suffer as the result of the liquidation of the bank.

Annex.

1. The respective governments, when transmitting to the reparation commission all the currency notes of the Austro-Hungarian bank withdrawn by them from circulation in accordance with terms of article 206, shall also deliver to the commission all the records showing the nature and amounts of the conversions which they have effected.

2. The reparation commission, after examining the records, shall deliver to the said governments separate certificates stating the total amount of currency notes which the governments have converted:

(a) within the limits of the former Austro-Hungarian monarchy as they existed on July 28 1914;

(b) elsewhere.

These certificates will entitle the bearer to lodge a claim with the receivers of the bank for currency notes thus converted which are entitled to share in the assets of the bank.

3. After the liquidation of the bank is completed the reparation commission shall destroy the notes thus withdrawn.

4. No notes issued on or prior to Oct. 27, 1918, wherever they may be held, will rank as claims against the bank unless they are presented through the government of the country in which they are held.

Article 207.

Each one of the states to which territory of the former Austro-Hungarian monarchy is transferred, and each one of the states arising from the dismemberment of that monarchy, including Austria, shall deal as it thinks fit with the petty or token coinage of the former Austro-Hungarian monarchy existing in its territory.

No such state shall have any recourse under any circumstances, on behalf either of itself or of its nationals, against any other state with regard to such petty or token coinage.

Article 208.

States to which territory of the former Austro-Hungarian monarchy is transferred and states arising from the dismemberment of that monarchy shall acquire all property and possessions situated within their territories belonging to the former or existing Austrian government.

For the purposes of this article, the property and possessions of the former or existing Austrian government shall be deemed to include the property of the former Austrian empire and the interests of that empire in the joint property of the Austro-Hungarian monarchy, as well as all the property of the crown, and the private property of members of the former royal family of Austria-Hungary.

These states shall, however, have no claim to any property of the former or existing government of Austria situated outside their own respective territories.

The value of such property and possessions acquired by states other than Austria shall be fixed by the reparation commission and placed by that commission to the credit of Austria and to the debit of the state acquiring such property on account of the sums due for reparation. The reparation commission shall deduct from the value of the public property thus acquired an amount proportionate to the contribution in money, land or material made directly by any province, or commune or other autonomous local authority toward the cost of such property.

Without prejudice to article 203 relating to secured debt, in the case of each state acquiring property under the provisions of this article, the amount placed to the credit of Austria and to the debit of the said state in accordance with the preceding paragraph shall be reduced by the value of the amount of the liability in respect of the unsecured debt of the former Austrian government assumed by that state under the provisions of article 203 which, in the opinion of the reparation commission, represents expenditure upon the property so acquired. The value shall be fixed by the reparation commission on such basis as the commission may consider equitable.

Property of the former and existing Austrian governments shall be deemed to include a share of the real property in Bosnia-Herzegovina of all descriptions, for which, under article 5 of the convention of Feb. 26, 1909, the government of the former Austro-

Hungarian monarchy paid £T2,500,000 to the Ottoman government. Such share shall be proportionate to the share which the former Austrian empire contributed to the above payment, and the value of this share, as assessed by the reparation commission, shall be credited to Austria on account of reparation.

As exception to the above there shall be transferred without payment:

(1) The property and possessions of provinces, communes and other local autonomous institutions of the former Austro-Hungarian monarchy, including those in Bosnia-Herzegovina which did not belong to the former Austro-Hungarian monarchy;

(2) Schools and hospitals the property of the former Austro-Hungarian monarchy;

(3) Forests which belonged to the former kingdom of Poland.

Further, any building or other property situated in the respective territories transferred to the states referred to in the first paragraph whose principal value lies in its historic interest and associations, and which formerly belonged to the kingdom of Bohemia, the kingdom of Poland, the kingdom of Croatia-Slavonia-Dalmatia, Bosnia-Herzegovina, the republic of Ragusa, the Venetian republic or the episcopal principalities of Trient and Bressanone may, subject to the approval of the reparation commission, be transferred to the government entitled thereto without payment.

Article 209.

Austria renounces, so far as she is concerned, all rights accorded to her or her nationals by treaties, conventions or agreements, of whatsoever kind, to representation upon, or participation in, the control or administration of commissions, state banks, agencies or other financial or economic organizations of an international character exercising powers of control or administration and operating in any of the allied or associated states, or in Germany, Hungary, Bulgaria or Turkey, or in the dependencies of these states or in the former Russian empire.

Article 210.

1. The Austrian government agrees to deliver within one month from the coming into force of the present treaty to such authority as the principal allied and associated powers may designate the sum in gold deposited in the Austro-Hungarian bank in the name of the council of the administration of the Ottoman public debt as security for the first issue of Turkish government currency notes.

2. Without prejudice to article 244 of part X. of the present treaty, Austria renounces so far as she is concerned any benefit disclosed by the treaties of Bukharest and Brest-Litovsk and by the treaties supplementary thereto.

Austria undertakes to transfer either to Roumania or to the principal allied and associated powers, as the case may be, all monetary instruments, specie, securities and negotiable instruments or goods which she has received under the aforesaid treaties.

3. The sums of money and all securities, instruments and goods, of whatsoever nature, to be delivered, paid or transferred under the provisions of this article, shall be disposed of by the principal allied and associated powers in a manner hereafter to be determined by those powers.

4. Austria recognizes any transfer of gold provided for by article 259 (5) of the treaty of peace concluded at Versailles on June 28, 1919, between the allied and associated powers and Germany, and any transfer of claims provided for by article 261 of that treaty.

Article 211.

Without prejudice to the renunciation of any rights by Austria on behalf of herself or of her nationals in the other provisions of the present treaty, the reparation commission may, within one year from the coming into force of the present treaty, demand that Austria become possessed of any rights and interests of her nationals in any public utility undertaking or in any concession operating in Russia, Turkey, Germany, Hungary or Bulgaria, or in the possessions or dependencies of these states or in any territory formerly belonging to Austria or her allies to be transferred by Austria or her allies to any state, or to be administered by a mandatory under any treaty entered into with the allied and associated powers, and may require that the Austrian government transfer, within six months of the date of demand, to the reparation commission all such rights and interests and any similar rights and interests owned by the former or existing Austrian government.

Austria shall be responsible for indemnifying her nationals so dispossessed, and the reparation commission shall credit Austria on account of sums due for reparation with such sums in respect of the value of the transferred rights and interests as may be assessed by the reparation commission, and the Austrian government shall, within six months from the coming into force of the present treaty, communicate to the reparation commission all such rights and interests, whether already granted, contingent or not yet exercised, and shall renounce on behalf of itself and its nationals in favor of the allied and associated powers all such rights and interests which have not been so communicated.

Article 212.

The Austrian government undertakes to refrain from preventing or impeding such acquisition by the German, Hungarian, Bulgarian or Turkish governments of any rights and interests of German, Hungarian, Bulgarian or Turkish nationals in public utility undertakings or concessions operating in Austria as may be required by the reparation commission under the terms of the treaties of peace or supplementary treaties or conventions concluded between the allied and associated powers and the German, Hungarian, Bulgarian or Turkish governments respectively.

Article 213.

Austria undertakes to transfer to the allied and associated powers all claims in favor of the former or existing Austrian governments to payment or reparation by the governments of Germany, Hungary, Bulgaria or Turkey, and in particular all claims which may arise now or hereafter in the fulfillment of undertakings made after July 28, 1914, until the coming into force of the present treaty.

The value of such claims shall be assessed by the reparation commission and shall be transferred to the reparation commission for the credit of Austria on account of the sums due for reparation.

Article 214.

Any monetary obligation arising out of the present treaty and expressed in terms of gold kronen shall, unless some other arrangement is specifically provided for in any particular case under the terms of this treaty or conventions supplementary thereto, be payable at the option of the creditors in pounds sterling payable in London, gold dollars of the United States of America payable in New York, gold francs payable in Paris, or gold lire payable in Rome.

For the purposes of this article, the gold coins mentioned above shall be defined as being of the weight and fineness of gold as enacted by law on Jan. 1, 1914.

Article 215.

Any financial adjustments, such as those relating to any banking and insurance companies, savings banks, postal savings banks, land banks, mortgage companies or other similar institutions, operating within the territory of the former Austro-Hungarian monarchy, necessitated by the partition of that monarchy and the resettlement of public debts and currency provided for by these articles, shall be regulated by agreement between the various governments concerned in such a manner as shall best secure equitable treatment

to all the parties interested. In case the governments concerned are unable to come to an agreement on any question arising out of this financial adjustment, or in case any government is of opinion that its nationals have not received equitable treatment, the reparation commission shall, on the application of any one of the governments concerned, appoint an arbitrator or arbitrators, whose decision shall be final.

Article 216.

The government of Austria shall be under no liability in respect of civil or military pensions granted to nationals of the former Austrian empire who have been recognized as nationals of other states or who become so under the provisions of the present treaty.

PART X.—ECONOMIC CLAUSES.

Section I.—Commercial Relations.

Chapter I.—Customs Regulations, Duties and Restrictions.

Article 217.

Austria undertakes that goods the produce or manufacture of any one of the allied or associated states imported into Austrian territory, from whatsoever place arriving, shall not be subjected to other or higher duties or charges (including internal charges) than those to which the like goods the produce or manufacture of any other such state or of any other foreign country are subject.

Austria will not maintain or impose any prohibition or restriction on the importation into Austrian territory of any goods the produce or manufacture of the territories of any one of the allied or associated states, from whatsoever place arriving, which shall not equally extend to the importation of the like goods the produce or manufacture of any other such state or of any foreign country.

Article 218.

Austria further undertakes that, in the matter of the regime applicable on importation, no discrimination against the commerce of any of the allied and associated states as compared with any other of the said states or any other foreign country shall be made, even by indirect means, such as customs regulations or procedure, methods of verification or analysis, conditions of payment of duties, tariff classification or interpretation, or the operation of monopolies.

Article 219.

In all that concerns exportation Austria undertakes that goods, natural products or manufactured articles, exported from Austrian territory to the territories of any one of the allied or associated states shall not be subjected to other or higher duties or charges (including internal charges) than those paid on the like goods exported to any other such state or to any other foreign country.

Austria will not maintain or impose any prohibition or restriction on the exportation of any goods sent from her territory to any one of the allied or associated states which shall not equally extend to the exportation of the like goods, natural products or manufactured articles, sent to any other such state or to any other foreign country.

Article 220.

Every favor, immunity or privilege in regard to the importation, exportation or transit of goods granted by Austria to any allied or associated states or to any other foreign country whatever shall simultaneously and unconditionally, without request and without compensation, be extended to all the allied and associated states.

Article 221.

By way of exception to the provisions of article 286 of part XII. (Ports, Waterways and Railways), products in transit by the ports which before the war were situated in territory of the former Austro-Hungarian monarchy shall, for a period of three years from the coming into force of the present treaty, enjoy on importation into Austria reductions of duty corresponding with and in proportion to those applied to such products under the Austro-Hungarian customs tariff of Feb. 13, 1906, when imported by such ports.

Article 222.

Notwithstanding the provisions of articles 217 to 220, the allied and associated powers agree that they will not invoke these provisions to secure the advantage of any arrangements which may be made by the Austrian government with the governments of Hungary or of the Czecho-Slovak state for the accord of a special customs regime to certain natural or manufactured products which both originate in and come from those countries and which shall be specified in the arrangements, provided that the duration of these arrangements does not exceed a period of five years from the coming into force of the present treaty.

Article 223.

During the first six months after the coming into force of the present treaty the duties imposed by Austria on imports from allied and associated states shall not be higher than the most favorable duties which were applied to imports into the former Austro-Hungarian monarchy on July 28, 1914.

During a further period of thirty months after the expiration of the first six months this provision shall continue to be applied exclusively with regard to the importation of fruits (fresh and dried), fresh vegetables, olive oil, eggs, pigs and pork products, and live poultry, in so far as such products enjoyed at the above mentioned date (July 28, 1914), rates conventionalized by treaties with the allied or associated powers.

Article 224.

(1.) The Czecho-Slovak state and Poland undertake that for a period of fifteen years from the coming into force of the present treaty they will not impose on the exportation to Austria of the products of coal mines in their territories any export duties or other charges or restrictions on exportation different from or more onerous than those imposed on such exportation to any other country.

(2) Special agreements shall be made between Poland and the Czecho-Slovak state and Austria as to the supply of coal and of raw materials reciprocally.

(3) Pending the conclusion of such agreements, but in no case during more than three years from the coming into force of the present treaty, the Czecho-Slovak state and Poland undertake that no export duty or other restrictions of any kind shall be imposed on the export to Austria of coal or lignite up to a reasonable quantity to be fixed, failing agreement between the states concerned, by the reparation commission. In fixing this quantity the reparation commission shall take into account all the circumstances, including the quantities both of coal and of lignite supplied before the war to present Austrian territory from upper Silesia and from the territory of the former Austrian empire transferred to the Czecho-Slovak state and Poland in accordance with the present treaty, and the quantities now available for export from those countries. Austria shall in return furnish to the Czecho-Slovak state and Poland supplies of the raw materials referred to in paragraph (2) in accordance with the decisions of the reparation commission.

(4) The Czecho-Slovak state and Poland further undertake during the same period to take such steps as may be necessary to insure that any such products shall be available for sale to purchasers in Austria on terms as favorable as are applicable to like products sold under similar conditions to purchasers in the Czecho-Slovak state or Poland respectively or in any other country.

(5) In case of disagreement in the execution or interpretation of any of the above provisions the reparation commission shall decide.

Chapter II.—Shipping.

Article 225.

The high contracting parties agree to recognize the flag flown by the vessels of any contracting party having no seacoast, which are registered at some one specified place situated in its territory; such place shall serve as the port of registry of such vessels.

Chapter III.—Unfair Competition.

Article 226.

Austria undertakes to adopt all the necessary legislative and administrative measures to protect goods the produce or manufacture of any one of the allied and associated powers from all forms of unfair competition in commercial transactions.

Austria undertakes to prohibit and repress by seizure and by other appropriate remedies the importation, exportation, manufacture, distribution, sale or offering for sale in her territory of all goods bearing upon themselves or their usual get-up or wrappings any marks, names, devices or descriptions whatsoever which are calculated to convey directly or indirectly a false indication of the origin, type, nature or special characteristics of such goods.

Article 227.

Austria undertakes, on condition that reciprocity is accorded in these matters, to respect any law, or any administrative or judicial decision given in conformity with such law, in force in any allied or associated state and duly communicated to her by the proper authorities, defining or regulating the right to any regional appellation in respect of wine or spirits produced in the state to which the region belongs or the conditions under which the use of any such appellation may be permitted; and the importation, exportation, manufacture, distribution, sale or offering for sale of products or articles bearing regional appellations inconsistent with such law or order shall be prohibited by the Austrian government and repressed by the measures prescribed in the preceding article.

Chapter IX.—Treatment of Nationals of Allied and Associated Powers.

Article 228.

Austria undertakes:

(a) not to subject the nationals of the allied and associated powers to any prohibition in regard to the exercise of occupations, professions, trade and industry, which shall not be equally applicable to all aliens without exception;

(b) not to subject the nationals of the allied and associated powers in regard to the rights referred to in paragraph (a) to any regulation or restriction which might contravene directly or indirectly the stipulations of the said paragraph, or which shall be other or more disadvantageous than those which are applicable to nationals of the most favored nation;

(c) not to subject the nationals of the allied and associated powers, their property, rights or interests, including companies and associations in which they are interested, to any charge, tax or impost, direct or indirect, other or higher than those which are or may be imposed on her own nationals or their property, rights or interests;

(d) not to subject the nationals of any one of the allied and associated powers to any restriction which was not applicable on July 1, 1914, to the nationals of such powers unless such restriction is likewise imposed on her own nationals.

Article 229.

The nationals of the allied and associated powers shall enjoy in Austrian territory a constant protection for their persons and for their property, rights and interests and shall have free access to the courts of law.

Article 230.

Austria undertakes to recognize any new nationality which has been or may be acquired by her nationals under the laws of the allied and associated powers, and in accordance with the decisions of the competent authorities of these powers pursuant to naturalization laws or under treaty stipulations, and to regard such persons as having, in consequence of the acquisition of such new nationality, in all respects severed their allegiance to their country of origin.

Article 231.

The allied and associated powers may appoint consuls-general, consuls, vice-consuls and consular agents in Austrian towns and ports. Austria undertakes to approve the designation of the consuls-general, consuls, vice-consuls and consular agents, whose names shall be notified to her, and to admit them to the exercise of their functions in conformity with the usual rules and customs.

Chapter V.—General Articles.

Article 232.

The obligations imposed on Austria by chapter I. above shall cease to have effect five years from the date of the coming into force of the present treaty, unless otherwise provided in the text, or unless the council of the league of nations shall, at least twelve months before the expiration of that period, decide that these obligations shall be maintained for a further period with or without amendment.

Nevertheless, it is agreed that unless the league of nations decides otherwise an allied or associated power shall not after the expiration of three years from the coming into force of the present treaty be entitled to require the fulfillment by Austria of the provisions of articles 217, 218, 219 or 220 unless that power accords correlative treatment to Austria.

Article 228 of chapter IV. shall remain in operation, with or without amendment, after the period of five years for such further period, if any, not exceeding five years, as may be determined by a majority of the council of the league of nations.

Article 233.

If the Austrian government engages in international trade, it shall not in respect thereof have or be deemed to have any rights, privileges or immunities of sovereignty.

Section II.—Treaties.

Article 234.

From the coming into force of the present treaty and subject to the provisions thereof the multilateral treaties, conventions and agreements of an economic or technical character concluded by the former Austro-Hungarian monarchy and enumerated below and in the subsequent articles shall alone be applied as between Austria and those of the allied and associated powers party thereto:

(1) Conventions of March 14, 1884; Dec. 1, 1886, and March 23, 1887, and final protocol of July 7, 1887, regarding the protection of submarine cables.

(2) Convention of Oct. 11, 1909, regarding the international circulation of motor cars.

(3) Agreement of May 15, 1886, regarding the sealing of railway trucks subject to customs inspection, and protocol of May 18, 1907.

(4) Agreement of May 15, 1886, regarding the technical standardization of railways.

(5) Convention of July 5, 1890, regarding the publication of customs tariffs and the organization of an international union for the publication of customs tariffs.

(6) Convention of April 25, 1907, regarding the raising of the Turkish customs tariff.

(7) Convention of March 14, 1857, for the redemption of toll dues on the sound and belts.

(8) Convention of June 22, 1861, for the redemption of the state toll on the Elbe.

(9) Convention of July 16, 1863, for the redemption of the toll dues on the Scheldt.
(10) Convention of Oct. 29, 1888, regarding the establishment of a definite arrangement guaranteeing the free use of the Suez canal.
(11) Conventions of Sept. 23, 1910, respecting the unification of certain regulations regarding collisions and salvage at sea.
(12) Convention of Dec. 21, 1904, regarding the exemption of hospital ships from dues and charges in ports.
(13) Convention of Sept. 26, 1906, for the suppression of night work for women.
(14) Conventions of May 18, 1904, and May 4, 1910, regarding the suppression of the white slave traffic.
(15) Convention of May 4, 1910, regarding the suppression of obscene publications.
(16) Sanitary convention of Dec. 3, 1903, and the preceding conventions signed on Jan. 30, 1892, April 15, 1893, April 3, 1894, and March 19, 1897.
(17) Convention of May 20, 1875, regarding the unification and improvement of the metric system.
(18) Convention of Nov. 29, 1906, regarding the unification of pharmacopœial formulæ for potent drugs.
(19) Convention of Nov. 16 and 19, 1885, regarding the establishment of a concert pitch.
(20) Convention of June 7, 1905, regarding the creation of an international agricultural institute at Rome.
(21) Conventions of Nov. 3, 1881, and April 15, 1889, regarding precautionary measures against phylloxera.
(22) Convention of March 19, 1902, regarding the protection of birds useful to agriculture.
(23) Convention of June 12, 1902, regarding the guardianship of minors.

Article 235.

From the coming into force of the present treaty the high contracting parties shall apply the conventions and agreements hereinafter mentioned, in so far as concerns them, Austria undertaking to comply with the special stipulations contained in this article.
Postal conventions:
Conventions and agreements of the universal postal union concluded at Vienna July 4, 1891.
Conventions and agreements of the postal union signed at Washington June 15, 1897.
Conventions and agreements of the postal union signed at Rome, May 26, 1906.
Telegraphic conventions:
International telegraphic conventions signed at St. Petersburg, July 10-22, 1875.
Regulations and tariffs drawn up by the international telegraphic conference, Lisbon, June 11, 1908.
Austria undertakes not to refuse her assent to the conclusion by the new states of the special arrangements referred to in the conventions and agreements relating to the universal postal union and to the international telegraphic union, to which the said new states have adhered or may adhere.

Article 236.

From the coming into force of the present treaty the high contracting parties shall apply, in so far as concerns them, the international radio-telegraphic convention of July 5, 1912, Austria undertaking to comply with the provisional regulations which will be indicated to her by the allied and associated powers.
If within five years after the coming into force of the present treaty a new convention regulating international radio-telegraphic communications should have been concluded to take the place of the convention of July 5, 1912, this new convention shall bind Austria, even if Austria should refuse either to take part in drawing up the convention or to subscribe thereto.
This new convention will likewise replace the provisional regulations in force.

Article 237.

The international convention of Paris of March 20, 1883, for the protection of industrial property, revised at Washington on June 2, 1911, and the agreement of April 14, 1891, concerning the international registration of trade-marks shall be applied as from the coming into force of the present treaty, in so far as they are not affected or modified by the exceptions and restrictions resulting therefrom.

Article 238.

From the coming into force of the present treaty the high contracting parties shall apply, in so far as concerns them, the convention of The Hague of July 17, 1905, relating to civil procedure. This provision, however, will not apply to France, Portugal and Roumania.

Article 239.

Austria undertakes, within twelve months of the coming into force of the present treaty, to adhere in the prescribed form to the international convention of Bern of Sept. 9, 1886, for the protection of literary and artistic works, revised at Berlin in 1908, and the act and protocol of March 20, 1914, relating to the protection of literary and artistic works.
Until her adherence, Austria undertakes to recognize and protect by effective measures and in accordance with the principles of the said convention the literary and artistic works of nationals of the allied and associated powers.
In addition and irrespective of the above mentioned adherence, Austria undertakes to continue to assure such recognition and such protection to all literary and artistic works of the nationals of each of the allied and associated powers to an extent at least as great as upon July 28, 1914, and upon the same conditions.

Article 240.

Austria undertakes to adhere to the following conventions:
(1) Convention of Sept. 26, 1906, for the suppression of the use of white phosphorus in the manufacture of matches.
(2) Convention of Dec. 31, 1913, regarding the unification of commercial statistics.

Article 241.

Each of the allied or associated powers, being guided by the general principles or special provisions of the present treaty, shall notify to Austria the bilateral agreements of all kinds which were in force between her and the former Austro-Hungarian monarchy, and which she wishes should be in force as between her and Austria.
The notification referred to in the present article shall be made either directly or through the intermediary of another power. Receipt thereof shall be acknowledged in writing by Austria. The date of the coming into force shall be that of the notification.
The allied and associated powers undertake among themselves not to apply as between themselves and Austria any agreements which are not in accordance with the terms of the present treaty.
The notification shall mention any provisions of the said agreements which, not being in accordance with the terms of the present treaty, shall not be considered as coming into force.
In case of any difference of opinion, the league of nations will be called on to decide.
A period of six months from the coming into force of the present treaty is allowed to the allied and associated powers within which to make the notification.
Only those bilateral agreements which have been the subject of such a notification shall be put in force between the allied and associated powers and Austria.
The above rules apply to all bilateral agreements existing between any allied and associated powers signatories to the present treaty and Austria, even if the said allied and asso-

ciated powers have not been in a state of war with Austria.

Article 242.

Austria hereby recognizes that all treaties, conventions or agreements concluded by her or by the former Austro-Hungarian monarchy with Germany, Hungary, Bulgaria or Turkey since Aug. 1, 1914, until the coming into force of the present treaty are of no effect.

Article 243.

Austria undertakes to secure to the allied and associated powers and to the officials and nationals of the said powers, the enjoyment of all the rights and advantages of any kind which she or the former Austro-Hungarian monarchy may have granted to Germany, Hungary, Bulgaria or Turkey or to the officials and nationals of these states by treaties, conventions or arrangements concluded before Aug. 1, 1914, so long as those treaties, conventions or arrangements are in force.

The allied and associated powers reserve the right to accept or not the enjoyment of these rights and advantages.

Article 244.

Austria recognizes that all treaties, conventions or arrangements which she or the former Austro-Hungarian monarchy concluded with Russia or with any state or government of which the territory previously formed a part of Russia or with Roumania before July 28, 1914, or after that date until the coming into force of the present treaty are of no effect.

Article 245.

Should an allied or associated power, Russia, or a state or government of which the territory formerly constituted a part of Russia, have been forced since July 28, 1914, by reason of military occupation or by any other means or for any other cause, to grant or to allow to be granted by the act of any public authority, concessions, privileges and favors of any kind to the former Austro-Hungarian monarchy, or to Austria or to an Austrian national, such concessions, privileges and favors are ipso facto annulled by the present treaty.

No claims or indemnities which may result from this annulment shall be charged against the allied or associated powers or the powers, states, governments or public authorities which are released from their engagements by the present article.

Article 246.

From the coming into force of the present treaty Austria undertakes, so far as she is concerned, to give the allied and associated powers and their nationals the benefit ipso facto of the rights and advantages of any kind which she or the former Austro-Hungarian monarchy has granted, by treaties, conventions, or arrangements to nonbelligerent states or their nationals since July 28, 1914, until the coming into force of the present treaty, so long as those treaties, conventions or arrangements are in force for Austria.

Article 247.

Those of the high contracting parties who have not yet signed, or who have signed but not yet ratified, the opium convention signed at The Hague on Jan. 23, 1912, agree to bring the said convention into force, and for this purpose to enact the necessary legislation without delay and in any case within a period of twelve months from the coming into force of the present treaty.

Furthermore, they agree that ratification of the present treaty should in the case of powers which have not yet ratified the opium convention be deemed in all respects equivalent to the ratification of that convention and to the signature of the special protocol which was opened at The Hague in accordance with the resolutions adopted by the third opium conference in 1914 for bringing the said convention into force.

For this purpose the government of the French republic will communicate to the government of the Netherlands a certified copy of the protocol of the deposit of ratifications of the present treaty, and will invite the government of the Netherlands to accept and deposit the said certified copy as if it were a deposit of ratifications of the opium convention and a signature of the additional protocol of 1914.

Section III.—Debts.

Article 248.

There shall be settled through the intervention of clearing offices to be established by each of the high contracting parties within three months of the notification referred to in paragraph (e) hereafter the following classes of pecuniary obligations:

(1) Debts payable before the war and due by a national of one of the contracting powers, residing within its territory, to a national of an opposing power, residing within its territory:

(2) Debts which became payable during the war to nationals of one contracting power residing within its territory and arose out of transactions or contracts with the nationals of an opposing power, resident within its territory, of which the total or partial execution was suspended on account of the existence of a state of war:

(3) Interest which has accrued due before and during the war to a national of one of the contracting powers in respect of securities issued or taken over by an opposing power, provided that the payment of interest on such securities to the nationals of that power or to neutrals has not been suspended during the war:

(4) Capital sums which have become payable before and during the war to nationals of one of the contracting powers in respect of securities issued by one of the opposing powers, provided that the payment of such capital sums to nationals of that power or to neutrals has not been suspended during the war.

In the case of interest or capital sums payable in respect of securities issued or taken over by the former Austro-Hungarian government the amount to be credited and paid by Austria will be the interest or capital in respect only of the debt for which Austria is liable in accordance with the financial clauses of the present treaty, and the principles laid down by the reparation commission.

The proceeds of liquidation of enemy property, rights and interests mentioned in section IV. and in the annex thereto will be accounted for through the clearing offices, in the currency and at the rate of exchange hereinafter provided in paragraph (d), and disposed of by them under the conditions provided by the said section and annex.

The settlements provided for in this article shall be effected according to the following principles and in accordance with the annex to this section:

(a) Each of the high contracting parties shall prohibit, as from the coming into force of the present treaty, both the payment and the acceptance of payment of such debts, and also all communications between the interested parties with regard to the settlement of the said debts otherwise than through the clearing offices.

(b) Each of the high contracting parties shall be respectively responsible for the payment of such debts due by its nationals, except in the cases where before the war the debtor was in a state of bankruptcy or failure, or had given formal indication of insolvency, or where the debt was due by a company whose business has been liquidated under emergency legislation during the war.

(c) The sums due to the nationals of one of the high contracting parties by the nationals of an opposing state will be debited to the clearing office of the country of the debtor, and paid to the creditor by the clearing office of the country of the creditor.

(d) Debts shall be paid or credited in the currency of such one of the allied and associated powers, their colonies or protectorates, or the British dominions or India, as may be concerned. If the debts are payable in some other currency they shall be paid or credited in the currency of the country concerned, whether an allied or associated power, colony, protectorate, British dominion or India, at the prewar rate of exchange.

For the purpose of this provision the prewar rate of exchange shall be defined as the average cable transfer rate prevailing in the allied or associated country concerned during the month immediately preceding the outbreak of war between the said country concerned and Austria-Hungary.

If a contract provides for a fixed rate of exchange governing the conversion of the currency in which the debt is stated into the currency of the allied or associated country concerned, then the above provisions concerning the rate of exchange shall not apply.

In the case of the new states of Poland and the Czecho-Slovak state the currency in which and the rate of exchange at which debts shall be paid or credited shall be determined by the reparation commission provided for in part VIII., unless they shall have been previously settled by agreement between the states interested.

(e) The provisions of this article and of the annex hereto shall not apply as between Austria on the one hand and any one of the allied and associated powers, their colonies or protectorates, or any one of the British dominions or India, on the other hand, unless within a period of one month from the deposit of the ratification of the present treaty by the power in question, or of the ratification on behalf of such dominion or of India, notice to that effect is given to Austria by the government of such allied or associated power or of such dominion or of India as the case may be.

(f) The allied and associated powers which have adopted this article and the annex hereto may agree between themselves to apply them to their respective nationals established in their territory so far as regards matters between their nationals and Austrian nationals. In this case the payments made by application of this provision will be subject to arrangements between the allied and associated clearing offices concerned.

Annex.

1. Each of the high contracting parties will, within three months from the notification provided for in article 248, paragraph (e), establish a clearing office for the collection and payment of enemy debts.

Local clearing offices may be established for any particular portion of the territories of the high contracting parties. Such local clearing offices may perform all the functions of a central clearing office in their respective districts, except that all transactions with the clearing office in the opposing state must be effected through the central clearing office.

2. In this annex the pecuniary obligations referred to in the first paragraph of article 248 are described as "enemy debts," the persons from whom the same are due as "enemy debtors," the persons to whom they are due as "enemy creditors," the clearing office in the country of the creditor is called the "creditor clearing office," and the clearing office in the country of the debtor is called the "debtor clearing office."

3. The high contracting parties will subject contraventions of paragraph (a) of article 248 to the same penalties as are at present provided by their legislation for trading with the enemy. They will similarly prohibit within their territory all legal process relating to payment of enemy debts, except in accordance with the provisions of this annex.

4. The government guaranty specified in paragraph (b) of article 248 shall take effect whenever, for any reason, a debt shall not be recoverable, except in a case where at the date of the outbreak of war the debt was barred by the laws of prescription in force in the country of the debtor, or where the debtor was at that time in a state of bankrupcy or failure or had given formal indication of insolvency, or where the debt was due by a company whose business has been liquidated under emergency legislation during the war. In such case the procedure specified by this annex shall apply to payment of the dividends.

The terms "bankruptcy" and "failure" refer to the application of legislation providing for such juridical conditions. The expression "formal indication of insolvency" bears the same meaning as it has in English law.

5. Creditors shall give notice to the creditor clearing office within six months of its establishment of debts due to them, and shall furnish the clearing office with any documents and information required of them.

The high contracting parties will take all suitable measures to trace and punish collusion between enemy creditors and debtors. The clearing offices will communicate to one another any evidence and information which might help the discovery and punishment of such collusion.

The high contracting parties will facilitate as much as possible postal and telegraphic communication at the expense of the parties concerned and through the intervention of the clearing offices between debtors and creditors desirous of coming to an agreement as to the amount of their debt.

The creditor clearing office will notify the debtor clearing office of all debts declared to it. The debtor clearing office will, in due course, inform the creditor clearing office which debts are admitted and which debts are contested. In the latter case the debtor clearing office will give the grounds for the non-admission of debt.

6. When a debt has been admitted, in whole or in part, the debtor clearing office will at once credit the creditor clearing office with the amount admitted, and at the same time notify it of such credit.

7. The debt shall be deemed to be admitted in full and shall be credited forthwith to the creditor clearing office unless within three months from the receipt of the notification or such longer time as may be agreed to by the creditor clearing office notice has been given by the debtor clearing office that it is not admitted.

8. When the whole or part of a debt is not admitted the two clearing offices will examine into the matter jointly and will endeavor to bring the parties to an agreement.

9. The creditor clearing office will pay to the individual creditor the sums credited to it out of the funds placed at its disposal by the government of its country and in accordance with the conditions fixed by the said government, retaining any sums considered necessary to cover risks, expenses or commissions.

10. Any person having claimed payment of an enemy debt which is not admitted in whole or in part shall pay to the clearing office, by way of fine, interest at 5 per cent on the part not admitted. Any person having unduly refused to admit the whole or part of a debt claimed from him shall pay, by way of fine, interest at 5 per cent on the amount with regard to which his refusal shall be disallowed.

Such interest shall run from the date of expiration of the period provided for in paragraph 7 until the date on which the claim shall have been disallowed or the debt paid.

Each clearing office shall in so far as it is concerned take steps to collect the fines above provided for, and will be responsible if such fines cannot be collected.

The fines will be credited to the other clearing office, which shall retain them as a contribution toward the cost of carrying out the present provisions.

11. The balance between the clearing offices

shall be struck monthly and the credit balance paid in cash by the debtor state within a week.

Nevertheless, any credit balances which may be due by one or more of the allied and associated powers shall be retained until complete payment shall have been effected of the sums due to the allied or associated powers or their nationals on account of the war.

12. To facilitate discussion between the clearing offices each of them shall have a representative at the place where the other is established.

13. Except for special reasons all discussions in regard to claims will, so far as possible, take place at the debtor clearing office.

14. In conformity with article 248, paragraph (b), the high contracting parties are responsible for the payment of the enemy debts owing by their nationals.

The debtor clearing office will therefore credit the creditor clearing office with all debts admitted, even in case of inability to collect them from the individual debtor. The governments concerned will, nevertheless, invest their respective clearing offices with all necessary powers for the recovery of debts which have been admitted.

15. Each government will defray the expenses of the clearing office set up in its territory, including the salaries of the staff.

16. Where the two clearing offices are unable to agree whether a debt claimed is due, or in case of a difference between an enemy debtor and an enemy creditor or between the clearing offices, the dispute shall either be referred to arbitration if the parties so agree under conditions fixed by agreement between them, or referred to the mixed arbitral tribunal provided for in section VI. hereafter.

At the request of the creditor clearing office the dispute may, however, be submitted to the jurisdiction of the courts of the place of domicile of the debtor.

17. Recovery of sums found by the mixed arbitral tribunal, the court or the arbitration tribunal to be due shall be effected through the clearing offices as if these sums were debts admitted by the debtor clearing office.

18. Each of the governments concerned shall appoint an agent who will be responsible for the preservation of the mixed arbitral tribunal of the cases conducted on behalf of its clearing office. This agent will exercise a general control over the representatives or counsel employed by its nationals.

Decisions will be arrived at on documentary evidence, but it will be open to the tribunal to hear the parties in person, or according to their preference by their representatives approved by the two governments, or by the agent referred to above, who shall be competent to intervene along with the party or to reopen and maintain a claim abandoned by the same.

19. The clearing offices concerned will lay before the mixed arbitral tribunal all the information and documents in their possession, so as to enable the tribunal to decide rapidly on the cases which are brought before it.

20. Where one of the parties concerned appeals against the joint decision of the two clearing offices he shall make a deposit against the costs, which deposit shall only be refunded when the first judgment is modified in favor of the appellant and in proportion to the success he may attain, his opponent in case of such a refund being required to pay an equivalent proportion of the costs and expenses. Security accepted by the tribunal may be substituted for a deposit.

A fee of 5 per cent of the amount in dispute shall be charged in respect of all cases brought before the tribunal. This fee shall, unless the tribunal directs otherwise, be borne by the unsuccessful party. Such fee shall be added to the deposit referred to. It is also independent of the security.

The tribunal may award to one of the parties a sum in respect of the expenses of the proceedings.

Any sum payable under this paragraph shall be credited to the clearing office of the successful party as a separate item.

21. With a view to the rapid settlement of claims, due regard shall be paid in the appointment of all persons connected with the clearing offices or with the mixed arbitral tribunal to their knowledge of the language of the other country concerned. Each of the clearing offices will be at liberty to correspond with the other and to forward documents in its own language.

22. Subject to any special agreement to the contrary between the governments concerned, debts shall carry interest in accordance with the following provisions:

Interest shall not be payable on sums of money due by way of dividend, interest or other periodical payments which themselves represent interest on capital.

The rate of interest shall be 5 per cent per annum, except in cases where, by contract, law or custom the creditor is entitled to payment of interest at a different rate. In such cases the rate to which he is entitled shall prevail.

Interest shall run from the date of commencement of hostilities (or, if the sum of money to be recovered fell due during the war, from the date at which it fell due) until the sum is credited to the clearing office of the creditor.

Sums due by way of interest shall be treated as debts admitted by the clearing office and shall be credited to the creditor clearing office in the same way as such debts.

23. Where by decision of the clearing offices or the mixed arbitral tribunal a claim is held not to fall within article 248, the creditor shall be at liberty to prosecute the claim before the courts or to take such other proceedings as may be open to him.

The presentation of a claim to the clearing office suspends the operation of any period of prescription.

24. The high contracting parties agree to regard the decisions of the mixed arbitral tribunal as final and conclusive, and to render them binding upon their nationals.

25. In any case where a creditor clearing office declines to notify a claim to the debtor clearing office, or to take any step provided for in this annex intended to make effective in whole or in part a request of which it has received due notice, the enemy creditor shall be entitled to receive from the clearing office a certificate setting out the amount of the claim, and shall then be entitled to prosecute the claim before the courts or to take such other proceedings as may be open to him.

Section IV.—Property, Rights and Interests.

Article 249.

The question of private property, rights and interests in an enemy country shall be settled according to the principles laid down in this section and to the provisions of the annex hereto:

(a) The exceptional war measures and measures of transfer (defined in paragraph 3 of the annex hereto) taken in the territory of the former Austrian empire with respect to the property, rights and interests of nationals of allied or associated powers, including companies and associations in which they are interested, when liquidation has not been completed, shall be immediately discontinued or stayed and the property, rights and interests concerned restored to their owners.

(b) Subject to any contrary stipulations which may be provided for in the present treaty, the allied and associated powers reserve the right to retain and liquidate all property, rights and interests which belong, at the date of the coming into force of the present treaty to nationals of the former Austrian empire or companies controlled by them, and are within the territories, colonies, possessions and protectorates of such powers (including territories ceded to them by the pres-

ent treaty) or are under the control of those powers.

The liquidation shall be carried out in accordance with the laws of the allied or associated state concerned and the owner shall not be able to dispose of such property, rights or interests nor to subject them to any charge without the consent of that state.

Persons who within six months of the coming into force of the present treaty show that they have acquired ipso facto in accordance with its provisions the nationality of an allied or associated power, including those who under article 72 or 76 obtain such nationality with the consent of the competent authorities, or who under articles 74 or 77 acquire such nationality in virtue of previous rights of citizenship (pertinenza) will not be considered as nationals of the former Austrian empire within the meaning of this paragraph.

(c) The price or the amount of compensation in respect of the exercise of the right referred to in paragraph (b) will be fixed in accordance with the methods of sale or valuation adopted by the laws of the country in which the property has been retained or liquidated.

(d) As between the allied and associated powers and their nationals on the one hand and nationals of the former Austrian empire on the other hand, as also between Austria on the one hand and the allied and associated powers and their nationals on the other hand, all the exceptional war measures, or measures of transfer, or acts done or to be done in execution of such measures, as defined in paragraphs 1 and 3 of the annex hereto shall be considered as final and binding upon all persons except as regards the reservations laid down in the present treaty.

(e) The nationals of allied and associated powers shall be entitled to compensation in respect of damage or injury inflicted upon their property, rights or interests, including any company or association in which they are interested, in the territory of the former Austrian empire, by the application either of the exceptional war measures or measures of transfer mentioned in paragraphs 1 and 3 of the annex hereto. The claims made in this respect by such nationals shall be investigated, and the total of the compensation shall be determined by the mixed arbitral tribunal provided for in section VI. or by an arbitrator appointed by that tribunal. This compensation shall be borne by Austria, and may be charged upon the property of nationals of the former Austrian empire, or companies controlled by them, as defined in paragraph (b), within the territory or under the control of the claimant's state. This property may be constituted as a pledge for enemy liabilities under the conditions fixed by paragraph 4 of the annex hereto. The payment of this compensation may be made by the allied or associated state and the amount will be debited to Austria.

(f) Whenever a national of an allied or associated power is entitled to property which has been subjected to a measure of transfer in the territory of the former Austrian empire and expresses a desire for its restitution, his claim for compensation in accordance with paragraph (e) shall be satisfied by the restitution of the said property if it still exists in specie.

In such case Austria shall take all necessary steps to restore the evicted owner to the possession of his property, free from all encumbrances or burdens with which it may have been charged after the liquidation, and to indemnify all third parties injured by the restitution.

If the restitution provided for in this paragraph cannot be effected, private agreements arranged by the intermediation of the powers concerned or the clearing offices provided for in the annex to section III. may be made, in order to secure that the national of the allied or associated power may secure compensation for the injury referred to in paragraph (e) by the grant of advantages or equivalents which he agrees to accept in place of the property, rights or interests of which he was deprived.

Through restitution in accordance with this article the price or the amount of compensation fixed by the application of paragraph (e) will be reduced by the actual value of the property restored, account being taken of compensation in respect of loss of use or deterioration.

(g) The rights conferred by paragraph (f) are reserved to owners who are nationals of allied or associated powers within whose territory legislative measures prescribing the general liquidation of enemy property, rights or interests were not applied before the signature of the armistice.

(h) Except in cases where, by application of paragraph (f), restitutions in specie have been made, the net proceeds of sales of enemy property, rights or interests wherever situated carried out either by virtue of war legislation, or by application of this article, and in general all cash assets of enemies, other than proceeds of sales of property or cash assets in allied or associated countries belonging to persons covered by the last sentence of paragraph (b) above, shall be dealt with as follows:

(1) As regards powers adopting section III. and the annex thereto, the said proceeds and cash assets shall be credited to the power of which the owner is a national, through the clearing office established thereunder; any credit balance in favor of Austria resulting therefrom shall be dealt with as provided in article 189 of part VIII. (Reparation) of the present treaty.

(2) As regards powers not adopting section III. and the annex thereto, the proceeds of the property, rights and interests, and the cash assets, of the nationals of allied or associated powers held by Austria shall be paid immediately to the person entitled thereto or to his government; the proceeds of the property, rights and interests, and the cash assets, of nationals of the former Austrian empire, or companies controlled by them, as defined in paragraph (b), received by an allied or associated power shall be subject to disposal by such power in accordance with its laws and regulations and may be applied in payment of the claims and debts defined by this article or paragraph 4 of the annex hereto. Any such property, rights and interests or proceeds thereof or cash assets not used as above provided may be retained by the said allied or associated power, and if retained the cash value thereof shall be dealt with as provided in article 189 of part VIII. (Reparation) of the present treaty.

(i) Subject to the provisions of article 267, in the case of liquidations effected in new states, which are signatories of the present treaty as allied and associated powers, or in states which are not entitled to share in the reparation payments to be made by Austria, the proceeds of liquidations effected by such state shall, subject to the rights of the reparation commission under the present treaty, particularly under articles 181 (part VIII.) and 211 (part IX.), be paid direct to the owner. If, on the application of that owner, the mixed arbitral tribunal provided for by section VI. of this part, or an arbitrator appointed by that tribunal, is satisfied that the conditions of the sale or measures taken by the government of the state in question outside its general legislation were unfairly prejudicial to the price obtained, they shall have discretion to award to the owner equitable compensation to be paid by that state.

(j) Austria undertakes to compensate her nationals in respect of the sale or retention of their property, rights or interests in allied or associated states.

(k) The amount of all taxes or imposts on capital levied or to be levied by Austria on the property, rights and interests of the na-

tionals of the allied or associated powers from Nov. 3, 1918, until three months from the coming into force of the present treaty, or, in the case of property, rights or interests which have been subjected to exceptional measures of war, until restitution in accordance with the present treaty, shall be restored to the owners.

Article 250.

Austria undertakes, with regard to the property, rights and interests, including companies and associations in which they were interested, restored to nationals of allied and associated powers in accordance with the provisions of article 249, paragraph (a) or (f):

(a) to restore and maintain, except as expressly provided in the present treaty, the property, rights and interests of the nationals of allied or associated powers in the legal position obtaining in respect of the property, rights and interests of nationals of the former Austrian empire under the laws in force before the war;

(b) not to subject the property, rights or interests of the nationals of the allied or associated powers to any measures in derogation of property rights which are not applied equally to the property, rights and interests of Austrian nationals, and to pay adequate compensation in the event of the application of these measures.

Annex.

1. In accordance with the provisions of article 249, paragraph (d), the validity of vesting orders and of orders for the winding up of businesses or companies, and of any other orders, directions, decisions or instructions of any court or any department of the government of any of the high contracting parties made or given, or purporting to be made or given, in pursuance of war legislation with regard to enemy property, rights and interests is confirmed. The interests of all persons shall be regarded as having been effectively dealt with by any order, direction, decision or instruction dealing with property in which they may be interested, whether or not such interests are specifically mentioned in the order, direction, decision or instruction. No question shall be raised as to the regularity of a transfer of any property, rights or interests dealt with in pursuance of any such order, direction, decision or instruction. Every action taken with regard to any property, business or company, whether as regards its investigation, sequestration, compulsory administration, use, requisition, supervision or winding up, the sale or management of property, rights or interests, the collection or discharge of debts, the payment of costs, charges or expenses, or any other matter whatsoever, in pursuance of orders, directions, decisions or instructions of any court or of any department of the government of any of the high contracting parties, made or given, or purporting to be made or given, in pursuance of war legislation with regard to enemy property, rights or interests, is confirmed. Provided that the provisions of this paragraph shall not be held to prejudice the titles to property heretofore acquired in good faith and for value and in accordance with the laws of the country in which the property is situated by nationals of the allied and associated powers.

The provisions of this paragraph do not apply to such of the above mentioned measures as have been taken by the former Austro-Hungarian government in invaded or occupied territory, nor to such of the above mentioned measures as have been taken by Austria or the Austrian authorities since Nov. 3, 1918, all of which measures shall be void.

2. No claim shall be made or brought against any allied or associated power or against any person acting on behalf of or under the direction of any legal authority or department of the government of such a power by Austria or by any Austrian national or by or on behalf of any national of the former Austrian empire wherever resident in respect of any act or omission with regard to his property, rights or interests during the war or in preparation for the war. Similarly no claim or action shall be made or brought against any person in respect of any act or omission under or in accordance with the exceptional war measures, laws or regulations of any allied or associated power.

3. In article 249 and this annex the expression "exceptional war measures" includes measures of all kinds, legislative, administrative, judicial or others, that have been taken or will be taken hereafter with regard to enemy property, and which have had or will have the effect of removing from the proprietors the power of disposition over their property, though without affecting the ownership, such as measures of supervision, of compulsory administration, and of sequestration; or measures which have had or will have as an object the seizure of, the use of or the interference with enemy assets, for whatsoever motive, under whatsoever form or in whatsoever place. Acts in the execution of these measures include all detentions, instructions, orders or decrees of government departments or courts applying these measures to enemy property, as well as acts performed by any person connected with the administration or the supervision of enemy property, such as the payment of debts, the collecting of credits, the payment of any costs, charges or expenses or the collecting of fees.

Measures of transfer are those which have affected or will affect the ownership of enemy property by transferring it in whole or in part to a person other than the enemy owner, and without his consent, such as measures directing the sale, liquidation or devolution of ownership in enemy property, or the canceling of titles or securities.

4. All property, rights and interests of nationals of the former Austrian empire within the territory of any allied or associated power and the net proceeds of their sale, liquidation or other dealing therewith may be charged by that allied or associated power in the first place with payment of amounts due in respect of claims by the nationals of that allied or associated power with regard to their property, rights and interests, including companies and associations in which they are interested in territory of the former Austrian empire, or debts owing to them by Austrian nationals, and with payment of claims growing out of acts committed by the former Austro-Hungarian government or by any Austrian authorities since July 28, 1914, and before that allied or associated power entered into the war. The amount of such claims may be assessed by an arbitrator appointed by M. Gustave Ador, if he is willing, or if no such appointment is made by him, by an arbitrator appointed by the mixed arbitral tribunal provided for in section VI. They may be charged in the second place with payment of the amounts due in respect of claims by the nationals of such allied or associated power with regard to their property, rights and interests in the territory of other enemy powers, in so far as those claims are otherwise unsatisfied.

5. Notwithstanding the provisions of article 249, where immediately before the outbreak of war a company incorporated in an allied or associated state had rights in common with a company controlled by it and incorporated in Austria to the use of trade-marks in third countries, or enjoyed the use in common with such company of unique means of reproduction of goods or articles for sale in third countries, the former company shall alone have the right to use these trade-marks in third countries to the exclusion of the Austrian company, and these unique means of reproduction shall be handed over to the former company, notwithstanding any action taken under war legislation in force in the Austro-Hungarian monarchy with regard to the latter company or its business, industrial property or shares. Nevertheless, the former company, if requested, shall deliver to the latter company derivative copies permitting

the continuation of reproduction of articles for use within Austrian territory.

6. Up to the time when restitution is carried out in accordance with article 249, Austria is responsible for the conservation of property, rights and interests of the nationals of allied or associated powers, including companies and associations in which they are interested, that have been subjected by her to exceptional war measures.

7. Within one year from the coming into force of the present treaty the allied or associated powers will specify the property, rights and interests over which they intend to exercise the right provided in article 249, paragraph (f).

8. The restitution provided in article 249 will be carried out by order of the Austrian government or of the authorities which have been substituted for it. Detailed accounts of the action of administrators shall be furnished to the interested persons by the Austrian authorities upon request, which may be made at any time after the coming into force of the present treaty.

9. Until completion of the liquidation provided for by article 249, paragraph (b), the property, rights and interests of the persons referred to in that paragraph will continue to be subject to exceptional war measures that have been or will be taken with regard to them.

10. Austria will, within six months from the coming into force of the present treaty, deliver to each allied or associated power all securities, certificates, deeds or other documents of title held by its nationals and relating to property, rights or interests situated in the territory of that allied or associated power, including any shares, stock, debentures, debenture stock or other obligations of any company incorporated in accordance with the laws of that power.

Austria will at any time on demand of any allied or associated power furnish such information as may be required with regard to the property, rights and interests of Austrian nationals within the territory of such allied or associated power, or with regard to any transactions concerning such property, rights or interests effected since July 1, 1914.

11. The expression "cash assets" includes all deposits or funds established before or after the existence of a state of war, as well as all assets coming from deposits, revenues or profits collected by administrators, sequestrators or others from funds placed on deposit or otherwise, but does not include sums belonging to the allied or associated powers or to their component states, provinces or municipalities.

12. All investments wheresoever effected with the cash assets of nationals of the high contracting parties, including companies and associations in which such nationals were interested, by persons responsible for the administration of enemy properties or having control over such administration, or by order of such persons or of any authority whatsoever, shall be annulled. These cash assets shall be accounted for irrespective of any such investment.

13. Within one month from the coming into force of the present treaty, or on demand at any time, Austria will deliver to the allied and associated powers all accounts, vouchers, records, documents and information of any kind which may be within Austrian territory and which concern the property, rights and interests of the nationals of those powers, including companies and associations in which they are interested, that have been subjected to an exceptional war measure, or to a measure of transfer either in the territory of the former Austrian empire or in territory occupied by that empire or its allies.

The controllers, supervisors, managers, administrators, sequestrators, liquidators and receivers shall be personally responsible under guaranty of the Austrian government for the immediate delivery in full of these accounts and documents, and for their accuracy.

14. The provisions of article 249 and this annex relating to property, rights and interests in an enemy country, and the proceeds of the liquidation thereof, apply to debts, credits and accounts, section III. regulating only the method of payment.

In the settlement of matters provided for in article 249 between Austria and the allied or associated powers, their colonies or protectorates, or any one of the British dominions or India, in respect of any of which a declaration shall not have been made that they adopt section III. and between their respective nationals the provision of section III. respecting the currency in which payment is to be made and the rate of exchange and of interest shall apply unless the government of the allied or associated power concerned shall within six months of the coming into force of the present treaty notify Austria that one or more of the said provisions are not to be applied.

15. The provisions of article 249 and this annex apply to industrial, literary and artistic property which has been or will be dealt with in the liquidation of property, rights, interests, companies or businesses under war legislation by the allied or associated powers, or in accordance with the stipulations of article 249, paragraph (b).

ection V.—Contracts, Prescriptions, Judgments.

Article 251.

(a) Any contract concluded between enemies shall be regarded as having been dissolved as from the time when any two of the parties became enemies, except in respect of any debt or other pecuniary obligation arising out of any act done or money paid thereunder and subject to the exceptions and special rules with regard to particular contracts or classes of contracts contained herein or in the annex hereto.

(b) Any contract of which the execution shall be required in the general interest, within six months from the date of the coming into force of the present treaty, by the government of the allied or associated power of which one of the parties is a national, shall be excepted from dissolution under this article.

When the execution of the contract thus kept alive would, owing to the alteration of trade conditions, cause one of the parties substantial prejudice the mixed arbitral tribunal provided for by section VI. shall be empowered to grant to the prejudiced party equitable compensation.

(c) Having regard to the provisions of the constitution and law of the United States of America, of Brazil, and of Japan, neither the present article, nor article 252, nor the annex hereto shall apply to contracts made between nationals of these states and nationals of the former Austrian empire; nor shall article 257 apply to the United States of America or its nationals.

(d) The present article and the annex hereto shall not apply to contracts the parties to which became enemies by reason of one of them being an inhabitant of territory of which the sovereignty has been transferred, if such party shall acquire under the present treaty the nationality of an allied or associated power, nor shall they apply to contracts between nationals of the allied and associated powers between whom trading has been prohibited by reason of one of the parties being in allied or associated territory in the occupation of the enemy.

(e) Nothing in the present article or the annex hereto shall be deemed to invalidate a transaction lawfully carried out in accordance with a contract between enemies if it has been carried out with the authority of one of the belligerent powers.

Article 252.

(a) All periods of prescription, or limitation of right of action, whether they began to

run before or after the outbreak of war, shall be treated in the territory of the high contracting parties, so far as regards relations between enemies, as having been suspended for the duration of the war. They shall begin to run again at earliest three months after the coming into force of the present treaty. This provision shall apply to the period prescribed for the presentation of interest or dividend coupons or for the presentation for repayment of securities drawn for repayment or repayable on any other ground.

(b) Where, on account of failure to perform any act or comply with any formality during the war, measures of execution have been taken in the territory of the former Austrian empire to the prejudice of a national of an allied or associated power, the claim of such national shall, if the matter does not fall within the competence of the courts of an allied or associated power, be heard by the mixed arbitral tribunal provided for by section VI.

(c) Upon the application of any interested person who is a national of an allied or associated power the mixed arbitral tribunal shall order the restoration of the rights which have been prejudiced by the measures of execution referred to in paragraph (b), wherever, having regard to the particular circumstances of the case, such restoration is equitable and possible.

If such restoration is inequitable or impossible the mixed arbitral tribunal may grant compensation to the prejudiced party to be paid by the Austrian government.

(d) Where a contract between enemies has been dissolved by reason either of failure on the part of either party to carry out its provisions or of the exercise of a right stipulated in the contract itself the party prejudiced may apply to the mixed arbitral tribunal for relief. The tribunal will have the powers provided for in paragraph (c).

(e) The provisions of the preceding paragraphs of this article shall apply to the nationals of allied and associated powers who have been prejudiced by reason of measures referred to above taken by the authorities of the former Austrian government in invaded or occupied territory, if they have not been otherwise compensated.

(f) Austria shall compensate any third party who may be prejudiced by any restitution or restoration ordered by the mixed arbitral tribunal under the provisions of the preceding paragraphs of this article.

(g) As regards negotiable instruments, the period of three months provided under paragraph (a) shall commence as from the date on which any exceptional regulations applied in the territories of the interested power with regard to negotiable instruments shall have definitely ceased to have force.

Article 253.

As between enemies no negotiable instrument made before the war shall be deemed to have become invalid by reason only of failure within the required time to present the instrument for acceptance or payment or to give notice of nonacceptance or nonpayment to drawers or indorsers or to protest the instrument, nor by reason of failure to complete any formality during the war.

Where the period within which a negotiable instrument should have been presented for acceptance or for payment, or within which notice of nonacceptance or nonpayment should have been given to the drawer or indorser, or within which the instrument should have been protested, has elapsed during the war, and the party who should have presented or protested the instrument or have given notice of nonacceptance or nonpayment has failed to do so during the war, a period of not less than three months from the coming into force of the present treaty shall be allowed within which presentation, notice of nonacceptance or nonpayment or protest may be made.

Article 254.

Judgments given by the courts of an allied or associated power in all cases which, under the present treaty, they are competent to decide, shall be recognized in Austria as final, and shall be enforced without its being necessary to have them declared executory.

If a judgment or measure of execution in respect of any dispute which may have arisen has been given during the war by a judicial authority of the former Austrian empire against a national of an allied or associated power, or a company or association in which one of such nationals was interested, in a case in which either such national or such company or association was not able to make their defense, the allied and associated national who has suffered prejudice thereby shall be entitled to recover compensation to be fixed by the mixed arbitral tribunal provided for in section VI.

At the instance of the national of the allied or associated power the compensation above mentioned may, upon order to that effect of the mixed arbitral tribunal, be effected where it is possible by replacing the parties in the situation which they occupied before the judgment was given by the Austrian court.

The above compensation may likewise be obtained before the mixed arbitral tribunal by the nationals of allied or associated powers who have suffered prejudice by judicial measures taken in invaded or occupied territories, if they have not been otherwise compensated.

Article 255.

For the purpose of sections III., IV., V. and VII., the expression "during the war" means for each allied or associated power the period between the commencement of the state of war between that power and the former Austro-Hungarian monarchy and the coming into force of the present treaty.

Annex I.—General Provisions.

1. Within the meaning of articles 251, 252 and 253 the parties to a contract shall be regarded as enemies when trading between them shall have been prohibited by or otherwise became unlawful under laws, orders or regulations to which one of those parties was subject. They shall be deemed to have become enemies from the date when such trading was prohibited or otherwise became unlawful.

2. The following classes of contracts are excepted from dissolution by article 251 and, without prejudice to the rights contained in article 249 (b) of section IV., remain in force subject to the application of domestic laws, orders or regulations made during the war by the allied and associated powers and subject to the terms of the contracts:

(a) Contracts having for their object the transfer of estates or of real or personal property where the property therein had passed or the object had been delivered before the parties became enemies;

(b) Leases and agreements for leases of land and houses;

(c) Contracts of mortgage, pledge, or lien;

(d) Concessions concerning mines, quarries or deposits;

(e) Contracts between individuals or companies and states, provinces, municipalities, or other similar juridical persons charged with administrative functions, and concessions granted by states, provinces, municipalities or other similar juridical persons charged with administrative functions.

3. If the provisions of a contract are in part dissolved under article 251, the remaining provisions of that contract shall, subject to the same application of domestic laws as is provided for in paragraph 2, continue in force if they are severable, but where they are not severable the contract shall be deemed to have been dissolved in its entirety.

II.—Provisions Relating to Certain Classes of Contracts. Stock Exchange and Commercial Exchange Contracts.

4. (a) Rules made during the war by any recognized exchange or commercial association providing for the closure of contracts entered

into before the war by an enemy are confirmed by the high contracting parties, as also any action taken thereunder, provided:

(i.) That the contract was expressed to be made subject to the rules of the exchange or association in question;

(ii.) That the rules applied to all persons concerned;

(iii.) That the conditions attaching to the closure were fair and reasonable.

(b) The preceding paragraph shall not apply to rules made during the occupation by exchanges or commercial associations in the districts occupied by the enemy.

(c) The closure of contracts relating to cotton "futures," which were closed as on July 31, 1914, under the decision of the Liverpool Cotton association is also confirmed.

Security.

5. The sale of a security held for an unpaid debt owing by an enemy shall be deemed to have been valid irrespective of notice to the owner if the creditor acted in good faith and with reasonable care and prudence and no claim by the debtor on the ground of such sale shall be admitted.

This stipulation shall not apply to any sale of securities effected by an enemy during the occupation in regions invaded or occupied by the enemy.

Negotiable Instruments.

6. As regards powers which adopt section III. and the annex thereto the pecuniary obligations existing between enemies and resulting from the issue of negotiable instruments shall be adjusted in conformity with the said annex by the instrumentality of the clearing offices, which shall assume the rights of the holder as regards the various remedies open to him.

7. If a person has either before or during the war become liable upon a negotiable instrument in accordance with an undertaking given to him by a person who has subsequently become an enemy, the latter shall remain liable to indemnify the former in respect of his liability notwithstanding the outbreak of war.

III.—Contracts of Insurance.

8. Contracts of insurance entered into by any person with another person who subsequently became an enemy will be dealt with in accordance with the following paragraphs:

Fire Insurance.

9. Contracts for the insurance of property against fire entered into by a person interested in such property with another person who subsequently became an enemy shall not be deemed to have been dissolved by the outbreak of war, or by the fact of the person becoming an enemy, or on account of the failure during the war and for a period of three months thereafter to perform his obligations under the contract, but they shall be dissolved at the date when the annual premium becomes payable for the first time after the expiration of a period of three months after the coming into force of the present treaty.

A settlement shall be effected of unpaid premiums which became due during the war or of claims for losses which occurred during the war.

10. Where by administrative or legislative action an insurance against fire effected before the war has been transferred during the war from the original to another insurer, the transfer will be recognized and the liability of the original insurer will be deemed to have ceased as from the date of the transfer. The original insurer will, however, be entitled to receive on demand full information as to the terms of the transfer, and if it should appear that these terms were not equitable they shall be amended so far as may be necessary to render them equitable.

Furthermore, the insured shall, subject to the concurrence of the orginal insurer, be entitled to transfer the contract to the original insurer as from the date of the demand.

Life Insurance.

11. Contracts of life insurance entered into between an insurer and a person who subsequently became an enemy shall not be deemed to have been dissolved by the outbreak of war or by the fact of the person becoming an enemy.

Any sum which during the war became due upon a contract deemed not to have been dissolved under the preceding provision shall be recoverable after the war with the addition of interest at 5 per cent per annum from the date of its becoming due up to the day of payment.

Where the contract has lapsed during the war owing to nonpayment of premiums or has become void from breach of the conditions of the contract, the assured or his representatives or the persons entitled shall have the right at any time within twelve months of the coming into force of the present treaty to claim from the insurer the surrender value of the policy at the date of its lapse or avoidance.

Where the contract has lapsed during the war owing to nonpayment of premiums the payment of which has been prevented by the enforcement of measures of war, the assured or his representative or the persons entitled shall have the right to restore the contract on payment of the premiums with interest at 5 per cent per annum within three months from the coming into force of the present treaty.

12. Where contracts of life insurance have been entered into by a local branch of an insurance company established in a country which subsequently became an enemy country, the contract shall, in the absence of any stipulation to the contrary in the contract itself, be governed by the local law, but the insurer shall be entitled to demand from the insured or his representatives the refund of sums paid on claims made or enforced under measures taken during the war, if the making or enforcement of such claims was not in accordance with the terms of the contract itself or was not consistent with the laws or treaties existing at the time when it was entered into.

13. In any case where by the law applicable to the contract the insurer remains bound by the contract notwithstanding the nonpayment of premiums until notice is given to the insured of the termination of the contract, he shall be entitled where the giving of such notice was prevented by the war, to recover the unpaid premiums with interest at 5 per cent per annum from the insured.

14. Insurance contracts shall be considered as contracts of life assurance for the purpose of paragraphs 11 to 13 when they depend on the probabilities of human life combined with the rate of interest for the calculation of the reciprocal engagements between the two parties.

Marine Insurance.

15. Contracts of marine insurance including time policies and voyage policies entered into between an insurer and a person who subsequently became an enemy shall be deemed to have been dissolved on his becoming an enemy, except in cases where the risk undertaken in the contract had attached before he became an enemy.

Where the risk had not attached, money paid by way of premium or otherwise shall be recoverable from the insurer.

Where the risk had attached effect shall be given to the contract notwithstanding the party becoming an enemy, and sums due under the contract either by way of premiums or in respect of losses shall be recoverable after the coming into force of the present treaty.

In the event of any agreement being come to for the payment of interest on sums due before the war to or by the nationals of states which have been at war and recovered after the war, such interest shall in the case of losses recoverable under contracts of marine

insurance run from the expiration of a period of one year from the date of the loss.

16. No contract of marine insurance with an insured person who subsequently became an enemy shall be deemed to cover losses due to belligerent action by the power of which the insurer was a national or by the allies or associates of such power.

17. Where it is shown that a person who had before the war entered into a contract of marine insurance with an insurer who subsequently became an enemy entered after the outbreak of war into a new contract covering the same risk with an insurer who was not an enemy, the new contract shall be deemed to be substituted for the original contract as from the date when it was entered into and the premiums payable shall be adjusted on the basis of the original insurer having remained liable on the contract only up till the time when the new contract was entered into.

Other Insurances.

18. Contracts of insurance entered into before the war between an insurer and a person who subsequently became an enemy, other than contracts dealt with in paragraphs 9 to 17, shall be treated in all respects on the same footing as contracts of fire insurance between the same persons would be dealt with under the said paragraphs.

Reinsurance.

19. All treaties of reinsurance with a person who became an enemy shall be regarded as having been abrogated by the person becoming an enemy, but without prejudice in the case of life or marine risks which had attached before the war to the right to recover payment after the war for sums due in respect of such risks.

Nevertheless, if, owing to invasion, it has been impossible for the reinsured to find another reinsurer, the treaty shall remain in force until three months after the coming into force of the present treaty.

Where a reinsurance treaty becomes void under this paragraph, there shall be an adjustment of accounts between the parties in respect both of premiums paid and payable and of liabilities for losses in respect of life or marine risks which had attached before the war. In the case of risks other than those mentioned in paragraphs 11 to 17 the adjustment of accounts shall be made as at the date of the parties becoming enemies without regard to claims for losses which may have occurred since that date.

20. The provisions of the preceding paragraph will extend equally to reinsurances, existing at the date of the parties becoming enemies, of particular risks undertaken by the insurer in a contract of insurance against any risks other than life or marine risks.

21. Reinsurance of life risks effected by particular contracts and not under any general treaty remain in force.

22. In case of a reinsurance effected before the war of a contract of marine insurance, the cession of a risk which had been ceded to the reinsurer shall, if it had attached before the outbreak of war, remain valid and effect be given to the contract notwithstanding the outbreak of war; sums due under the contract of reinsurance in respect either of premiums or of losses shall be recoverable after the war.

23. The provisions of paragraphs 16 and 17 and the last part of paragraph 15 shall apply to contracts for the reinsurance of marine risks.

Section VI.—Mixed Arbitral Tribunal.

Article 256.

(a) Within three months from the coming into force of the present treaty, a mixed arbitral tribunal shall be established between each of the allied and associated powers on the one hand and Austria on the other hand. Each such tribunal shall consist of three members. Each of the governments concerned shall appoint one of these members. The president shall be chosen by agreement between the two governments concerned.

In case of failure to reach agreement, the president of the tribunal and two other persons, either of whom may in case of need take his place, shall be chosen by the council of the league of nations, or, until this is set up, by M. Gustave Ador if he is willing. These persons shall be nationals of powers that have remained neutral during the war.

If in case there is a vacancy a government does not proceed within a period of one month to appoint as provided above a member of the tribunal, such member shall be chosen by the other government from the two persons mentioned above other than the president.

The decision of the majority of the members of the tribunal shall be the decision of the tribunal.

(b) The mixed arbitral tribunals established pursuant to paragraph (a) shall decide all questions within their competence under sections III., IV., V. and VII.

In addition, all questions, whatsoever their nature, relating to contracts concluded before the coming into force of the present treaty between nationals of the allied and associated powers and Austrian nationals shall be decided by the mixed arbitral tribunal, always excepting questions which, under the laws of the allied, associated or neutral powers, are within the jurisdiction of the national courts of those powers. Such questions shall be decided by the national courts in question, to the exclusion of the mixed arbitral tribunal. The party, who is a national of an allied or associated power may, nevertheless, bring the case before the mixed arbitral tribunal if this is not prohibited by the laws of his country.

(c) If the number of cases justifies it, additional members shall be appointed and each mixed arbitral tribunal shall sit in divisions. Each of these divisions will be constituted as above.

(d) Each mixed arbitral tribunal will settle its own procedure except in so far as it is provided in the following annex, and is empowered to award the sums to be paid by the loser in respect of the costs and expenses of the proceedings.

(e) Each government will pay the remuneration of the member of the mixed arbitral tribunal appointed by it and of any agent whom it may appoint to represent it before the tribunal. The remuneration of the president will be determined by special agreement between the governments concerned; and this remuneration and the joint expenses of each tribunal will be paid by the two governments in equal moieties.

(f) The high contracting parties agree that their courts and authorities shall render to the mixed arbitral tribunals direct all the assistance in their power, particularly as regards transmitting notices and collecting evidence.

(g) The high contracting parties agree to regard the decisions of the mixed arbitral tribunal as final and conclusive, and to render them binding upon their nationals.

Annex.

1. Should one of the members of the tribunal either die, retire or be unable for any reason whatever to discharge his functions, the same procedure will be followed for filling the vacancy as was followed for appointing him.

2. The tribunal may adopt such rules of procedure as shall be in accordance with justice and equity and decide the order and time at which each party must conclude its arguments, and may arrange all formalities required for dealing with the evidence.

3. The agent and counsel of the parties on each side are authorized to present orally and in writing to the tribunal arguments in support or in defense of each case.

4. The tribunal shall keep record of the questions and cases submitted and the proceedings hereon, with the dates of such proceedings.

5. Each of the powers concerned may appoint a secretary. These secretaries shall act together as joint secretaries of the tribunal and shall be subject to its direction. The tribunal may appoint and employ any other necessary officer or officers to assist in the performance of its duties.

6. The tribunal shall decide all questions and matters submitted upon such evidence and information as may be furnished by the parties concerned.

7. The high contracting parties agree to give the tribunal all facilities and information required by it for carrying out its investigations.

8. The language in which the proceedings shall be conducted shall, unless otherwise agreed, be English, French, Italian or Japanese, as may be determined by the allied or associated power concerned.

9. The place and time for the meetings of each tribunal shall be determined by the president of the tribunal.

Article 257.

Whenever a competent court has given or gives a decision in a case covered by sections II., IV., V. or VII., and such decision is inconsistent with the provisions of such sections, the party who is prejudiced by the decision shall be entitled to obtain redress which shall be fixed by the mixed arbitral tribunal. At the request of the national of an allied or associated power, the redress may, whenever possible, be effected by the mixed arbitral tribunal's directing the replacement of the parties in the position occupied by them before the judgment was given by the court of the former Austrian empire.

Section VII.—Industrial Property.

Article 258.

Subject to the stipulations of the present treaty, rights of industrial, literary and artistic property, as such property is defined by the international conventions of Paris and of Berne, mentioned in articles 237 and 239, shall be re-established or restored, as from the coming into force of the present treaty, in the territories of the high contracting parties, in favor of the persons entitled to the benefit of them at the moment when the state of war commenced, or their legal representatives. Equally, rights which, except for the war, would have been acquired during the war in consequence of an application made for the protection of industrial property, or the publication of a literary or artistic work, shall be recognized and established in favor of those persons who would have been entitled thereto, from the coming into force of the present treaty.

Nevertheless, all acts done by virtue of the special measures taken during the war under legislative, executive or administrative authority of any allied or associated power in regard to the rights of nationals of the former Austrian empire in industrial, literary or artistic property shall remain in force and shall continue to maintain their full effect.

No claim shall be made or action brought by Austria or Austrian nationals or by or on behalf of nationals of the former Austrian empire in respect of the use during the war by the government of any allied or associated power or by any persons acting on behalf or with the assent of such government of any rights in industrial, literary or artistic property, nor in respect of the sale, offering for sale or use of any products, articles or apparatus whatsoever to which such rights applied.

Unless the legislation of any one of the allied or associated powers in force at the moment of the signature of the present treaty otherwise directs, sums due or paid in respect of the property of persons referred to in article 249 (b) and in virtue of any act or operation resulting from the execution of the special measures mentioned in the second paragraph of this article shall be dealt with in the same way as other sums due to such persons are directed to be dealt with by the present treaty; and sums produced by any special measures taken by the government of the former Austrian empire in respect of rights in industrial, literary or artistic property belonging to the nationals of the allied or associated powers shall be considered and treated in the same way as other debts due from Austrian nationals.

Each of the allied and associated powers reserves to itself the right to impose such limitations, conditions or restrictions on rights of industrial, literary or artistic property (with the exception of trade-marks) acquired before or during the war, or which may be subsequently acquired in accordance with its legislation, by Austrian nationals, whether by granting licenses, or by the working, or by preserving control over their exploitation, or in any other way, as may be considered necessary for national defense, or in the public interest, or for assuring the fair treatment by Austria of the rights of industrial, literary and artistic property held in Austrian territory by its nationals, or for securing the due fulfilment of all obligations undertaken by Austria in the present treaty. As regards rights of industrial, literary and artistic property acquired after the coming into force of the present treaty, the right so reserved by the allied and associated powers shall only be exercised in cases where these limitations, conditions or restrictions may be considered necessary for national defense or in the public interest.

In the event of the application of the provisions of the preceding paragraph by any allied or associated power, there shall be paid reasonable indemnities or royalties, which shall be dealt with in the same way as other sums due to Austrian nationals are directed to be dealt with by the present treaty.

Each of the allied or associated powers reserves the right to treat as void and of no effect any transfer in whole or in part of or other dealing with rights of or in respect of industrial, literary, or artistic property effected after July 28, 1914, or in future which would have the result of defeating the objects of the provisions of this article.

The provisions of this article shall not apply to rights in industrial, literary or artistic property which have been dealt with in the liquidation of businesses or companies under war legislation by the allied or associated powers, or which may be so dealt with by virtue of article 249, paragraph (b).

Article 259.

A minimum of one year after the coming into force of the present treaty shall be accorded to the nationals of the high contracting parties, without extension fees or other penalty, in order to enable such persons to accomplish any act, fulfill any formality, pay any fees, and generally satisfy any obligation prescribed by the laws or regulations of the respective states relating to the obtaining, preserving, or opposing rights to, or in respect of, industrial property either acquired before July 28, 1914, or which, except for the war, might have been acquired since that date as a result of an application made before the war or during its continuance, but nothing in this article shall give any right to reopen interference proceedings in the United States of America where a final hearing has taken place.

All rights in, or in respect of, such property which may have lapsed by reason of any failure to accomplish any act, fulfill any formality, or make any payment, shall revive, but subject in the case of patents and designs to the imposition of such conditions as each allied or associated power may deem reasonably necessary for the protection of persons who have manufactured or made use of the subject matter of such property while the rights had lapsed. Further, where rights to patents or designs belonging to Austrian nationals are revived under this article, they shall be subject in respect of the grant of licenses to the

same provisions as would have been applicable to them during the war, as well as to all the provisions of the present treaty.

The period from July 28, 1914, until the coming into force of the present treaty shall be excluded in considering the time within which a patent should be worked or trade-mark or design used, and it is further agreed that no patent, registered trade-mark or design in force on July 28, 1914, shall be subject to revocation or cancellation by reason only of the failure to work such patent or use such trade-mark or design for two years after the coming into force of the present treaty.

Article 260.

The rights of priority provided by article IV. of the international convention for the protection of industrial property of Paris of March 20, 1883, revised at Washington in 1911, or by any other convention or statute, for the filing or registration of applications for patents or models of utility, and for the registration of trade-marks, designs and models which had not expired on July 28, 1914, and those which have arisen during the war, or would have arisen but for the war, shall be extended by each of the high contracting parties in favor of all nationals of the other high contracting parties for a period of six months after the coming into force of the present treaty.

Nevertheless, such extension shall in no way affect the right of any of the high contracting parties or of any person who before the coming into force of the present treaty was bona fide in possession of any rights of industrial property conflicting with rights applied for by another who claims rights of priority in respect of them, to exercise such rights by itself or himself personally, or by such agents or licensees as derived their rights from it or him before the coming into force of the present treaty; and such persons shall not be amenable to any action or other process of law in respect of infringement.

Article 261.

No action shall be brought and no claim made by nationals of the former Austrian empire, or by persons residing or carrying on business within the territory of that empire on the one part, and on the other part by persons residing or carrying on business in the territory of the allied or associated powers, or persons who are nationals of such powers respectively, or by any one deriving title during the war from such persons, by reason of any action which has taken place within the territory of the other party between the date of the existence of a state of war and that of the coming into force of the present treaty, which might constitute an infringement of the rights of industrial property or rights of literary and artistic property, either existing at any time during the war or revived under the provisions of articles 259 and 260.

Equally no action for infringement of industrial, literary or artistic property rights by such persons shall at any time be permissible in respect of the sale or offering for sale for a period of one year after the signature of the present treaty in the territories of the allied or associated powers on the one hand or Austria on the other, of products or articles manufactured, or of literary or artistic works published, during the period between the existence of a state of war and the signature of the present treaty, or against those who have acquired and continue to use them. It is understood, nevertheless, that this provision shall not apply when the possessor of the rights was domiciled or had an industrial or commercial establishment in the districts occupied by the Austro-Hungarian armies during the war.

This article shall not apply as between the United States of America on the one hand and Austria on the other.

Article 263.

Licenses in respect of industrial, literary or artistic property concluded before the war between nationals of the allied or associated powers or persons residing in their territory or carrying on business therein, on the one part, and nationals of the former Austrian empire, on the other part, shall be considered as canceled as from the date of the existence of a state of war between the former Austro-Hungarian monarchy and the allied or associated powers. But, in any case, the former beneficiary of a contract of this kind shall have the right, within a period of six months after the coming into force of the present treaty, to demand from the proprietor of the rights the grant of a new license, the conditions of which, in default of agreement between the parties, shall be fixed by the duly qualified tribunal in the country under whose legislation the rights had been acquired, except in the case of licenses held in respect of rights acquired under the law of the former Austrian empire. In such cases the conditions shall be fixed by the mixed arbitral tribunal referred to in section VI. of this part. The tribunal may, if necessary, fix also the amount which it may deem just should be paid by reason of the use of the rights during the war.

No license in respect of industrial, literary or artistic property granted under the special war legislation of any allied or associated power shall be affected by the continued existence of any license entered into before the war, but shall remain valid and of full effect, and a license so granted to the former beneficiary of a license entered into before the war shall be considered as substituted for such license.

Where sums have been paid during the war in respect of the rights of persons referred to in article 249 (b) and by virtue of a license or agreement concluded before the war in respect of rights of industrial property or for reproduction or the representation of literary, dramatic or artistic works, these sums shall be dealt with in the same manner as other debts or credits of such persons as provided by the present treaty.

This article shall not apply as between the United States of America on the one hand and Austria on the other.

Section VIII.—Special Provisions Relating to Transferred Territory.

Article 263.

Of the individuals and juridical persons previously nationals of the former Austrian empire, including Bosnia-Herzegovinians, those who acquire ipso facto under the present treaty the nationality of an allied or associated power are designated in the provisions which follow by the expression "nationals of the former Austrian empire"; the remainder are designated by the expresson "Austrian nationals."

Article 264.

The inhabitants of territories transferred by virtue of the present treaty shall, notwithstanding this transfer and the change of nationality consequent thereon, continue to enjoy in Austria all the rights in industrial, literary and artistic property to which they were entitled under the legislation in force at the time of the transfer.

Article 265.

The questions concerning the nationals of the former Austrian empire, as well as Austrian nationals, their rights, privileges and property, which are not dealt with in the present treaty, or in the treaty prepared for the purpose of regulating certain immediate relations between the states to which territory of the former Austro-Hungarian monarchy has been transferred, or arising from the dismemberment of that monarchy, shall form the subject of special conventions between the states concerned, including Austria; such conventions shall not in any way conflict with the provisions of the present treaty. For this purpose it is agreed that three months from the coming into force of the present treaty a conference of delegates of the states in question shall take place.

Article 266.

The Austrian government shall without delay restore to nationals of the former Austrian empire their property, rights and interests situated in Austrian territory.

The amount of taxes and imposts on capital which have been levied or increased on the property, rights and interests of nationals of the former Austrian empire since Nov. 3, 1918, or which shall be levied or increased until restitution in accordance with the provisions of the present treaty, or, in the case of property, rights and interests which have not been subjected to exceptional measures of war, until three months from the coming into force of the present treaty, shall be returned to the owners.

The property, rights and interests restored shall not be subject to any tax levied in respect of any other property or any other business owned by the same person after such property had been removed from Austria, or such business had ceased to be carried on therein. If taxes of any kind have been paid in anticipation in respect of property, rights and interests removed from Austria, the proportion of such taxes paid for any period subsequent to the removal of the property, rights and interests in question shall be returned to the owners.

Cash assets shall be paid in the currency and at the rate of exchange provided for the case of debts under articles 248 (d) and 271.

Legacies, donations and funds given or established in the former Austro-Hungarian monarchy for the benefit of nationals of the former Austrian empire shall be placed by Austria, so far as the funds in question are in her territory, at the disposition of the allied or associated power of which the persons in question are now nationals, in the condition in which these funds were on July 28, 1914, taking account of payments properly made for the purpose of the trust.

Article 267.

Notwithstanding the provisions of article 249 and the annex to section IV. the property, rights and interests of Austrian nationals or companies controlled by them situated in the territories which formed part of the former Austro-Hungarian monarchy shall not be subject to retention or liquidation in accordance with these provisions. Such property, rights and interests shall be restored to their owners freed from any measure of this kind, or from any other measure of transfer, compulsory administration or sequestration, taken since Nov. 3, 1918, until the coming into force of the present treaty, in the condition in which they were before the application of the measures in question.

The property, rights and interests here referred to do not include property which is the subject of article 208 of part IX. (Financial Clauses).

Nothing in this article shall affect the provisions laid down in part VIII. (Reparation), section I., annex III., as the property of Austrian nationals in ships and boats.

Article 268.

All contracts for the sale of goods for delivery by sea concluded before Jan. 1, 1917, between nationals of the former Austrian empire on the one part and the administrations of the former Austro-Hungarian monarchy, Austria, or Bosnia-Herzegovina, or Austrian nationals on the other part shall be annulled, except in respect of any debt or other pecuniary obligation arising out of any act done or money paid thereunder. All other contracts between such parties which were made before Nov. 1, 1918, and were in force at that date shall be maintained.

Article 269.

With regard to prescriptions, limitations and forfeitures in the transferred territories, the provisions of articles 252 and 253 shall be applied with substitution for the expression "outbreak of war" of the expression "date, which shall be fixed by administrative decision of each allied or associated power, at which relations between the parties became impossible in fact or in law," and for the expression "duration of the war" of the expression "period between the date above indicated and that of the coming into force of the present treaty."

Article 270.

Austria undertakes not to impede in any way the transfer of property, rights or interests belonging to a company incorporated in accordance with the laws of the former Austro-Hungarian monarchy, in which allied or associated nationals are interested, to a company incorporated in accordance with the laws of any other power, to facilitate all measures necessary for giving effect to such transfer, and to render any assistance which may be required for effecting the restoration to allied or associated nationals, or to companies in which they are interested, of their property, rights or interests whether in Austria or in transferred territory.

Article 271.

Section III., except article 248 (d), shall not apply to debts contracted between Austrian nationals and nationals of the former Austrian empire.

Subject to the special provisions laid down in article 248 (d) for the case of the new states, these debts shall be paid in the legal currency at the time of payment of the state of which the national of the former Austrian empire has become a national, and the rate of exchange applicable shall be the average rate quoted on the Geneva exchange during the two months preceding Nov. 1, 1918.

Article 272.

Insurance companies whose principal place of business was in territory which previously formed part of the former Austro-Hungarian monarchy shall have the right to carry on their business in Austrian territory for a period of ten years from the coming into force of the present treaty, without the rights which they previously enjoyed being affected in any way by the change of nationality.

During the above period the operations of such companies shall not be subjected by Austria to any higher tax or charge than shall be imposed on the operations of national companies. No measure in derogation of their rights of property shall be imposed upon them which is not equally applied to the property, rights or interests of Austrian insurance companies; adequate compensation shall be paid in the event of the application of any such measures.

These provisions shall only apply so long as Austrian insurance companies previously carrying on business in the transferred territories, even if their principal place of business was outside such territories, are reciprocally accorded a similar right to carry on their business therein.

After the period of ten years above referred to, the provisions of article 228 of this part of the present treaty shall apply in regard to the allied and associated companies in question.

Article 273.

Special agreements will determine the division of the property of associations or public corporations carrying on their functions in territory which is divided in consequence of the present treaty.

Article 274.

A special convention shall determine all questions relative to the records, registers and copies in connection with the protection of industrial, literary or artistic property, and fix their eventual transmission or communication by the offices of the former Austro-Hungarian monarchy to the offices of the states to which is transferred territory of the said monarchy and to the offices of new states.

States to which territory of the former Austro-Hungarian monarchy is transferred and states arising from the dismemberment of that monarchy shall recognize and give effect to rights of industrial, literary and artistic prop-

erty in force in the territory at the time when it passes to the state in question, or re-established or restored in accordance with the provisions of article 258. These rights shall remain in force in that territory for the same period as that for which they would have remained in force under the law of the former Austro-Hungarian monarchy.

Article 275.

Without prejudice to other provisions of the present treaty, the Austrian government undertakes, so far as it is concerned, to hand over to any power to which territory of the former Austro-Hungarian monarchy is transferred or which arises from the dismemberment of that monarchy such portion of the reserves accumulated by the governments or the administrations of the former Austro-Hungarian monarchy or by public or private organizations under their control, as is attributable to the carrying on of social or state insurance in such territory.

The powers to which these funds are handed over must apply them to the performance of the obligations arising from such insurances.

The conditions of the delivery will be determined by special conventions to be concluded between the Austrian government and the governments concerned.

In case these special conventions are not concluded in accordance with the above paragraph within three months after the coming into force of the present treaty, the conditions of transfer shall in each case be referred to a commission of five members, one of whom shall be appointed by the Austrian government, one by the other interested government and three by the governing body of the international labor office from the nationals of other states. This commission shall by majority vote within three months after appointment adopt recommendations for submission to the council of the league of nations, and the decisions of the council shall forthwith be accepted as final by Austria and the other government concerned.

PART XI.—AERIAL NAVIGATION.

Article 276.

The aircraft of the allied and associated powers shall have full liberty of passage and landing over and in the territory of Austria and shall enjoy the same privileges as Austrian aircraft, particularly in case of distress.

Article 277.

The aircraft of the allied and associated powers shall, while in transit to any foreign country whatever, enjoy the right of flying over the territory of Austria without landing, subject always to any regulations which may be made by Austria and which shall be applicable equally to the aircraft of Austria and to those of the allied and associated countries.

Article 278.

All aerodromes in Austria opened to national public traffic shall be open to the aircraft of the allied and associated powers, and in any such aerodromes such aircraft shall be treated on a footing of equality with Austrian aircraft as regards charges of every description, including charges for landing and accommodation.

Article 279.

Subject to the present provisions, the rights of passage, transit and landing provided for in articles 276, 277 and 278 are subject to the observance of such regulations as Austria may consider it necessary to enact, but such regulations shall be applied without distinction to Austrian aircraft and to those of the allied and associated countries.

Article 280.

Certificates of nationality, airworthiness or competency and licenses issued or recognized as valid by any of the allied or associated powers, shall be recognized in Austria as valid and as equivalent to the certificates and licenses issued by Austria.

Article 281.

As regards internal commercial air traffic, the aircraft of the allied and associated powers shall enjoy in Austria most favored nation treatment.

Article 282.

Austria undertakes to enforce the necessary measures to insure that all Austrian aircraft flying over her territory shall comply with the rules as to lights and signals, rules of the air and rules for air traffic on and in the neighborhood of aerodromes, which have been laid down in the convention relative to aerial navigation concluded between the allied and associated powers

Article 283.

The obligations imposed by the preceding provisions shall remain in force until Jan. 1, 1923, unless before that date Austria shall have been admitted into the league of nations or shall have been authorized by consent of the allied and associated powers to adhere to the convention relative to aerial navigation concluded between those powers.

PART XII.—PORTS, WATERWAYS AND RAILWAYS.

Section I.—General Provisions.

Article 284.

Austria undertakes to grant freedom of transit through her territories on the routes most convenient for international transit, either by rail, navigable waterway or canal, to persons, goods, vessels, carriages, wagons and mails coming from or going to the territories of any of the allied and associated powers, whether contiguous or not.

Such persons, goods, vessels, carriages, wagons and mails shall not be subjected to any transit duty or to any undue delays or restriction, and shall be entitled in Austria to national treatment as regards charges, facilities and all other matters.

Goods in transit shall be exempt from all customs or other similar duties.

All charges imposed on transport in transit shall be reasonable, having regard to the conditions of the traffic. No charge facility or restriction shall depend directly or indirectly on the ownership or on the nationality of the ship or other means of transport on which any part of the through journey has been or is to be accomplished.

Article 285.

Austria undertakes neither to impose nor to maintain any control over transmigration traffic through her territories beyond measures necessary to insure that passengers are bona fide in transit; nor to allow any shipping company or any other private body, corporation or person interested in the traffic to take any part whatever in, or to exercise any direct or indirect influence over, any administrative service that may be necessary for this purpose.

Article 286.

Austria undertakes to make no discrimination or preference, direct or indirect, in the duties, charges and prohibitions relating to importations into or exportations from her territories, or, subject to the special engagements contained in the present treaty, in the charges and conditions of transport of goods or persons entering or leaving her territories based on the frontier crossed; or on the kind, ownership or flag of the means of transport (including aircraft) employed; or on the original or immediate place of departure of the vessel, wagon or aircraft or other means of transport employed, or its ultimate or intermediate destination; or on the route of or places of transshipment on the journey; or on whether the goods are imported or exported directly through an Austrian port or indirectly through a foreign port; or on whether the goods are imported or exported by land or by air.

Austria particularly undertakes not to establish against the ports and vessels of any of

the allied and associated powers any surtax or any direct or indirect bounty for export or import by Austrian ports or ships, or by those of another power, for example by means of combined tariffs. She further undertakes that persons or goods passing through a port or using a vessel of any of the allied and associated powers shall not be subjected to any formality or delay whatever to which such persons or goods would not be subjected if they passed through an Austrian port or a port of any other power, or used an Austrian vessel or a vessel of any other power.

Article 287.

All necessary administrative and technical measures shall be taken to expedite, as much as possible, the transmission of goods across the Austrian frontiers and to insure their forwarding and transport from such frontiers, irrespective of whether such goods are coming from or going to the territories of the allied and associated powers or are in transit from or to those territories under the same material conditions in such matters as rapidity of carriage and care en route as are enjoyed by other goods of the same kind carried on Austrian territory under similar conditions of transport.

In particular, the transport of perishable goods shall be promptly and regularly carried out, and the customs formalities shall be effected in such a way as to allow the goods to be carried straight through by trains which make connection.

Article 288.

The seaports of the allied and associated powers are entitled to all favors and to all reduced tariffs granted on Austrian railways or navigable waterways for the benefit of any port of another power.

Article 289.

Austria may not refuse to participate in the tariffs or combinations of tariffs intended to secure for ports of any of the allied and associated powers advantages similar to those granted by Austria to the ports of any other power.

Section II.—Navigation.

Chapter I.—Freedom of Navigation.

Article 290.

The nationals of any of the allied and associated powers as well as their vessels and property shall enjoy in all Austrian ports and on the inland navigation routes of Austria the same treatment in all respects as Austrian nationals, vessels and property.

In particular the vessels of any one of the allied or associated powers shall be entitled to transport goods of any description, and passengers, to or from any ports or places in Austrian territory to which Austrian vessels may have access, under conditions which shall not be more onerous than those applied in the case of national vessels; they shall be treated on a footing of equality with national vessels as regards port and harbor facilities and charges of every description, including facilities for stationing, loading and unloading, and duties and charges of tonnage, harbor, pilotage, lighthouse, quarantine and all analogous duties and charges of whatsoever nature, levied in the name of or for the profit of the government, public functionaries, private individuals, corporations or establishments of any kind.

In the event of Austria granting a preferential regime to any of the allied or associated powers or to any other foreign power, this regime shall be extended immediately and unconditionally to all the allied and associated powers.

There shall be no impediment to the movement of persons or vessels other than those arising from prescriptions concerning customs, police, sanitation, emigration and immigration, and those relating to the import and export of prohibited goods. Such regulations must be reasonable and uniform and must not impede traffic unnecessarily.

Chapter II.—Clauses Relating to the Danube.

1. General Clauses Relating to River Systems Declared International.

Article 291.

The following river is declared international: The Danube from Ulm; together with all navigable parts of the river system which naturally provide more than one state with access to the sea, with or without transshipment from one vessel to another, as well as the portion of the course of the Morava (March) and the Thaya (Theiss) forming the frontier between Czecho-Slovakia and Austria, and lateral canals and channels constructed either to duplicate or to improve naturally navigable sections of the specified river system or to connect two naturally navigable sections of the same river.

The same shall apply to the Rhine-Danube navigable waterway, should such a waterway be constructed, under the conditions laid down in article 308.

Any part of the above mentioned river system which is not included in the general definition may be declared international by an agreement between the riparian states.

Article 292.

On the waterways declared to be international in the preceding article, the nationals, property and flags of all powers shall be treated on a footing of perfect equality, no distinction being made to the detriment of the nationals, property or flag of any power between them and the nationals, property or flag of the riparian state itself or of the most favored nation.

Article 293.

Austrian vessels shall not be entitled to carry passengers or goods by regular services between the ports of any allied or associated power, without special authority from such power.

Article 294.

Where such charges are not precluded by any existing convention, charges varying on different sections of a river may be levied on vessels using the navigable channels or their approaches, provided that they are intended solely to cover equitably the cost of maintaining in a navigable condition, or of improving, the river and its approaches, or to meet expenditure incurred in the interests of navigation. The schedule of such charges shall be calculated on the basis of such expenditure and shall be posted up in the ports. These charges shall be levied in such a manner as to render any detailed examination of cargoes unnecessary, except in cases of suspected fraud or contravention.

Article 295.

The transit of vessels, passengers and goods on these waterways shall be effected in accordance with the general conditions prescribed for transit in section I, above.

When the two banks of an international river are within the same state goods in transit may be placed under seal or in the custody of customs agents. When the river forms a frontier goods and passengers in transit shall be exempt from all customs formalities; the loading and unloading of goods, and the embarkation and disembarkation of passengers, shall only take place in the ports specified by the riparian state.

Article 296.

No dues of any kind other than those provided for in this part shall be levied along the course or at the mouth of these waterways.

This provision shall not prevent the fixing by the riparian states of customs, local octroi or consumption duties, or the creation of reasonable and uniform charges levied in the ports in accordance with public tariffs, for the use of cranes, elevators, quays, warehouses and other similar constructions.

Article 297.

In default of any special organization for carrying out the works connected with the upkeep and improvement of the international portion of a navigable system, each riparian state shall be bound to take the necessary measures to remove any obstacle or danger to navigation and to insure the maintenance of good conditions of navigation.

If a state neglects to comply with this obligation any riparian state or any state represented on the international commission may appeal to the tribunal instituted for this purpose by the league of nations.

Article 298.

The same procedure shall be followed in the case of a riparian state undertaking any works of a nature to impede navigation in the international section. The tribunal mentioned in the preceding article shall be entitled to enforce the suspension or suppression of such works, making due allowance in its decisions for all rights in connection with irrigation, water power, fisheries and other national interests, which, with the consent of all the riparian states or of all the states represented on the international commission, shall be given priority over the requirements of navigation.

Appeal to the tribunal of the league of nations does not require the suspension of the works.

Article 299.

The regime set out in articles 292 and 294 to 298 above shall be superseded by one to be laid down in a general convention drawn up by the allied and associated powers and approved by the league of nations, relating to the waterways recognized in such convention as having an international character. This convention shall apply in particular to the whole or part of the above mentioned river system of the Danube, and such other parts of that river system as may be covered by a general definition.

Austria undertakes, in accordance with the provisions of article 331, to adhere to the said general convention.

Article 300.

Austria shall cede to the allied and associated powers concerned, within a maximum period of three months from the date on which notification shall be given her, a proportion of the tugs and vessels remaining registered in the ports of the river system referred to in article 291 after the deduction of those surrendered by way of restitution or reparation. Austria shall in the same way cede material of all kinds necessary to the allied and associated powers concerned for the utilization of that river system.

The number of the tugs and boats, and the amount of the material so ceded, and their distribution, shall be determined by an arbitrator or arbitrators nominated by the United States of America, due regard being had to the legitimate needs of the parties concerned and particularly to the shipping traffic during the five years preceding the war.

All craft so ceded shall be provided with their fittings and gear, shall be in a good state of repair and in condition to carry goods and shall be selected from among those most recently built.

Wherever the cessions made under the present article involve a change of ownership, the arbitrator or arbitrators shall determine the rights of the former owners as they stood on Oct. 15, 1918, and the amount of the compensation to be paid to them, and shall also direct the manner in which such payment is to be effected in each case. If the arbitrator or arbitrators find that the whole or part of this sum will revert directly or indirectly to states from whom reparation is due, they shall decide the sum to be placed under this head to the credit of the said states.

As regards the Danube the arbitrator or arbitrators referred to in this article will also decide all questions as to the permanent allocation and the conditions thereof of the vessels whose ownership or nationality is in dispute between states. Pending final allocation the control of these vessels shall be vested in a commission consisting of representatives of the United States of America, the British empire, France and Italy, who will be empowered to make provisional arrangements for the working of these vessels in the general interest by any local organization, or failing such arrangements by themselves, without prejudice to the final allocation.

As far as possible these provisional arrangements will be on a commercial basis, the net receipts by the commission for the hire of these vessels being disposed of as directed by the reparation commission.

2. *Special Clauses Relating to the Danube.*

Article 301.

The European commission of the Danube reassumes the powers it possessed before the war. Nevertheless, as a provisional measure, only representatives of Great Britain, France, Italy and Roumania shall constitute this commission.

Article 302.

From the point where the competence of the European commission ceases, the Danube system referred to in article 291 shall be placed under the administration of an international commission composed as follows:

Two representatives of German riparian states:

One representative of each other riparian state:

One representative of each nonriparian state represented in the future on the European commission of the Danube.

If certain of these representatives cannot be appointed at the time of the coming into force of the present treaty, the decisions of the commission shall nevertheless be valid.

Article 303.

The international commission provided for in the preceding article shall meet as soon as possible after the coming into force of the present treaty, and shall undertake provisionally the administration of the river in conformity with the provisions of article 292 and 294 to 298 until such time as a definitive statute regarding the Danube is concluded by the powers nominated by the allied and associated powers.

The decisions of this international commission shall be taken by a majority vote. The salaries of the commissioners shall be fixed and paid by their respective countries.

As a provisional measure any deficit in the administrative expense of this international commission shall be borne equally by the states represented on the commission.

In particular this commission shall regulate the licensing of pilots, charges for pilotage and the administration of the pilot service.

Article 304.

Austria agrees to accept the regime which shall be laid down for the Danube by a conference of the powers nominated by the allied and associated powers, which shall meet within one year after the coming into force of the present treaty, and at which Austrian representatives may be present.

Article 305.

The mandate given by article 57 of the treaty of Berlin of July 13, 1878, to Austria-Hungary, and transferred by her to Hungary, to carry out works at the Iron Gates is abrogated. The commission intrusted with the administration of this part of the river shall lay down provisions for the settlement of accounts subject to the financial provisions of the present treaty. Charges which may be necessary shall in no case be levied by Hungary.

Article 306.

Should the Czecho-Slovak state, the Serb-Croat-Slovene state, or Roumania, with the

authorization of or under mandate from the international commission, undertake maintenance improvement, weir or other works on a part of the river system which forms a frontier, these states shall enjoy on the opposite bank, and also on the part of the bed which is outside their territory, all necessary facilities for the survey, execution and maintenance of such works.

Article 307.
